**While Ye Have Light. Brave, Pious Patrick. Making Steel With Gas. Big Bootleg Bribes.**

**—By ARTHUR BRISBANE—**

(Copyright, 1928.)

NEWTON, KAN., March 17.

AS THIS is written on the way through Kansas, two cars are visible up to their hubs in mud, on the road beside the Santa Fe track. There should be a national well-paved highway one hundred feet wide running from ocean to ocean in place of this long mudhole.

SENATOR CAPPER'S able *Topeka Daily Capital* carries this appropriate text on today's editorial page: "Walk while ye have the light, lest darkness come upon you. John 12-35."

DEAD nearly fifteen hundred years, St. Patrick was remembered and honored all over the world on his birthday today. He is remembered because he was pious and brave. He defied the pagan Irish king, in his raw bull's hide, on the Hill of Tara, and when told that only the king could light a big bonfire on a certain night, St. Patrick lighted his to show that Christianity was more important than kings.

ONCE, standing at Ireland's western extremity, Patrick spoke of that place as "the land beyond which no man is."

He would be surprised to know how many good Irishmen are beyond that point now, here in America.

BONFILS in his *Denver Post* says the Colorado Fuel and Iron Company will make steel with natural gas. They will also use gas from coke ovens since coke is needed in the blast furnaces.

WHY not change natural gas at the well into electric power, manufacture steel by the electric process, do away with coke, make better, cheaper, almost rust proof steel? That should interest Mr. Rockefeller who controls Colorado Fuel and Iron. Mr. Wills who helped Henry Ford to develop wonderfully strong steel alloys could tell how to do it.

PROHIBITION inspectors indicted in Detroit for taking bribes from rum runners are said by the district attorney to have received $200,000 in the first six months of 1927.

Bootleg liquor must flow in freely, for the inspectors got only $1 a case for whisky, 25 cents a case for beer.

Under prohibition customs inspectors can get a hundred thousand dollars a year each, in bribes, if willing to take them.

THE Pullman porter who said, "Not all gentlemen steal soap from Pullman cars, but everybody has his price," would doubt the possibility of finding enough honest inspectors.

VICTOR BERGER, only Socialist in Congress and a sincere advocate of obedience to law, sometimes says things that need to be said.

When congressmen of both big parties had worn themselves out urging reduction of big individual and corporation income taxes, Victor Berger said, "I want to say a few words for men and women who do not earn enough to pay any income tax.

"They are the people without whose toil and effort the income tax payers could not exist for a single day. They are the people without whom civilization could not exist for a single day."

HOW rarely anything is said in Congress about individuals that don't pay an income tax. Yet they number more than 115,000,000.

Congressmen don't agree with Berger, but listen to him, laugh at his good points and applaud him. THEY KNOW HE IS HONEST.

A THOUSAND more marines are sent to Nicaragua, three thousand five hundred of our "Devil Dog" fighters will watch the polls at Nicaragua's election.

Nicaragua might ask, "Why don't you use a few of them in your big city elections?"

THOSE in whom a fondness for killing things survives will yearn as they read that farmers near Ellinwood, Kan., along the marshes are patroling their cornfields, firing blank shells to keep away thousands of wild ducks.

**LOOK AT THIS SELECTION!**

NEW STEEL building, 60x120, Pennsylvania siding, additional ground if desired term lease. See classification 32.

CHICKEN FARM, 10 acres; coop for 500 chickens; fruits of all kinds; house of 6 rooms, barn, garage. Price $5700, one-third cash. See classification 46.

BLACK Cocker Spaniel Puppies, males $35; females $25. Champion strain. See classification 64.

CHEVROLET Sedan, in fine shape, 6 tires, all good; $65 for quick sale. Over three pages of good used cars advertised today.

BUFFET, extension table, 6 chairs; very reasonable. See classification 72.

A BEAUTIFUL Spanish home, Mission Hills, Mt. Lebanon, wonderful view from every side, center hall, built and occupied by owner 6 months. An exceptional home at $35,500. Look for it under classification 58.

INFORMATION is wanted as to the present whereabouts of Frances Armenia Joseph Michael, Martha Mallsis, children of Columbus Smith. See classification 60.

***For hundreds of other bargains see Today's Sun-Tele Classified Ads.***

## *Rammed S-4, With 8 of Crew Floated*

## SUBMARINE ON WHICH 40 NAVY MEN DIED RAISED

**Undersea Boat Chained to Naval Tugs as Procession To Navy Yard Begins.**

**Ill-fated Ship Raised Three Months After Sinking at Cape Cod.**

PROVINCETOWN, Mass., March 17.—The submarine S-4 floated to the surface at 3:23 p. m. today.

This was three months almost to the minute from the time she was rammed to the bottom off Cape Cod by the coast guard destroyer Paulding. The time and date of the sinking of the S-4 was 3:37 p. m., December 17, 1927.

The stern pontoons of the S-4 appeared above the surface at 2:58 p. m. Just below the top of the ocean lay the submarine at a slight angle. Four lines were attached to the naval tugs Wandank and Sagamore, the other end of the line being fast to the S-4. The submarine finally was above the water at 3:23.

**DRIPS WITH SLIME**

The submersible, dripping with slime, and carrying inside the bodies of eight of the 40 men who died in the sea disaster, was chained to naval tugs.

Flags on the eight naval salvage ships flew at half mast as the grim procession started for the Charlestown Navy Yard at Boston.

The towing of the raised craft along the shore line to Boston Navy Yard will be complete about noon Sunday.

At the Navy yard the ship will be opened.

The weather was holding good and the work of pumping out the water from the pontoon chambers and pumping in the air went forward with clock like regularity.

Within a few hours after the pumping of air began the S-4 came to the surface with a great gurgle of water.

The pumping of 10,000 feet of compressed air into the airtight chambers was done from the U. S. S. Falcon and submarine S-6.

The men whose bodies still remain in the forward torpedo compartment were: Lieut. Graham N. Fitch, of Washington; R. I. Short, of Boonville, Mo.; R. A. Crabb, of Fall River, Mass., and Sandiego, Cal.; George Pelnar, of South Omaha, Neb.; Frank Snizek, of Ridgefield Park, N. J., and J. L. Stephen, of Providence, R. I.

## *'Love Bomber' Denied New Trial; Sentenced*

OTTAWA, Ill., March 17.—Hiram Reed, convicted "love bomber" of the Pleasant Valley School here, this afternoon was sentenced to serve from one to 20 years in the penitentiary for placing a dynamite bomb in the school stove. A new trial was denied.

Sentence was imposed by Judge Frank Hayes a few hours after Miss Iola Bradford, his former sweetheart and school teacher injured by the blast, filed suit against him for $25,000 damages. Reed was held in bond of $5,000. He announced he would appeal to the State Supreme Court.

## WEDS 'OTHER WOMAN' IN SHOOTING

### Shot By One, Marries Other

Photo by Sun-Tele Staff Photographer.

**WED**—Lying in South Side Hospital, paralyzed by a bullet in his neck, Sam Lagattuto, 38, was married to Miss Pauline Costanzo, 18, 1318 Clark street, by an alderman. Pauline and her three-weeks-old baby are pictured above shortly after the ceremony last night.

**SHOT**—Rose Scarfo, 35, with whom Sam has lived at 538 Becks Run road for 11 years, fired five revolver shots, only one of which took effect, when he came home after a three-day absence. It was Rose who thus sent him to the hospital. Police are holding her now.

### Senators Dodge Lindbergh's Bid; Only One to Fly

Associated Press.

WASHINGTON, March 17.

UNITED STATES SENATORS apparently prefer to stay on the ground.

To date only one acceptance of the invitation of Col. Charles A. Lindbergh to fly with him either March 21 or 22 has been filed with the Secretary of the Senate, that of Senator Frazier, North Dakota, Republican, who also has requested that his two sons be permitted to make the flight.

Senator Ashurst, Democrat, Arizona, was the first to accept the bid, but he has ordered his name scratched, with the statement that he will be away from the Capital on both the dates.

## 300 PERILED IN HOSPITAL FIRE

International News Service.

ALBANY, N. Y., March 17.—Fire which followed an explosion in the X-ray room at the Memorial Hospital late today threatened the lives of 300 patients before it was finally brought under control.

Carried from the smoke-filled institution, the patients were rushed to the city's two other hospitals.

No one was killed.

Ruth Allen, a nurse, who jumped from a fourth-story window was believed to have been seriously injured.

For a time it was feared the hospital would be completely destroyed.

Firemen carried scores of bedridden patients down ladders to safety as the acid-smoke from the X-ray room spread through the hospital's five floors.

Mrs. B. R. Hoag, of Ravena, who gave birth to a son yesterday, dragged herself to a fourth floor window and jumped into a life net held by firemen. She was rushed to the Albany Hospital in an unconscious condition. Her baby was saved by firemen.

## *Sister of Dempsey's Wife Is Injured*

LOS ANGELES, March 17.—(INS.)—The condition of Helen Taylor, sister of Estelle Taylor (Mrs. Jack Dempsey), became so serious today that Jack Dempsey was reported to have canceled his plans to attend the Coffroth handicap at the Tijuana race track tomorrow.

Miss Taylor and her husband, R. P. White, were injured last night by a terrific explosion which wrecked their home in Hollywood. The cause of the explosion has not been determined by the police.

## *Senator Ferris, of Michigan, Is Ill*

WASHINGTON, March 17.—(AP.)—The condition of Senator Woodbridge N. Ferris of Michigan, confined to his hotel apartment with an ailment that started with a severe cold, was said to be bad last night.

## *Sinclair Lewis' Wife Seeks Reno Divorce*

RENO, Nev., March 17.—Mrs. Sinclair Lewis, wife of the novelist, admitted today that she is in Reno to divorce her famous author husband. She has been residing here quietly for the last six weeks and today, she said she planned to file her suit for divorce in mid-April but declined to discuss her divorce plans.

## VICTIM LYING IN HOSPITAL MARRIES GIRL

**Woman Who Shot Him Admits Deed—Fired When She Found Out 'Triangle.'**

**Man Near Death—Ceremony Performed at Bedside. Change Child's Name.**

Sam Lagattuto, 38, male member of the latest so-called love triangle, lay on his bed in the South Side Hospital Saturday night and with two words—"I do"—renounced that trinity. He married "the other woman."

It was Rose Scarfo, 35, who had lived with Sam at Becks Run road, who shot him late Friday when she learned that he had been sharing his love with another.

It was pretty Pauline Costanzo, 18, of 1318 Clark street, whom Sam married beside the bed on which he is near death from the bullet wound Rose Scarfo inflicted. Rose had shot five times, she admitted in Morals Court, and missed four.

Pauline has a plump baby three weeks old. "His name was Lawrence," she said, "after his grandpop, but I'll change it to Sam."

## HENDERSHOT, HOME, HIDES

His recovery almost as swift as the mysterious malady supposed to have dragged him almost to death's door a few days ago in Washington, D. C., Lester Hendershot, inventor of the "fuelless" motor, shut himself up in his West Elizabeth home Saturday and refused to see newspapermen. Barr Feat, promoter of Bettis Field, and this particular inventor, was equally terse in an interview.

"I'm not talking," Mr. Feat declared when seen in his office at Bettis Field.

"What about Hendershot's illness? Has he recovered from the effects of the electrical shock?" he was asked.

"He's getting along all right," Mr. Feat said.

"Well, how did he get shocked?"

"We won't discuss that, and I'm not saying anything more," Mr. Feat replied.

## *One Dead, 15 Hurt In Florida Tornado*

ORLANDO, Fla., March 17.—(AP.)—Mrs. Maggie Brackwell was killed and 15 persons injured when a tornado, cutting a path 300 feet wide, struck the town of Sorrento, near here, this afternoon. Seven houses were demolished.

Sorrento is approximately 25 miles from Orlando.

## 'RADIO' PLANE COMING TODAY

International News Service.

WASHINGTON, March 17.—The New York American-Toledo Leader radio plane, which is flying 10,000 miles and visiting 45 cities, including Pittsburgh, completed the first leg of its nation-wide journey late today, landing at Bolling Field late this afternoon, after hopping from New York, with stops at Philadelphia and Bristol, Pa. The plane is due at Bettis Field, McKeesport, early Sunday afternoon.

The ship is demonstrating the value of radio in connection with aeronautics. It was piloted by Lieut. George W. Hopkins, and carried four passengers, representing the New York American, the Toledo Safety Council and the Radio Corporation of America.

About the first thing attended to aboard the ship was the filing of messages to a group of prominent men, calling their attention to the fact that this was the first time in the history of commercial aviation that such radio-grams ever had been sent from a moving airplane.

Included in the list were President Coolidge, Gov. Al Smith, Mayor Walker, William Randolph Hearst and the managing editors of New York papers.

The recently-perfected combined radio telephone and telegraph set installed in the ship by the Radio Corporation of America worked perfectly from a height of 4,000 feet. Radio Engineer W. A. Fisk conversed with operators at the Anacostia Naval Radio Station.

## *Death Calls Captain of Old 'Island Queen'*

CINCINNATI, March 17.—(AP.)—Capt. James Milton Dupuy, 79, one of the last survivors of the early river shipping captains, died here today. For 25 years Dupuy, whose experience dated back to Civil War days, was captain of the old excursion steamer "Island Queen." He retired about five years ago, shortly before the boat burned. Capt. Dupuy once was a familiar figure on the Ohio and Mississippi rivers from Pittsburgh to New Orleans.

## *Tear Gas Exploded In Duquesne Garden*

Tear shed tears at the hockey game in Duquesne Garden Saturday night.

Somebody dropped a tear-gas bomb, accidentally or otherwise. The somebody was arrested.

## G.O.P. AIMS TO BLOCK CASES TILL PRIMARY, CHIEFS ADMIT

**Agreement With Marshall Postponing Cases Until April Works in With Plans.**

**Few Can Be Heard Before Spring Election — Many Likely to Go Until Fall.**

The first aim of the Republican organization in seeking to delay the prosecution of election frauds at the September primary of last year has been achieved, Republican leaders admit. The faithful who pull the levers that make the organization machinery go have earnestly sought to postpone the work and publicity of election trials until after the primary, April 24. This would help a lot, although contests have been reduced to a minimum.

The appointment of Attorney Rody P. Marshall, admittedly employed by the Republican leaders, as the sole counsel for nearly 200 indicted election officials, accomplished this initial aim. His engagement during the last two weeks prevented any trials and his occupation otherwise has delayed trials for the next month. Under his agreement to undertake trials of the cases continuously commencing April 16, but one week of trials may occur before the primary.

**SEE LONG WAIT**

Regardless of predictions to the contrary, sound opinion in Criminal Court circles leans to the belief that a majority of the 39 election boards awaiting trial must of necessity be put over until next fall or winter. Few close to the situation believe that 20 boards will be tried before the summer recess.

This belief is based to some extent on the expectation that no pleas will be entered.

"Have you any offers of pleas in the election cases?" District Attorney Samuel H. Gardner was asked Saturday.

"None," he replied.

**PLEAS WITHDRAWN**

It is known that pleas had been offered previously and withdrawn. This happened before all indicted election officials were directed to turn their defense over to a single counsel and dismiss counsel previously engaged. This showed the highly organized manner in which the Republican leaders operated. One attorney representing three boards, comprising 15 indicted officials, offered to enter pleas for all his clients and a day was fixed for the disposal of the cases in court. Another attorney proceeded similarly for an additional board. Members of several other election boards had volunteered pleas. All these were withdrawn. Their change to Attorney Marshall indicates the pressure employed by the organization, for it was known that several prominent Republican leaders had objected to the common defense and the raising of a fund to finance it.

Meanwhile, reports are heard that the raising of the defense fund is proceeding with hardly a hitch. Several ward leaders have privately admitted that they have made the contribution ordered by the leaders. Political satellites confirm that the original estimate of a fund of $40,000 will be reached and that the collection probably will reach $50,000. A few complaints are reported from "racketeers" ordered to make up the ward contributions, but it is said that most are going along with the program.

## Chief Two Eagles Fired, Indeed; But Lo! Here's Second

Memo to City Editor:

Upon reporting Saturday, a few minutes before 8 o'clock, as instructed by you when you gave me an assignment, I was asked by your assistant if I spoke Cherokee. Never having considered that language an essential part of the education of a future Arthur Brisbane, I was forced to admit my unfamiliarity with same. In spite of that, your assistant instructed me to proceed immediately to South Park for the purpose of interviewing Chief Two Eagles, who, he informed me, was a full-blooded Cherokee Indian in charge of the buffalo, moose, wild horses and other game there.

My efforts to locate the park need not be told in this memo, as the entire trip is itemized, per instructions, on the accompanying expense account. When I finally reached South Park, I was shocked to learn that Chief Two Eagles, accompanied by his wife, whose name, I was told, is Princess Koya, and four papooses, had departed for parts unknown. I also was told that any effort to trail the Indian band would be at my own risk, the county of Allegheny assuming no responsibility, as only a few days ago Two Eagles had gone on the war path, chasing an employe of the county, one

(Continued on Next Page, Col. Six.)

## *Coal Man's Wife Killed on Way Here*

CRESSON, Pa., March 17.—(AP.)—Mrs. John Barton, wife of a prominent coal operator of Hopewell, Bedford county, was instantly killed and two of her daughters and a son were probably fatally hurt tonight when an automobile in which they were driving to Pittsburgh skidded on the William Penn highway, near here, and crashed into a telephone pole.

## *Mother of 6 Freed In Husband's Death*

UNIONTOWN, Pa., March 17.—Mrs. Mary Barish, 39, mother of six children, of Newton, was exonerated by a coroner's jury today for the death of her husband, whom she pushed down a flight of steps onto a concrete pavement. Mrs. Barish testified her husband, after spending household money for liquor, arrived home drunk and threatened her.

## Now Fish, Too, May Enjoy Day of Rest

There's considerable elation in piscatorial circles of the commonwe lth.

The fish finally have found a friend.

And he's no other than that ardent angler, Judge P. J. Fuller, who, sitting in Quarter Sessions Court of Luzerne county, affirmed a summary conviction for Sunday fishing in the case of the Commonwealth vs. Gushinski.

Hereafter the fish can feel free to go and come at will on the Sabbath secure of their legal status. Paeans are being sung by the perch and catfish and a movement is afoot, or a-fin, among the water denizens to vote an appreciatory resolution to the judge.

The game laws definitely state that "one who takes out of the water a fishing d-vice, as a net, though he does it on Sunday and may have put the device in place on another day, is guilty of transgr ing the Sunday fishing statute."

The game laws further state "where defendant has not so testified, there would be no presumption that he had withdrawn a net actuated by merciful intention to free the fish from imprisonment, and particularly where not shown that the fish were discontented or suffering from the confinement."

In Judge Fuller's opinion he goes deeply into the little fishes' personal regards.

"On Sunday . . . the defendant, he opines, "was caught red-handed

(Continued on Next Page, Col. Seven.)

## RAP AGE LIMIT FOR CITY FORCES

A vigorous protest against reducing the maximum age of applicants for positions on the police and fire forces from 35 to 32 years was received by Council yesterday from the Allegheny County Council, Veterans of Foreign Wars.

Pointing out that the present average age of the men who served in France is 35, the letter said the reduction would prevent the city from obtaining the services of veterans whose Army experience would make them valuable members of either force. The maximum age of enlistment in the Army, Navy and Marine Corps is 35, the letter stated. It was signed by C. E. Dailey, commander.

## BREAKS PLANE LOOP RECORD

International News Service.

ST. PAUL, Minn., March 17.—Charles W. (Speed) Holman, 25-year-old Twin City air mail pilot established a new world record for consecutive looping the loop in his Laird plane here today by turning his machine over for 1,433 loops in 5¼ hours.

The old figure was 1,111 loops, established in France by A. Fronval.

It was the second time in recent weeks that Holman had bettered the record. Gene Shank, of St. Paul, set a mark of more than 500, which was beaten by Holman with 1,093 twirls. Then came the 1,111 loops by Fronval, which Holman surpassed today.

## Lindy Declared 'Fit" But Feet Are Flat

MITCHEL FIELD, N. Y., March 17.—(AP.)—Flat feet was the only defect found when Col. Charles A. Lindbergh took the rigorous "609" today, the physical examination every service flyer must pass twice a year. He was declared as near the hypothetical normal as any flyer in the air corps.

The examination was conducted by Maj. I. B. Marsh and P. D. Moulton and lasted two hours. When it was over Maj. Marsh complimented the aviator on his physical condition and Col. Lindbergh replied:

"A lot of newspapers will be disappointed about that."

During his long flights since he flew the Atlantic Col. Lindbergh has frequently denied newspaper stories that he was on the verge of a nervous breakdown.

The flier answered most of the questions in the course of the examination with a brief yes or no, but he qualified his answer to the question whether he used liquor or tobacco.

"No," he answered, and then as though on second thought: "Not that I don't approve, but I just don't like the taste."

In announcing that Col. Lindbergh had been found to have flat feet, Maj. Marsh said that "this went with his build." Though otherwise in perfect physical condition, Maj. Marsh said Col. Lindbergh was unquestionably underweight, being 6 feet 2 inches tall and weighing only 159 pounds.

# Call Senate's Rejection of Esch Slap at Coolidge

## Countries of World Represented in Salon of Photographic Art

**POUF!**—That is the title of this photograph by Nicholas Haz, of New York, which is one of the 340 prints on exhibition in the fifteenth annual Pittsburgh Salon of Photographic Art in the Carnegie Institute.

**A RURAL STUDY**—"Pastorale Arabe" is the title of the picture study submitted by Joseph Petrocelli, also of New York. The salon is conducted under the auspices of the Academy of Science and Art of Pittsburgh and contains photographs representing 15 different countries.

**SOUTH WIND**—Victor Overman, of Omaha, Neb., is responsible for this. Pittsburgh also is represented in the salon by a number of persons, including George H. Morse, who has four prints on display.

**A PORTRAIT**—Leon De Vos, of Astoria, L. I., submitted this to the salon, which opened yesterday and will continue through April 15. This print, known as "Norma Marianna," is but one of the many interesting portraits shown.

## LOSS OF POST ON I. C. C. HELD BLOW AT PA.

**State's Champion in Coal Freight Rate Fight Ousted After Reappointment.**

International News Service.

WASHINGTON, March 17.—The Senate had administered another slap at President Coolidge today by rejecting, 35 to 29, his reappointment of John J. Esch, of Wisconsin, to the Interstate Commerce Commission.

Esch's defeat was en[illegible] by a group of Senators [illegible]ing southern coal fields. Th[illegible]ed him because of his vote [illegible]ke cargo case which gave [illegible] and [illegible] a preferen[illegible]ht [illegible] to the [illegible]

"The [illegible] tice [illegible] that he cannot [illegible] commission a man w[illegible] override the interests of We[illegible] Virginia, Kentucky, Virginia and other southern coal fields," said Senator Neely (D.), of West Virginia, leader of the opposition.

**BLOW AT PENNSYLVANIA**

Senator Reed (R.), of Pennsylvania, an Esch supporter, declared: "The Senate bewails the conditions in the Pennsylvania coal camps and then punishes Esch for trying to remedy them. The opposition was based solely on the lake cargo coal case. It is plain notice to the commission that any man who dares to vote in favor of Pennsylvania and Ohio will be lynched when he is renominated."

President Coolidge has had considerable trouble with his Interstate Commerce Commission appointments. Only last year the Senate rejected Cyrus E. Woods, of Pennsylvania.

Senators Glass, of Virginia, and Reed, of Missouri, Democrats, aided Neely in the battle against confirmation, both attacking Esch's action in the lake cargo case.

**FESS DEFENDS ESCH**

In a minority report from the Interstate Commerce Committee, Senator Fess declared that from the standpoint of ability and experience, Esch was "eminently fitted for the position and from the basis of honesty and integrity he is equal to the best in public life."

The minority report called attention that between his two votes, Esch, like all other members of the commission, had the benefit of "extended further hearings, a mass of further evidence which embraced some 2,000 pages, and two days of oral argument before the full commission."

Esch, who had been serving under a recess appointment since his first term expired three months ago, is co-author of the Esch-Cummins railroad act. Before going on the commission he served 22 years as a member of the House and 18 years on its Interstate and Foreign Commerce Committee.

Born near Norwalk, Wis., March 20, 1861, his first appointment to the commission also was contested, but he won out easily, 52 to 3, in April, 1921. "Fighting Bob" La Follette, of the same state, who led the opposition then, contended Esch had been "consistently friendly to the railroads."

## Philadelphia Goal of Ill-Fated Endeavour

International News Service.

NEW YORK, March 17.—Capt. Walter Hinchliffe, with the Hon. Elsie Mackay, planned to hop from England to Philadelphia in their ill-fated trans-Atlantic venture, it became known today.

In a letter dated January 14 to John Gillespie, his American representative, Capt. Hinchliffe said that because of the coming competition for the $25,000 Evening Bulletin prize, he was eager to hurry the attempted hop.

He asked Gillespie to remain quiet about the projected hop and to guard carefully the identity of his associate.

The letter follows in part:

**PLANNED EARLY HOP**

"Having heard of such a number of other competitors, we intend starting as early as possible, perhaps even the beginning of March, should atmospheric conditions permit.

"On March 5, and thereabouts, the moon will be full, a great asset, and I would greatly like to make the attempt then.

"Failing this, it would be the beginning of April. At any rate, we wish to start as soon as reasonably possible.

"Once more, please try to keep this flight quiet. Should anyone accidentally learn of the identity of my associates please do your utmost to suppress it. Discovery of the identity of one of them would definitely prevent that person from being able to come."

After the notation, "Starting Point," he had Baldonnell Aerodrome, Dublin, Ireland.

**LISTED ROUTE**

He listed his route, "Dublin, St. Johns (Newfoundland), and then more or less along the coast via Boston, New York or Philadelphia."

Another sub-division of the letter was headed "safety."

"Every detail is receiving the greatest attention. In order to give the matter my whole time, I have resigned my position from the Imperial Airways, Limited, with which company, as you know, I was chief pilot.

"The position of every Atlantic vessel upon the day of our flight will be known by us, and in event of our seeing one, reference to a chart carried by us will show us its position and therefore our position also."

**WANTED MOVIE**

Capt. Hinchliffe told also of their plans to carry a motion picture camera.

"It is our intention to carry one to make a film of all our preparations here," he wrote.

The body of the letter was typewritten. A postscript, however, was in his own handwriting. It said:

"Stinson still thinks the machine is for the Indian flight. Please do not give the true flight to them, until I give you word.

Signed) "R. H."

**URGES AIR SEARCH**

OTTAWA, March 17.—(AP.)—Search from the air was recommended today as the only means likely to procure results in the investigation of reports that a plane was heard near Greenville, Me., in a telegram to the ministry of marine and fisheries from the superintendent of the Canadian Pacific Railway at St. Johns, N. B.

The superintendent said that a private detective went from Greenville to Roaches Pond today to continue investigation "on instructions from Washington," but that the woods were very dense and successful search from the ground seemed doubtful.

He said that two men at a Hollingsworth and Whitney Company camp were still positive that they had heard a plane about 6 o'clock Thursday morning, an hour when the missing trans-Atlantic plane Endeavour might conceivably have been passing over head.

## OFFER MILLION FOR FLOOD AID

Universal Service.

LOS ANGELES, March 17.—The Board of Harbor Commissioners today offered the Mayor and City Council $1,000,000 from its surplus reserve fund for immediate use by the city of Los Angeles in rehabilitation of the area devastated by the St. Francis Dam break.

The communication from the harbor board came just as Mayor Cryer described the city's embarrassing position. "We recognize our strong responsibility," the Mayor stated. "We are anxious to meet the obligation. But the city attorney advises us that we cannot legally appropriate the city's money for this purpose."

Acceptance of the harbor board's offer, made through President Walter B. Allen, will permit the city to at once go ahead with the reconstruction and restitution program suggested by President Eastman and General Manager Arnoll of the Chamber of Commerce following a survey of the flood-swept region.

Notice was broadcast today for all persons who had suffered loss in the flood to at once file an estimate of their damage. After being checked these claims will eventually be presented as a bill to Los Angeles.

The death list of the disaster still mounts. Three additional bodies were found in the mud of the Santa Clara River bottom, two at Fillmore and one at Santa Paula.

According to official figures announced by Coroner Nance, the flood claimed 297 victims and 280 persons are missing. An inquest over 67 bodies found in Los Angeles county will be held Wednesday morning.

SACRAMENTO, March 17.—Four engineers of national reputation "free from prejudices," and with instructions only to "ascertain the facts," were today appointed by Gov. C. C. Young as a commission to investigate the collapse of the St. Francis dam near Los Angeles.

They are A. J. Wiley of Boise, Ida.; H. T. Cory, of Redondo Beach; Frederick H. Fowler and Frank Bonner, both of San Francisco.

## Chamberlin Testing Pgh. Propeller Here

Clarence Chamberlin, trans-Atlantic flier, is spending several days in McKeesport, where he is testing a Pittsburgh-made propeller on the three-cylinder flivver biplane in which he is touring the country. He flew here from Louisville, Ky., in the tiny ship and plans to hop off from Bettis Field tomorrow or Monday for Washington, D. C.

During his stay here, he is the guest of the McKeesport chapter of the National Aeronautic Association, under whose auspices he gave an illustrated lecture on aviation Friday night in the Penn-McKee Hotel. Harry A. Kraeling, president of the Standard Steel Propeller Company of Pittsburgh, has placed all the facilities of his factory at Chamberlin's disposal.

Chamberlin says he has just as much confidence in the flivver plane as he had in the big ship which carried Levine and himself to Germany last summer. The little ship is not nearly so powerful, nor speedy as the average airplane, he said, but it has proven itself just as dependable as larger and more expensive ships, he said.

Mrs. Chamberlin is traveling with her husband, but does not fly with him. She arrived in McKeesport Friday afternoon by rail from Louisville and will go to Washington by rail also.

## To Wed Kaiser's Son

Photo by P. & A.

**INDIGNANT**—Former Kaiser Wilhelm is aroused at the report that his second son, Prince Eitel Friedrich, is engaged to marry the wealthy widow of the famed baritone, Joseph Schwartz. Frau Schwartz, one of Germany's wealthiest women, is aged 52 and has been married three times already.

## Borah's Fund to Purge G.O.P. Reaches $1,701

International News Service.

WASHINGTON, March 17.—Cash contributions to Senator Borah's "obligation of shame" fund to repay the $160,000 Harry F. Sinclair donated to the Republican deficit in 1923 reached $1,701 tonight.

There were five substantial donations, but most of the money came in small checks and currency. Borah returned a $5 check sent him by Representative Boylan (Dem.) of New York.

Counting the pledges which Borah has received, the grand total is estimated at about $10,000. Two unnamed Chicagoans have pledged $6,000, but Borah said he would make no names public until cash was received.

The cash subscription list follows:

Senator Cutting (R.), of New Mexico, $1,000; ex-Senator William M. Calder (R.), of New York, $200; H. L. Loomis, New York, E. H. Gruening, Portland, Me., and Sol O. Levinson, Chicago, $100; George Schreiner, Washington, W. G. Simpson, Detroit, C. P. Connelly, Newark, N. J., and J. W. Remick, Concord, N. H., $10; J. H. Hamilton, Washington, J. H. Yost, Winchester, Va., L. H. Hirsch, Princeton, N. J., H. L. Benedict, Boston, J. A. Einhart, Paterson, N. J., N. W. Unger, Athen, N. Y., William Gray, New York, and Frances Keller, New York, $5; Gilbert Rosenberg, New York, Ray Harris, New York, F. L. Perry, New Haven, Conn., and J. F. Kleit, Winter Hill, Mass., $2; H. P. Grunauer, Cleveland, J. F. Rouse, Charleston, W. Va., the Rev. Edward Radcliff, New York, F. B. Bell, Brooklyn, G. W. Egbert, Brooklyn, S. L. Stern, New York, Ben Daniels, Goldsboro, N. C., A. B. Haley, Newton Center, Mass., M. P. Allen, State Senate, Albany, N. Y., E. H. Howell, Elmira, N. Y., Mrs. Dennecoll, New York, and W. F. Burbank, Cleveland, $1.

**BORAH PLEASED**

"I am highly gratified over the results thus far," said Borah. "The public announcement was only made on Thursday and it will take several days for the country as a whole to respond."

In forwarding the $5 to Borah, Boylan said he wanted to "aid your belated effort to buy back the Republican party," and rid the "party of the odor of oil."

Borah's laconic reply follows:

"I have your letter of the 16th enclosing a check for $5. I judge from your letter that this check is rather reluctantly given and you will permit me therefore to return the same to you."

Borah explained he would accept contributions from Democrats "if their conscience hurt them."

He tore up a letter sent by an unnamed man who said he would like to donate but "didn't want to give the money back to Sinclair."

Borah declared he had written no letters and had received no communications from President Coolidge, the various Republican candidates for the Republican presidential nomination, or the officers of the Republican national committee.

The corruption unearthed by the Senate Teapot Dome committee undoubtedly will play a prominent part in this year's campaign, Borah said, if certain candidates are nominated. He declined to elucidate.

### Wanted! A Name Newly Born Pup Has Green Hair

CAN anyone suggest an appropriate name for a newly-born Collie pup with a patch on its neck that its owner insists is green hair?

Philip Costello, confectioner of Homestead Park, owner of the pup, reports the freak. Costello has the reputation throughout the community of being an upright citizen of unquestioned veracity.

And he isn't color blind, either.

### *Girl Band Director Sued for Hotel Bill*

Nellie Jay and her Jay Bird Band ran out on the Hotel Planters Corporation of Chicago, it was revealed in the filing of a fraudulent debtors attachment here today. The suit is for $207.38, with the Stanley, Davis, Clark Corporation named as garnishee. The suit, directed against Nellie Jay, individually and collectively with the band, recites that Nellie Jay left Chicago without settling a hotel bill contracted during November and December of last year and part of January this year.

### *Slashes Wife When They Meet on Street*

A chance meeting of Judson Jones, 28, Negro, and his wife, Laura, 26, in Tunnel street, near Bigelow boulevard, Saturday afternoon, resulted in the wife going to the Mercy Hospital with knife wounds in the neck and head. The husband, arrested, said the woman had deserted him in Trenton, N. J., several weeks ago and had come here to work in a restaurant.

### *Ohio Governor at Franklin Funeral*

FRANKLIN, Pa., March 17.—Funeral services were held here today for Ralph S. Snow, of Cleveland. Gov. Vic Donahey, of Ohio, was among the honorary pall bearers.

## Chief Two Eagles Fired, But Here's 2d

(Continued from Page One.)

Robert Nicholson, with a spade. I also was told that the Chief was a hardy, vigorous man, who, on one occasion at least, had been seen swimming the creek with the mercury below zero.

**INDEED FIRED**

"Did he leave on his own account or was he discharged?" I asked a man in what is termed somewhat grandiloquently in my opinion, the administration building. He declined to give any information. It seems one of the county commissioners is very much interested in the park and does not like his subordinates to furnish information of any kind to newspapermen. He suggested that I go to the Court House for information. Knowing that time and newspapers wait for no man, I had thoughtfully kept a taxicab waiting (see expense account) and ordered the driver to proceed with all speed to Fifth avenue and Grant street.

At the Court House, after much effort, I learned that the chief had indeed been fired. He not only had been given his final pay but an expeditionary force of county detectives had been sent to insure his departure was taken without danger to the settlers in the neighborhood. In this connection I may state that his pay was $100 a month, a house and a horse. Next I went to the office of the Western Pennsylvania Historical Society and verified what had been my opinion—namely, that the movement of the county detectives against the Chief Two Eagle reservation in South Park really can be termed the last Indian campaign on the dark and bloody ground of Western Pennsylvania, scene of Braddock's defeat and other historical engagements which I can get from the encyclopedia if necessary.

Returning to the Court House, I was amazed to see standing in the corridor what appeared to be a full-blooded Indian, with a headdress of feathers and a coat made of skins of some kind. After some thought, I decided that even a full-blooded Indian would not go on the war path in the center of a crowded city; so I approached him.

"Are you Chief Two Eagles?" I asked, alert for any hostile move, but reassured because there were no spades in sight.

**ANOTHER CHIEF**

It developed he was not Two Eagles, but a full-blooded South American Indian named Cali, also a chief, but of a tribe whose name I could not understand although he courteously repeated it a number of times. Cali informed me that he reached Pittsburgh this morning. At the station he was approached by a total stranger who inquired if he is a full-blooded Indian. When Cali answered in the affirmative, the stranger directed him to the Court House, saying, "The County Commissioners need Indians." This stranger, it seems, was a white man. Cali informed me he was to return Monday to get final word about the position from which Two Eagles had been discharged. One of the things against him, he admitted, is lack of a squaw and papooses, as well as lack of complete knowledge of such North American game animals as buffalo and moose.

I am sorry that I failed on my first assignment, namely, getting an interview with Chief Two Eagles, but I believe you will admit that I did the best I could and failed through no fault of my own, having control over neither the county officers who discharged the chief, nor the movements of the chief himself. In this connection may I add that your assistant was mistaken when he referred to Two Eagles as a Cherokee. He is, I am reliably informed, a full blooded Sioux, the war-like riders of the wide open spaces.

(Signed)
REPORTER ON INDIAN ASSIGNMENT.

## KIDNAPED MAN BUYS LIBERTY

DETROIT, March 17.—(AP.)—James E. Hall, wealthy beverage establishment owner kidnaped yesterday and held for $10,000 ransom, was liberated today, presumably after the demands of his abductors had been met. He was not harmed.

Although Hall and his wife would not make any statement concerning the kidnaping, it was learned that he appeared about noon Saturday at a downtown bank and cashed a check said by an attendant to have "run into the thousands."

### *Free McKeesporter Held on 'Suspicion'*

Judge John A. Evans, of Common Pleas Court, has ordered the release of Toney Kaminsky, Jerome street, McKeesport, from jail, on a habeas corpus action. No one from McKeesport's legal department appeared in court to oppose the proceedings. It appears that Kaminsky was committed March 12 by Alderman A. C. Markus, of McKeesport, to serve 30 days because of being unable to pay a fine of $200. The commitment stated he was being incarcerated "on suspicion," while the transcript charged him with keeping a disorderly house. Judge Evans declared there is no law to cover "on suspicion," and as to the latter he did not know on what authority the magistrate acted.

### *Propeller Holds Flier At Beaver*

BEAVER, Pa., March 17.—A broken propeller on his big American Eagle biplane kept Joe Sullivan of St. Louis, Mo., here yesterday. Sullivan, piloting the plane in its maiden trip from St. Louis to Boston, was forced to land in a wheat field along the Ohio River yesterday by a frozen motor. The propeller was damaged in the landing.

### *Greensburg Patrol Head Found Guilty*

BUTLER, Pa., March 17.—Capt. David E. Miller, of Greensburg, head of the Western Pennsylvania district of the State Highway Patrol, was found guilty of malfeasance in office by a jury in court here today. The officer, it was testified, changed a charge against N. F. Vidal, Jr., of Youngstown, O., from one of operating a motor vehicle while intoxicated to one of reckless driving. Capt. Miller was exonerated on a charge of conspiracy.

## $80,000,000 REQUESTED IN COUNTY ISSUE

**Commissioner Armstrong Indicates Figure Will Be Cut in Two.**

Approximately $80,000,000 in public improvements has been proposed to the County Commissioners for inclusion in the approaching county bond issue. This was disclosed Saturday upon inquiry of Norman Brown, director of the County Department of Public Works.

The date of the special election at which the county bond issue will be submitted to the voters has not been definitely fixed, County Commissioner Joseph G. Armstrong stated. He said he expects it to be held late in May or early in June.

Most complications in grouping the improvements for the county bond issue revolve around the demands for bridges and tunnels in "The Point" area. There have been $36,000,000 of improvements alone proposed for this section, Director Brown said. They include the Ferry street bridge over the Monongahela river and the South Hills tunnels project, the proposed Manchester-West End bridge, together with a tunnel to the South Hills, and proposed Ohio river bridges at two places below "The Point," connecting the lower North Side with Corliss street and also at a point further down the river, the latter including a tunnel project.

## GET READY FOR BANDIT GANG

MARTINSBURG, W. Va., March 17.—Several banks in a number of towns in the Shenandoah Valley, of which this city is the gateway, have employed additional armed guards to thwart possible bank robberies, following the circulation of a report that a gang of holdup men and bank robbers are hiding in the valley. Yesterday and today all banks in Shenandoah county, Va., south of here, were kept under heavy guard.

Kirby Dellinger, one of four bandits who robbed the national bank at Mt. Jackson, Va., last July, and escaped, is said to be with the gang, and to be furnishing them with maps of the towns and their banks.

## Now Fish, Too, May Enjoy Day of Rest

(Continued from Page One.)

by the watchful warden and his coadjutor in the very act of drawing from Raub's Pond, in Lake township, a net containing two perch and one catfish. These fish, we may observe in passing, were too diminutive to make their confiscation a motive for official activity.

"The learned counsel for defendant," resumed Judge Fuller, "urged there was reasonable presumption of innocence and a reasonable doubt in the absence of proof showing when the fish actually entered the net; and their rescue on Sunday from a watery grave was an act of mercy, permissable even on that holy day."

In his learned opinion, and answering the argument that merely pulling up a net on Sunday did not violate the Sabbath Day law, Judge Fuller said:

"This involves a definition of fishing, and in the light of our personal experience, extended over half a century, we define it to be a human effort, successful or unsuccessful, by any device, to remove from water the piscatorial denizens thereof, a performance demanding patience, involving skill, accompanied by profanity and usually followed by mendacity."

The judicial mind on the momentous problem involved, coming to the subject of mercy said:

"A consideration equally fatal to the plea is that these fish were not suitable objects of mercy at all. They were not seeking to escape, but accepted the situation in perfect contentment. They suffered no pain of body or mind."

In summing up the case, Judge Fuller concluded as follows:

"Our treatment of this case has been exhaustive because we have begun to weary of it and wish to end it here and now. The officials are at last justified, the magistrate has achieved the miracle of returning a record, which, if not perfect, is at least passable; astute evasion of punishment has reached its limit, the perpetrator of that crime is brought to justice, those pitiful little fishes so ruthlessly routed from their quiet abode on that holy day of rest are avenged; the Christian Sabbath is restored to its pinnacle of strict observance against the subtle Mephistophelian argument of private property, the private pond must abjure the protection of its supposed prerogative to break the Fourth Commandment, and the judgment is affirmed."

"Fiat justitia, ruat coelum."

# American Girl, Blazing With Jewels, Weds Ex-Nabob

## $1,750,000 IN BRIDAL GEMS CLIMAX POMP

### 700 Feast After Gorgeous Rites—"First Wife" Sees Indore Ceremonies.

By C. S. DE ANDRADE,
International News Service Special Correspondent.

BOMBAY, India, March 17.—Seven hundred guests sat down to a wedding feast at Barwaha tonight in celebration of the marriage of Tukojirao Holkar, Indian prince and former maharajah of Indore, and an American girl, Miss Nancy Ann Miller, whose nuptials at sundown were blessed, according to the ritual priests, by all the Hindoo gods.

Miss Miller, who will be known in the future as her Serene Highness Maharanee Sharmishthabai Holkar, was almost overwhelmed by the groom's gifts, which included priceless jewels and richly carved gold and silver ornaments.

In accordance with Hindoo custom, the bride and groom ate from the same dish. The Prince offered a sugared sweetmeat to the Senior Maharani, the first of his three wives, who returned it to him while the other guests looked on and cheered. This wife attended the wedding ceremony at the sacred Shamiana Shrine, near Barwaha, and was one of the most interested onlookers during the 18 separate rites that united the ex-Maharajah and the American girl in wedlock.

**18 CEREMONIES**

The last of the 18 nuptial ceremonies took place as darkness was falling. It was the fire worship rite which sanctified the nuptials in the eyes of the fire god Agni. The bride and groom dressed especially for this ceremony. They were clad in the richest garments of Indian craftsmanship. The bride's robe was the most gorgeous ever seen, being embroidered with ther ichest jewels from the Indore state treasure. A blazing diadem of jewels rested upon her head, the worth of these gems alone being placed at $1,750,000.

After the invocation to the fire god the bride and groom solemnly took seven steps round the sacred fire. This culminated the long ritual. The American girl had become an Indian princess.

Despite the long preliminary ceremonies, which began at 2 o'clock this morning when Miss Miller was admitted into the Dhangar caste, which placed her upon a status of equality with her husband, the bride went through the tiring nuptial service with amazing equanamity. She said she was not weary; that she had been too engrossed in the gorgeous and impressive mysticism of the ritual to think of getting exhausted.

It was revealed that the bride is suffering from a light attack of appendicitis. After a trip to the city of Indore the couple are going to Europe for their honeymoon. Miss Miller will undergo an operation in Europe.

After the elevation of the American girl to the Dhangar caste there was a pre-nuptial feast during which the former Maharajah partook of some food, then passed the plate to the caste woman who nibbled the remnant.

**RECEIVES TITLE**

Miss Miller, wearing a cloth of gold headdress and a brilliant crimson robe, was formally admitted into the Holkar family. It was then she received her title and it was then that she became eligible to worship the family deity.

The marriage procession to the little patch of jungle near the Holkar palace, where the rites were conducted, was a gorgeous spectacle, marked by the impressive splendors of the Orient. It was led by richly camparisoned elephants, bearing gilded howdahs, in which rode the aristocrats. There were a score of camels, whose saddles were inlaid with gold and silver, resting upon brightly colored silken robes. There was a native band with drums and trumpets. And, strung out behind, were hundreds of Indians from all parts of the state of Indore, whose sandals plowed through the thick dust of the highway.

Before leaving for her silken tent, near the altar, the bride worshipped at the idol of Devi Court, wearing a diamond garland upon her head, golden anklets, green bangles on her arms and a girdle of rich, green emeralds. A special nose ring, encrusted with diamonds of the first water, was pendant from her nostrils.

Immediately before the ceremony began, the groom, wearing garlands of roses upon his head and shoulders, and with his bare feet colored with yellow ochre, visited the bride in her tent and formally asked for her hand.

## Expelled, Kaiser's Kin Going to Congo

BRUSSELS, March 17.—(AP.)—Alexander Subkoff, young husband of the Princess Victoria of Schaumberg-Lippe, who recently was ordered expelled from Germany, has gone to Antwerp, intending to sail for the Belgian Congo.

Subkoff arrived in Brussels alone on Thursday night. He took a single room in a second class hotel, where he told the porter he was en route to the Congo. His main baggage went direct to Antwerp and he left for Antwerp Friday.

Announcement that Subkoff had been ordered expelled on the technical ground that he had not renewed his residence permit after it expired was made at Cologne, Germany, on Thursday. Princess Victoria was not included in the expulsion order.

At that time it was reported that Subkoff had left Schaumberg palace at Bonn for Belgium. It was stated that he intended to arrange passage to the Belgian Congo, where his uncle, who is of Swedish extraction, was believed to have an estate.

Princess Victoria denied that her husband had fled and said no divorce was contemplated.

"We are perfectly happy together," said the sister of the former Kaiser. "Our only desire is to be left alone."

## Pittsburghers to See Passion Play

**VERONICA**— Mrs. James Loder will portray the role of Veronica in the Passion Play to be presented by the Rev. James R. Cox, pastor of Old St. Patrick's Catholic Church, in the Gayety Theater during the week of March 26. The production will be in keeping with the dignity, solemnity and religious significance of the great tragedy of the redemption.

**ANGEL**— Martha Jeanne Miller will appear as the Angel in the production which is taken absolutely from the Bible with the Oberammergau adaption. Popular prices will prevail and a special matinee will be given for children Saturday afternoon, March 31. Tickets are on sale at Old St. Patrick's parish house, Liberty avenue and Seventeenth street.

## Sent Money, Joachim Cancels His Concerts

PHILADELPHIA, March 17.—(AP.)—Cancellation of all concert engagements in America of Prince Joachim Albrecht, second cousin of the former Kaiser, who is now in New York, became known here today.

The news of the prince's decision to call off his appearances as the conductor of a number of orchestras in various parts of the country was revealed by Charles M. Brendlinger, commander of an American Legion post here, upon his return from a conference in New York with Paul Sydow, manager for Prince Joachim. Brendlinger called on Sydow to mak final arrangements to have the prince conduct a benefit concert here.

Sydow informed him, he said, that all engagements had been canceled and that checks totaling $35,000 as guarantees from different cities were being returned.

"There has been too much unfavorable publicity," was Sydow's explanation.

He explained further that the prince's original purpose in visiting the United States was to tour the principal cities as a sight-seer, but upon his arrival in New York found himself deluged with offers to lead orchestras. The titled visitor, Sydow asserted, had acceded to the requests with the understanding that under no circumstance would he accept money for his appearances, but nevertheless checks "to pay expenses" kept pouring in.

It was also stated that the prince's decision to forego the concert engagements would in no way affect his plans to tour the country.

## DOCTOR GUILTY IN GIRL'S DEATH

BUTLER, Pa., March 17.—Dr. V. F. Thomas, 62, of Evans City, was found guilty by a jury in Criminal Court yesterday on a charge of performing an illegal operation which resulted in the death of Violet McNany, 15, in a Pittsburgh hospital, January 22. He was named in an ante-mortem statement by the girl along with Roy Davidson, of Valencia. The latter was indicted as an accessory, but has not been placed on trial.

## Police 'Tag' Car Near Station; Find It Stolen

CHESTER, Pa., March 17. AUTOMOBILE thieves with a sense of humor, parked a stolen car in an alleyway in the rear of police headquarters, where it remained for several days before officers noticed it. It was not until officers decided to "tag" the machine for violating the parking laws that the theft was discovered.

The car had been stolen March 4.

## *Jeannette Youths Paroled in Thefts*

GREENSBURG, Pa., March 17.—David Baker, 17, and Arthur Tobias, 18, of Jeannette, sought to augment the wages of honest toil by day by burglaries at night, they told the court when they pleaded guilty to robbing a poolroom at Arlington. They were paroled.

## *Rob Connellsville Garage of $27*

CONNELLSVILLE, Pa., March 17.—While the watchman was working on an automobile outside, robbers slipped into the garage of the New Haven Motor Company and tapped the cash register of $27.

# More Food Reaches Snowbound

### *Seized Beer Truck And Load Disappear*

JOHNSTOWN, Pa., March 17.—A truck load of high-powered beer, seized by a city patrolman in early morning, disappeared before the hearing—and police headquarters has no explanation. Two men arrested on the truck, Steese Brubaker and Charles White, forfeited their $100 bonds.

### *New Philadelphia Mills Start Up*

NEW PHILADELPHIA, O., March 17.—When two additional units are started Monday morning, all 12 hot mills of the local works of the American Sheet and Tin Plate Company will be in operation for the first time since October, 1926. A total of 600 men will be employed.

## SNOWMOBILE, DOG SLED AND PLANE ARRIVE

**Detour Now Thoroughly Rescued Town After Being Cut Off From World 17 Days.**

International News Service.

DETOUR, Mich., March 17.—Detour, snowbound for 17 days, sat back in comfort today and discussed the excitement which marked their rescue from famine-threatened isolation.

No community was ever more thoroughly rescued, relief having come almost simultaneously from three quarters.

A dog sled, an airplane and a snowmobile brought needed supplies. Today the 600 inhabitants have food other than salt pork and corn bread. They have tobacco; they are reading and rereading mail from the outside world and they have the satisfaction of knowing the sick in their midst, Russell Goetz, is being cared for in a Sault Ste. Marie hospital.

He was taken to Sault Ste. Marie yesterday in the government transport plane which brought supplies and mail here. It was the first plane ever to land in the village and caused great excitement.

The snowmobile, sent out by the Soo Evening News, arrived about noon. The crew suffered severe hardships.

Dr. John F. Deadman was wildly acclaimed when he mushed into the village with a food-laden dog sled.

## Bridge Opening Celebration

**TO PARADE AND DINE**—Communities of the South Hills plan to observe a half-holiday on March 27, when the new Liberty Bridge is officially open to the public. There will be a parade in the afternoon and a banquet in the William Penn Hotel in the evening. S. W. Provost, of the Castle Shannon Business Men's Association, is treasurer of the general committee in charge of the celebration. C. E. Hood, Mt. Lebanon Chamber of Commerce, heads the parade committee. H. H. Jackson, of the same organization, is general chairman.

### *Pastor to Accept Warrendale Call*

The Rev. W. A. Mintier, now in unofficial charge of the United Presbyterian Church at Warrendale, will accept a call to become pastor of that church. The call, approved two weeks ago by the Allegheny Presbytery, will be formally presented by that body to Rev. Mintier at its quarterly meeting to be held next Tuesday in the Forest Avenue Church, Bellevue. Rev. Mintier came to Warrendale last July from New Concord, O.

### *Grove City's New Water Plant Ready*

GROVE CITY, Pa., March 17.—The new municipal water filtering and softening plant here has been completed, and water will be turned into it within a few days. Work was started last fall, but was delayed by poor weather. It is believed the advantages of the plant will not be apparent for some time after it has been put to use, because the water mains have become corroded from iron now in the water.

## 91 AND IRISH ON ERIN'S DAY

When an Irishman can celebrate his birthday on St. Patrick's Day, that's something, but when he can round out 91 years on the day set apart for honoring Ireland's patron saint, that's something even better to boast of.

George Porter achieved that distinction Saturday and all day his friends called at 639 Seventh avenue, Coraopolis, where he resides with his son, David, to congratulate him.

Born in Ireland, Porter came to this country with his parents when a lad. He worked as a teamster in Pittsburgh for 40 years. He recalled that he had hauled stone for some of the buildings that are landmarks of this city, among them the Dollar Savings Bank Building, in Fourth avenue. In later years he was employed by the borough of Coraopolis. His wife died five years ago.

### *Fall From Ladder Kills War Veteran*

PARKERSBURG, W. Va., March 17.—(AP.)—Howard Moorehead, 33, of Parkersburg, was killed today when he fell from a ladder in the Parkersburg mill plant. Moorehead, a World War veteran, suffered a fractured skull.

**New Spring Suits**

in which quality is considered before price

**$35 $40 $45**

The style of the new suits demands good materials, carefully tailored, if they are to retain their free and easy lines, and not become shapeless bags.

In materials and making these suits are built "up to a standard, not down to a price."

Yet they are not expensive—their prices are but little more than you are asked for doubtful clothes.

But what a saving, when you consider your clothes cost as you should—by the year, rather than by the suit.

**For Cadillac Stands Alone**

The new Cadillac is offered, without reservation, as the finest of fine cars—designed for people who seek beauty individually expressed, and built to perform well beyond the conventional conception of fine car possibilities.

Therefore leave all pre-conceived standards behind when you inspect the Cadillac or test its famous 90-degree, V-type, 8-cylinder engine. Cadillac today establishes its own standards, just as has every Cadillac that has preceded it for 25 years.

It is gratifying to discover, also, that the new Cadillac is one instance in which exclusiveness and prestige can be enjoyed on the basis of a sensible investment. Every dollar represents incomparable value that only a Cadillac, backed by General Motors, could offer.

# First Lady's Illness Reaction Alarms Close Friends

## MRS. COOLIDGE MISSING FROM SOCIAL CIRCLE

**Specialist's Visits Indicate Concern Caused at White House by Recent Sickness.**

International News Service.

WASHINGTON, March 17.—Although Mrs. Calvin Coolidge has been officially described as recovering from the illness that curtailed her social activities six weeks ago, her general condition, it was learned today, is giving her physicians and close friends considerable concern.

For more than a month she has not attended an official dinner nor engaged in any other of the usual social activities that custom demands of the first lady. She has been absent at most of the cabinet dinners, which are a feature of the capital social season, and has even been missing at the White House dinner table on formal occasions.

Normally an enthusiastic walker, she has foregone her usual daily walks about th city and parks. Her only outings have been short rides in one of the White House cars.

Dr. Hugh Young, the famous Johns Hopkins specialist, has been called into consultation by White House physicians. He has been a White House visitor three times during the past few weeks.

## Lawyers Have New Referendum Plan

A new plan for referendums by the Allegheny County Bar Association has been prepared by the judiciary commitee of that organization and will be submitted for approval at the next regular meeting.

One of the chief points of difference between the new plan and that used for the secret ballot taken among the members before the primary election last year, is that a candidate will be required to get 40 per cent of the highest vote cast instead of 20 in order to have his name certified as one approved by the association.

## 1,433 Flop-Overs

**NEW RECORD** — Charles W. "Speed" Holman, 25-year-old air mail pilot of St. Paul, turned his airplane over in 1,433 consecutive times in five hours and a half to establish a new world's record.

## Stoyestown Farmer Guilty in Auto Deaths

EBENSBURG, Pa., March 17—Frank W. Shaulis, 62, a farmer of Stoyestown, was convicted of involuntary manslaughter here for the deaths of Mrs. Frieda Kinzey and her 2-year-old daughter, Geraldine Mae, of Johnstown. Shaulis' truck collided with a machine in which the mother and child were passengers last August, the two dying from their injuries.

## Fed Sandwich, Water, Prisoner Files Suit

BEAVER, Pa., March 17.—A sandwich and a pint of water a day was the menu Jesse Martin, of New Castle, was served while he was a prisoner for four days in the Ambridge jail, it is alleged by Martin in his suit for $10,000 against P. J. Caul, former chief of police of Ambridge. Martin charges false arrest.

## DIES IN DIVE FROM BRIDGE

A dive off the Sixteenth Street Bridge, McKeesport, into the Youghiogheny River, sent Andrew Racs, 29, of 1612 Romine avenue, McKeesport, to his death Saturday afternoon.

Racs, fully clothed, climbed atop the bridge railing and jumped before witnesses could reach him. His body was recovered two hours later by employes of the McKeesport Tin Plate Company.

Racs was married and had one child. No reason could be found for his act.

## Wilbur to Be Feted On Visit Monday

Curtis Dwight Wilbur, secretary of the Navy, and his naval aide, Capt. Neal, will be met on their arrival in Pittsburgh Monday morning by Frederick Ickes Merrick, of Holyrood road. They will be taken to the home of Mr. and Mrs. M. Day Kirk, Schenley Apartments, who will give a breakfast in their honor. Before going to fulfill his lecture engagement at the Twentieth Century Club, where he will be entertained at luncheon, the Secretary will visit the Children's Hospital. Later in the day the Chamber of Commerce will show him some of Pittsburgh's large industrial plants, and entertain him at dinner. The Secretary and Capt. Neal will return to Washington Monday night.

## 4 BOYS KILLED IN NITRO BLAST

WEST UNION, W. Va., March 17.—(AP.)—Denzil Doak, 14, injured this afternoon when a can of fluid thought to have been nitro-glycerin, exploded while he and three companions were picking over a dump, died tonight in a Clarksburg hospital, making the fourth victim of the blast.

His three companions, Gaylord Clark, 14; Howard Doak, 12, brother of Denzil, and Harry Williams, 16, were killed instantly.

The explosion occurred shortly after noontime. The two Doak boys, Clark and Williams, were gathering junk along the road near a summer resort known as Crystal Lake, authorities learned, and shortly after they picked up the can a terrific blast was heard.

## Ban Confederate Monument Gifts

DECATUR, Ga., March 17.—(AP.)—A temporary order restraining the city of Atlanta and Fulton county from making further donations to the Stone Mountain Confederate Monumental Association and enjoining the latter from receiving such contributions was issued in Superior Court here yesterday on petition of five prominent Atlanta women.

Their action, which sought to recover funds already paid to the association on the grounds that such donations were unconstitutional, also asked the appointment of a receiver for the organization.

# Candidate for Hoover Loses

## BOOTH PETITION DECLARED VOID; NO G. O. P. FIGHT

**Find 17 Signers Not Registered; Loss of Names Results in Defeat.**

HARRISBURG, March 17.—(AP.)—The nomination petitions of Francis P. Booth as a candidate for delegate-at-large to the Republican national convention today were declared null and void by the Dauphin County Court.

As a result there will be no contest for places on the Republican big seven, as Booth was the only candidate to file who was not "slated" by the Republican leaders. He was pledged to support Herbert Hoover for President. He is a Pittsburgh engineer.

Last Saturday action was started in the Dauphin County Court attacking the Booth petitions on the grounds that insufficient number of qualified electors had signed them.

John G. Hall, chief clerk of the board of county commissioners of Washington county, testified today that at least 17 of the names listed on the Booth petitions from that county were not registered.

M. Rose Zarilla, assistant chief clerk of the board of county commissioners of Lawrence county, testified that at least 10 of the Lawrence signers of the Booth petitions were not registered and not assessed.

Yesterday similar testimony was given as to the Westmoreland county signers.

This testimony, which was accepted by the court, brought the number of signers of the Booth petitions in three counties below the 100 mark required by the law. The election law required candidates for delegate-at-large to have petitions from five counties with 100 signers each. Booth filed petitions from six counties, but petitions from three having been successfully attacked, the whole was declared invalid.

### *Clarksburg to Vote On Bridge Bonds*

CLARKSBURG, W. Va., March 17.—Council has ordered a special election May 15 on a $400,000 bond issue for seven bridge and street projects.

## W. VA. WIFE UP FOR MURDER

PARSONS, W. Va., March 17.—Lines were drawn today for a bitter legal battle over the fate of Mrs. Goldie Harper, 28, of Hendricks, charged with slaying her husband, Amos Harper, a prominent Tucker county farmer, the night of February 21. The trial opens Monday morning.

Mrs. Harper, refused bail, has been in the county jail since the murder. She is alleged to have fired a revolver at her husband, the bullet lodging in his heart. Two former county prosecutors will assist Prosecuting Attorney R. D. Hetronimous.

## SEPARATED, BUT WINS ESTATE

NEW PHILADELPHIA, O., March 17.—Mrs. Vera Carnathan is entitled to statutory rights in the estate of her husband, Laton S. Carnathan, despite that the couple separated and signed a post-nuptial contract abrogating her rights to his property three years before his death, Probate Judge J. H. Lamneck ruled.

Judge Lamneck based his opinion on the grounds that the couple lived together after signing the contract. He also ruled that the wife was entitled to keep $600 which she received for signing the agreement.

Gimbels—HOUSEWARES AND CHINA—Seventh Floor

# U. S. JUDGES BACK "DOPE" FARM BILL

**Urge Passage of Porter's Measure; Prison Conditions Said Hindrance to Addicts.**

International News Service.

WASHINGTON, March 17.—Pleas by federal judges in all parts of the country for congressional action to curb the drug evil were revealed in letters made public today by Representative Stephen Porter (R.), of Pennsylvania, author of a bill to establish federal "dope farms."

Passage of the measure would mark a great advancement in the development of the federal penal system, the judges declared. Porter plans to take the judicial pleas to the House judiciary committee within the next two weeks, seeking a place on the House calendar for his measure.

The federal judges all stressed the difficulty of handling narcotic addicts under the present laws. Under the Porter bill two federal farms would be established to which all federal prisoners who are "dope fiends" would be sent.

"I have been on the district bench for six years, and have been impelled to send quite a number—I expect as many as 40 or 50—to the Atlanta prison, who are criminal addicts, but who might be cured at a proper place under proper treatment," wrote Judge George W. McClintic, of Huntington, W. Va., Judge of the Southern West Virginia district.

"Most of those who come back from Atlanta insist that there is no difficulty in getting supplies of morphine, or whatever they want, in that prison. I appreciate the fact that this is likely exaggerated, but with the enormous number that are there, and the various kinds of guards that they have, it is quite likely that more or less of the 'stuff' is smuggled in.

**Healed Her Sore Leg**

Mrs. M. E. Shook of Claremont, N. C., who was quickly healed of a sore leg (varicose ulcers) after 20 years' suffering, says every sufferer who writes Dr. H. J. Whittier, Suite 116-B, Westport Bank Bldg., Kansas City, Mo., for a free copy of his copyrighted book on leg sores will learn of a simple home treatment that stops the itching at once and heals in a little while. There is no cost or obligation.—Advertisement.

## French Room Gowns Epitomize the Beauty of the Modern Vogues

## $69.50

The summation of all that is smartest in the edicts of fashion . . . French Room Gowns. The styles are of the moment as the illustrations show. The fabrics are the softest flat crepe, Elizabeth and sheer chiffons, heavier crepe Jolie and fine georgette . . . with the tucks and godets, rainbow pleating, Chanel skirts and graceful folds. Afternoon and dinner frocks, sheer evening modes, and silks for all occasions . . . in pastels and black and the spring-sponsored light hues. Sizes 34 to 42.

Gimbels—FRENCH ROOM—Third Floor

## Distinctive Coat Styles for the Fashionable Woman and Miss

## $69.50

Coats may be merely coats . . . or they may be the tangible evidences of the wearer's fashion sense. Gimbel coats are true to the newest style trends and are correct in design, fabric and fur. Dress coats of kashara, anadyr, laurette, faille silk . . . with the narrowest of seams and tucks, with scarf collars or squirrel, fitch, or monkey fur collars. Travel coats are of brushed tweed, with fox or wolf collars, Irish plaids and bordered fabrics and sportive mixtures. Sizes 14 to 20 and 36 to 44.

Gimbels—COAT SHOPS—Third Floor

## The Separate Fur Scarf

## $29.50 to $400

With the vogue for the furless coat collar and the tailored suit this Spring, the fur scarf becomes a convenient as well as a smart costume accessory in keeping chill Spring winds at bay. In our fur shop, a wide choice of skins, including red fox (illustrated), black fox, baum marten, sable, etc. At prices to fit any purse. $29.50 to $400.

Gimbels—FUR SHOP—Third Floor

## Bandeaux Again for Evening

*A Variety of Styles and Designs Priced From*

## $1.00 to $19.50

The hair band, especially for evening, returns with the new Spring mode of Femininity. You will find here a number of styles to suit your particular type. Sprays of gold or silver leaves, $1.00 to $2.50. Rhinestones in straightline or tiarra effects, $1.00 to $19.50. Delicate rosebud sprays, $2.25 to $2.95. Pearls, $3.50 to $19.50.

Gimbels—Street Floor

## Diamond Jewelry of Rare Charm

*Rings, Brooches, Pendants, Etc. In Platinum Settings*

Exquisite jewels—a diamond, superbly cut, in a platinum setting of fine simplicity. A brooch of unusual daintiness. A pendant on a slender chain. One of the very wide bracelets set with tiny sapphire leaves. Or aquamarine, onyx, jade in novel settings of gold or platinum. A collection of jewels of rare charm and perfection. Semi-precious stones, $35 to $175. Diamonds, $110 to $500.

Gimbels—Street Floor

## Ensemble Suits—the Practical Style for Spring Wearing

*Presented in Varied Manners, With Blouses, Sweaters or Silk Frocks in Harmonizing Shades*

The increasing vogue for the suit ensemble is fully justified in these attractive models. If one leans to the sports types she will admire the novelty tweeds and diagonals, the bordered coats and modernistic blouses, the sweater suits that are smart on the street or at the country club.

For the more elaborate occasions, suits of kashara type fabrics and fine twills with satin or crepe blouses to match the linings are selected. And the silk frocks that accompany some of the suits are just as modish worn alone.

Long tunic blouses are noted on a few of the suits, and occasionally a fur collar or a coat trimmed with row after row of buttons endears itself to the woman of fashion.

## $35.00 to $119.50

Gimbels—SUITS—Third Floor

## To Match Hat, Dress or Shoes

## SPORT BAGS

## $4.95 to $20.00

Reproductions of hand bags by Chanel, Patou, Rodier and others equally famous. Unusually smart because of their materials—created to match one's hat, shoes or frock. In chenille, tweed, felt, rayon, linen, pleated or quilted silks and Panama straw. Plain colors, chic stripes or polka dots, distinctive novelty weaves.

Gimbels—WOMEN'S HAND BAGS—Street Floor

## This Week a Specialist Will Fit You in Red Cross Shoes

*The Red Cross Shoe is Specially Constructed to Give the Utmost Comfort to a Woman's Foot in Action or Repose*

Recognizing that foot-ease and comfort are the invisible essentials to beauty, Red Cross shoes are made into the most modish models but concealed is the famous "Arch-Tone" that completely supports the foot in any position.

**Beginning Monday and continuing throughout the week a representative of the Red Cross Company will be present in the Gimbel Shoe Department to personally supervise the fitting of these models of fashion and ease.**

Red Cross Shoes are obtainable in patent leather, black kid or satin in a variety of styles with Cuban or Spanish heels.

Four popular models, in black kid or patent are illustrated:

A. Cut-out oxford with medium vamp and toe, welt sole and leather Cuban heel with rubber top lift. In patent or black kid.

B. Center gored step-in pump with buckle and leather Cuban heel. In patent or black kid.

C. Three-strap model with cut-outs. Welt sole and Cuban heel. In patent or back kid.

D. One-strap pump in dress model with covered Cuban heel. In patent or black kid.

# 'Say It With Smiles'—Pgh. Coal

## JUST GRIN ALL YOUR ANSWERS, IS NEW ORDER

**Lesher, Conspicuous Exponent of Command, Uses Smiles Instead of Words.**

Smile, smile, smile. It is the new policy of the Pittsburgh Coal Company, adopted Saturday, to settle its labor difficulties with simulated good humor.

"Smile—don't talk, but smile and smile." These were the orders that went out from headquarters and they are being implicitly obeyed from the highest executives down the line to the humblest of the holders of "white-collar" jobs.

LESHER "SMILER" NOW

C. E. Lesher, executive vice president and official spokesman for the company since the scrapping of the Jacksonville contract, is the most conspicuous exponent of the new order since now he "smiles" his answers instead of uttering them orally. Interpreted from smiles, grins, chuckles and guffaws, the latter to accentuate the superlatives, the Pittsburgh Coal Company feels:

Mildly amused at the statement of E. S. McCullough, former Chamber of Commerce "special industrial aide," that the chamber committee was all right and that the action of the coal company was "dirty."

Very happy over Gov. John S. Fisher's attack on the Senate coal investigators in his speech at Easton Friday night.

"PLEASED" OVER ESCH CASE

Curiously pleased over the action of the Senate in rejecting the reappointment of John J. Esch as a member of the Interstate Commerce Commission.

Jocular when told of the comments of Senator David A. Reed on the Esch appointment in which he was quoted as declaring it meant an "unfavorable omen for the Pennsylvania coal industry."

Inexpressibly ticked over the projected Chamber of Commerce "neutral" survey under the chairmanship of George R. Wallace to present the facts to the Senate investigators.

Like laughing its head off ever the whole situation.

Smile, smile, smile!

## Fox Chapel Holds First Horse Show

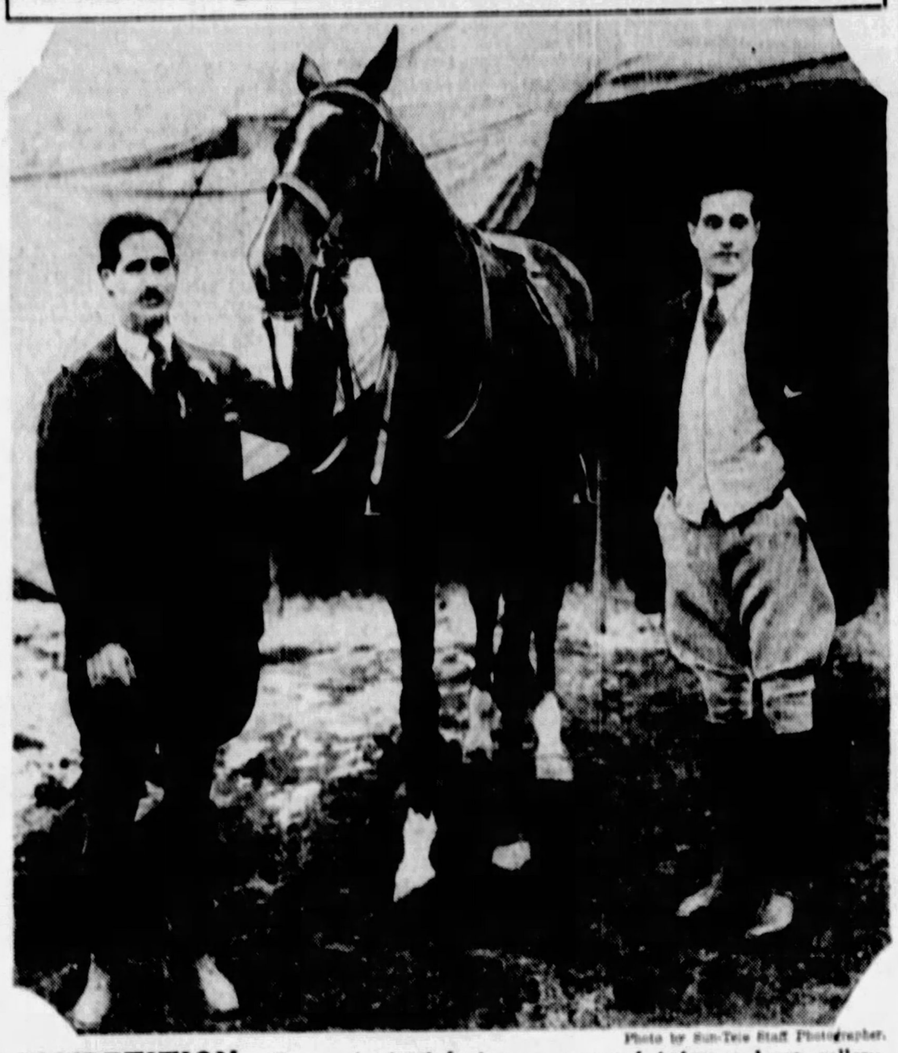

Photo by Sun-Tele Staff Photographer.

**COMPETITION**— The opening local horse show at the Fox Chapel Farms was presented with a galaxy of thoroughbreds entered. Jumpers, in both novice and open classes, competed before a large gallery. Mr. Edgar Kaufmann and Mr. Oliver Kaufman were sponsors for the show.

## Weather Outlook For Present Week

International News Service.

WASHINGTON, March 17.

WEATHER outlook for the period March 19 to 24, inclusive.

North and Middle Atlantic States: Generally fair the first half of the week, except possibly snow in the North Atlantic States Monday morning. General rains about Thursday, fair at the end of the week. Temperature below normal Monday, rising temperature thereafter until Thursday, then colder with below normal temperature by Saturday.

Ohio Valley and Tennessee: Generally fair, except rains Wednesday or Thursday. Temperature below normal Monday and again after Thursday. Warmer Tuesday and Wednesday.

## *Venango School Directors Elect*

FRANKLIN, Pa., March 17.—The Venango County School Directors' Association has elected Mrs. Frances Hillier, of Cooperstown, president, and Harry Hoover, of Polk, and Mrs. W. O. Turk, of Cornplanter, vice presidents. A. J. Woody, of Sandy Creek, was chosen auditor of teachers' institute funds.

## *New Fire Truck, No Water; Home Burns*

CONNELLSVILLE, Pa., March 17.—Perry township's newly organized fire company almost christened the new pumper truck. Answering the first alarm when the H. T. Duff home near Perryopolis ignited, the firemen could not use the truck due to lack of water.

## Palmer's Silk Store

JUST DIFFERENT

PALMER'S reputation as Pittsburgh's largest Exclusive Silk Store, and the unusual circumstances which necessitate the closing of a successful business in midseason—the dissolution of partnership—has made an occasion of extraordinary interest to the public. While considerable merchandise remains, the end is in sight.

## *Further Reductions*

To speed these remaining stocks, further reductions have been made on many things, already ¼ to ½ below prevailing figures. Catering to an exclusive trade, the stocks comprise fashionable weaves and high-grade novelties, which provide sensational values at the prices now upon them. Woolen dress fabrics, dress silks, linings, and negligee materials, as well as silk hosiery and underwear, may be had at prices far below actual worth. Come and see what is going on!

# Free State Has Dry St. Patrick's Day; Pubs Closed

## CAN'T DROWN SHAMROCK AS IN OLDEN DAYS

**"Pat" Must Either Lay in Supply or Go Across Border and Join Festivities.**

BELFAST, Ireland, March 17.—(AP.)—St. Patrick's Day was dry in the Irish Free State. In a country with an annual drink bill running into 17 or 18 millions sterling the national festival could not be celebrated with the time-honored "drowning of the shamrock." Public houses had to close, and even the most bonafide thirst could not be quenched in them.

For good reasons, too, the publicans obeyed the law. An offense means indorsement of the license, and three indorsements spell its extinction. The Saorstat (Free State) government has under consideration the reduction of the number of licensed premises, and the average publican is not inclined to do anything that will decrease his chances for compensation on compulsory retirement.

On St. Patrick's Day the shamrock is as popular in Northern Ireland as in the Free State. The Northerner cannot only wear it, but can wet it in the traditional fashion. The Free State dweller has only two alternatives. He can lay in a stock of his favorite beverage, and enjoy it in the quietude of his home, or journey across the border and drown it to his heart's content.

In bygone days the national festival was a great off day for the Irish people. At one time the drowning of the shamrock was observed with the utmost enthusiasm. Scenes of drunkenness were often accompanied by rioting, and the rioters not infrequently woke up in the police cells, sadder but not wiser men. It was the thing to do and they did it all over again when opportunity offered. Country folk thronged the towns and helped to swell the madding crowds. Occasionally political parties availed of the crowds to stage a meeting to expound their views, but the emblems of party never really predominated.

## New Store Opened Downtown

**OPEN FOR BUSINESS**—A new link in the chain of stores of the McCulloch Drug Company has been added with the opening of the newest and most up-to-date store in the Clark Building, Liberty avenue and Seventh street. Above is a section of the soda fountain, one of the features.

## CROWDS TAX NEW STORE

Crowds which taxed its capacity visited the new McCulloch drug store which opened Saturday in the new Clark Building at Liberty avenue and Seventh street. Souvenirs were distributed to the guests.

The modern fixtures appeared to find favor with the visitors. The store has 50 linear feet of window front in Liberty avenue and Seventh street and there is ample room inside for the many varied displays of merchandise.

"This new store," said the McCulloch announcement, "is the last word, the ultimate syllable in modernity and beauty.

"The Liberty-Seventh McCulloch store adjoins the Stanley Theater. Around it are other theaters, railway terminal stations, hotels, banks, shopping district and food markets.

"The new drug store is on the chief artery from the North Side and municipal cars and interurban lines either pass the door or are but a minute or two away."

L'Isle Joyeuse.....Debussy
Mr. Frauenheim.
Quartet in D Major.....Ottorino Respighi
Allegro moderato.
Andante—Theme with variations.
Intermezzo—Allegretto.
Allegro vivace.
(First time in Pittsburgh).

The Yost String Quartet closed its season last night with a very unusual program. Schenley ballroom was crowded, and the audience was very enthusiastic, an encouraging sign for such music. It is good news that the quartet contemplates another season, and it is hoped that Pittsburgh will respond, for the quality of this organization has constantly improved, and the programs are never trite. Last night better intonation and a more closely knit tone was always apparent. In the Mozart Quartet a new tenderness appeared which was most appealing.

The soloist of the evening was Norman Frauenheim, pianist, who has just returned from a long sojourn in Paris. His offerings were entirely modern with the exception of a Chopin Waltz, given as encore, and which had caught the contagion of latter day writers. In all his playing their is a fresh spirit, tremendous vitality, gorgeous color and profoundly-stirring rhythms. With all his force, Frauenheim imbues all his music with rich poetic fancy and a pagan spirit such as we can associate with no other player. He soon will play an entire recital for Pittsburgh, when we shall be curious to see how he applies his marvelous gifts to the classics.

Frederick's
"The House of Service"

Unloading By Branch Stores This Week
Crowning Sensation
—OF OUR—
Removal Sale

Leases expiring April 1st on buildings occupied by a number of Frederick branch stores which are to be discontinued, we have just received a dozen or more shipments of pianos to add to the lines yet unsold in our Pittsburgh store. We have found that the business accruing to these certain very near outside stores can now be handled more advantageously and economically from Pittsburgh, but we had no idea at the time the management decided on this change of policy that there would be any doubt about our getting into our own building at the expiration of our lease here on May 1st.

In one respect, however, these stocks from nearby towns arriving at this stage of our Removal Sale, taking the place of lines sold out, would be a blessing if we had time to dispose of them at a profit. But profit is impossible now with a huge storage bill staring us in the face in the event we do not succeed in making a satisfactory arrangement before May 1st, to cover the lapse of time which it seems must now ensue before we can get possession of our own building.

*The only alternative therefore is to cut deeper and deeper into our regular prices. The greatest savings of this gigantic sacrifice await you now. If the pianos so offered were not celebrated makes—with generations of prestige behind each and every one of them and all fully guaranteed—the money you can save would not be so amazing. But these are not sale pianos. They are pianos of pedigree. Not cheap products like you usually see advertised at sales.*

*Sounds Like a Miracle. Yet True*

## ALTOONA GIRL INVOLVES MISS PITTSBURGH '26

**Got Her to Pose as "Miss West Virginia" in Contest, She Declares.**

BUFFALO, N. Y., March 17.—Harold E. Orr, assistant United States attorney, said today that an additional charge involving young girls will be placed against Royce Grimm, now under arrest in Detroit on a Mann act charge. Orr is supervising investigation of the case.

Grimm and Mrs. Jesse Gray, formerly Thelma Williams, Miss Pittsburgh of 1926, are under arrest on charges of conspiracy to violate the Mann act. The case will be presented to the federal grand jury upon completion of investigation into the "perfect girl contest" which Grimm held here.

Federal investigation of Grimm's beauty contest business followed complaint of Mrs. F. G. Kish, of Altoona, Pa., who told police her daughter, Helen, 17, was missing from home. When found here, Helen said she had been left stranded by Grimm and Thelma Williams when they went to Detroit. The girl said she came here in answer to a letter from Miss Williams to appear unde the name of "Miss West Virginia."

## Married for Year

**SECRET OUT**— Roszika Dolly, one of the famed Dolly Sisters of the musical comedy stage, has been married for almost a year to Mortimer Davis, son of Sir Mortimer Davis, Canadian sportsman—but it's only leaking out. They're happy, she says.

## MYSTERY FIRE KILLS FARMER

ERIE, Pa., March 17.—Ernest Wolf, 44, farmhand, died in St. Vincent's Hospital today before he could tell how the lower part of his body had been burned to a crisp. Wolf, his clothing almost burned from his body, was found in a barn on the farm of Fred Fuhrer, Kearsage, where he had been employed until last Friday. At the hospital he could not talk, and there are no clues as to how he was set afire.

Corns Lift Right Off!

Hard corns, soft corns, corns between the toes and callouses lift right off! You'll laugh—it is so easy and doesn't hurt a bit!

Just drop "Freezone" on any tender, touchy corn. Instantly it stops aching; then shortly you just lift that old bothersome corn right off with your fingers. It works like a charm, every time. Seems magic.

A tiny bottle of "Freezone" costs only a few cents at any drug store. Try it!

## VETERAN WITH OLD COINS HELD

Because he was displaying to pedestrians at Fourth avenue and Grant street a box of old coins, Cornelius O'Brien, 54, who said he was a gassed war veteran, was taken in tow by police Saturday.

O'Brien's coins were estimated by police to be worth several hundred dollars. Police said the man would not be formally arrested, but would be turned over to the welfare department.

## *Washington Official Draws 'Red Ink' Pay*

WASHINGTON, Pa., March 17.—L. Frank Baker is out of pocket $1,000 for the privilege of serving as recorder of deeds of Washington county in 1927. The law gives him a $5,000 salary, but prescribes his office must "earn" it. Business was so slack last year that Baker not only failed to make his allotted stipend, but had to dig into his jeans to make up the deficit.

Grip Frequently Disorders the Kidneys

—Healy Studio

Lewistown, Pa.—"I had the flu and it seemed to have affected my kidneys. I had terrible headaches and pain in my back from which I was not relieved until I took Dr. Pierce's Anuric Tablets. I only had taken part of a bottle until I was relieved."—Mrs. Dewey Hoffman, R. D. No. 4.

Serious kidney or bladder trouble often follows when one is run down by the grippe. To eliminate the poisons from the system, take Dr. Pierce's Anuric to clean out the kidneys and the bladder, and an occasional dose of Dr. Pierce's Pleasant Pellets, and you are on the high road to health.

Dr. Pierce's Anuric is sold by all druggists; or, send 10c for trial pkg. to Dr. Pierce's Clinic, Buffalo, N. Y. and write for free advice.

# Oil Probers Hit New Clue

## ADVANCE HINT OF STARTLING REVELATIONS

### Testimony by Mystery Witness Prompts Committee To Hasten to Washington.

By JOHN A. KENNEDY,
Universal Service.

CHICAGO, March 17.—Closing its Chicago sessions, the Senate Teapot Dome investigators today left for Washington to run down a new mystery which committee members said promised startling revelations in the now five-year-old scandals.

The new leads revolved around a mysterious witness, "Siddons," who was closeted with Senators Nye and Norbeck for half an hour this morning.

Neither Senator would reveal the nature of the information given by "Siddons," a resident of Washington, Ill.

Committee investigators, however, immediately were put on the trail to check up some of the statements he is said to have made.

If the information proves correct, Siddons will be called to testify in Washington next week, on a matter entirely different than any so far given to the committee.

Senator Gerald P. Nye, committee chairman, expressed himself as "well satisfied" over the results of the sessions here, during which 70 witnesses were questioned.

**NEW LEADS FOUND**

In addition to the Siddons and other "leads" which are expected to prove of material aid, the committee rounded out the story of its previous revelations by establishing, Nye said, that all of the $65,000 in Liberty Bonds which Will H. Hays said he gave Fred W. Upham from the $260,000 Teapot slush fund advance given the G. O. P. by Harry F. Sinclair were exchanged by Upham and credited to "dummy" Chicago contributors.

The committee also established that Hays had been plunging in market operations in Sinclair stocks on tips furnished by Sinclair himself.

Further, the committee dug up some promising leads with reference to the bank accounts of Col. Robert W. Stewart, chairman of the board of the Standard Oil Company (Indiana).

Stewart, it was revealed, made deposits totaling approximately $300,000 in the late fall of 1923 and in January of 1924 purchased $300,000 of Liberty bonds.

Just how this will be linked up as material to the Continental Trading Company deal is still speculative, but Senator Nye thinks the bank entries at least deserve careful checking and even more careful explanation.

Whether Stewart may be recalled to the stand to explain the bank deposits still is undecided. He already is under indictment for contempt of the Senate for refusing to tell the committee all he knows.

**G. O. P.-DEMOCRATIC PACT**

There was some more testimony in the record today with reference to the alleged pact between Democratic and Republican treasurers to keep secret their 1923 contributions.

Irl B. Hipsley and A. V. Leonard, secretaries to the late Fred W. Upham, former G. O. P. treasurer, again took the stand to back up their stories of yesterday about an alleged agreement between Upham and Wilbur Marsh, former Democratic treasurer, not to file the 1923 lists.

The committee today revealed an interesting method used by Upham in securing contributions to the 1923 deficit.

Three score Chicago millionaires and industrialists, most of whom have testified here, helped foot the debt.

GOODYEAR AUTOMOBILE AND TRUCK TIRES

## Geared Up to Give Service

HERE, at this up-to-date, new, drive-in station, practical tire men are in high gear to give you service. We don't expect to see much of our families after the season opens up. It's our job to see Pittsburgh motorists drive in safety and comfort, and with real economy. Takes all our time. We like the tire business.

# 1,000 More Marines Sent to Nicaragua

### Latrobe Must Pay Derry Twp. for Land

GREENSBURG, Pa., March 17.—Latrobe school district must pay Derry township $4,162.10 for annexing tracts of the township land in 1922, 1923 and 1924, according to a decree issued in equity court here.

### Kissed Man in Bus; Husband Asks Divorce

NEW PHILADELPHIA, O., March 17. A kiss in a public automobile bus is the basis of a divorce suit filed here by Warner Anderson, of Dover, against his wife, Lucille Anderson. The kiss, it is charged, was not for the husband. Another man got it.

### Edinboro Normal Renames Crawford

MERCER, Pa., March 17.—Dr. C. C. Crawford has been re-elected principal of the State Normal School at Edinboro, at an increase in salary, Prof. H. E. McConnell, county superintendent of schools and a trustee of the Normal School, announced.

## DEVIL DOGS GO TO KEEP PEACE DURING VOTING

### Reinforcements Want to Take Field Against Sandino; Will Sail Soon.

WASHINGTON, March 17.—(AP.)—As a sequel to Nicaragua's failure to enact legislation providing for American supervision of her next presidential election, plans were under way today for dispatching 1,000 more Marines to that country to help enforce the Stimson peace agreement.

The action to send the additional two battalions to the Central American republic was announced at the Navy Department late yesterday and soon afterward President Coolidge was represented as believing that the United States can still be of assistance to Nicaragua in choosing its next president, despite the failure of the supervisory enabling legislation.

**WILL SAIL AT ONCE**

The Marines, most of whom will be taken from the scouting fleet and Atlantic coast ports, will embark as soon as sailing space is obtained and other details of the expedition are completed. Some are expected to leave within a few days.

They will augment the 2,700 Marines already in Nicaragua policing the country and trying to capture "Gen." Sandino, last of the native leaders to decline to lay down their arms under the Stimson truce, which also provided for American aid to see to it that the next elections are carried out in a legal and orderly manner.

Secretary Wilbur says the new Marine force will be used principally for maintaining order during the balloting for a successor to Adolfo Diaz, now president of the little country. They will not be used in the field against Sandino, he declares, although some of them perhaps will be employed for guard duty and other marine activity there.

President Coolidge feels that while the McCoy bill providing for American supervision of the Nicaraguan elections is not absolutely necessary to the carrying out of the Stimson agreement, it would have been better if the Nicaraguan Congress had adopted it.

He is of the opinion that the presence of marines there already has achieved great good by stopping the civil war between the Liberals and Conservatives, by bringing a year of tranquility to the troubled republic, and by permitting many of its citizens to return to their former occupations.

**U. S. IS OBLIGATED**

Now, in his opinion, it is up to the Washington government to devise some means of meeting the election supervision problem, an obligation it assumed when the present governor general of the Philippines, Henry L. Stimson, brought the warring factions together last year as personal representative of the executive.

When recent indications pointed to failure of the McCoy bill, the State Department informed the Nicaraguan government, through Minister Eberhardt at Managua, that if the legislation was not enacted the United States would be forced to adopt some other step looking to the fulfillment of its duty under the Stimson agreement. Whether the sending of more marines is the step the department had in mind was a question unanswered officially here today.

### 8-Day Clock on Job Every Day For 53 Years

KITTANNING, Pa., March 17. JAMES M. SCHRECKENGOST, of Yatesboro, has an eight-day clock which has been ticking away for 53 years, without missing a day. It was formerly owned by Ross Milliren, former register and recorder of Armstrong county.

### Keystone Club Chief To Go on Job May 1

Fred H. Crawford, newly-elected general manager of the 21-story home of the Keystone Athletic Club at Third avenue and Wood street, is to take up his duties as assistant to the building and house committee of the organization May 1, it was announced last week by Charles J. Caspar, vice president. Mr. Crawford comes to the Keystone Club from the Cincinnati Club, where he was engaged in the same capacity.

## Tragedies traced to Goitre

### Diseased Thyroid Gland Cause of Many Unhappy Lives

That the freedom from goitre, often unsuspected, restores wrecked homes to happiness, and altered characters to normal, is the startling discovery of a noted Battle Creek goitre specialist.

Histories of thousands of cases treated by him show not only the disappearance of goitre and its symptoms but a corresponding and resultant return of the patient to normal disposition and happy home life once more.

And why not? Science tells us that long before the goitre becomes visible, before its presence is even suspected, its poisons are irritating the nerves, interfering with right mental processes.

Nerves become hypersensitive. Restlessness and a craving for excitement follow. The patient, not realizing her condition, begins a restless search for new thrills, keener emotional stimulation. This

Pretty Marie Young, whose goitre reduced 3½ inches in 6 weeks—and her disposition changed accordingly.

may end anywhere in tragedy all too often.

**Too Much Jazz**

"For several years," wrote a distracted mother to this specialist, "I worried over my daughter's growing wildness. Remonstrances only led to scenes. Hours became later. Parties more questionable."

What a common picture of lovable, high-strung modern youth! In how many anxious homes is it duplicated today.

"Then came your remarkable book on goitre," continues Mrs. Young's letter, "and Marie's subsequent cure as you know. Today our girl is her natural, sweet, happy self, content with the normal pleasures of a girl's life. Saved from, we know not what sorrows."

**Happy Homes Restored**

Advanced stages of thyroid gland poisoning, still often unsuspected, cause abnormal irritability, frequent mental disturbances, hysteria-like unreasonableness. What love or home is proof for long against such attacks?

"Not mine," said Jack Howard. When charming little Mrs. Howard gradually changed from companionship to nagging, Jack packed up and left. Happening upon the goitre book written by this same specialist he recognized the symptoms and induced his wife to take the treatment.

"Today," says young Howard, "with the goitre gone and Molly herself again, there isn't a happier home in the world. And just to think where we might have been—!"

These cases are typical of literally dozens traced to this most successful physician.

**Young Girls Victims**

A glance at almost any group of school girls and young women shows an alarming proportion of them with gently swollen throats, indicative of goitre. In some localities as high as 80% are affected.

Contrary to popular belief the size of the goitre has very little to do with its seriousness. Often it is invisible. Often it results in mental slowness rather than mental stimulation, in physical undevelopment, dizziness, headaches, choking sensations.

**What to Do?**

An understanding of the **causes** of this all-too-prevalent disease would serve to prevent countless cases. An understanding of the **symptoms** would discover its presence in the early stages when it is most easily checked. An understanding of its **proper treatment** would bring blessed relief to sufferers, and in most cases even where the disease is already advanced.

This knowledge is found in a recent book on goitre, referred to above, and which the Doctor expressed himself as glad to send without charge or obligation of any kind, to anyone interested.

**New Book Tells How**

"Goitre, Its Causes, Its Dangers, Its Treatment," as this authoritative book is called, is perhaps the most complete and informative non-technical book ever published on the subject. It is written by the one man best qualified to write such a book. He has specialized in this one disease for over 20 years, and has, without doubt, more cases to his credit than any other one person.

This book, to anyone touched by this tragic disease, or with loved ones who may be affected, is invaluable. It should be in every household. Every mother, every girl and woman, should read it. Before the supply is exhausted, take advantage of this extraordinary offer. Send for a copy of the book. It is free. It is given to our readers without obligation of any kind.

# Cruiser Bill Passes

## HOUSE FAVORS ACT BY VOTE OF 287 TO 57

**Fight to Block Final Vote Ends Abruptly — Senate Takes Week-End Recess.**

WASHINTON, March 17.—(AP.)—Steered by Pennsylvania's veteran legislative pilot, "Tom" Butler, the 25-cruiser Navy building bill today went through the House safely by a vote of 287 to 57, and this constituted the major activity of the day in Congress.

The Senate rested over the week-end, and none of its committees were in session. Another meeting of the radio bill conferees was the only legislative activity in that end of the Capitol.

House committees also were taking it easy for the day with the exception of the foreign relations group, which had Secretary Wilbur on hand to explain Navy Department objections to the Burton plan for banning exportation of arms to belligerent nations.

The Navy secretary found himself promptly in hot water over some statements made in the exposition of departmental views prepared for his signature by the general board.

The end of the House Navy bill fight came suddenly. Last night a prolonged battle over proposed amendments blocked a final vote. It took only five minutes and no talk to shove it through today, although a preliminary quorum call took up an additional half hour.

Representative Strong of Kansas then began an address urging his idea that some method or revaluing gold be evolved in a world stabilization movement. The buzz of conversation on the floor kept up as he talked, repeated poundings of Speaker Longworth's gavel failing to stop it, and it looked as though members were restive and wanted to make a short session of it.

The Garner bill to get strayed or otherwise wandering cattle back from Mexico without paying duty on them was next in order.

## *$48,500 Disposed of In 3 Probated Wills*

Mrs. Margaret Moeller, late of Millvale, disposes of her $2?,000 estate to her five sons and a daughter in equal shares, according to her will.

Samuel A. Purvis, Pittsburgh, directs that his estate valued at $16,000 be given to his son, William E. Purvis, after a bequest of $300 is made to Miss Bertha Hollatz, the testator's housekeeper, if she remain d in his employ until his death.

Ellen Noone, Lake street, North Side, devises the bulk of her estate, valued at $10,500, to her nephew, Timothy Dissitt. The remainder of the estate is divided equally among two nieces and four nephews.

## TWO MISSING IN FIRE, SAFE

Fire destroyed five frame houses in Arcena street early Saturday and sent five families hurrying from their homes to safety. A fireman and a policeman were slightly hurt.

Firemen dug several hours through the ruins when Mrs. Sarah Belbos, 60, of 2145 Arcena street, and her son, John, could not located. They were finally found, safe, Mrs. Belbos in the Tustin street home of her landlady, and the son working at his place of employment.

Other homes destroyed were at 2139, 2141, 2142 and 2147 Arcena street. Hoseman Harry Sellers was cut and Wagonman Thomas Martin was burned in rescuing Anna Belt, Negro, and her two children from their blazing home.

**Charleston Dance Contest Judged By England's Leader**

Miss Leslie—Sutton, chief judge of the Charleston contest for England, writes: "My unique position in the dancing world today would never have happened if I had not taken care of my health.

I constantly had that tired out, depressed feeling, with sick headache, indigestion, biliousness caused by the poisons of constipation.

Your mild laxative has been of valuable assistance in keeping my system in a daily healthy condition."

**Noses and Throats Freed of Catarrh!**

Hundreds of noses and throats all over this country from Maine to California have been freed from Catarrh with its annoying features. Those noses and throats were pretty bad—some of them. They had bothered their owners for long periods. The noses had been stopped up—mucus formed—mucus gathered and made discharge within had to be constantly blown out on handkerchiefs. Some of this mucus dropped into the throats belonging to the above noses and made them raw and sore, with an annoying constant tickling sensation.

Little wonder that the eyes accompanying these noses and throats became watery and weak—the breaths foul and the sense of smell gradually disappearing.

But what a change has come over these noses and throats through the Method of treatment originated by Catarrh Specialist Sproule, 610 Cornhill Building, Boston. They became once again the clear, sweet, useful portions of the body their Creator intended. The nasal discharge stopped, because there was no more inflammation and Catarrh germs to feed it. The eyes, the noses, the throats became free and clear. Those stupid dull feelings vanished—and the happy individuals met their friends frankly grateful they needed no longer worry over what serious thing their Catarrh might develop into.

**Free Consultation About YOUR Nose and Throat**

Wouldn't you like to know how your nose and throat might be freed of its Catarrh? Then just sign your full name and address and mail to Specialist Sproule's Office.

**This Coupon** entitles readers of this paper to consultation free on Catarrh.

# DRY AGENTS EXACT HEAVY TOLL IN FEB.

**Pennington's Activities Inflict Loss of $1,705,180 on Violators of Prohibition Law.**

Manufacturers and dealers of moonshine whisky and other violators of the national prohibition law, in the division under the supervision of Prohibition Administrator John D. Pennington, sustained losses in February aggregating $1,766,180 by raids and seizures by prohibition officers, according to the monthly report of the prohibition enforcement authorities.

To inflict the damage the government spent $45,000, which was equivalent, the report sets forth, of a bootleg loss of $37.89 for each $1 it cost the government.

The enforcement unit, operating under the direction of Joseph A. Frayne, assistant administrator, raided 104 moonshine whisky distilleries in which were seized 119 stills, capable of producing 7,960 gallons of whisky daily. The raiders also seized five "wildcat" breweries, a alcohol plant, 58 automobiles, 5,596 gallons of whisky, 2,189 gallons of alcohol, 2,256 gallons of wine, 3,282 gallons of beer and 249 gallons of other contraband liquors. The estimated bootleg value of liquor seizures was placed at $68,687; the automobiles at $22,400; distilling equipment at $61,538 and plants seized at $1,652,855.

In connection with the raids and seizures, 401 prisoners were taken; 176 of American birth and the others representing 18 other nationalities. The total number of raids were 352, the report shows. It also sets forth that fines aggregating $47,622 were imposed at the February term of the Federal District Court on violators of the prohibition law, in addition to penitentiary sentences totaling 18 months and jail sentences aggregating 1,188 days.

The permit division, under the jurisdiction of R. E. Joyce assistant administrator, made 123 inspections of permit holders, resulting in revocation of five permits and recommendations for revocation of five others. The legal division, under direction of Louis E. Graham, chief legal adviser to Mr. Pennington, filed in Federal Court 104 libels against automobiles, liquors and other alleged contraband seized by prohibition agents, and sold 42 automobiles and other property seized in raids, which placed $4,329.50 in the coffers of the United States Treasury.

**STOMACH Troubles Vanish**

DR. YOUNG CO., Dept. 58, Jackson, Mich.

**Be Little that's the Charm**

**Banish Fat in this easy way**

All ideas of beauty, style and fitness call for slender figures now. All who seek to please, in movies or society, must banish excess fat.

Note how many do that. In every circle you can see that most folks now are slender. Fat is the exception.

One great reason is Marmola prescription tablets. People have used them for 20 years—millions of boxes of them. They have told the results to others. The slender figures now seen everywhere are largely due to that.

No abnormal exercise or diet is required, though moderation helps. The results of Marmola come through supplying a substance which Nature employs in nutrition. Its purpose is to turn food into fuel and energy, rather than into fat. The use is based on wide research and experiment.

Every box of Marmola contains the formula, also the reasons for results. This is to let you know just why it acts and avoid any fear of harm.

Marmola has for two decades held top place in this field. Go learn the reason. Watch what it does for beauty, health and vitality! Then tell your friends who need it. No one can afford to be abnormal when reduction is so easy. Order now—before you forget it.

Marmola prescription tablets are sold by all druggists at $1 per box. If your druggist is out, he will get them at once from his jobber.

# WETS QUESTION SENATOR BORAH

WASHINGTON, March 17.—(AP.)—Senator Borah, of Idaho, who has been asking presidential candidates how they stand on prohibition, now is asked for his own views on the subject from its moral and economic standpoint. The questions have been put by Rear Admiral W. W. Kimball, retired and Walter D. Wilcox, Washington members of an information committee of the Association Against the Prohibition Amendment.

They wrote the Senator asking whether he would favor legislation to permit searching of ships and refusal of passage through the Panama Canal of liquor-carrying vessels, and whether he thinks previously innocent acts were changed in their nature by enactment of the Volstead law so that they now involve moral turpitude.

Another question sought the Senator's opinion of "A member of Congress or other United States official who drinks alcoholic beverages openly here in Washington."

## *Dogs Wild Animals, So Boys Go Free*

WHEELING, W. Va., March 17.—Dogs are wild animals until proven otherwise. And it is no crime to "steal" a wild animal.

That was the defense offered by Attorney J. Leonard Baer for James and William Blattner and Robert Shinski, accused of stealing two dogs.

Police offered no logical comeback to the attorney's stand, and the boys were discharged by Squire Walter Wickham.

Another Record Broken...

Cunard carried 269,167 passengers during 1927 . . .

For the Fifth Successive Year CUNARD and Associated Lines carried more Transatlantic passengers than any other line or associated group of lines.

. . . Again the travel-wise of America and Europe reaffirm in irrefutable figures . . . their preference for Cunard ships and service.

WATCH OUR BASEMENT ADS EVERY DAY THIS WEEK

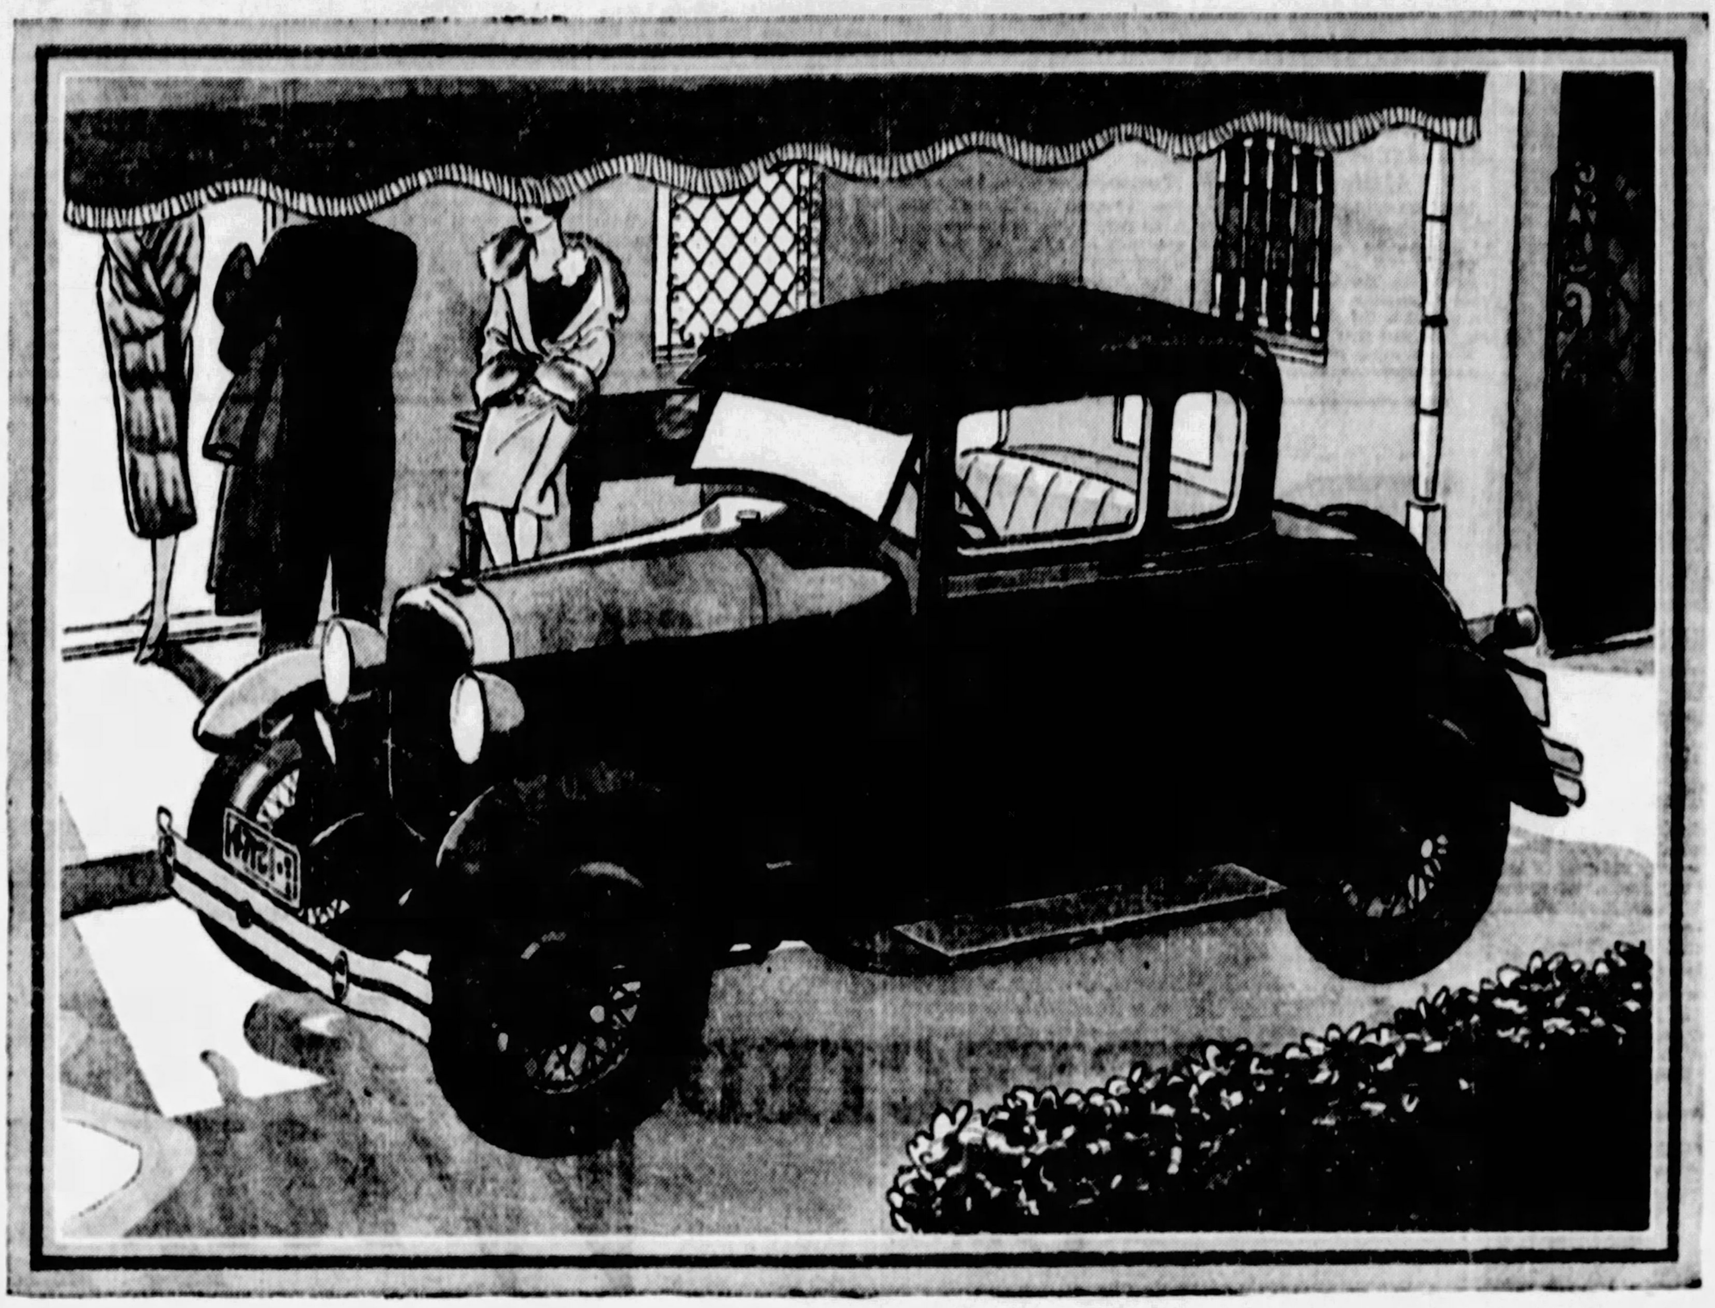
*All the features of the new Ford cars are brought to you in this new Coupe . . . steel body . . . smart low lines and beautiful colors . . . 40-horse-power engine . . . remarkable acceleration . . . 55 to 65 miles an hour . . . 20 to 30 miles per gallon of gasoline . . . four-wheel brakes . . . Houdaille hydraulic shock absorbers . . . new transverse, semi-elliptic springs . . . Triplex shatter-proof glass windshield . . . typical Ford reliability and long life . . . low first cost and exceptionally low up-keep cost.*



# You ride in *complete comfort* when you ride in the new Ford car

MANY factors have contributed to the unusual comfort of the new Ford.

First of all, you are comfortable in mind because you are sure of the mechanical performance of this car. You know it has been built to endure—to give you thousands upon thousands of miles of faithful, uninterrupted service.

Physical comfort is yours because of the roominess of all of the new Ford cars, the restful seat cushions set at just the right tilt, the low center of gravity, and the Houdaille hydraulic shock absorbers.

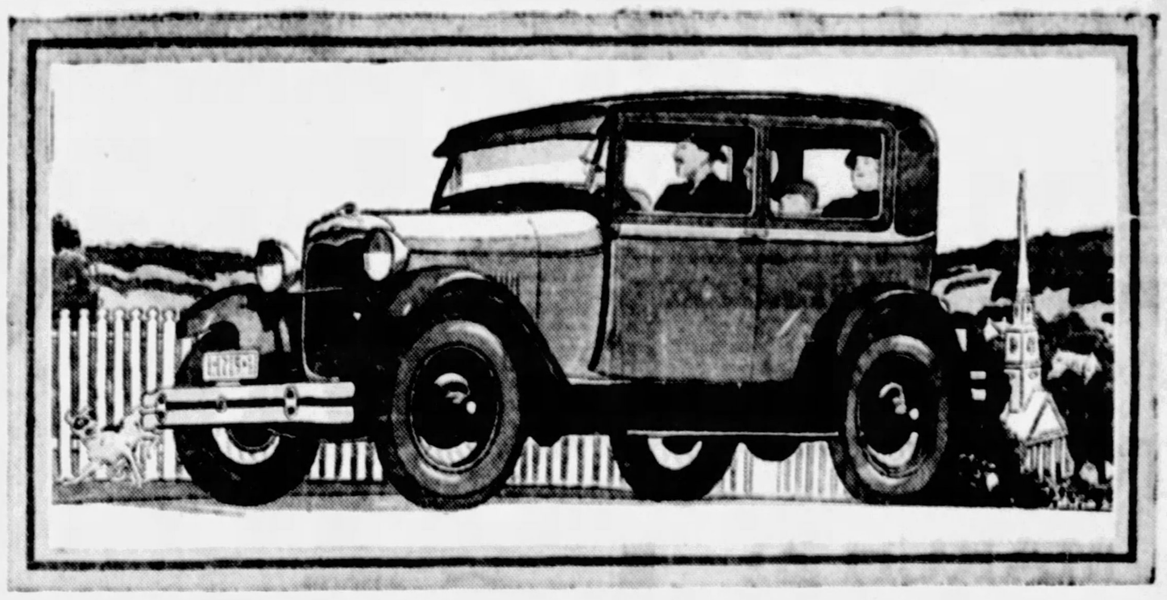
But the most important reason for the easy-riding comfort of the new Ford is the low ratio of unsprung weight to sprung weight, due principally to the new transverse springs.

The riding quality of any car, as you may know, depends to a great extent upon the ratio of the weight carried above the springs (the sprung weight) to the weight carried below the springs (the unsprung weight).

The less the unsprung weight in ratio to the sprung weight, the easier riding the car will be. If the weight below the spring is unusually heavy or out of proportion to that above, it imparts road shocks with greater force, thus lessening riding comfort.

In the transverse type of spring used on the new Ford, but one spring is used on each axle, the spring being bolted to the frame at the center, or heavy part, and suspended from shackles on the axle. By this principle of suspension the weight of the springs becomes part of the sprung weight of the car instead of the unsprung weight.

Road shocks are imparted at the outer flexible end of the spring. The most sensitive part of the spring thus receives the shock first, diminishing the effects of sharp impacts before they reach the sprung weight of the car. Rebound of the springs to such impacts is controlled by the Houdaille hydraulic shock absorbers, especially designed for the new Ford car. These shock absorbers give the spring a free range of action when the car is being driven over smooth highways. There is instant shock-absorbing effect as soon as the car encounters any bump on the road. Other factors in the low unsprung weight of the new Ford are the construction of the front axle and the new rear axle housing, which is made entirely of steel and is therefore lighter—and stronger—than rear axle housings made of malleable iron castings.

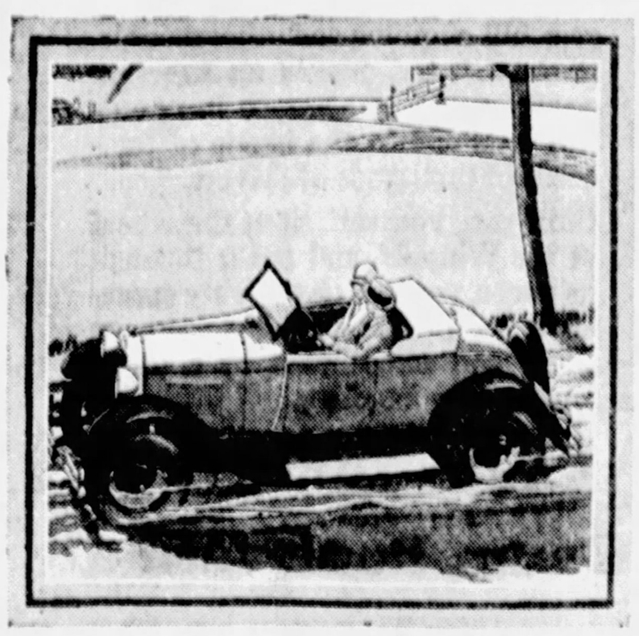


*Restful riding comfort is an outstanding feature of the new Ford Tudor Sedan. A great family car because of the generous room provided for all five passengers.*

There are definite understandable reasons, therefore, why the new Ford car is one of the most comfortable cars on the road today.

Prove this for yourself by arranging for a demonstration. Check up on comfort, on speed, on power, on acceleration, on hill climbing, on gasoline economy, on safety, on reliability, on low up-keep cost, and you will know there is nothing quite like the new Ford anywhere in design, quality and price.

The new Ford Roadster sells for $385, the Phaeton for $395, the Tudor Sedan for $495, the Coupe for $495, and the Sport Coupe, including a wide, substantial rumble seat, for $550. (All prices F. O. B. Detroit.)



*As speedy as it looks is the new Ford Roadster. And so comfortable and easy-riding that even rough roads may be taken at a fast pace.*

# Music Dispute Costs British Naval Officers Jobs

## JAZZ BAND AT PARTY ON SHIP BRINGS CLASH

**Captain Defies Admiral in Arrangements for Gala Affair—Admiralty Criticised.**

LONDON, March 17.—(A.P.)—A dispute over music by a jazz band for an admiral's dance is said in naval circles to have caused the incident aboard the battleship Royal Oak because of which three officers were suspended and newspapers today were clamoring for the admiralty to explain.

The papers criticised the admiralty, saying the incident happened nearly a week ago and that the naval heads should be fully informed by now. The papers demanded that it be cleared up quickly.

Rear Admiral Bernard St. C. Collard, commanding the battleship squadron at Malta, Capt. Kenneth G. B. Dewar, commanding the battleship Royal Oak, and Commander H. M. Daniels, of the same ship, were suspended. The admiralty said it lacked information and could not explain the trouble, yet this story was told in naval circles:

**DEFIES ADMIRAL**

When the Royal Oak, the flagship, arrived at Malta, Admiral Collard planned to stage a party and invited the elite of Malta.

The battleship's jazz band would furnish the music, announced the admiral.

It would not, said Capt. Dewar. Commander Daniel backed up his captain.

He had no objections to a dance aboard the battleship, said the captain to the admiral in diplomatic language, but if the admiral wanted jazz he had better import a band from the shore to pipe for his dancing.

The boys had too much work to do in the day, continued the captain, and he did not propose to permit them to stay up most of the night for the amusement of the ship's guests—even if the admiral gave the dance.

**THREE ARE SUSPENDED**

Capt. Dewar and Commander Daniel were suspended by a court of inquiry at Malta and came to London. The admiral also was suspended and his flag "struck" from the Royal Oak, but he stayed at Malta.

## Shriners

**DINNER**—Fred H. Riegelmeier is in charge of decorations for the annual dinner dance of the Syria Temple Automobile Club to be held in the Syria Mosque Wednesday.

### *Shrine Auto Club Will Hold Dance*

Shriners of Western Pennsylvania, who are members of the Temple Automobile Club, will meet in their mosque on Wednesday, March 21, for their annual dinner dance. Harry Kramer is general chairman. Fred H. Riegelmeier, in charge of decorations, has converted the mosque into a "Garden of Hawaii," and a beautiful representation of Honolulu scenery has been accomplished.

### *All Shenango Works Mills to Resume*

NEW CASTLE, Pa., March 16.—The 40 mills at the Shenango works of the American Sheet and Tin Plate Company will be placed in full operation on March 26 for the first time 7 months. Many employes, let out while the plant was operating only part time, are being notified to return to work.

## Film Fire on Ship Perils Passengers

International News Service.

NEW YORK, March 17.—More than a thousand passengers aboard the Italian liner Diulio, narrowly escaped disaster when the ship's motion picture projection room caught fire during a raging storm, it was revealed today when the ship docked.

Passengers told of the heroism of Mrs. Vaughan Clarke and Miss Hazel Dare Wylda, of New Orleans, who helped check the fire and sounded the alarm.

The first cabin passengers were viewing a film, while the liner rolled in a 90-mile gale.

As the picture neared the end, there was a flash, and the image disappeared from the screen. Flames poured through the window of the projection room.

Mrs. Clarke ran toward the windows, and, disregarding the fire, slammed them shut.

Miss Wylda ran to the purser's office and gave the alarm.

Capt. Alfure Romano ordered the crew to fire stations, and hurried to the salon.

Hardly able to keep a foothold on the rolling deck, sailors poured streams of water from hose lines into the burning projection room.

A dozen heavy glass windows of boat deck cabins were cracked by the heat before the fire was extinguished.

### *Seeks to Divorce Alleged Bootlegger*

Ethel Lynette, married less than two weeks and still under age, wants a divorce from Samuel Lynetta because, it is alleged, he wanted her to travel with him on whisky-selling expeditions.

**DRINK HOT TEA FOR A BAD COLD**

Get a small package of Hamburg Breast Tea at any pharmacy. Take a tablespoonful of this Hamburg tea, put a cup of boiling water upon it, pour through a sieve and drink a teacupful at any time. It is the most effective way to break a cold and relieve grip, as it opens the pores, relieving congestion. Also loosens the bowels, thus breaking a cold at once.

It is inexpensive and entirely vegetable, therefore harmless.

(Advertisement.)

## Gas Forces Woman To Sleep In Chair

"Nights I had to sit up in a chair, I had stomach gas so bad. I took Adlerika and nothing I eat hurts me now and I sleep fine."—Mrs. Glenn Butler.

The simple mixture of buckthorn bark, glycerine, saline, etc., (known as Adlerika), has a most surprising DOUBLE action. First, it acts on BOTH upper and lower bowel (most medicines act on lower bowel only) and removes foul matter that often poisoned the system for months. Second, Adlerika clears all GAS and sourness from stomach and bowels, bringing INSTANT relief from stomach trouble. And in addition, Adlerika removes metabolic poisons which cause neuritis, rheumatism, etc.

Dr. H. L. Shoub, New York, writes: "Adlerika, in addition to its intestinal cleansing, checks the growth of intestinal bacteria and bacilli."

Dr. J. Weaver: "In my 50 years' practice, I have found nothing to excel Adlerika."

J. E. Puckett: "After using Adlerika, I feel better than for 20 years. Awful impurities were eliminated."

It will astonish you the great amounts of poisonous matter Adlerika brings out—matter you would never believe was in your system, in chronic constipation, gas bloating, sour stomach and sick headache, just ONE spoonful Adlerika brings wonderful relief. At leading druggists. Sold in Pittsburgh by May Drug Co. and other druggists.

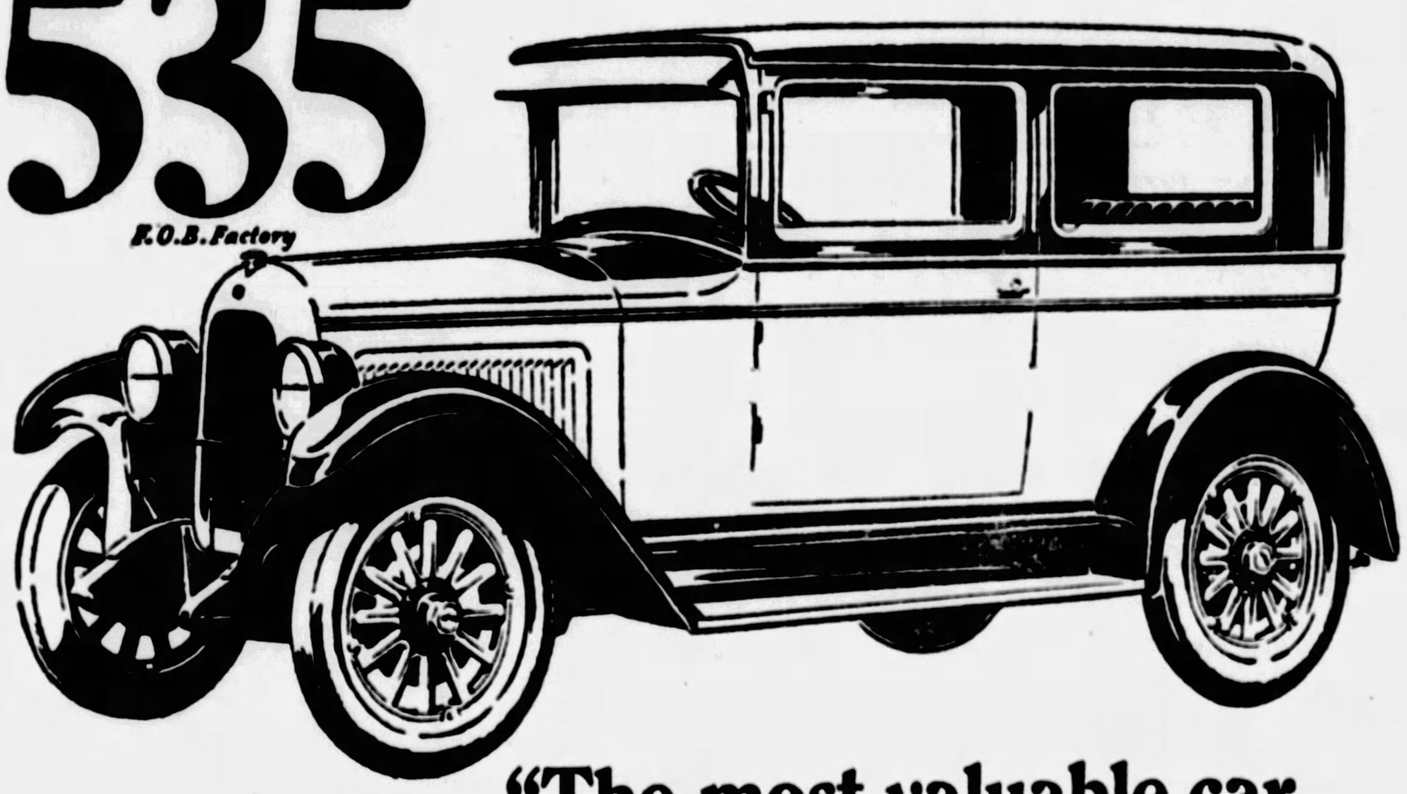
## The PERFECTED Whippet Coach

## $535

F.O.B. Factory



**"The most valuable car ever offered for so little money"**

TO KNOW how much greater value is offered you in the perfected Whippet, compare its many features with what you get in other light cars.

**Advanced Engineering**

When the first Whippet was produced it was far ahead of competition. And the perfected Whippet is still ahead of the field in modern engineering design. It has a drilled crankshaft for full force-feed lubrication, and silent timing chain as used on the finest custom cars. It has the only light car power plant which actually *doubles* its rated horsepower.

The Whippet holds the A. A. A. Coast-to-Coast Economy Record with an average of 43.28 miles to a gallon of gasoline. No other car in its class has ever shown such economy. It holds, also, many speed, second gear, hill-climbing and other records. In short, it has *proved its superior qualities of performance* in countless tests and in the hands of hundreds of thousands of drivers.

Until *you*, yourself, sit at the wheel of the Whippet, and put it through its paces, you can never truly appreciate its liveliness, its pickup, its speed and smoothness, its comfort and its easy handling.

# FAIR SEX IS THRILLED BY SPRING MODES

### Color Continuity Demands Smart Dresser Match Gown With Shoes of Same Shade

It's such a gloriously enthralling problem this year—choosing shoes.

Did you ever see a little urchin standing fascinated before the candy counter, trying to make up his mind about what he will buy with his nickel? The pink gum drops do look so good. And there are those yellow corn candies; you get a lot of those for a nickel. But the grimy little finger finally points unwaveringly towards some huge pieces of fudge, each with a half walnut-meat on top.

And so we feel about the glamor of the shoes for spring, 1928. They're so new and there's such endless variety that we just can't decide. But the one thing about the new shoes that is positively thrilling to feminine hearts is that they have color. Yessir! Beige and blue and green and yellow—and whatever you like!

For months back the clever advertisements have been telling us about "color in the kitchen." We've heard all about the shiny red dishpans, and pretty blue paring knives, and green what-nots. (Almost any day we women may expect to see an advertisement for bright red soap to "bring beauty to the dish-water"!)

**PLAY COLORFUL PART**

But color in shoes! Well, that's different. Every feminine from 'teens to eighties knows that here is something artistic and really beautiful. She may match the color of her gown or coat—accent the color note of hat or bag—or match her lipstick, if she chooses. Anyhow, in this day of returning femininity and frills, shoes play an important and colorful part.

Color continuity is one of the most exacting fashion dictates of the hour. Never before have we watched dress, coat, hat, shoes, hose, gloves, even handkerchief — never before have we watched them with such an analytical and color-fastidious eye. They must all decidedly "belong" together. Not merely second cousins, but real honest-to-goodness close family relatives, with family characteristics.

**BIEGE PREDOMINATES**

No longer may we think "shoes is shoes." They are more than mere footwear; they're a most important part of the "tout ensemble." Wearing black shoes with a tan ensemble this spring would be as incorrect as wearing orange color on St. Patrick's Day. It just isn't done!

As beige is without doubt the outstanding fashion shade for coats and frocks, of course the footwear has caught the color harmony and given us beige shoes. Every shade of beige from the very pale tint called "egg-shell" to the golden tan, called "honey beige." You'll find these beige shades predominating in shoes for sports, for street, for afternoon—and they're present in the evening.

Probably honey-beige is the most popular that is being sponsored by fashion. It is rightly named, too, for it has that rich tint that is exactly like honey.

There's a reason for its unbounded popularity, for it is entirely practical. It blends beautifully with any of the tan shades that you might choose for your coat, and goes just as smartly with the contrasting shades, such as blues and greens.

### *Snakeskin Survives Despite Maker's Ban*

It is said by all the smart bootmakers that snake is gone for good, that nothing can make them revive it again, yet one sees quite a good many black patent pumps with snake heels, and a narrow binding about the throat.

The best walking shoe seen in the past month was of brown crocodile with covered Cuban heels of plain brown leather; ankle and instep straps fastened directly in the center of the instep with gold slide buckles.

### *Hats, Handbag, Shoes To Match in Spring*

The spring costume ensemble will show increasing attention to the matching of millinery, handbags and shoes. Hosiery will be worn in harmonious contrast, but the smart thing now is to match the three costume accessories, as just mentioned.

**Birthday Cake**

The most unique birthday celebration offer ever made! Come in—everybody! A piece of birthday cake in a pretty souvenir box—FREE to every visitor tomorrow! They're choice morsels baked by Sander & Company.

And the big birthday cake on our main floor is worth a trip downtown! It's a masterpiece of the baker's art—a monster cake exquisitely decorated by a master pastryman whose creations in baking adorned the tables of Europe's kings! See this birthday spectacle!

***A One-Day Rug Sale***
**9x12 Velvets**
**$26.22**

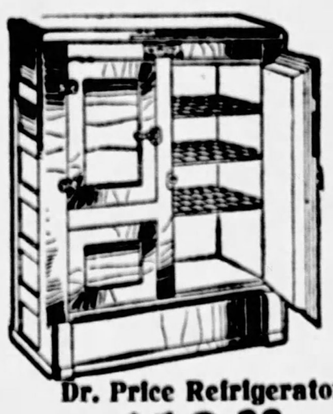
A choice lot of superb rugs set aside just for this one-day birthday selling. Closely woven, in the newest Spring patterns and hues.
*$3 Monthly*

**9x12 Axminsters**
**$34.22**

Heavy, high, silky pile Axminster rugs that are regularly $50. Choice patterns; excellently woven coverings. A special selling.
*$4 Monthly*

**9x12 Congoleum**
**$5.22**

Genuine Gold Seal Congoleum in 9x12 size, without borders. Attractive patterns in Spring's freshest colors.
*$1 Monthly*



**Dr. Price Refrigerator**
**$19.22**

A special birthday price on these famous Dr. Price refrigerators that are noted for their hygienic construction and ice-saving qualities. They are so scientifically built that hospitals indorse them. It's the popular three-door side icer style.
*$2 Monthly*

***Come! See the Big Birthday Cake***

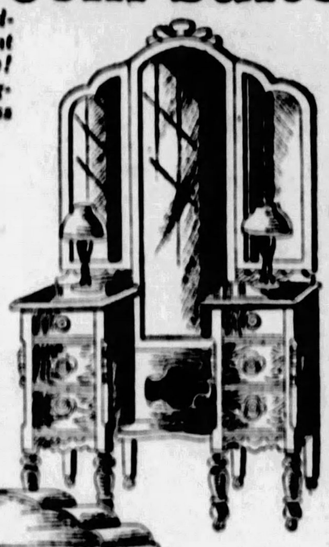
**One-Day Price Sensation**

**This $200 Bedroom Suite**

*By arrangement with a very outstanding furniture manufacturer, we present this most extraordinary bargain tomorrow! We received a special discount in recognition of our birthday. This saving we pass on to you in its entirety.*

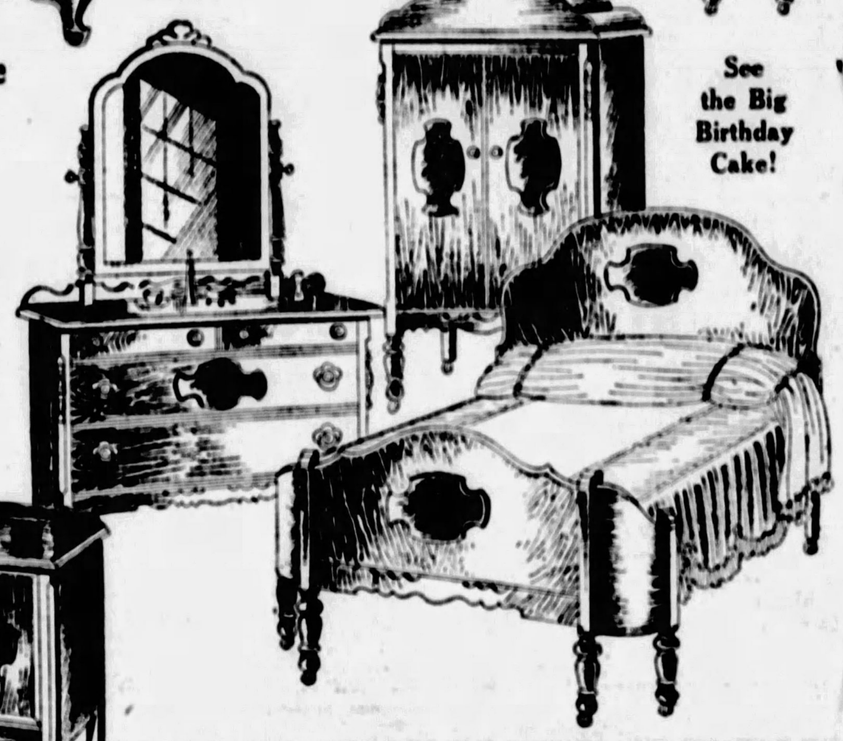
**$122**

Exceptional value—greater than one might hope for even during May-Stern's birthday. The charmingly fashioned pieces include a large 50-inch dresser, canopy top chifforobe, full vanity and bow-end bed. Of Walnut veneers, attractively finished, in combination with other hardwoods; duo tone overlays; dustproof.
***$10 Monthly!***



**Serpentine Front Suite In Jacquard Velour**
**$122**

Unusual grace of line and unusual quality for such a remarkably low price. Both sides of cushions, arms and fronts in jacquard velour; sides and back in velour; famous Nachman inner spring construction; fashionable serpentine design. Sofa, club chair and fireside chair.
*$10 Monthly*



**See the Big Birthday Cake!**

**10-Piece Dining Suite**
**$122**

Again offering the utmost in this birthday value! A stately furnished dining room stylishly complete with a smart decorated tea wagon. The suite is of Walnut veneers combined with other hardwoods, and the rich, warm brown background forms a delightful contrast for the darker tone panel overlays artistically applied. Besides the colorful tea wagon, the group includes the tall grilled door China cabinet, the large 60-inch buffet, the extension dining table, five side chairs and host chair with shaped panel backs and genuine leather seats.
***Only $10 Monthly***

***A Birthday "Surprise" Offer***

**22 New Players**
**$222**

We wired the player manufacturer, "Schirmer," for his special co-operation in order that our music department could take part in the birthday sale with a super-sensational value never before equalled! And now—here are 22 players at only $222.

**Brand New $500 "Schirmers"**

These 22 players are the pride of the "Schirmer" artisans, for they are superb instruments with latest improved action, distinct, bell-like tone and are in cases of a rare elegance and richness of wood tone. They are equipped with automatic tracking device and latest expression levers. To sell instruments of such quality for so little as $222 is a merchandising achievement without parallel.

***50 Rolls and Bench FREE! . . . $10 Monthly***

**The 'Lloyd' Looms Contribute 'Their Bit' for the Occasion**

**New Lloyd Creations**

The newest styles in baby vehicles for smart youngsters now birthday priced. The Lloyd loom-woven products without peer.

**Lloyd Pullman Carriage**
Extra comfort for baby; easy riding; adjustable lined hood; heavy rubber-tired. **$19.22**

**Loom-Woven Lloyd Stroller**
Light, yet highly serviceable; adjustable hood; firmly loom-woven body; thick tires. **$13.22**

**Lloyd Loom Folding Sulky**
Folds compactly; loom-woven fibre body shaped for most comfort. **$5.22**

***On Easy Terms***

**This Clever 3-Piece Lloyd Fibre Suite**
**$44.22**

An advance messenger of Springtime gayety and color is this Lloyd creation in fibre. Of specially prepared, smooth durable fibre woven on the loom. In every upright strand is an invisible core of tested steel wire, insuring great strength and permanent shape-holding qualities such as the famed Lloyd construction. Note the heavy automobile spring-filled cretonne cushions for added comfort.
***$5 Monthly***

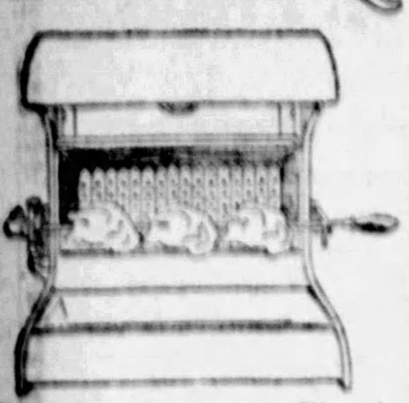
# BAR-B-Q



Gas, Gasoline or All Electric, Genuine Humphrey, Catalog Free.
GENERAL GAS LIGHT CO., 927 Liberty Ave., Pittsburgh.

$10,000
IN YOUR OWN BUSINESS OR A JOB!

It is up to you to decide; if you are satisfied to plug along, working for the other fellow who makes the real money—that's up to you.

If You Have Ambition

Tierney can show you how to cash in, your willingness to work and ambition to succeed, at $5,000 to $10,000 a year.

Feed the People

365 days a year, 120,000,000 people get hungry—three times a day; they must be fed; if you are one of those catering to this natural habit—You Make the Money.

Own and Operate a TIERNEY DINER

We teach you how; we find a good location for you; we literally start you on the way to big profits; there is no mystery or magic about succeeding with a Tierney Diner; all you need is $5,000 cash and the "Will to Win."

Book of Opportunity

We have written a "Book of Opportunity" that tells you how to succeed—how to make real money—how others (both men and women), with no more training than you have now, are making $5,000 to $10,000 and more each year; they are successful business people; they are enjoying those luxuries of life that you have always wanted—their own car, their own home, a college education for their children, protection for their old age—and are earning it with a Tierney Diner.

Write for this book now!

## Let Office, Desk Room 30

**Law & Finance Building**
4th Avenue & Cherry Way
OPPOSITE POST OFFICE
WHAT DOES IT COST TO RENT AND OPERATE AN OFFICE IN THIS BUILDING?

Ordinarily you expect to pay a higher price for any commodity that excels in its ability to serve.
This building does excel in this ability. It provides a time-saving element in its location and in the character of layout of its offices; it serves in an economic sense as few other buildings can.
Despite these obvious advantages the rental schedules are lower than those charged in other quality office buildings.
INVESTIGATE BEFORE LEASING.
PHONE 3640 COURT.

When to Borrow Money
PEOPLES
If the interest on your mortgage is about due or if you owe rent, grocer, doctor or other bills, we will advance you as much money as you need and centralize your indebtedness into one place.
LOAN
Our loans are made similar to the building and loan plan, whereby you return the money in small monthly payments and thereby reduce the interest accordingly. If you intend buying anything on time borrow from us and pay cash and avoid the installment prices. Our offices are private and your business will be confidential. Licensed by state banking department. We invite you to call.

MENTION THE SUN-TELEGRAPH WHEN ANSWERING ADVERTISEMENTS

WRITE A SELLING AD TO BRING REPLIES

The suggestions offered below are made to help Sun-Telegraph advertisers get best results from their farm ads.

Describe what you have to sell as clearly and completely that your ad will receive prompt action.

Do not defeat a sale with meaningless abbreviations that readers do not understand. Good copy in The Sun-Tele will make the sale.

Farms

SIZE—
Number of acres. One-fourth section, etc.

WHERE LOCATED—
Name of state or county, northwestern part of state, near town, schools, main highway, etc.

CROPS—
Suitable for corn, wheat, sugar beets, etc.

GENERAL DESCRIPTION—
Number of acres in cultivation, number of acres wooded, kind of land, well drained, etc.

EQUIPMENT—
House and other buildings, tools, etc.

PRICE—
Terms. Trade for smaller farm or city property, or business.
ADDRESS, ETC.

And when your ad is prepared, phone or mail it to The Sun-Telegraph, Grant 5400.

## READ THIS IMPORTANT MESSAGE TO USED CAR BUYERS!

## PLAY SAFE! SAVE MONEY AND TROUBLE!!

## RIDE IN CONTENTMENT!!!

MONEY BACK CERTIFICATE

GUARANTEE OF SATISFACTION

This certifies that we will, without question, refund the amount paid us for any used car purchased from us which is not entirely satisfactory to the customer and that a written guarantee to this effect will be given by us at the time of delivery.

PIERPOINT MOTOR CO.,
5001 BAUM BOULEVARD.

We take a Used Car in trade, because it is worth a certain amount of money. In other words we accept as money the unused portion of the car traded in. We take out the used portion (worn parts) replace them, repaint if necessary and put car back to as near original condition as is possible. After thorough test we offer these cars for sale under same conditions as we would offer a new car.

WE EVEN GIVE A BONA-FIDE BATTERY GUARANTEE!
ATTEND THE EARY SPRING SHOWING OF THESE CARS—
IN THE WORLD'S LARGEST AUTO SHOW ROOM
BEGINNING SUNDAY, MARCH 18th

ALL MAKES ... LATE MODELS ... $50 AND UP

# Cleanliness Needed For Healthy Chicks

The third step in growing healthy chicks is clean brooder house. This is a most important step in the program of growing healthy chicks. At this point the poultryman can start cultivating the habit of cleanliness in raising chicks. After the habit of cleanliness is once formed and put into practice it will surprise many poultrymen to find how successful they can be in growing healthy chicks.

To brood chickens successfully under artificial conditions it is necessary to have good equipment. With good equipment one has an incentive to do his best work. Equipment necessary for successful brooding consists of brooder house, brooder, hoppers and fountains.

**THE CHICK'S FIRST HOME**

The brooder house should be large enough for the number of chicks to be brooded and also for the caretaker to conveniently work in it. It is generally recommended that an 8x12 or 10x12-foot house is large enough for 300 chicks and 10x14 or 12x16 feet for 400 to 500 chicks. Unless one has had some experience in brooding, it is not advisable to brood more than 300 chicks at a time.

Other essentials of a good brooder house are ventilation without drafts and the admission of plenty of sunlight.

Plans for the construction of a brooder house may be secured from your county agricultural agent.

The brooder or type of brooder to be used in brooding the chicks is largely a matter of personal taste. Whether it should be oil burning or coal burning is for the individual to decide; both give good satisfaction. In the purchase of a brooder, one should consider the size of the hover or canopy. A 52-inch hover will brood 300 chicks, while a 56-inch will take care of 500 chicks. It does not pay to buy a cheap brooder as they require very close attention to operate and they often last but one season.

**THE CHICK'S CAFETERIA**

Feeding equipment is often overlooked or forgotten until the chicks arrive, then any old tin or box is used for the feed; while an odd saucer with jar is used for a fountain. Feeding equipment need not be expensive. In fact all that is necessary to buy are the fountains. For the first few days of feeding, egg case flats are ideal, using a clean flat each time the chicks are fed. As the chicks grow, mash hoppers should be provided. A convenient home-made hopper for day-old chicks is an open box 2¾ inches deep, 6 inches wide and 30 inches long. Three or four such hoppers will provide plenty of feeding space for the chicks. The important factors in feeding equipment are plenty of hoppers and fountains so that all chicks can get all they want to eat, and that the equipment is easy to clean and disinfect.

Too many poultrymen believe that a brooder house is clean if the litter from the previous year has been removed and the floor swept. The house looks clean, but from the standpoint of disease germs, it is not clean. To properly clean a brooder house and have it pass as a clean house, the following steps should be observed:

1. Sweep the ceilings and walls, removing all accumulated dust and dirt.
2. Scrape the floor and remove all accumulated dirt.
3. Scrub the floor and sidewalls with a powerful disinfectant.
4. Whitewash the interior of the house.

The following disinfectants have proved satisfactory:

1. Concentrated lye—one pound to 40 gallons of water.
2. Bichloride of mercury (tablet form)—one ounce to eight gallons of water.
3. Crude carbolic acid crystals—two parts to 50 parts water.

**THE CLEAN CHICKS**

From a clean mother hen
A spotless incubator, too.
Now in a nice, clean brooder house
Our chicks come to view.

Have you a record sheet for each brood of chicks? If not, you may secure additional copies from your county agricultural agent.

## Chicken Chatter

I WONDER what has become of "Al" Henning, Harry Bauer, "Doc" Mullen, "Doc" Haupt, Fred Goedecker, the "Squire of Goose Run," and all the other South Side poultry fans who, about 15 years ago put on those excellent shows in the South Side Market House? Doubtless they have pulled down the chicken coops and replaced them with tin garages.

Another boost for Pittsburgh poultry fandom. Jake Bedell, the Buff Leghorn breeder of Millvale, has been selected to judge several shows this fall. We don't know of any one who is more deserving of this honor than Jake. He has been a consistent raiser of Buff Leghorns for more than 15 years and carried off third prize in the Madison Square show this year for best cockerel. Jake is a neighbor of Judge Auerswald. Probably judgeships are contagious in Millvale.

* * *

One of the real live poultry men of the Pittsburgh district is Harry Singer, the secretary of the Mutual Poultry Show Association, the organization which has kept the flag flying for the standard bred men in this section by putting on the great shows in East Pittsburgh. Harry's middle name is "work." Besides his daily stunt as a chemist in the Edgar Thomson Steel Works and an expert on making out income taxes, he manages to look after a flock of several hundred White Leghorns at his place out on the Lincoln Highway.

* * *

Bennie Hilldorfer, son of Joe Hilldorfer, is following in his father's footsteps as a breeder of standard bred poultry. Bennie has selected Buff Leghorns as his choice and we understand he has developed a high-laying strain. He maintains a stand in the Pittsburgh Market where he can be seen by those interested in the Buffs.

* * *

The American Bird Store has taken over the Fox Pet Shop at 110 Smithfield street, and has enlarged the premises and improved and rennovated the property to the extent of making it the finest store of the kind in Western Pennsylvania. A full line of pets is carried in stock and the main features are cleanliness and sanitation. William Schaumann and his son, Arnold, are the proprietors. For the past 15 years they have been in the business here and another generation preceded them in Germany.

# Sophie Gets Key to City

**AT OPENING**—Sophie Tucker, vaudeville star, was presented with a symbolic key Saturday that typifies both the hospitality of Pittsburgh and the service of the Wise chain of shoe stores for women. Nathan Weiss, New York, general manager of the Wise system, presented the token at the formal opening of the newest of the Wise shops in Fifth avenue, here.

# PEERLESS CO. TO 'CARRY-ON' INDEPENDENT

**Cleveland Man to Be Named President—Will Continue Present Aggressive Plans.**

CLEVELAND, March 17.—This information came yesterday in the first official statements on recent developments in Peerless, made public by R. W. Judson, president of the Continental Motors Corporation, and A. W. Wallace, investment banker of Detroit.

A Cleveland man who has never been a president of the company will be the next chief executive of Peerless, according to yesterday's statements; and it was denied that W. C. Durant was any way connected with the company.

According to Wallace, a group of Cleveland and Detroit business men have acquired a substantial block of Peerless stock, including the holdings of G. G. G. Peckham, president of the Ohio-Buick Company. Two of the men associated with him in acquisition of this stock are connected with Continental Motors, Wallace said, but that company has no part in the activities of the group.

**NO DURANT CONNECTION**

Mr. Judson's statement also analyzed the present ownership of Peerless.

"Statements that Continental Motors Corporation is a heavy purchaser of stock in the Peerless Motor Car Company, are false," he said. "Aside from 500 shares purchased more than six years ago, Continental does not own any stock in Peerless and does not expect to.

"Statements that a merger or consolidation of Continental Motors and Peerless or Jordan is contemplated also are untrue. This company is interested in the Peerless Motor Car Company as a purchaser of Continental engines.

"We have not been advised that W. C. Durant has acquired directly or indirectly an interest in the Peerless Company and we do not believe that he has. Neither is he a stockholder of Continental Motors, at least so far as the records of this company reflect the facts. We enjoy a cordial relationship with him as the manufacturer of motors used by him, but aside from this there is no connection between him and this company."

**STRENGTHEN ORGANIZATION**

Wallace's statement said he had believed for some time that Peerless stock had attractions from an investment view and told of his part in the purchase of the "so-called Peckham stock."

"Those associated with me comprise a comparatively small group of Cleveland and Detroit business men," Wallace said. "Two of the Detroit men are connected with Continental Motors Corporation, but that company, as such, has no part in the activities of the group.

"Our influence will be exerted in the direction of strengthening the present organization without making radical changes in the personnel of the executives. Plans and policies of a constructive nature are now well under way, including the selection of a strong, aggressive, capable Cleveland man for president."

Leon R. German, vice president and general manager of the Peerless Motor Car Corporation, yesterday made the following statement which is being sent to dealers:

"Parties who recently acquired stock in Peerless are men of ability and are friendly to us. Their association with us will add materially to the company's strength. Continuation of present policies and executives is assurred. The company was never so strongly entrenched as now and its continuous prosperity is assured."

# NEW WISE SHOE STORE OPENED

When Sophie Tucker, actress, on Saturday, was fitted with a pair of new slippers and received also a symbolic key to the city and a cluster of red carnations, she declared the latest Wise Shoe Shop formally open. The ceremony took place in the new Pittsburgh store of the Wise chain in Fifth avenue, and was witnessed by several hundred women, who shared the gifts of flowers while they were buying new spring shoes. The women, intent on their shopping, did not tarry a moment to participate in the formalities and an extra force of salesmen was kept busy.

Nathan Schoen, president, and Nathan Weiss, of New York, general manager of the Wise system of stores, were congratulated on the interest shown by Pittsburgh women in the new shop. The windows were handsomely decorated and the interior of the store was a bower of spring blooms that set off displays of hosiery and the latest styles in women's footwear.

# Brother Denies Dead Houdini Sends Word

"Neither Dr. Conan Doyle nor Mrs. Houdini, nor, in fact, any living person has ever received a single word of communication from Harry Houdini since he crossed the 'Great Divide' to that bourne from which no traveler has ever returned."

Hardeen.

With all the emphasis he could command, Hardeen, the brother of Harry Houdini, made this statement today to The Sun-Telegraph.

Hardeen declared that he knows this to be absolutely true, for the reason that there exists between him and his dead brother, Houdini, a solemn compact through which, if psychically possible to penetrate the mysterious spaces of the Great Beyond, Houdini is pledged to speak to his brother—Hardeen.

**ENTERED INTO PACT**

"Some months before my brother, Houdini, died," said Hardeen, "another brother of mine, Bill, by name, was seriously ill at Saranac Lake, N. Y. Houdini and I paid him a visit. Bill knew he was going to die. He said to Harry:

"'I don't believe in any of this bunk that you and Dr. Conan Doyle are discussing, but I do not know what lies beyond. I think, however, we three brothers should agree, if there is any possible way, to find out the absolutely uncontrovertible proof. I suggest that we form a code of six words which we three shall keep secret and sacred to ourselves. Whichever of us passes away first will try to communicate the six code words to the survivors.'

"We agreed among the three of us, and the six code words were devised.

"Houdini died, as you all know, after the accident which happened following his visit to McGill University. He passed away in Detroit. His last words to me told to me again the story of our compact.

Since his death there has been no sign given to me that he has been trying to speak to me the six code words. I am confident that if he could come through from the other world he certainly would give me the code. We were deeply attached and he had absolute confidence in me, a fact which I think is proved by the bequeath of the key to all his mysteries to me.

"The cables a few weeks ago quoted Dr. Conan Doyle as saying that Mrs. Houdini had received a code message from her dead husband, Houdini.

"That is absolutely false.

"I understand that Mrs. Houdini, herself, claims to have received a message, not from my brother, Harry, but from my mother, with the one word, 'Forgive.'

"That, also, is untrue."

**WILL EXPOSE TRICKS**

"Like Houdini, I am interested only in the truth. He has asked me to 'carry on,' and has bequeathed to me, not only his 'bag of tricks,' but said the fulfillment of his promise, to prove or disprove the question whether persons who have passed from this life can communicate with those of us who remain here. I am devoting all my spare time to the subject."

Hardeen has been appearing during the past three days of last week at Sheridan Square Theater in East Liberty, and is to appear all this week at the Harris Theater in Diamond street.

He has arranged to expose, through the columns of the Sun-Telegraph, a series of eight feats of magic. One of these will be run each day in the Sun-Telegraph, beginning Monday, March 19.

# FIREMEN RENEW FEUD AT BLAZE

SCOTTDALE, Pa., March 17.—The long standing feud between the Scottdale fire department, officials, fire fighters of the borough and the Community Hose Company, broke out anew at a fire in the home of Mike Pasqualla yesterday.

Robert Barkwell, Jr., member of the Community company, was arrested for violating the councilmanic edict, which gave official sanction to the Scottdale company and branded the Community company as an usurper outfit. The Community outfit was directed not to answer alarms.

Barkwell was released on a deposit and today swore out warrants for the arrest of Walter Haines, chief of the recognized fire department; Cecil Loucks, assistant chief; William Shallenberger, the arresting officer, and Arthur Zuk and W. E. Clarkson, charging assault and battery. A hearing will be held next Tuesday.

## Shot, Ex-Inmate of Reformatory Dying

STEUBENVILLE, O., March 17.—Raymond McAtier, 24, recently released from the Mansfield reformatory, is dying in Ohio Valley Hospital of gunshot wounds received in a battle with John Crumbley, village marshal of Amsterdam. Arrested for auto theft, McAtier dropped the officer with a blow on the jaw, then ran. Crumbley shot McAtier through the kidneys.

# SPURIOUS COIN SUSPECT HELD

Catablo Spanazo, 42, of 1414 Hoffman street, in whose home government secret service operatives and city police seized 209 spurious 50-cent pieces, was held for court Saturday by the United States commissioner to answer a charge of possessing and passing counterfeit money. Bond was set at $3,000.

The principal government witness at the preliminary hearing was Anna Justko, 10, of 1416 Hoffman street, who was caught while attempting to tender a counterfeit half dollar at a North Side store in payment for a quart of milk. She testified the coin had been given her by Spanazo. Spanazo, testifying in his own defense, said he had purchased the coins for $100 from a stranger.

No complaint was filed against the girl. The wife of the defendant, Mrs. Theresa Spanazo, was exonerated by the husband, who said she had no knowledge of the coins being counterfeit.

## DeMolay Honor Club To Banquet Tonight

The Pittsburgh DeMolay Legion of Honor Club will have a banquet this evening at the Seventh Avenue Hotel, marking the anniversary date of the martyrdom of Jacques DeMolay, last grand master of the Knights Templar, after whom the Order of DeMolay has been named. Officers of this club are Henry W. Mertens, president; Garland Kerr, secretary, and Dallas Fox, treasurer.

## IN MEMORIAM.

RESOLUTIONS IN MEMORY OF MRS. TERESA M. MOLAMPHY, PRESIDENT OF THE PITTSBURGH COUNCIL OF CATHOLIC WOMEN.

The Board of Directors of the Pittsburgh Council of Catholic Women adopted the following resolutions on the death of their beloved President, Mrs. Teresa M. Molamphy.

Whereas, Almighty God, in His infinite wisdom, has seen fit to take from us our capable, efficient leader.

Resolved, While we bow in submission to His holy will we are conscious of our great loss. She was a faithful wife, a kind and loving mother, a true friend and a lover of her fellow man. Her traits of mind and heart were accentuated by her spirituality. All was done in God's holy name.

Resolved, That we appreciate the fact by her ability, personality and kindliness she might have placed herself in high places, yet she gave of her great talents to the service of God and the furthering of His kingdom in the work of this diocese.

Resolved, That we as members of this diocesan organization, as a tribute to her memory, continue the life work of this great Catholic woman, and take up the burden where she laid it down.

Resolved, That we who so deeply feel her loss, will console ourselves with the thought that she is enjoying the reward of a well-spent useful life. God grant peace to her soul.

Resolved, That a bronze tablet be placed in the Council House as a perpetual memorial to her memory.

Resolved, That these resolutions be spread on the minutes of the Council and published in the daily and Catholic papers of Pittsburgh and in the National Catholic Welfare Conference Bulletin.

Mrs. Thomas P. Horan, Chairman.
Mrs. John H. Roney,
Miss Rachel A. Good,
Mrs. Mary Harrer,
Mrs. William Kessler,
Mrs. J. Magee Clark,
Mrs. Mamie A. Bittner,
Mrs. John Finn.

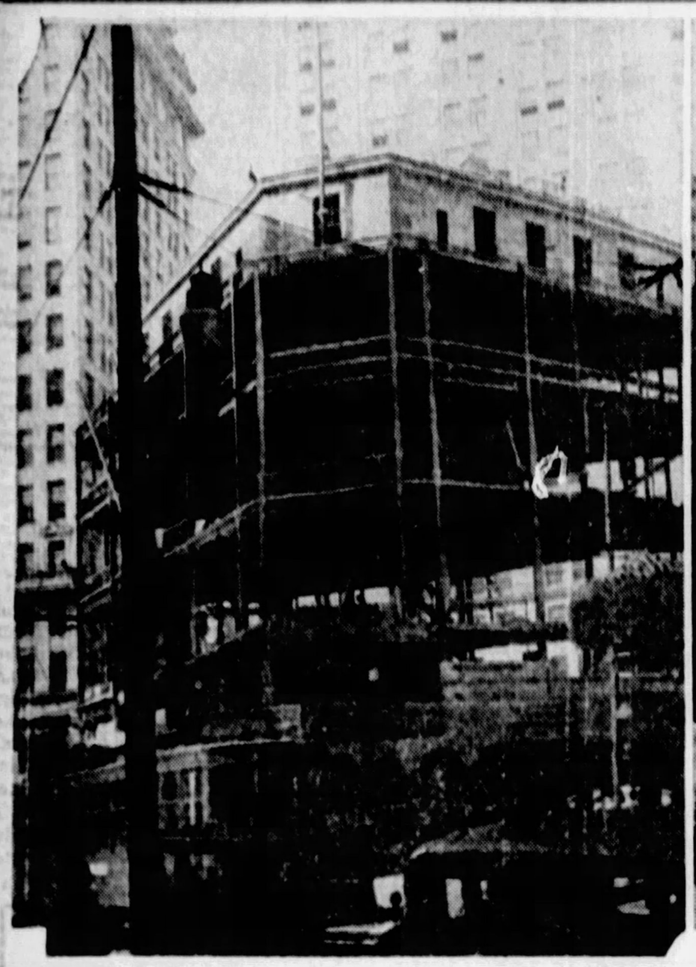
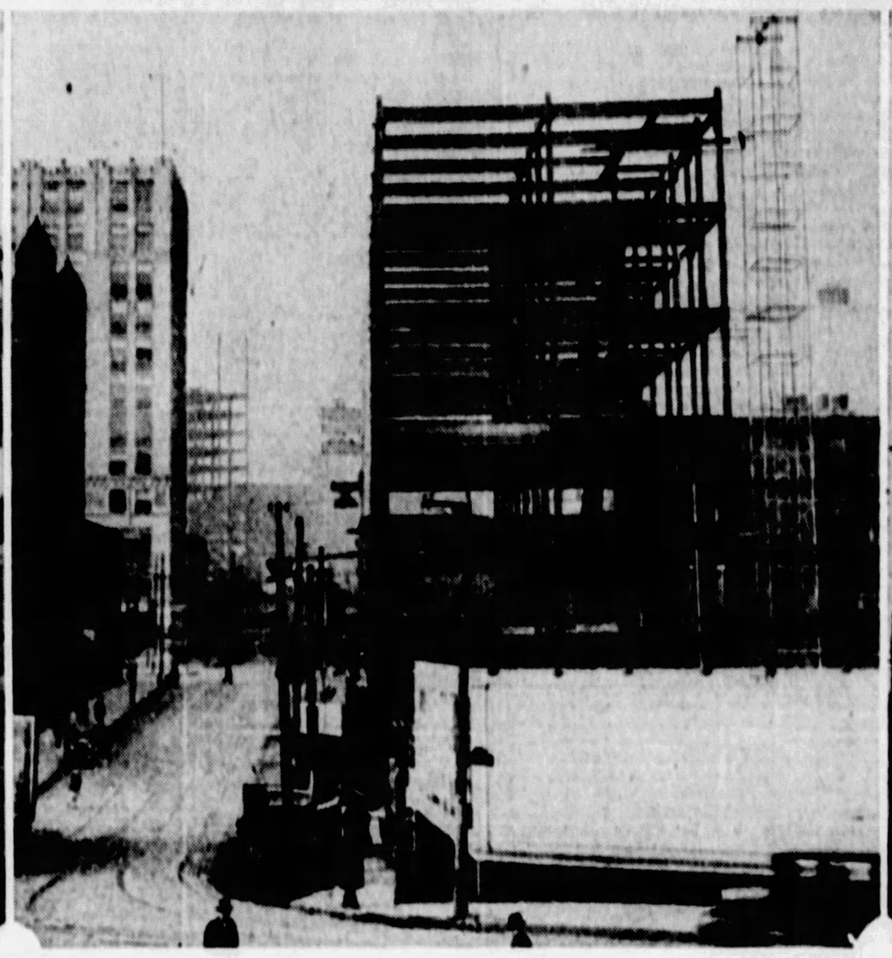
# Locating of Retail Stores Reduced to Science

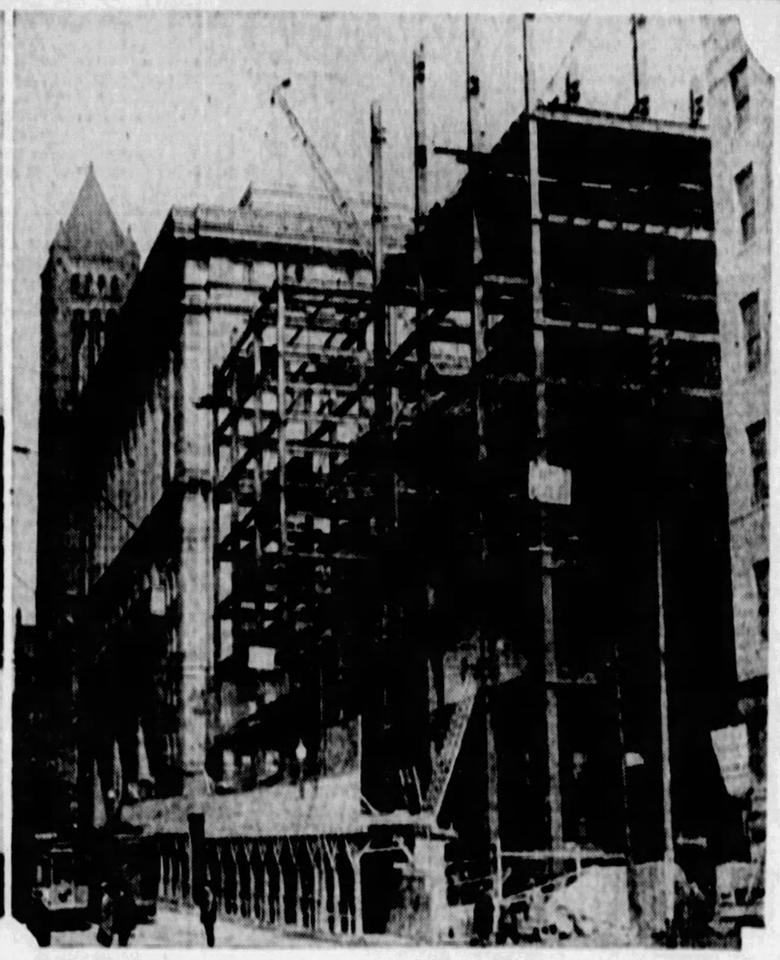
## Rivet Hammers Ring As Steel Frames on New Buildings Rise in Downtown District



**MONONGAHELA**—The stone walls of the new Monongahela National Bank Building at Wood street, Sixth and Liberty avenues, are being built rapidly around the steel framework. The building is scheduled for completion in June. In the background are the Keenan Building at the left and the Clark Building at the right.



**IRON CITY**—This view looking out Sixth avenue from the approach to the Liberty Bridge includes the new store and warehouse building of the Iron City Electric Company in the foreground. This building will be equipped with loading facilities on Diamond street. At the left beyond the county jail is the new Plaza Building and in the distance the steel work on the William Penn Hotel addition.



**GRANT**—Swift progress is being made in placing the structural steel in the new Grant Building, which will tower 35 stories at the southeast corner of Fourth avenue and Grant street. The set-back style will be used. This picture was taken looking north on Grant street from Second avenue, with the City-County Building and the Court House at the left.

## Success or Failure Of Store Due to Site

By M. V. BURGESS.

The selection of retail store locations in the business district of a large city has become a science. Those who have learned the art can make a count of the persons passing a store site in a shopping district and estimate closely the gross business which might be done in one year by a particular kind of store in that location.

These estimates are based on a study of the habits of crowds. Tables of figures have been compiled which work out with reasonable accuracy. The estimates are subject, of course, to changing business conditions and to the element of uncertainty which is always found in trade, but under given conditions are reliable.

**LOCATION IS IMPORTANT**

The difference between success and failure in business is often in the location of the store. A distance of 50 feet may be enough to remove the store from the direct path of the buyers. The business man was once satisfied to take a chance on getting a good location. Now he knows exactly what his location is before he takes the property. He may even figure how much rent he will be justified in paying for it.

Retail business produces a higher return on real estate than any other form of activity. Real estate men have studied business property with great care and have learned the points of value and how they may be recognized. The data which has been gathered has been used for some time in the location of chain stores.

The most important point is the general idea in the mind of the crowd. Are they in a certain district for the purpose of shopping or are they merely passing that section on their way somewhere else?

The number of pedestrians near a railroad station is very large, but they are not in the mood for buying large amounts of merchandise. They hurry from the station to the office in the morning and in the evening run for the homeward bound trains. They may buy candy, cigars, something which may be picked up quickly, but are not likely to linger long over anything.

**COUNT MEANS LITTLE**

The count of persons passing a spot means little unless it can be determined that they are in the neighborhood with the idea of shopping. There are spots in every city where the crowds go with that particular notion. These are known as 100 per cent retail areas.

These 100 per cent areas as a rule are not difficult to pick out. The crowds wander from store to store, window-shopping, distinctly in a mood for business. All locations within the 100 per cent area may not be good. A choice is necessary.

The type of merchandise to be handled must be considered. A spot well suited for a store carrying women's garments would not be the best for a men's shop. The requirements for drug stores and five-and-ten-cent stores are different.

Chain store men in studying a location make 10-minute counts of pedestrians at regular intervals during the day. An average of the counts will give an accurate idea of the number of persons passing the store in a business day.

Tables have been developed to show what percentage of pedestrians passing a store will be attracted to its counters and what percent of that number will actually buy. With this data it is possible to figure in advance with reasonable accuracy the gross sales for the year.

Various types of stores differ in the percentage of gross revenue which they can use for rental. In the case of women's goods, it is possible to use 10 to 15 per cent of the gross sales in one year for rent. Drug stores run 8 to 12 per cent. Men's stores spend 6 to 10 per cent. In department stores, it is generally 3 to 4 per cent.

This is understood when it is considered that the business of the department store is based in handling large masses of merchandise in a number of lines. A small percentage of this large gross business might easily outstrip the larger percentage of the specialty shop when it comes to actual square foot rental values.

**CAR STOPS HELP**

The location of the large department stores is of course of great importance to many the little merchants. The advertising programs of the big stores attract crowds of shoppers, and if the small merchant can place himself in the path of the crowd somewhere near or between the large stores, he is likely to do a profitable business.

Things like street car and bus stops make a difference in a business street. Diamond street, as an example, has benefited greatly since a number of the East End car lines have been routed there.

Crowds often show a preference for the shady side of a street. They learn to walk there in the hot summer days and, when winter comes, habit carries them along in the beaten track.

The average person forms a habit in going to work. In nine cases out of 10, they map out a regular route and follow it carefully. Many shoppers follow these same habits, going to their favorite store and then moving on a charted course to another shop with which they are acquainted.

Jay-walking, a habit of the Pittsburgher which at intervals calls down the reproach of the Department of Public Safety, is a factor which is given consideration in store location. Crowds have their favorite spots to cross the street and in many cases they are not at street intersections. In narrow streets, a favorite crossing is generally a line of march which slants across the street somewhere near the middle of the block. Fortunate is the merchant who is located at a point where the shoppers walk directly toward his display windows.

In spite of the things which have been learned about the behavior of crowds, there is much that remains a sealed book. You can never be entirely sure of what a crowd will do for any length of time. Perhaps it was this uncertainty which coined the expression, "Keeping up with the crowd."

## *English-Type Home Sold for $35,000*

The Stevenson-Williams Company has sold for Albert N. Young to Carl C. Bain an English type stone cottage on a large plot of ground in Washington road almost opposite the entrance of Beverly Heights, Mt. Lebanon. The consideration was $35,000. The house is one of the show places of the district. It will be occupied by the new owner about the middle of April.

## Better House Market Boosts Realty Sales

Improved inquiry for homes gave a brighter appearance to the real estate market last week. A number of high class residential properties were sold in the South Hills, Fourteenth Ward, and Shady Side.

The Forbes-Murray Realty Company, Inc., represented by R. C. Dever, sold to William Gibson a house and garage at 5643 Beacon street, Fourteenth Ward. The purchaser takes the property for a home.

J. Leo Sheran sold for Serafino Lamanna a store and apartment building in Beechwood boulevard, Fourteenth Ward, at private terms.

Mary L. Lewis has sold to J. Gilbert Lloyd a brick house on 50x182 feet at 6315 Burchfield avenue, Fourteenth Ward.

**BROOKLINE SALES**

F. J. Breen sold for Dunbar & Trilli, builders, a new seven-room brick house and garage on 30x110 feet at 1127 Bellaire avenue, Brookline, for $9,700; for A. C. Feagan a new seven-room brick dwelling on 30x110 feet at 918 Rossmore avenue, Brookline, for $9,500.

Frank T. Lauinger sold for the Keystone State Building and Loan Association to Frank S. Sulanowski an eight-room brick and shingle dwelling on 48x166 feet at 45 Clifton boulevard, Carrick. The purchaser bought for a home.

Thomas F. Breen, Jr., sold for H. B. Helmer a lot fronting 183 feet in Westport avenue, Overbrook, for $6,000, and a lot 47x105 feet at Overbrook boulevard and Walton avenue, for $1,300; for W. G. Erb, 50x100 feet in Olivet street, Twenty-ninth Ward; for Milton E. Stemmler, 50x100 feet in Hazel avenue, Mt. Lebanon, and 51x100 feet in Ashland avenue, Mt. Lebanon; for T. F. Dunn to M. Gleesner, 60x120 feet in Woodbourne avenue, Nineteenth Ward, for $1,500.

**MURDOCH FARMS DEALS**

Philip Goodman has purchased from Edward Crump, Jr., a number of lots in Fair Oaks, Murdoch and Inverness streets, Murdoch Farms, and will erect individual homes. Nat Canter was the broker.

The Feehold Real Estate Company has sold for the East Wilkinsburg Improvement Company to Lawrence A. Riddell 50x146 feet in the Edgewood Acres plan, Forest Hills. Mr. Riddell has let the contract for an eight-room English design house to cost approximately $14,000.

Margaret Orr Lockard has sold for George R. McNary to W. E. Deinbaugh a six-room brick house in Chalfant street, Wilkinsburg, for $9,000.

There were 506 mortgages placed on record last week amounting to $2,432,959.43, according to the report of C. C. C. Stotler, secretary of the Title Guaranty Company.

**WEEK'S MORTGAGES**

Of these, 49 were purchase money mortgages amounting to $183,774 and 457 were straight mortgages amounting to $2,249,226.43. The straight mortgages included 192 amounting to $1,315,649.28 to corporations; 143 amounting to $525,250 to building and loan associations, and 122 amounting to $408,327.15 to individuals.

In addition to the above, a trustee mortgage was recorded March 16 from the Pittsburgh Water Heater Company to the Colonial Trust Company, trustee, debt, $1,200,000.

Building permit applications included:

Twelfth Ward—Standard Sanitary Manufacturing Company, brick warehouse, 6585 Julius street, $19,000.

Fifth Ward—L. Feiser, extension, 2247 Center avenue, $15,000.

Fourteenth Ward—Josephine H Kimerer, brick dwelling and garage, 5714 Lynn Haven road, $12,000; A. Rex Flinn, addition, 5558 Aylesboro street, $4,500.

Twentieth Ward—J. G. Boggs, brick dwelling, 3417 Kedzie street, $4,000.

## PARK LECTURE FOR REALTORS

Paul B. Rils, director of the bureau of county parks, will speak on the improvements in progress in the new North and South parks at the luncheon of the Pittsburgh Real Estate Board Tuesday at the William Penn Hotel.

Mr. Rils' talk will go into detail on the golf courses, swimming pools and roads which are being surveyed in the new parks. He will show how these parks place Allegheny county among the foremost in recreational facilities in the country.

Meetings of committees of the board scheduled for this week include the house committee Tuesday at 10 a. m. and the finance committee Tuesday at 4 p. m.

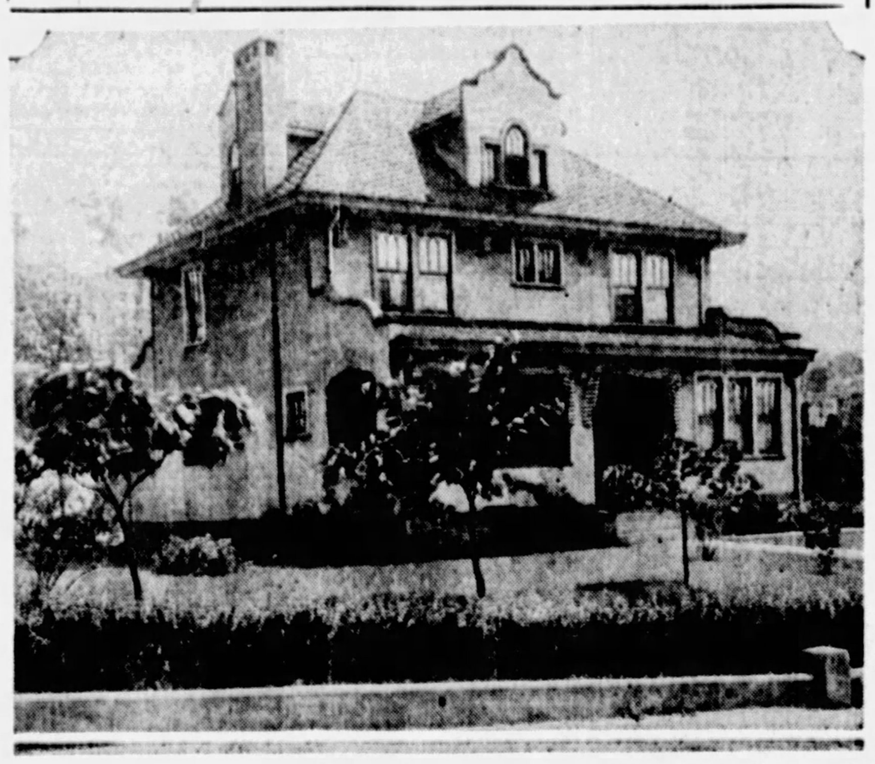
## See the Plan Book

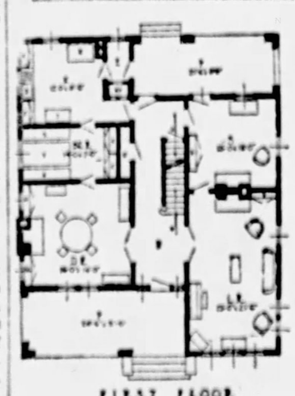
Are you in doubt about the style of home to build? See our book—"Pennsylvania Homes." It shows 200 houses, with floor plans. Our dealers furnish a list of building materials required and the cost of these.

Any retail lumber dealer in Western Pennsylvania will gladly co-operate with you in your building plans.

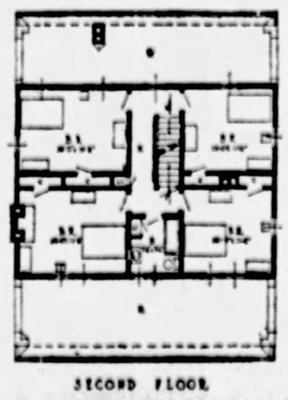
**Retail Lumber Dealers' Association**
730 Park Building, Pittsburgh

## Spanish Influence in Large Home





FIRST FLOOR



SECOND FLOOR

**THE FERNANDO**
This residence in the Spanish style of architecture, has dignity and solidity in both appearance and arrangement. The house has nine rooms and one bath, and the dimensions are 38 feet six inches by 34 feet. A living room, study, dining room, breakfast room, kitchen, pantry, center hall and front and rear porches are included in the first floor layout. There are four large bedrooms and one bath on the second floor. A stairway is provided to the third floor, where two bedrooms may be finished if so desired. This plan is prepared by the Retail Lumber Dealers' Association, of Pennsylvania, 730 Park Building, Pittsburgh.

## *Mitchell Building Is Being Remodeled*

The N. M. Mitchell Building at the southwest corner of Penn avenue and Fancourt street is being remodeled and three additional storerooms will be installed. Two of these have already been leased through the Horner Real Estate Company, the one to the Penn Dye Works and the other to J. L. Harman & Sons. The two upper floors have been leased through the same brokers to George Nichols for a hotel.

## *Sewickley Plot Sold for $12,500*

The Samuel W. Black Company, represented by J. Collard White, has sold for James W. Porter, Jr., to Lloyd C. Beall 125x200 feet, vacant, in Beaver street, Sewickley, for $12,500. The buyer will build a house on the property.

## *DeJohn Moves to Larger Quarters*

J. H. DeJohn is moving his main office to larger quarters in a new building at 8221 West Liberty avenue. The change was made necessary by the increasing volume of real estate business in the South Hills.

**You will Enjoy -a modern apartment**

## TEAR GAS BOMB CAUSES NEAR PANIC AT GAME

### Fans Storm Exits After Spectator Explodes Missile In Duquesne Garden.

### Victory Enables Corsairs to Stay on Heels of Detroit Cougars.

By CARL W. SHATTO

TEARS were by the quart and by the gallon at Duquesne Garden Saturday night, but the weeping was not occasioned by a Pittsburgh defeat for the Pirates kept in the race for third place by subduing the hated Boston Bruins, 3 to 1.

All of the weeping was done at the end of the first period when a fan with a very unique idea of fun set off a tear bomb in the packed

## Another Unbeaten Panther Squad

## Pitt Swimmers, Like Gridders And Cage Stars, Go Undefeated

By JESS CARVER.

INTRODUCING a third undefeated Pitt athletic team!

Well nigh lost 'mid the dazzling glare of the pyrotechnics set off by the brilliant and undefeated football and basketball teams that have represented the University of Pittsburgh on the gridiron and court during the present school year, but deserving of as much acclaim as either of the other two, is Pat Corr's unbeaten swimming varsity.

Coach Corr, a former Pitt star himself, has developed the fifth team to go through a regular season at Pitt since last spring undefeated. In football, track, cross-country and basketball, and now in swimming, Pitt has been able to chalk up perfect records for the regular schedules. The football team lost a post-season game on the Coast, and the tennis team dropped the season's opening match to Ohio State and then raced through the remainder of the schedule without opposition.

The Panther quatic stars won seven dual meets since the season opened in January. Carnegie Tech fell twice, as did Wooster College of Ohio, and, in addition, the Army in the East and Notre Dame in the West bowed to the Gold and Blue splashers.

The victory over the Army and

(Continued on Page 6, This Part.)

***Read Dr. Cliff Carlson's own story of the Pitt Panthers' perfect basketball season, on page 3, this part. The coach of the undefeated team tells how its success was built on a firm foundation and was no accident.***

## Leheny, Deming Farmed Out By Corsair Club

SAN FRANCISCO, March 17.

BEFORE today's Pirate-Mission game began, Secretary Sam Dreyfuss of the Pirates announced the first cut in the big Pittsburgh squad.

Two youngsters will leave the team Tuesday morning, and both are of the Pittsburgh district. Regis Leheny, lefthand pitcher, whose home is in Oakland, has been "farmed" out to the Salisbury club of the South Atlantic League. Pitcher John Deming of the Bellevue Section will be turn home while management strives to place him.

Leheny will visit in Pittsburgh for a few days before reporting to the Sally League team. The club is owned by the Pirates and Leheny, therefore, is subject to Pittsburgh orders.

### PETE ZIVIC WINS

NEW YORK, March 17.—(AP.)—Pete Zivic of Pittsburgh was awarded the judges' decision over Lou Moscowitz of New York at the end of a 10-round featherweight clash at the Olympic Club in Harlem tonight. Zivic recently knocked out Moscowitz in the first round.

### Corsair Captain Drives Ball Into Bleachers to Break Up Mound Duel.

### Sparky Adams Has Big Day With Double and Home Run Against Native Sons.

By CHARLES J. DOYLE,
Sun-Telegraph Staff Correspondent.

SAN FRANCISCO, Cal., March 17.—Sunshine and shamrocks greeted the Pirates here this afternoon to make San Francisco's welcome an event of real delight. The Bushwhackers appreciated the reception, but insisted on winning a fine battle with the Mission Bells in a thrilling game. Capt. Pie Traynor spilled a home run in the center field bleachers in the ninth inning to

### *North Union Wins Fayette Tourney*

UNIONTOWN, Pa., March 17.—Ploughing their way through all opposition today, the North Union Township High School won the Fayette county high school championship tournament, in which were entered Redstone and Uniontown high schools.

North Union played the best ball of the tournament and deserved to win the premier basketball honor of the entire county. Georges Township, with the smallest high school in the county, were the runners-up, being defeated only by North Uniontown, 31-21, in the finals. In the semi-finals Georges won from South Union, 35-28.

### *Alumni to Honor Pitt Floor Squad*

The University of Pittsburgh alumni will be the host to the undefeated Panther varsity basketball team at its weekly luncheon in the William Penn Hotel next Tuesday at 12:15 o'clock.

The following Tuesday the Panthers will be guests at a banquet to be given in their honor by the Braddock Business Men's Association at the Edgewood Country Club.

Coach Carlson, Capt. Sykes Reed and Stash Wrobleski are residents of Braddock and the business men are eager to show their appreciation for their excellent work in basketball this winter.

### *England Defeats Scotland at Rugby*

TWICKENHAM, Eng., March 17. (AP.)—England won the jubilee international Rugby football match from Scotland today by 6 points to 0.

Of the 50 games played between has won 21; Scotland 20, while nine have been drawn.

By winning today England also captured the international Rugby championship for this season from Scotland, Ireland, Wales and France. Ireland was second.

### *Seligson Beaten in Indoor Final*

NEW YORK, March 17.—(AP.)—William Aydelotte, 23-year-old New Yorker, today brought to a culmination a series of brilliant victories in the men's national indoor tennis championship by defeating Julius Seligson of Lehigh in the final round, 2-6, 6-1, 3-6, 6-4, 6-2.

Paired with Perrine Rockafellow, Aydelotte also won the doubles title with a straight-set victory over J. Gilbert Hall of Montclair, N. J., and Elmer Griffin of New York, 6-3, 7-5, 6-3.

# Heidelberg Wins West Penn Soccer Championship

## ROVERS LOSE IN GAME FOR TITLE, 6 TO 2

### Great Speed Enables National Amateur Kings to Down Opponents.

### McCosky and Cusis Lead Spirited Attack With Pair of Goals Each.

By TOM BIRKS

PLAYING the same aggressive type of soccer that won it the pennant in the American League, Heidelberg, 1927 national amateur champion, won the Western Pennsylvania championship when it defeated the Pittsburgh Rovers by a 6-goals-to-2 score at Westinghouse High School Stadium Saturday afternoon.

It was again the case of Heidelberg being too fast for the opposition, the Rovers' halfbacks never being able to stop that Green and Gold speed line. And again, as the fans figured, when it came to playing classy football the Rovers were far superior, but that did not get goals. Fagan and Valiani stepping in when the pattern weaving started around Courtley.

The heavy snow left a soggy field and this did not suit the Rovers' style of play. The Lawrence Park boys won the toss and Donnelli kicked off. The Rovers pressed hard right at the start and Valiani removed the danger. Kusis made a sensational run, crossed in front of goal, Grilli returned and McCosky neatly t rned the ball into the net.

The Rovers then pressed hard an Courtley was forced to run out to clear. After 25 minutes Kusis staged a sole effort and rounding McLay, scored the second. The half-time score was Heidelberg 2, Rovers 0.

**PLAY SPEEDED UP**

The second-half play was sensational. Only three minutes had elapsed when Buff Donnelli smashed the ball past Holbrook. The Rovers' goalie was playing great ball. The Rovers broke into the score column when a wonderful passing movement by the front line left Potter in possession and he scored easily. Then Heidelberg monopolized the play and McCosky headed in a neat shot from Grilli's corner. Then keeping up the pressure, Puck Donnelli added the fifth. The Rovers reduced the score when Dunlop scored from a penalty, and with two minutes to go Kusis added the sixth.

That last 20 minutes found Heidelberg at its best. The work of Holbrook, Hewitt, Valiani and Grilli stood out. The lineup:

| Heidelberg—6 | | Rovers—2 |
|---|---|---|
| Courtley | G. | Holbrook |
| Fagan | R. B. | Hewitt |
| Valiani | L. B. | McLay |
| Grandy | R. H. | Gifford |
| Jones | C. H. | Graff |
| Stenzel | L. H. | Clark |
| Kusis | O. R. | Potter |
| F. Donnelli | I. R. | Morun |
| B. Donnelli | C. | Evans |
| McCosky | I. L. | Dunlop |
| Grilli | O. L. | Bradshaw |

Goal scores—McCosky 2, B. Donnelli, Kusis 2, F. Donnelli, Dunlop, Potter. Score at half time—2-0 Heidelberg. Time of halves—45 minutes. Referee—Brannagan.

**SWISSVALE AT CLEVELAND**

The Swissvale Union Switch and Signal soccer team plays the Magyars of Cleveland at Cleveland today in the Western semi-finals of the National amateur competition. The Magyars are the aggregation that eliminated Heidelberg, last year's champion, a few weeks ago.

### Y PONIES WIN

The Hilltop Y Ponies defeated the Westinghouse Cadets Saturday night, 36 to 21. The lineup:

| Hilltop Y—36. | | Westinghouse—21 |
|---|---|---|
| Currie | F. | Wadsworth |
| Price | F. | Dye |
| Frantz | C. | Windelle |
| Wittum | G. | Buwesheld |
| Ganter | G. | Hess |

Field goals—Price 3, Frantz 5, Ganter 3, Currie 2, Rhone 1, Dye 2, Buwesheid 2, Wadnell 2. Foul goals—Hilltop 8 out of 12, Westinghouse 9 out of 20. Referee—Hasenfritz.

# SPORTING REVIEW OF THE WEEK

**First Part of Pirate Training Is Successful and Team Will Be Stronger Than in 1927—Will Look Like Repeater at End of Exhibition Trip—Adams Fits in Nicely and With Wright in Improved Form Infield Is Best in National League—Comorosky Must Hit Better to Win Outfield Job—Fussell, Brame and Bartell Three New Pirates Who Are Likely to Stick to Big Show—Hubbell's Trick Walk Is Recalled.**

by JAMES J. LONG

THE first part of spring practice is over for the Pittsburgh baseball club. Camp has been broken at Paso Robles and the squad has started on the long exhibition trip. At present the Pirates are in San Francisco, where they are to play until one week from today, and after another week of games in Oakland and Los Angeles they will quit California and embark on a tour through Phoenix, San Antonio, Dallas, Memphis, Jackson and Paducah, leading right up to St. Louis for the opening battle of the pennant season on April 11.

That trip is a most important one. Not only will it put the finishing touches to the conditioning work of the regulars and fit them for the real fighting that is to begin three weeks from next Wednesday, but it will bring the answers to all the questions with which the fans here at home are now wrestling in connection with the final makeup of the crew.

It will determine, for instance, who is going to be chosen for that vacant post in the outfield; it will decide whether Pete Scott is going to be a catcher or an outfielder, and it will tell what new players are going to be retained and what recruits are going to be turned adrift.

**Conditions Satisfactory**

As far as the training and testing operations have progressed, fans of the Pittsburgh district have every reason to feel satisfied with what has been accomplished.

Practically all of the regulars are in fine shape for this stage of the proceedings, and of the pitchers who are to be relied upon mainly in the pennant fight all are well advanced toward fitness with the exception of Remy Kremer, who has been retarded by illness.

True, the first team did not cover itself with glory in the camp games with the Yanigans as far as victories were concerned, the rookies winning the first five of the six contests played, but that's nothing to worry about. It doesn't mean a thing.

In the first place, it is not the habit of veteran players to hustle and play their heads off in camp games. They prefer to go along gradually and condition themselves by easy stages, avoiding any unnecessary chances that might result in injury. In addition they often try out plays instead of playing to make runs.

The Yanigans on the other hand, are full of the pep of youth and lacking in the training wisdom that comes with experience. They are out to win and don't care how many injuries they may suffer in doing it.

Also, the rookies are in trial and must show the manager what they can do. The regular has an advantage there, because the skipper knows what he is capable of doing and it isn't necessary for him to exert himself until time and condition make it possible for him to do so safely. But the recruit must show something to convince the boss of his good qualities, so that there can be no holding back on his part.

**Boost for Pitchers**

Another item in the five straight wins of the youngsters over the vets was the fact that first-string pitchers worked for the Yanigans whenever possible, and the recruit hurlers did the flinging for the regulars.

That spells a considerable difference, so that in one sense the victories of the second team really form a source of confidence in the first team for the season to come, inasmuch as they speak well for the 1928 form of the men who will do the regular slab work for the Corsairs during the pennant race.

As to the rest of the first team, there is every prospect that the early hopes of the local fans will be more than realized when the Bucs take the field.

The outfield post has not yet been definitely filled, but there is plenty of material to plug it up satisfactorily, while as for the infield, it looks to be easily the best in the National League.

True to expectations, Sparky Adams has fitted nicely into the keystone notch, and with Glenn Wright looking like his old self this spring and apparently destined to have a big year, these two are going to turn in a lot of brilliant work around the midway.

Double plays will be largely increased, something that was sorely needed on the Pirate team.

**ADDED HELP**

ANOTHER item that willl help the Rovers in the infield is the improved form of George Grantham. He was out of his element at second base and unconsciously fell off in his hustling, but is tickled to death to get back to his old position at the first corner. It is likely to mean a vast improvement in his all-around work, and the club will profit more by his speed and hitting power than ever before.

Nothing need be said about Traynor. He still is the greatest third baseman in captivity by a wide margin and with Pie as the fourth member of the inner cordon Manager Bush will have a quartet that will be very much on the proverbial stonewall order. Adams already has made the infield look great, and the increased strength resulting from the acquisition of Sparky is reflected in all other departments of the team.

That outfield job is still up in the air. Adam Comorosky can do everything that an outfielder is required to do, defensively, and he can also run the bases, but whether he can hit or not is the big question. He will have to convince Manager Bush that he can hit in order to get the place, for with hitters like Clyde Barnhart and Joe Harris around no chances can be taken on leaving a weak spot in the attack.

**May Shift Scott**

Nor is Pete Scott to be overlooked. Scott has been used as a catcher so far, and has been doing very well at it, but it is believed the club is still angling for a seasoned catcher in National League circles and if it succeeds Pete will be carried as an outfielder and will be very much in the fight for the open job.

The two Waners are caring for the other outfield posts even better than ever, according to coast reports.

Baserunning is one department in which you may safely look for an improvement in Lloyd this year. He may not hit as well as he did last season, but he'll always be around the .300 mark, and his development of sliding skill this spring and the knack of getting the jump on the pitcher ought to make him one of the best base-stealers in the league.

Earl Smith is another who is pretty certain to have a better year than in 1927, and the determination and spirit that Burleigh Grimes is showing makes the Vic Aldridge trade look better than ever.

Putting two and two together in reliable reports from California, it seems safe to predict that there are at least three new players who are going to be kept.

One is Fred Fussell, left-hand pitcher; another is Erwin Brame, right-hand hurler, and the third is Dick Bartell, infielder.

Fussell has proved to be a real pitcher, good enough for any big league club.

Brame has a great fast ball and a good change of pace, and as soon as he has been coached into the development of a curve ball he will be able to step out and win some games for the Bucs.

**Bartell Ripe**

When the club went West it was figured that Bartell would need another year of seasoning in the minor leagues—and no fewer than seven clubs there wanted him, by the way—but Dick has shown such marked ability after his season in the Eastern League that he looks just about ripe for the big show and probably will be kept.

That's considerable strength added to what the Bucs had last year, and as they were good enough then to win the pennant the prospect of a repetition is very encouraging.

There are other recruits who look good, but who will probably not be kept for 1928. Glen Spencer ought to be a fine pitcher in another season. He has everything, is smart and a good hustler. Walter Tauscher also may come in another year. Regis Leheny, the Pittsburgh boy, is coming fast, and looks better every day, and as soon as he learns to get the ball over, which he probably will, he can't miss being a good pitcher.

Hemsley has looked like the makings of a great little catcher, but has shown little in the hitting department.

The third Waner, Travis, is another who will not be kept, and Linton may be added to the list. The fates of the other youngsters depend upon what they do between now and the end of the training trip.

**CITY RECORD**

WHAT city, do you think, holds the distinction of having had clubs in the greatest number of major baseball leagues?

What city would you name, if you were asked to do so, has been in more circuits of the major type than any other in the country?

You may 'e surprised to learn that Pittsburgh leads all other towns in America in that respect.

At first thought, it would seem to most fans that Boston, Chicago, New York, Philadelphia or some such city that entered the National League long before Pittsburgh did, and hat now has clubs in both the National and American leagues whereas Pittsburgh is represented only in the senior major circuit, would have a record of having held franhises in more big leagues than this city.

But that doesn't happen to be the case. The honor belongs to Father Pitt. He has had teams in a greater number of big-time loops than any other city on the baseball map.

**In Eight Leagues**

Pittsburgh has held franchises and entered representative clubs in no fewer than eight leagues that were rated as being of major caliber, whereas, no other city has had more than seven.

The first organization in which this city held membership was the International Association, the Alleghenys playing in that loop in 1877.

The following year the Allegheny players scattered, and a new team was formed to join the National Association. The club disbanded in June after playing in 26 games, of which it won only two, both at New Haven, Conn.

The next league that included Pittsburgh among its members was the American Association, a major league then. This city played in that girdle five years, or from 1882 to 1886, inclusive.

Meanwhile, Pittsburgh had a team in the Union Association, in 1884, the league lasting only one year.

After the American Association membership from 1882 to 1886, Father Pitt gained admission to the National League in 1887.

Buffalo, after a seven-year struggle in the National, had withdrawn after the 1885 season and Kansas City was admitted to fill the vacancy in 1886. One year was all that Kansas City could stand, however, and in 1887 the franchise was transferred to this city.

It has remained here ever since, and Pittsburgh has completed 41 seasons in the organization.

**In Others Meanwhile**

Though the city has continued steadily in the National since 1887, however, it does not follow that it has remained out of all other leagues meanwhile.

On the contrary it has had clubs in three other circuits.

The first came in 1890, when the Brotherhood of Players' League was in existence. Pittsburgh had a team in that league as well as in the National, but the Players' League lasted only one year.

In 1912 the United States League, an independent organization, was formed and put a club in Pittsburgh, but it blew up in June.

The last was the Federal League, in which Pittsburgh played in 1914 and 1915, the league disbanding after the 1915 campaign.

That makes a total of eight major leagues in which Pittsburgh has been represented. No other city has equaled that record and Pittsburgh still leads, even though it has never had a club in the American League and is at present a one-club town like Cincinnati, Brooklyn, Washington, Detroit and Cleveland.

Chicago, Brooklyn and St. Louis rank next to Pittsburgh, each of those three cities having been in seven big leagues: Cleveland, Washington, Philadelphia and Boston have played in six each, New York in five, and Cincinnati and Detroit in three each.

**ODD WALK**

ONE of the strangest baseball plays ever pulled in Pittsburgh, and one that kept 20,000 spectators guessing for a time after they had seen it worked, though it was entirely within the rules, was recalled the other day by a query from a Sun-Tele reader. He wanted to know if a pitcher, while in the box at Forbes Field several years ago, had been permitted to give a batter a base on balls by throwing four times to first base.

That's exactly what the pitcher did, and it may be of general interest to game-goers of this district to describe the happening all over again at this time, particularly as it caused such a discussion at the time that it led to a change in the rules.

On Saturday, July 12, 1924, the Pirates and Phillies played a bargain double-header at Forbes Field. The Buccaneers took the first game, 6 to 5, by scoring a run in the ninth inning, but the second event was such a hard-fought pitchers' battle between Emil Yde and Wilbur Hubbell that it went into extra innings and at the end of the tenth round the score stood 2 to 2.

**Beating the Rules**

The Phils failed to score in their half of the eleventh, but in Pittsburgh's half, after Carey had flied to Williams, Cuyler doubled to right and took third when Parkinson threw out Wright.

Bigbee then stepped up to the plate and Pitcher Hubbell caused the spectators to wonder by throwing the ball four times to Walter Holke at first base. They were further mystified when Umpire Sweeney ordered Bigbee to first on balls, the game ending a moment later when Traynor beat out a tap to Parkinson and Cuyler scored with the winning run.

Hubbell had given Bigbee an intentional base on balls, but in a new way. The explanation was that the baseball code at the time included the following rule: "If, after the batsman be standing in his proper position, ready to strike at a pitched ball, the ball be thrown by the pitcher to any player other than the catcher when in the catcher's lines and within 10 feet of home base (except in an attempt to retire a base-runner) each ball so thrown shall be called a ball."

This rule had been adopted for the purpose of penalizing a pitcher for delaying a game, but Hubbell made different use of it and employed it as a means of giving an intentional base on balls.

And that was not the first time he had done it, as four days earlier, or on July 8, he had worked the same trick against the Reds in a game at Cincinnati. His object in not throwing widely to the plate, as is customary, evidently was to avoid making the catcher jump outside his lines or leave his position behind the plate too quickly, thus escaping having a balk called, and at the same time he probably figured that the runner on third might try to sneak in and thus give the Phils a chance to retire him.

**Code Now Forbids**

But whatever his scheme was, he never got a chance to try it again. It was the first and last base on balls of that kind ever issued in a major league game in Pittsburgh, as League President Heydler at once put a stop to the practice and ordered the umpires to call a balk on every ball thrown under such conditions when it was not intended to catch a base runner.

Later, to make it stronger, the rule itself was changed, and since 1926 it has read as follows: "Rule 22, Section 1—When the batsman is standing in his proper position, ready to strike at a pitched ball the ball SHALL NOT BE THROWN BY THE PITCHER TO ANY PLAYER OTHER THAN THE CATCHER, when in the catcher's lines and within 10 feet of home base, except in an attempt to retire a base runner. IF REPEATED AFTER WARNING BY THE UMPIRE THE PITCHER SHALL BE REMOVED FROM THE GAME."

That was the end of the Hubbell trick.

Of all the players who took part in that game here in 1924, only Wright and Traynor still are with

(Continued on Page Four, This Part)

## Captain

**LEADS TITANS**—Charles (Chuck) Ayers, three-letter man at Westminster College, who has been elected captain of the Titan quintet for next season. He is a junior and his home is in Canonsburg. He plays guard or tackle on the football eleven and stars in the weights for the track team.

# SHOTS and PASSES

by Julius Levin

FANS picking the J. J. Mieles to finish a poor second in their battle to retain the P. & O. League championship are in for a rude surprise, judging by the brilliant exhibition given by the titleholders in their recent battle with the Goldensons.

Awakening from the lethargic state that has gripped them for several weeks, the Mieles showed signs of recovering their natural stride and if they continue to play as they played against the Goldensons it is going to prove a real task to dislodge them from the throne.

The Mieles are scheduled to defend their laurels against the winner of the triangular series between the Sianos, Somermans and Junkers. The issue seems to rest between the Somermans and Sianos, each of whom has taken a fall out of the Junkers.

TWO brilliant basketball stars who have contributed immensely to the success of the Goldenson Vanities in girls' basketball circles this winter are Mary Good and Marty Gracey.

Veteran stars of the popular winter indoor sport, this pair of Goldenson forwards stood out conspicuously in girls' basketball circles hereabouts this season.

Mary Good is rated by close followers of the sport as one of the outstanding forwards playing basketball in this vicinity. An excellent shot, this lassie has contributed much to the success of the Vanities.

Marty Gracey was a little slow in striking her natural stride, but her work in recent contests has left no room for complaint.

FOLLOWERS of girls' basketball are singing the praises of the Young Women's Hebrew Association sextet, the only team to score a victory over the famed McKees Rocks Tumblers this season.

The Bellefield lassies checked the McKees Rocks sextet on its own floor, 15 to 14. This team has been playing exceptionally fast basketball all season and merits its high rating in local girls' basketball competition.

Too much credit cannot be given Bee Tolochko for the fine showing of the Bellefield girls. Admitted to be one of the best shots in basketball hereabouts, Miss Tolochko has been one of the main cogs in the Y. W. H. A. sextet.

ST. MICHAEL'S LYCEUM comes through with a denial that its basketball team refused to go through with the third and deciding game of a series with St. Joseph's Lyceum to decide the South Side Catholic Lyceum League championship.

St. Michael's authorities claim that St. Joseph's, after agreeing to the officials, decided to ask for a change and when this was refused cancelled all arrangements for the third game.

This series had created unusual interest in the South Side and the failure of the officials to reach a suitable agreement has proved a big disappointment to the followers of the team.

MAKING a brilliant comeback after trailing in the first half of the race, the Duquesne Light passers today hold the championship of the Philadelphia Company League,

# Sacrifice, Grit, Secrets of Pitt Success—Carlson

## COACH OF UNDEFEATED PANTHER QUINT GIVES HIS SUCCESS FORMULA

**Knowledge of Fundamentals, Ability to Dream Big Dreams and Willingness to Bend Every Effort Toward Their Realization Contribute Most to Victory, Tutor Reveals — Fighting Spirit More Valuable Than Physical Strength.**

By H. F. Carlson

Coach Undefeated Pitt Basketball Varsity, National Collegiate Champion, 1928.

TO GIVE the secret of the success of this year's Pitt basketball team is my assignment. I cannot explain that it is due to anything on the order of subtle coaching, but rather to the fact that the Pitt boys shot more baskets than their opponents. That is simple, isn't it?

At any rate, it is very pleasant to have missed a call from Old Man Defeat.

Of course, everyone who is really playing the game for all he, and the game itself, is worth, deserves to get more baskets than his opponent. Every team desires to win all of its games, but for the most part, the desire is more of a passing fancy, and before long other pleasures are permitted to interfere with the basketball ambitions. This same fact applies to every line of endeavor—we would all like to accomplish great things, but most of us are not willing to pay the price in concentration.

Dr. Carlson.

There are no real secrets of success for the stories of great winners fill our libraries, and these stories tell us to what means these heroes went to win.

The formula that I believe enabled Pitt to win as it did this year is a simple one. First, there was the idea of a particular success, and second, the willingness to sacrifice everything in order to achieve that success. And then, the boys and myself, had the confidence.

### Dreams Come True

On this year's Pitt team I had boys who dreamed big dreams of basketball success over a period of years. Our team wasn't developed just this season. It had its beginning way back when the boys were just kids, when they first set their hearts on some day playing on a champion basketball team. They worked hard, and it was Pitt's good fortune to be able to gather 10 or a dozen of such boys together. They had the confidence, the ambition, and they worked hard to develop the ability and power to bring their dreams to full realization.

Our team wasn't a big one, nor was it particularly husky. But the boys made up with courage what they lacked in physical size. Give me the courageous team every time.

As to the technique of the Pitt team—every one of the boys was a good shot. They could pass accurately and they were fast, probably as fast as any basketball team in the country. They were good dribblers and all knew how to handle the ball. They have been classed by prominent coaches whose teams we met as being the fastest cutters they, the coaches, had ever seen. And in addition, we had a clean team. In the 21 games, only five men were banished for violation of the four-personal-foul rule.

### Always Play Ball

We emphasized at all times the playing of the ball, fighting the ball for all it was worth when the other team had it. Few, if any of our opponents were given opportunities to get set for a shot. As a result, they were hurried and were unable to train their eyes on the basket.

And then, the players never quit. They came from far behind more than once to win games, and stayed in every game until it was over.

With all the ability in the world, you cannot have a winner unless you have the desire to win and the grit and determination to follow through.

Here is your old secret—know your fundamentals, follow the formula and you are bound to win—if not this year, then next or the year after that.

Picture your goal, strengthen your belief and get going.

## Captain

**PENNSY LEAGUE STAR**—James (Mouse) Jennings, captain and second baseman of the Greensburg Club of the Pennsylvania League, which won the championship last year by a wide margin. Jennings is a fine field general aside from his skill as a player, and was awarded a prize as the most valuable player on the Greensburg team last year despite the fact that three other players "went up," Ropp and Wallace to Brooklyn and Packard to Buffalo. Jennings is a former student at Shadyside Academy, where he played quarterback. He has coached the St. Rosalia High School team the last four years, winning two championships and getting two ties. He lives in Greenfield.

## SANDLOT BASEBALL

by TOM BIRKS

WITH practically every sandlot organization holding special meetings during the past week, all of the leading sandlot leagues in Western Pennsylvania are beginning to show some results, with the exception of the Allegheny County loop, which apparently is going to be the last to finish its organization plans.

Practically all of the smaller leagues organized by Kaufmanns, Spaldings and Gimbels are completed and now the only work remaining before kicking off the lid is the getting together of the schedule makers. This work will naturally be delayed until some of the clubs find out from the playground authorities what dates will be given them.

Apparently the easiest loop to be whipped into shape was the City League. Despite the fact that four of last season's clubs have passed on this loop will again be composed of eight of the best sandlot outfits in the district. This loop is closed, and a committee formed to draw up the playing rules for the season.

St. Richards will be back this season with Jock Collette at the helm. He is to be assisted by Ray Modispacher. The Hill club is going to step out this season, playing only the best semi-pro clubs in the district. Hy Myers will again coach the outfit, and with a couple of new pitchers that Collette has lined up the Hill team should go good. For games call Mayflower 7034.

**Homestead Grays, as in seasons past, will pry off the lid in Pittsburgh at Forbes Field on April 14, with a team composed of the Eastern Ohio All-Stars opposed to the Power outfit. Bobby Williams will be missing from the Aberfield this season. Power has signed up a new man, but his name is being withheld for the time being.**

The meeting of the Allegheny Valley League finds a newcomer into local sandlot ranks in the Stewart Truck club. Hap Robinson, and Michael Lancelot, who for many years handled the Broad Realtors, will be in charge of the team. Hank George will coach the team.

The Trucks are going to play only the best semi-pro outfits in the district, and with the Allegheny-Kiski Valley League now defunct, there is plenty of material around the district.

The home games will be played at Parnassus High School field, and a large following is expected.

Where will Cathedral Chapel land this season? That is the question asked during the week at quite a number of sandlot meetings.

The Colorful club from Oakland withdrew from the City League and finished the season playing independent baseball. This season the outfit was reported to be lined up in a new league with Universal and Verona, but some of the other clubs supposedly in the league lined up with the re-organization of the City League.

The selection of Sweeney of the North Side Civics to the secretaryship of the City League means that the well-balanced outfit is going to get plenty of publicity. The Civic man keeps his own club well in front of the baseball fans by always being on the job.

The City League should be one of the best circuits in the district this season. The meeting held at the offices of the Reliance Life found some of the most energetic managers in the district on hand.

**Stowe will be under the managership of Nifty Gardner, the left-handed ace from down the Ro. Ill health has forced Pop Geers out of the leadership after many years of keeping Stowe Township on the baseball map. Stowe found the going too rough in the County League last season, and had a tough time finishing. This season the club will be finding a better level in the City League. Stowe is a good baseball town and should put the City League entry over big.**

After quite a little talk by managers of the County League along the "conservation" lines it will be interesting to watch the reaction to the announcement that Green Cab is back in the local semi-pro field. Manager Dinny Moore, who will again be at the helm of the Cabbies, states that only the best talent will be lined up, and when the Cabbies take the field for the 1928 campaign they will be one of the best semi-pro attractions ever gathered together in this district. But what will be the attitude of the managers who have already committed themselves on a "cut-to-the-bone" policy. Should the Cabbies get into the circuit, clubs will have to strengthen or have a one-sided race.

The North Side Civics will hold a benefit dance Easter Monday night, April 9, at Formans for the purpose of raising funds for the club this season. A booster organization has been formed and the affair should go over big. The second meeting of the team will be held Sunday at 2:30 p. m. in the club rooms. All players who attended the last meeting and many new players desiring tryout, should be on hand for this meeting.

**The Senora Juniors, who copped the Kaufmann Juvenile champion-**
(Continued on Page 5, This Part.)

### *Senators Release Eight Recruits*

TAMPA, Fla., March 17.—(AP.)—Clark Griffith, president of the Washington American League club, tonight cut eight members off the Senators' squad which is training here. Six will go to Birmingham of the Southern Association. They are Charles Lane and Luther Roy, pitchers; Albert Cooper, catcher; Ernest Smith, shortstop; Ernest (Mule) Shirley, first baseman, and Infielder Ralph Cooper.

Tommy Taylor was turned back to the Houston Texas League club, from which he was drafted, while Doug Wyckoff, former all-Southern football star at Georgia Tech, was sent to the Atlanta Southern Association club.

## Intercollegiate Rifle Meet Scheduled at Tech Saturday

AN INTER-COLLEGIATE shoulder-to-shoulder rifle match for the Pennsylvania-West Virginia sectional championship of the National Rifle Association will be held at the rifle range of Carnegie Tech next Saturday, Graduate Manager Clarence Overend announced last night.

Aside from Carnegie Tech, the University of Pittsburgh and Penn State have definitely accepted invitations to fire. West Virginia, Penn and Drexel Institute, both of Philadelphia, are likely to send teams.

Lebanon Valley and Gettysburg, also members of the Pennsylvania section, have been invited.

Sectional matches for the team of the National Rifle Association are being held this year instead of a sectional shoulder-to-shoulder match similar to the competition held last year in New York.

Teams will consist of five shooting
(Continued on Page 4, This Part.)

## PIRATES

(Continued from Page 1, This Part.)

give his club the victory. The score was 4 to 3.

**5,000 ATTEND GAME**

Approximately 5,000 fans were out to pay tribute to friend and foe. The fans had a big ovation for the Waner boys, who started on the road to baseball fame with the Seals. A great cosmopolitan city, San Francisco also is a big league baseball town in every respect except geographical. And the followers of he sport always have a fine greeting for a major league entry that comes here to show the best it has.

With conditions ideal and opposing players in perfect condition, it was easy to presume that a genuine battle was in the making as the teams paired off. Moreover, the play was fast and snappy, the nine full innings being reeled off in one and one-half hours.

**ADAMS HITS HOMER**

Traynor's belt to the bleacher seats was the opening number of the last act. This homer had the victory ticket, but it was no more important, by the way, than a four-baser, propelled into the left field section, by the sturdy little arms of Sparky Adams. Sparky found the range in the third inning with Burleigh Grimes on the sacks.

Grimes and Bunker Hill worked the contest for the National League champions. The spitball star and the spectacled ace had to bear down all the way to prevent an outburst on the part of Red Killefer's peppy band. Killefer seems to have established a well-balanced team, his pitchers being exceptionally impressive.

Hill seems to have shared the honors with Adams and Traynor. Grimes was solved for three tallies in four rounds, but the Corry giant drove a wedge through the Coast Leaguers in five well-pitched frames. Only once was Carmen solved. Chili McDaniel hitting safely to right in the eighth. Just one of the Bells reached the mid-way station.

Manager Bush sent Adam Comorosky to left field in place of Clyde Barnhart in line with his policy of keeping both leftfielders ready for duty. The Polish boy was close to an accident in the second frame when he challenged McDaniel's double. Comm was moving fast when he crashed into the short fence that fronts the leftfield bleachers. The rocket hit in his hands at the same moment and was jostled out. Adam fell flat, but was up quickly and was able to continue.

**SHOW REAL CLASS**

The Pirates have established a local reputation for class. In all their trips to the Golden Gate they have won consistently. This year it was feared there would be a change as a result of the terrific slump that clung to the first team in the Paso Robles games. The champions also were doleful at Monterey yesterday but once they landed in this hospitable city they began to show their stuff.

The ovation given the team by the Coast League fans apparently acted as a tonic. Besides showing a snappy style, the Buccos had a better co-ordinated play to show the natives. In all events they delighted the onlookers as they jumped off in an extended series.

## SHARON HOLDS SCHOOL TITLE

GROVE CITY, Pa., March 17.—Sharon High successfully defended their title as Northwestern Pennsylvania basketball champions by defeating Erie Central here tonight in the final of the ninth annual northwestern tournament, 20-14. Sharon ran up a six-point lead in the first quarter before Erie scored and held it consistently throughout the game. Erie's inability to count from the foul line was the deciding factor in the game, the up-state lads scoring only eight out of 22 chances.

This win matches Sharon against Duquesne High, W. P. I. A. L. champion here at Grove City next Tuesday night. The lineup:

| ERIE—14. | | SHARON—20. |
|---|---|---|
| Lytle | F. | Seifert |
| Sievers | F. | Flaherty |
| Livens | C. | Murphy |
| Holcomb | G. | Conlen |
| Speer | G. | Leyseck |

Field goals—Flaherty 4, Conlen 2, Peterson 1, Lytle 2, Holcomb 1. Substitutions—Erie: Dressel, Welsh. Sharon: Devine, Palonus, Burns. Foul goals—Sharon, 6 out of 13; Erie, 8 out of 22. Umpire—Shuck. Referee—Bolster.

## New League Is Formed

Teams representing the leading department stores and industrial corporations of Pittsburgh held an organization meeting at Kaufmann's Friday night and decided to sponsor a baseball league.

Attending this confab were representatives from Gimbel's, Joseph Horne's, Carnegie Steel, Union Stock and Kaufmann's. Invitations have been sent to Frank & Seder's, McCreery's and Boggs & Buhl's.

Dave (Lefty) Levenson of Kaufmann's was elected president and W. J. Hatch of the Carnegie Steel Company secretary.

The league personnel consists of bona-fide employes. The teams will play a split season. Other teams desiring to join the loop are requested to get in touch with Levenson at Kaufmann's immediately. Another meeting will be held next Saturday at 2 p. m. at Kaufmann's. The arbitration board consists of Ralph S. Davis, Regis M. Welsh and Tom Birks, of The Sun-Telegraph.

### HYATT SPEAKER.

Charley Hyatt, Pitt basketball star, will speak on athletics at the East Liverpool (O.) Y. M. C. A. tonight.

## Lehigh Wins Mat Tourney

PRINCETON, N. J., March 17.—(AP.)—Lehigh grapplers captured the Intercollegiate Wrestling Association championships here today with a total point score of 20. Cornell took second place with 15 points, Penn State third with 13 and Yale fourth with 11.

Lehigh concluded the finals with two champions crowned, while Cornell also had two matmen finish at the top of their divisions.

The new intercollegiate champions are as follows:

115-pound class—Hyman Josefson, Cornell.

125-pound class—Ed Wilson, Penn State.

135-pound class—Robert (Dick) Lewis, Lehigh.

145-pound class—Burwell Dodd, Yale.

153-pound class—William Graham, Princeton.

175-pound class—Arthur Lehr, Lehigh.

Unlimited class—Glenn Stafford, Cornell.

Syracuse finished in fifth place with seven points, Princeton sixth with six points, Pennsylvania seventh with two points and Columbia eighth and last with one point.

### WAYNESBURG VICTOR

WAYNESBURG, Pa., March 17.—Waynesburg High School defeated Monessen High here tonight, 23 to 12. The visitors were held to two field goals. The lineup.

| Waynesburg—23. | | Monessen—12. |
|---|---|---|
| McCracken | F. | Paul |
| Hewitt | F. | Anderson |
| Ullom | C. | Carlson |
| Mancuso | G. | McEnnis |
| Smith | G. | Tedman |
| Waynesburg | 9 | 14—23 |
| Monessen | 7 | 5—12 |

Field goals—McCracken 5, Hewitt 1, Ullom 2, Mancuso 1, Paul 2.

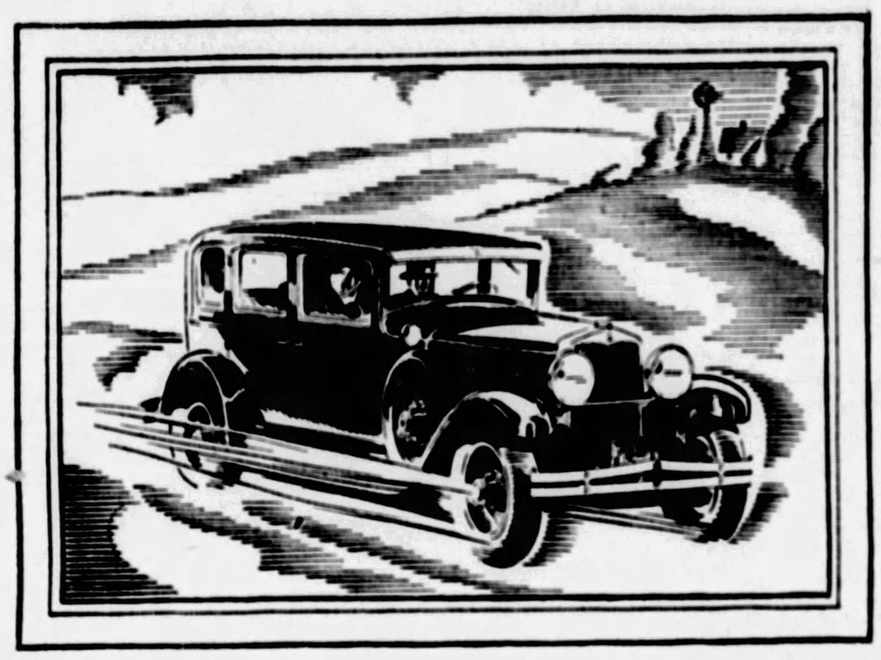
Foul goals—Waynesburg 5 out of 9, Monessen 8 out of 14.

Referee—Beyers, Pitt.

### THETA SIGMAS WIN

The fast cage team of the Theta Sigma Chi fraternity easily defeated the J. N. Chester Club, 27 to 7, in a one-sided game at the Falk Memorial gym.

# Record Public Demand Drives Hupmobile Sales Higher



**TWICE in recent months, Hupmobile sales have shattered all previous records. In no uncertain terms, the public has spoken its preference for the brilliant and individual styles created and inaugurated by Hupmobile in the new Century models.**

**Hupmobile will continue to establish new high sales records in succeeding months, because more completely than any cars in their price class, the new Century Hupmobiles link pride of possession with the finest mechanical and engineering qualities in motordom.**

**Fifty standard and custom-equipped models in three different wheelbases on the Century Eight and Six chassis now offer a wide range of choice.**

# Pitt Places Four on District All-Star Quintet

## THREE LEAGUE BERTHS GO TO WESTMINSTER

### Glenn, of West Virginia, Given Call Over Zehfuss In Choices.

### Hyatt Outstanding Among Nation's Court Stars, Panthers Among Teams.

By JESS CARVER.

THE phenominal success, plus the array of talent and the displays of individual brilliancy encountered in the champion University of Pittsburgh basketball varsity, undefeated, makes the selection of an all-star team, always a serious task, doubly difficult.

In discussing the prospect with one of the section's leading coaches, Francis Stadsvold of West Virginia's Mountaineers, the matter of the first team was very easily settled by the West Virginia coach, who insisted that it would be nothing short of criminal not to include the entire Pitt varsity on the first all-district team.

"And then," said Stadsvold, "I'll pick out a second team and I'll put men from five different schools on it."

However, a thorough study of the past campaign discloses the fact that there were anywhere from a dozen to two dozen exceptionally fine players in this territory. Due to the fact that few, if any of the schools paid particular attention to the defense, prefering to concentrate on an offensive game, some fine scoring aces were developed, led by the three Panthers, Hyatt, Reed and Wrobleski, who outranked the entire country in the compiling of huge point totals.

The men who have been selected on the accompanying all-district and all-Conference teams have been chosen with the following standards in mind:

1. Scoring ability.
2. General aptness at handling the ball.
3. Degree of smartness.
4. Efficiency at dribbling, cutting, etc.

### The District Team

Hyatt, of Pitt, and Little Sleepy Glenn, of West Virginia, were the outstanding forwards of the season. Hyatt was probably the outstanding forward of the country this year, possessing almost uncanny basketball ability—and to such an extent that all who saw him unhesitatingly dubbed him the greatest college player in history. He is a dead shot, an expert ball handler, fast as a flash, a deceptive dribbler and a cutter extraordinary. He scored more points than any two players either in the Big Ten, the Eastern Intercollegiate League, or the Pacific Coast Conference.

Glenn, who like Hyatt, was an all-America scholastic forward, was another clever basketeer, a good shot and very fast, though lacking the all-around ability possessed by Hyatt. Illness during mid-season threw him slightly off his stride, and he did not score as he might have, one reason being that the offensive of the West Virginia team was built more about Capt. Trueheart Taylor, an ordinary player, than around Glenn.

Zehfuss, of Pitt, rivaled his teammate, Hyatt, as a ball hawk. He was the surprise of the season, and played a consistently good game. A good shot, he did not score as often as he might, the Pitt system demanding other duties of him. Poscover played fine ball for Davis-Elkins, was a good shot and a good floorman. He has been compared favorably with Hyatt and Glenn. Angelo and Delahunty were next in line to Poscover and Zehfuss.

THE CENTERS

Wunderlich of Pitt was the best center in the district. He outplayed Hageberg and Gillium, the giants of West Virginia and Grove City, and outclassed Saunders, Wash-Jeff, Nesbitt of Allegheny and Harpster of Carnegie Tech. He did not score to any great extent, but he was an accurate passer and a fine floor man. His defensive play was a feature of the Pitt season.

Connors of Westminster was second to Wunderlich in all-around ability. Hageberg should have been the best in the section, because of his size and reach, but lacked the drive and consistency that should go into the makeup of a star center. Gillium of Grove City was a great disappointment.

THE GUARDS

Reed and Wrobleski, Pitt stars, are given the guard positions because of their steady and consistent play throughout a difficult, nerve-straining season and because of their sensational scoring ability. Gilchrist of Wash-Jeff and Lewis of Westminster both were good, the Wash-Jeff man showing to advantage in both his contests against Pitt and against West Virginia.

Emerick of Geneva and Harvey White of Tech were both good players, though they did not measure up to any one of the other four in general ability.

You could not replace either Reed or Wrobleski with any other guards in the district without

(Continued on Page 8, This Part.)

## Sun-Telegraph 1928 District All-Star Selections

### CONFERENCE

| | First Team. | | Second Team. | | Third Team. | |
|---|---|---|---|---|---|---|

Outstanding player—Hyatt, Pitt.

## Week's Sport Review

By JAMES J. LONG

(Continued From Page Two, This Part)

the Pirates and only Williams and Wilson still are with the Phils.

### KEEP HOCKEY?

LOCAL hockey devotees are asking themselves whether the Pittsburgh team really is to stay here next season, as was intimated when the league refused to sanction the proposed sale of the club to J. C. Wener and its transfer to Cleveland, or is to be sold to other interests later.

On the surface it looks as if everything had turned out right for the Pittsburgh fan; that the team would stay here (no thanks to the present owners, who would have sold it if the league had not interfered), and that next winter would find this city still in the circuit.

This first impression was strengthened when the chief owner of the local icers expressed a desire for a reorganization and said he would like to have four or five Pittsburghers join him in putting the team on a new basis and remodeling Duquesne Garden so that it would accommodate crowds large enough to be profitable.

### League May Sell It

But it is whispered now that the retention of the team here is far from being certain and that the league itself may take steps to sell it to another city unless conditions in Pittsburgh are made more satisfactory.

Meanwhile Odie Cleghorn and his Pirate skaters are just hanging on by a thread in so far as their chances of getting into the play-offs are concerned. The Detroit victory over Les Canadiens Thursday night—incidentally a fluke goal gave the Cougars their win—broke the deadlock and give the Michiganders undisputed possession of third and last place money in the American section.

Tonight should decide the issue. The Bucs tangle with the Cougars on the latter's ice and the team that comes out on top will virtually eliminate the other.

After this game the Corsairs will continue farther north to Montreal, where the Maroons will be met Thursday night in the final road game of the season. Then they will come back home for the grand finale of the campaign with New York Rangers next Saturday night.

There is a possibility, slight as it may seem, of the Pirates and Detroit finishing the regular schedule on even terms, which would necessitate a play-off series between them. In this event two games would be played, one in each city, with total goals to decide the winner.

This extra series also would delay the opening of the group play-offs, as they are scheduled to start three days after the close of the season.

### Canadian Race Over

Boston has sewed up first place in the American League and will draw a bye in the semi-finals, leaving the New York Rangers to fight it out with the Bucs or Detroit for the right to meet the Bruins in the loop finals.

The three money positions in the Canadian section have been clinched by Les Canadiens, Montreal and Ottawa. The latter's victory over the Americans Thursday night assured it of the last money rung. Chicago and the Americans are anchored at the bottom of their respective divisions.

While somewhat discouraged over the lucky breaks the Cougars have been getting in recent games, the Garden lads have not given up hopes of eventually beating out the Fordtown boys.

It just means that they will have to fight that much harder and they say they are going to stay in the thick of the battle as long as they can skate and wield their sticks.

They will have accomplished a praiseworthy feat even if they don't share in the post-season spoils, as any team that can come out of the cellar after the second half of the schedule is under way and fight its way into the select circle under adverse conditions is entitled to lots of credit.

## WHEELING WINS STATE LAURELS

BUCKHANNON, W. Va., March 17.—Wheeling High School basketball team won the annual state scholastic basketball tournament here tonight when it defeated Shinnston in the final game, 31 to 22.

Shinnston fought desperately to overcome an early lead, but was unable to make ordinary easy shots. Mazzie stood out as the leading player for Shinnston and Fisding for Wheeling.

Large silver basketballs were presented to Wheeling and Shinnston and a large silver cup to Keyser. Fisding of Wheeling received a silver cup as most valuable player.

Beckley High won the cheering cup for the best cheering section. Washington Irving got one for having the largest cheering delegation.

The lineup:

| Wheeling—31. | | Shinnston—22. |
|---|---|---|
| Frost | F | Mazzie |
| Grounds | F | Abruzzino |
| Flanagan | C | Cubbon |
| Fisding | G | Hursey |
| Brohn | G | Caputo |

Substitutions—Wheeling—Goldberg, Shinnston—Strdahr, Pyles, Oliver. Field goals—Frost 2, Flanagan 5, Fisding 4, Brohn, Mazzie 3, Cubbon 3, Strdahr, Caputo. Foul goals—Wheeling, 1 out of 11; Shinnston, 8 out of 16.

| Wheeling—23 | | Keyser—21 |
|---|---|---|
| Frost | F | Stanhagen |
| Grounds | F | Long |
| Flanagan | C | Davis |
| Fisding | G | Arnehelt |
| Brohn | G | E. Miers |

Substitutions—Wheeling, Goldberg, Wallace, Stewart. Keyser—W. Miers. Goals—Flanagan 2, Fisding 6, Stanhagen 3, Long, E. Miers 3. Fouls—Wheeling, 7 in 14; Keyser, 7 in 20.

| Shinnston—27. | | Parkersburg—14. |
|---|---|---|
| Mazzie | F | Rutter |
| Abruzzino | F | Bannum |
| Cubbons | C | Nern |
| Caputo | G | Rauch |
| Hursey | G | Stephens |

Substitutions—Shinnston, Pyles, Strdahar, Oliver. Parkersburg, Brown, Goals, Mazzi, 1; Abruzzino, 1; Cubbons, 7; Hursey, 1; Rutter, 2; Rauch, 2. Fouls Shinnston, 7 out of 10; Parkersburg, 6 out of 9.

| Parkersburg—6 | | Keyser—29 |
|---|---|---|
| Rutter | F | W. Miers |
| Huggins | F | Long |
| Brown | C | Stanaher |
| Cranmer | G | Arnehelt |
| Stephens | G | E. Miers |

Substitutions — Parkersburg, Bannum, Nern, Rauch; Keyser, Lowe, Davis, Trefzer. Goals—Rutter 2, Rauch, W. Miers 2, Long 2, Stanaher 6, Arnehelt, Fouls—Parkersburg, none out of 5; Keyser, 7 out of 14.

## Fritzi Stifel Defeated, 5-4

BELLEAIR, Fla., March 17.—(AP.)—Frances Hadfield, several times feminine golf champion of Wisconsin, today won the annual Bellair women's tournament by defeating Fritzi Stifel of Wheeling, W. Va., 5 and 4. The match was played under adverse weather conditions and high wind and rain making the going extremely difficult. On the 14th green, Miss Stifel required nine putts when she tried to negotiate the cup through four inches of water.

As the match neared the end it became almost a farce, as the rain fell steadily and both players hurried to a finish. Miss Stifel won the 13th, however, despite the handicaps, with a par four.

## MANOS KEEPS HANDBALL TITLE

Theos Manos of the Downtown Y. M. C. A. won the district handball title for the second successive year Saturday afternoon when he defeated Langfitt of the P. A. A. in the final of the annual A. M. A. senior A. A. U. handball championships. Because the greater part of the draw had been centered in Manos' half of the draw, the Downtown Y star experienced no difficulty in achieving his triumph in the final. The score, 21-6, 21-10, tells the tale of Manos' superiority.

Manos advanced to the final by defeating Winkleman of the Y. M. H. A., 21-4, 21-10, and Langfitt conquered Stegelman of the P. A. A., 21-17, 15-21, 21-18, in the semi-final round.

The A. M. A. doubles tourney will be played at the P. A. A. next Thursday, Friday and Saturday.

### GRIFFIN DUAL CHAMPION

CLEVELAND, March 17.—(AP.)—Joe Griffin of Detroit, the youthful sensation of the handball court, added another jewel to his championship crown today when he wrested the National A. A. U. singles title from George A. Nelson of Baltimore, 18-21, 21-18, 21-7.

Griffin, who is just 23, achieved a goal that no handball player had reached before—title to both the A. A. U. and National Y. M. C. A. singles championships.

Two other Detroiters, Albert Schaufelberger and Willis Kamman, came through victorious in the A. A. U. doubles and annexed the title by defeating Joe Goudreau and Sam Berko of Cleveland, 21-8, 21-13.

## ELLSWORTH QUITS RACE

FLAGSTAFF, Ariz., March 17.—Having completed the first 500 miles and more of their cross-continent marathon, C. C. Pyle's bunion derby contenders re'e here tonight.

They have some 2,900 more miles to leg before they arrive at the Yankee Stadium in New York.

So far Arthur Newton of Rhodesia is still leading the contingent. His record shows an elapsed time of 80:19:45 for the 515.8 miles from Los Angeles. Andrew Payne of Claremore, Okla., is second.

Rodney V. Ellsworth of Monongahela, Pa., dropped out yesterday, leaving Bill Busch of Pittsburgh and Earl Dilks of New Castle as the only Western Pennsylvania runners still in the grind.

### DEMAR BREAKS RECORD

BOSTON, March 17.—(AP.)—Clarence DeMar of Melrose, veteran marathon runner, today easily won a 44-mile road race from Providence to Boston. None of the other runners was in sight when he finished.

DeMar's time was 5 hours, 47 minutes, 39 seconds, a record for the run and said to be a record for the distance. The best previous time was 6:05:26.

## FRANKLIN HIGH AGAIN ANNEXES KISKI LAURELS

### History Repeats as Champion and Blairsville Again Meet In Final Round.

### Winning Score Is 23-18. Kittanning Captures Consolation Crown.

NEW KENSINGTON, Pa., March 17.—Franklin and Blairsville finished in the order in which they came through in the 1927 event as the third annual Allegheny-Kiski Valley school basketball tourney closed here tonight—Franklin, champion, and Blairsville, runner-up. Franklin won the title by downing the Indiana Countians, 23 to 18, in a contest in which the Venango representatives held the lead at every stage.

In the consolation game, Kittanning, defeated by Blairsville in the second round, won out over Har-Brack Union, Franklin's earlier victim.

Kittanning was the third place team, and Har-Brack loser in the consolation.

East Brady was awarded the team sportsmanship prize, a large silver basketball. The most valuable player prize went to Adam Cardellino, captain of Blairsville. Har-Brack Union copped the students' cheering and sportsmanship trophy.

The lineup:

FINAL ROUND

| Franklin—23. | | Blairsville—18. |
|---|---|---|
| Marwood | F | Cardellino |
| Smiley | F | Cleckner |
| Yeager | C | Henry |
| Fry | G | Delora |
| Bean | G | Hosack |

Substitutions—Franklin, McMasters for Fry; Blairsville, McClure for Hosack, Hosack for McClure, Varzetta for McClure. Field goals—Marwood 2, Smiley 2, Yeager 3, Fry, Bean, Cleckner 2, Varzetta 2, Foals—Franklin 5 out of 9, Blairsville 8 out of 12. Referee—Dunmeile. Umpire—Frick.

SEMI-FINAL ROUND

| Blairsville—26. | | Kittanning—19. |
|---|---|---|
| Cardellino | F | Woodall |
| Cleckner | F | Wilson |
| Henry | C | Hilliard |
| Delora | G | Erickson |
| Hosack | G | Lynde |

Substitutions—Milliron for Wilson, Wilson for Erickson, Erickson for Lynde, McClure for Hosack, Varzetta for McClure, Hosack for Varzetta. Field goals—Cardellino 3, Henry 2, Cleckner 2, Hosack, Woodall 3, Wilson, Hilliard 3, Erickson. Foals—Blairsville, 10 out of 18; Kittanning, 3 out of 10.

| Har-Brack—14. | | Franklin—21. |
|---|---|---|
| J. Foster | F | Marwood |
| Sparks | F | Smiley |
| F. Murdock | C | Yeager |
| Crooks | G | Fry |
| Barclay | G | Bean |

Substitutions—McMasters for Fry, Rutherland for Bean, Hathaway for Sparks, Featherock for Hathaway, J. Murdock for F. Murdock. Field goals—Marwood 3, Yeager 3, Smiley 2, Crooks 2, Fry, Foster, F. Murdock. Foals—Franklin, 3 out of 4; Har-Brack, 8 out of 10.

CONSOLATION

| Har-Brack—20. | | Kittanning—13. |
|---|---|---|
| Foster | F | Woodall |
| Sparks | F | Wilson |
| F. Murdock | C | Hilliard |
| Crooks | G | Lynde |
| Barclay | G | Erickson |

Substitutions—Hathaway for F. Murdock, Murdock for Crooks, Milliron for Wilson, Wilson for Erickson, Erickson for Milliron, Milliron for Woodall. Field goals—Foster 4, Crooks 3, Sparks, Hilliard 2, Lynde 2, Erickson, Milliron. Foals—Har-Brack, 4 out of 6; Kittanning, 9 out of 11. Referee—Frick. Umpire—Duffy.

### FRANKLIN GIRLS WIN

FRANKLIN, Pa., March 17.—The Franklin High School girls' team, entered in the title play at Knox, defeated Knox this afternoon, 14 to 13. It was Knox's first defeat of the season in 14 games played.

### Y. M. H. A. TRIUMPHS

The Y. M. H. A. basketball team defeated the Rankin Sokols on the Y. M. H. A. floor Saturday night, 43 to 35. The contest was the last of the season for the winners. The lineup:

| Y. M. H. A.—43 | | Rankin Sokols—35 |
|---|---|---|
| H. Barmen | F | Koch |
| Sarkin | F | Malarkamy |
| Epstein | C | Cedak |
| Ohlum | G | Matsko |
| H. Barmen | G | Linde |

Field goals—Levinson, E. Barmen 8, Sarkin 2, Epstein 2, Ohlum, H. Barmen 4, Koch 4, Malarkamy 2, Cedak 5, Matsko 7. Foul goals—Y. M. H. A., 7 out of 12; Sokols, 5 out of 10. Referee—Callahan.

## DRUGS EXCITE THE KIDNEYS, DRINK WATER

The American men and women must guard constantly against kidney trouble because we often eat too much rich food. Our blood is filled with acids which the kidneys strive to filter out; they weaken from overwork, become sluggish, the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment, or you are obliged to seek relief two or three times during the night; if you suffer with sick headache, or dizzy, nervous spells, acid stomach, or if you have rheumatism when the weather is bad, begin drinking lots of good soft water and get from your pharmacist about four ounces of Jad Salts. Take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine.

This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate clogged kidneys, to neutralize the acids in the system so they no longer are a source of irritation, thus often relieving bladder disorders.

Jad Salts is inexpensive; cannot injure, makes a delightful effervescent lithia-water drink and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time.

## New Pro

Photo by Sun-Tele Staff Photographer.

**WESLEY WALTHOUR,** former assistant professional at the Country Club of Allegheny county, who was signed last week as professional at the Hannastown Country Club, near Greensburg, succeeding Joe Guarino, who passed unto his Great Reward recently following an operation. Walthour will be on the job beginning Monday.

## SHOOT

(Continued from Page 3, This Part.)

members and the coach for the sectional match. All five scores will be counted.

Bronze medals will be awarded to the members of the winning teams. In the event that the winner of the Carnegie Tech match turns in the high national score for the N. R. A. championship, seven silve medals, the inter-collegiate team trophy and the certificate of victory will be awarded.

### JUNIORS MEET SUNDAY

The Hazelwood C. M. C. Juniors will hold their first baseball meeting on Sunday afternoon at Engine House No. 13 at 3 p. m. The following last year players are requested to attend: F. Jones, Gannon, J. Zoyechla, T. Burke, B. Jones, J. Rossie, Martino, Horgan, J. Pitillo, Joe, Provident, Sullivan, L. Furshell, W. Abrams, or any others wishing a tryout.

### COEN-SHIELDS LOSE

JACKSONVILLE, Fla., March 17.—(AP.)—Wilmer Allison and Berkley Bell, University of Texas, today defeated Frank Shields, New York, and W. F. Coen, Jr., Kansas City, 4-6, 8-6, 6-4, 3-7, 8-6, to win the Southeastern tennis doubles championship.

## BOWLING and BILLIARDS

THE greatest event in duckpin circles in Western Pennsylvania since the day when they first put rubber bands around the little maple pins apparently is scheduled for the Haus alleys in Federal street, North Side, during the period between April 9 and 21, when the first annual tournament of the American Duckpin Congress will be rolled. For what the rubber bands added in resiliency and rebound to the little sticks, the new A, D, C, system of splitting the prize money adds to the bowlers. Under the old system of awarding all the prize money to those standing at the top of the list when the shooting was over, the average bowler who mixes errors liberally with his strikes and spares was virtually out of it from the start. Now, while the star performers will have a little more money to shoot for than their brothers of lesser ability, the average bowler's interests are protected by the system that arranges three other money zones into which he may drop for a nice piece of change.

And already the bowlers are responding to the novel plan. The idea has caught on and the response has been beyond all expectations. Tournament Manager Hilary E. Wertz announced last night that, a week before the entries are scheduled to close, as many five-men teams have entered as any prvious tournament held here ever has started, and that by the time entries close at midnight next Saturday he expects to have well over the minimum of 500 five-men teams upon which the tourney promoters have set their hearts. This will mean more than $10,000 in prizes to shoot for, a record purse for even this stronghold of duckpin bowling.

Entries close positively at midnight next Saturday with the American Duckpin Congress Tournament Committee, 922 Fulton Building.

### LOCALS AT A. B. C.

This is Pittsburgh Week at the American Bowling Congress tournament at Kansas City. The Steel City's four five-men teams will roll, the Saunier-Wilhelm Nos. 1 and 2 teams bowling their five-men event Monday night and their singles and doubles Tuesday and the P. A. A. Nos. 1 and 2 teams competing Friday night and Saturday.

The local teams consist of the following:

Saunier-Wilhelm No. 1—Ed Votel, A. Brantner, A. Hogel, J. Lehner and L. Carroll.

Saunier-Wilhelm No. 2—P. Snyder, J. Sauer, F. Barth, M. Schmidt and H. Bickert.

P. A. A. No. 1—W. Williams, W. Secrist, H. Hutchinson, G. McKee and G. Ormiston.

P. A. A. No. 2—P. Harner, T. Ashenfelter, A. Johnson, L. Marone and H. Gearhart.

Peter Hornick and Gus Braun will roll in the singles and doubles only on Wednesday.

### CHURCH TEAMS IN MATCH

Two all-star teams representing the Central Presbyterian Church League of the North Side defeated similar teams representing the Etna Calvert Memorial Church League in a match game Friday night. Central No. 1 defeated Calvert No. 1, 2,324 to 2,068, while the Central No. 2 won 2,237 to 1,770.

The first annual duckpin tournament of the Nuss brothers' alleys, Homestead, is scheduled for next week. Joseph J. Steimer of 225 West Eighth street, Homestead, is receiving the entries and reports a gradually swelling list.

The second annual two-men and individual tenpin tournament on the Carrick Eagles alleys will get under way next Saturday and continue through to Monday, April 2. Entries close at midnight, Tuesday, with Walter J. Yeager and Art Ober, 3240 Liberty avenue, who may be reached by calling Fisk 2160.

### THREE-CUSHION LEAGUE

STANDING OF THE PLAYERS.

| | Won | Lost | Pct. |
|---|---|---|---|
| Greenwood, Ellis | 27 | 9 | .750 |
| Carter, Kalmer | 24 | 20 | .706 |
| Smith, Dimling | 19 | 16 | .543 |
| Pitfield, Dimling | 19 | 17 | .528 |
| Quinn, Kenny | 17 | 18 | .486 |
| Eichenmiller, Rudy | 14 | 19 | .424 |
| Currie, Ellis | 11 | 24 | .314 |
| Wainwright, Rudy | 8 | 26 | .212 |

GAMES THIS WEEK.

MONDAY.

Wainwright vs. Quinn, at Rudy's, East Liberty; Pitfield vs. Eichenmiller, at Dimling's, Smithfield street.

TUESDAY.

Currie vs. Smith, at Ellis' Diamond street.

WEDNESDAY.

Carter vs. Pitfield, at Kalmer's Oakland.

THURSDAY.

Wainwright vs. Greenwood, at Rudy's; Smith vs. Carter, at Dimling's.

FRIDAY.

Greenwood vs. Eichenmiller, at Ellis'; Quinn vs. Pitfield, at Kenny's.

SATURDAY.

Currie vs. Carter, at Ellis'.

### LEAGUE RECORDS FALL

Butler bowlers recently broke two records in the Allegheny-Kiski Valley Bowling League when they rolled 932 pins in a single five-man game and 2,574 points in a three-game match. Although setting a new record in the league, they won only one of the three games. The record-breaking feat took place on the Palace alleys in Tarentum. Butler bowled a total of 914 pins in the second game after its record-breaker in the first game, but was nosed out by its opponents, who collected 920 pins. New Kensington formerly held the record with a total of 922 pins in a single game and 2,569 for a three-game league match.

**The annual Harry Davis sweepstakes tournament is scheduled for the Club Alleys, April 9 to 21, the same dates as the American Duckpin Congress tournament. George Schmidt, Jr., of the Fidelity Title and Trust Company is receiving entries.**

# Local Fans Get Another "Action" Ring Card

## WILLIE DAVIES BOXES CHAPPIE IN MAIN BOUT

### Bill of Four Eight-Rounders Listed at Motor Square Garden.

### Two Champions Defend Their Titles—Jack Katkish Looms as Attraction.

By HARRY KECK,
Sun-Telegraph Sports Editor.

AS a result of the good battles put up by the principals in the four eight-round bouts last week, the Motor Square Boxing Club is offering its patrons another bill along similar "action" lines Monday night.

Willie Davies of Charleroi, who was the recipient of one of "those" decisions in his last start here, when he clearly outfought the dancing and prancing Midget Wolgast of Philadelphia, only to have the judges split and the referee award the verdict to his opponent, is in the top spot again and again a Philadelphia battler, one Young Chappie, a mite who has been boxing about six years against the leaders in his class, will be in the opposite corner. Chappie already has boxed Davies twice, the first time obtaining a 10-round draw in Philadelphia and the second time, last April, losing the decision in 12 rounds at Marietta, O. He is a hard mixer rather than the running, slapping type exemplified by Wolgast.

Two husky welterweight favorites, Young Saylor of Charleroi and Bobby Richardson of Portage, meet in the semi-final, and Jack Barry, former amateur star, returns to a local ring for the first time in many months against Jackie Murray, Negro welterweight of Center avenue. Barry has been doing most of his recent boxing in Erie, where he has become one of the most popular attractions. He has developed more fighting spirit than he formerly possessed and hopes to battle his way to a main bout opportunity here.

Jack Unglo, rugged welter of Etna, boxes Joe Todd of Donora in the opener.

KATKISH PROVES PUNCHER

Is Jack Katkish, after his several ups and downs, to become Pittsburgh's best drawing card during the remainder of the current indoor season? In his last two starts Katkish has proved himself a knockout puncher. He stopped Nick Susnell and came close to stowing away Rudy Ceder, flooring the latter three times in a great give-and-take engagement that thrilled the fans at Motor Square last Monday night.

The bugs like knockout sockers and Katty packs the best wallop of any of them hereabouts these days.

Some of the fans don't like Jack's style in the ring, claiming he pushes against his opponents too much and hits on the breaks, but the referees are in the ring to prevent such violations, and they can curb him in this respect. The point is that Jack has the old sock and it is the sock that fills arenas. On his showing his last two times out Katkish deserves a break in the way of a chance against some of the better known men in his class. In him the promoters have an opportunity to build themselves up a local card.

GRAYBER STAR REFEREE

While on the subject of Katkish's good work, let's not overlook the fact that a new star has arrived in the local refereeing ranks in the person of Al Grayber, former local middleweight boxer, who in his time battled Harry Greb, Leo Houck, Whitey Wenzel, Greek (K. O.) Brown, Terry Keller and others. Grayber has appeared in the last two shows at Motor Square and handled his bouts with the coolness and skill of a born arbiter. He makes himself as inconspicuous as possible and keeps the boxers under amazing control while letting them fight and not interfering with them. As one ringside spectator remarked the first night Grayber, who now is a city detective, worked:

**"Here it is the third round, and for the first time I have noticed that there is a referee in the ring."**

That is the test of a good referee. The spectators pay to see the fighters and not the referee. The good referee is the one who can command the respect of the fighters and lose himself insofar as the fans are concerned. We do not hesitate to predict a fine future for Grayber as a ring official. Watch his work the next time he is in there.

CHANCE FOR PHIL SCOTT

What's this? A British contender for the heavyweight championship?

Great guns, how the mighty Americans have fallen!

Not only is Honest Tawm Heeney, of Australia, a Briton, more or less, in there for the final elimination for the right to fight Gene Tunney for the crown, but even Philip Scott, the champion English heavyweight canvas-kisser, claims he has as much right to a preferred position as any of them.

Heeney earned his way to the top by beating or holding even everybody they offered him and is to box Johnny Risko, victor over Jack Sharkey, in his final test. He has beaten Risko once and should be able to do it again, and, as for Scott, well, he says as how he also walloped Risko when he was over here before. He was knocked out in the first round by Knute Hansen in his American debut, but came back to knock out Monte Munn and then fought Risko in Cleveland. This decision went against him, but he has contended all along that he really won the fight and produces newspaper clippings of the Cleveland writers to back him up. Here's what one of the best of the Cleveland scribes wrote about that battle:

**"Johnny Risko landed two clean blows in 10 rounds against Phil Scott. In the seventh round Risko dropped the English heavyweight champion with a sweeping left uppercut that landed at least eight inches below the belt and should have carried with it disqualification. Scott got up and won the round, as he had the six preceding rounds, and then he went on to carry the last three rounds.**

**"The unjust verdict was the one sour note in a symphony of sock. Risko was the aggressor, but that alone will not win a fight. A caged lion can charge the bars of his pen, but you must give the cage the decision."**

Phil Scott, the fightin' fireman vs. Gene Tunney in the Battle of Acorns.

There's the fight George Texas Rickard has been looking for to bless his box office complex.

Incidentally, Philip boxes Pierre Charles, the Belgian heavyweight champion, at the St. Nicholas rink in New York Monday night. If he doesn't get knocked out, he may box Tunney twice, for all of us.

TWO TITLE BOUTS ON TAP

Two world championship battles are listed for this week, a flyweight titular affair between Corp. Izzy Schwartz and Frankie Genaro, in Madison Square Garden, New York, Friday night, and a bout between Tod Morgan, the junior-lightweight champion, and Bruce Flowers, of New York, in Boston the night before.

The Schwartz-Genaro bout will clear up the 112-pound situation. Both are claimants of the laurels and there is little to choose between them, although Schwartz has been a more consistent winner recently.

The outcome of the Morgan-Flowers bout is very much in doubt. Flowers defeated Billy Petrolle in New York Friday, but will be weakening himself to come down to 130 pounds for Morgan. Morgan, on the other hand, is very much of an in-and-outer and has saved his title more than once by forcing his challengers to come into the ring overweight.

**McKeesport's two keenest hometown rivals have been matched for a 10-round battle Thursday night in the Tube City ring. They are Phil Scello and Teddy Welch and they will meet at 143 pounds at 3 p. m. Three six-round bouts complete the program.**

LITTLE WASHINGTON SHOW

The Washington Gardens Club of Washington, Pa., stages its second show Monday night. The first one, held recently, was a marked success in the matter of attendance and there is every reason to believe that the second offering will be even better. Freddie Boylstein and Walter Dickerson will meet in the 10-round windup, Chuck Semack and Frank Kopus in the semi-final and Able Witz and Sammy Gross in one of the two preliminaries.

Stanley Simmons and Charley O'Connell, light-heavyweights, clash Tuesday night for the third time. Each has won one of the previous bouts. Eddie Barr, local lightweight, answers the gong against an opponent who had not been named up to Saturday in one of the unique five-round bouts to be staged by Promoter Jim Mullen in Chicago Tuesday night, and local amateurs will compete in the national junior championships at Detroit Thursday and Friday nights. The local team consists of the Western Pennsylvania champions recently decided in the tournament at McKeesport and includes the following:

112-pound class, Dave Auld, Swissvale A. C.; 118-pound class, Dan Billick, Willow Club; 126-pound class, Regis Davis, Swissvale A. C.; 135-pound class, L. Collura, Pittsburgh Lyceum; 147-pound class, D. Proffo, Pittsburgh Lyceum; 160-pound class, Alex Regdon, Swissvale A. C.; 175-pound class, Joe Clements, Swissvale A. C., and, heavyweight class, Leo Clements, Swissvale A. C.

ODDS AND ENDS

Young Nanci, Swissvale bantamweight, who was the victim of a two-round technical knockout defeat at the fists of Harry Crisp of Cleveland at Steubenville last Monday night, has a kick coming. He was to box Young Irish of Akron and, when the latter was injured in an automobile accident, Crisp, a 126-pounder of considerable experience, was substituted against him. Crisp had too much height and reach on him and the referee stopped the battle. Nanci probably will be rematched with Irish at Steubenville... Mike Motan of Mt. Washington, who has been doing most of his fighting away from home for months, wants to get back on the local cards. He's fighting at 126-28 pounds... Young Saylor and Larry Brignolia, hard-hitting welterweight of Boston, are matched for the windup at Oil City Monday night of next week... Joey LaGrey meets Harry (Kid) Groves of Washington, D. C., in the 10-round windup in the state armory at Cumberland Tuesday night of next week... Jeff Smith, veteran middleweight boxer, who met 'em all in his time in three continents, has just announced his permanent retirement from the ring. Gene Tunney credited Smith with being the smartest opponent he ever faced and Jeff returned the compliment by telling Gene after that battle that Gene would be heavyweight champion some day.

Jack Hood and Alf Mancini, stablemates, will meet in a bout in Holland Park Hall, London, April 26, for the welterweight championship of Europe... Emmett Rocco, Ellwood City heavyweight, has been laid up with an attack of grippe, and as soon as he recovers will have his tonsils removed and plans then to go to Cleveland and place himself under the direction of Jimmy Dunn, in accordance with an agreement reached between the veteran handler of boxers and Joe Cumo, Emmett's manager, with a view to developing the big fellow into a contender for top honors... The boxing game is going over big in New Castle, where shows are being held every Monday night by Bill Jolly and Eddie Weyrandt. The pair are planning a number of outdoor bouts this summer.

## Donora, California, Ellsworth Win Washington County Titles

WASHINGTON, Pa., March 17.—Donora, California and Ellsworth High School basketball teams won the championships of their respective classes in the finals of the Washington county scholastic tournament here tonight, the contests drawing capacity crowds who witnessed thrilling games.

Donora High School defeated Canonsburg for the Class 1 title by a score of 27 to 21. The winners assumed the lead at the start and finished the first half on the long end of a 12 to 4 score. Canonsburg outscored Donora in the last half, 17 to 15, but the handicap was too much for the losers.

In the Class 2 final, California was forced to overcome a seven-point lead held at the half to nose out a 28 to 26 victory over Claysville.

Ellsworth had little difficulty in defeating West Bethlehem for the Class 3 title, winning by 10 points, 26 to 16. The lineups:

FINALS

| Donora—27. | | Canonsburg—21. |
|---|---|---|
| Lytle | F | Stalaro |
| Ercius | F | Manning |
| Evans | C | Sheets |
| Newmeyer | G | Orsino |
| Mathews | G | Maizland |

Foul goals: Canonsburg—Spadaro, 1 out of 4; Manning, 2 out of 3; Sheets, 1 out of 2; Orsino, 1 out of 3; Maizland, 2 out of 3. Charleroi—Butler, 3 out of 5; Baker, 2 out of 4. Referee—Brickley. Umpire—Snyder.

## HOCKEY

(Continued from Page 1, This Part.)

arena. Hundreds rushed to the exits as the gas spread, but the exodus was orderly and a panic was averted. The arrest of the offender brought lusty cheers from the gallerites who, near the roof, got most of the fumes.

Their tears fairly rained down on the spectators below, but they went unheeded for there were few who did not keep their handkerchiefs to their eyes throughout the rest period. The fans elected to become amused rather than panic-stricken, and those who had adjourned to the lobby returned to their seats when play was resumed.

The two Harolds, Darragh and Cotton, contributed most to the Pittsburgh victory. Coming to the rescue in the second period when the Pirates were trailing by a goal, Cotton twice passed the puck to Darragh at the goal mouth, and twice the latter climaxed beautiful plays by hammering the disc past Winkler for goals. McCurry tallied on Drury's rebound to solidify the Pirates lead about the middle of the final stanza.

Getting the jump at the opening face-off, the Bruins registered their only tally before the Buc defenders had become set after one minute and 25 seconds of play. Frederickson and Galbraith put over a combination play that resulted in a goal. The lanky center took Galbraith's pass as he reached the last blue line and found an upper corner with a shot that fairly reeked with class.

BUC DEFENSE HOLDS

After Darragh and Cotton had put the Pirates out in front, the local defense held like the proverbial stone wall. The Boston attack throughout the third period was a constant furry of concerted action, but Burke and McKinnon spilled them there and Worters threw cold water on the effort of those who were able to break through into the scoring zone. At least three of Worters' stops were sensational in the extreme, as he turned aside seemingly certain goals.

Milks, in the first period, and Drury, in the second stanza, contributed unique thrills to the struggle when they shot wide of the cage after they had eluded all foemen and had only the goalie to beat.

The victory enabled the Pirates to keep pace with the Detroit Cougars, but it did not advance them in the race, Detroit holding to its two-point lead with a triumph over Chicago. It is likely that the owner of the last play-off berth will be decided in Detroit Sunday night, when the Bucs battle the Cougars in their own lair. A victory virtually will put the Pirates "in" and defeat will mean their certain elimination.

The lineup and summary:

| Boston—1. | | Pittsburgh—3. |
|---|---|---|
| Winkler | G | Worters |
| Shore | D | Burke |
| Hitchman | D | McKinnon |
| Oliver | W | Darragh |
| Galbraith | W | Cotton |
| Frederickson | C | Milks |

Score by periods:

| | | | |
|---|---|---|---|
| Boston | 1 | 0 | 0—1 |
| Pittsburgh | 0 | 2 | 1—3 |

Spares—Boston, S. Cleghorn, Connor, Gainor, Gorden, Clapper and Harrington; Pittsburgh, Smith, McCurry, White, Drury, McCaffrey.

First period summary: Scoring—Frederickson on pass from Galbraith, 1:25. Penalties, Shore, illegal checking; Connor, tripping; Conner, tripping; Burke, tripping.

Second period summary—Scoring—Darragh, on pass from Cotton, 3:40; Darragh, on pass from Cotton, 12:42. Penalties, Hitchman, tripping; Gorden, tripping.

Third period summary—Scoring, McCurry, on Drury's rebound, 6:47. Penalties, Shore, tripping; Gainor, illegal checking.

Referees—O'Leary and Ritchie.

MAROONS BEAT OTTAWA

MONTREAL, Quebec, March 17.—(AP.)—The Montreal Maroons defeated Ottawa Senators here tonight in a National League hockey game, 3 to 1.

TORONTO, Ont., March 17.—(AP.)—Toronto defeated the Montreal Canadiens in a free-scoring National League hockey game here tonight by a score of 5 to 3.

CHICAGO, March 17.—(AP.)—The Detroit Cougars retained their hold on third place in the National Hockey League when they defeated the Chicago Blackhawks here tonight, 7 to 6.

## SANDLOT NOTES

(Continued from Page 3, This Part.)

**ship last season, will be on the diamond again this season. Sunset Jrs., Mt. Washington Regals, and other junior teams should call Mayflower 9761 for games.**

The Mangan club of the South Side will change its name this season and be known as the Kirk-Mangan club, and the sponsors of the club are predicting a big season with the best attractions being met. There will be a meeting Sunday at club headquarters, 1016 Carson street. Players Carrick, Meade, Chaney, Mangan, Magidson, Lucas, Cask and Homer are requested to attend. The club has entered Gimbel Brothers' Major League.

## Decide Junior Ring Champs

The A. M. A. junior boxing champions for the year were decided in the two days' tournament concluded in the Motor Square ring last night with some spirited competition. The results:

SEMI FINAL ROUND.

112-pound class—Nat Little, Willow Club, defeated Matt Gallagher, Hazelwood Club, three rounds.

126-pound class—Walter Devlin, Willow Club, defeated Louis Trenge, Willow Club, three rounds; Fred Bolden Superior A. C., won from Frank Lanz, Willow Club, three rounds.

135-pound class—Lawrence Markey, Willow Club, defeated Julian Drayten, Superior A. C., three rounds; Dan McCabe, Willow Club, defeated Carl Monabano, Braddock Library, three rounds.

147-pound class—A. DeLuca, Kingsley House, defeated William Deilach, Willow Club, 3 rounds.

160-pound class—John Poth, Willow Club, defeated Howard Miller, North Side A. C., Marty Letsth, Willow Club, defeated Stabley Cetmarowski, Falcon A. C., three rounds.

175-pound class—James Cook, Willow Club, stopped Ed. Haley, Willow Club, three rounds.

Heavyweight-class—L. Hundredmare, Washington Y. M. C. A., knocked out James Bennett, unattached, second round.

FINAL ROUND.

112-pound class—Nat Latfin, Willow Club, defeated Mose Butch, Willow Club, 3 rounds.

118-pound class—Johnny Haggerty, Willow Club, defeated Freddy Smith, unattached, 3 rounds.

126-pound class—Walter Devlin, Willow Club, defented Fred Bolden, Superior A. C., 4 rounds.

135-pound class—Lawrence Markey, Willow Club, defeated Dan McCabe, Willow Club, 3 rounds.

147-pound class—A. DeLuca, Kingsley House, defeated William Gatlieb, North Side A. C., 3 rounds.

160-pound class—John Toth, Willow Club, defeated Marty Letsch, Willow Club, 3 rounds.

175-pound class—J. Collins, Superior A. C., knocked out James Cook, Willow Club, 3 rounds.

Heavyweight—Bob Moody, Tarentum A. C., knocked out L. Hundredmark, Washington Y. M. C. A., 2 rounds.

## Dukes' Tenn's Card Named

The Duquesne University tennis schedul for this season calls for nine matches, including one with Notre Dame here on May 1. The Bluff netmen open their season with the Alumni racqueters on the Duquesne courts April 24. The season closes with a match at Beaver Falls with Geneva College. The schedule follows:

April 24—Alumni at home.
April 28—Bethany at Bethany, W. Va.
May 1—Notre Dame at home.
May 4—Westminster at home.
May 14—Geneva at home.
May 16—W. Va. Wesleyan at home.
May 22—Bethany at home.
May 28—Westminster at New Wilmington.
May 29—Geneva at Beaver Falls.

## TIP-TOP CLUB LOSES

The Homewood-Brushton Y. Juniors defeated Tip-Top Club Saturday night, 35 to 16.

## BISSI WINS ALL EVENTS IN DUX TOURNEY

### South Sider Totals 1770 in Original Southern Fixture. Obley Singles Champ.

### Only the Leader Is Displaced in Final Day's Rolling. Wuerthele Team Cops.

ONLY one leader was displaced in the final day's rolling of the annual Original Southern Duckpin tournament, concluded at midnight Saturday on the Forward alleys. That was the top pair in the doubles, Magness and Renquist, with a count of of 1,138, supplanting John and Bill Casper, who had been leading with 1,118.

F. Obley won the singles with 618, and the Wuerthele team won the five-men event with a total of 2,652 pins.

The all-events title went to Augie Bissi of the South Side, who corralled 1,770 sticks for his nine games. Vierheller and Spears tied for high single game score at 255.

The final day's scores:

MEN'S SINGLES.

Britt, 474; W. Stanton, 439; Woehle, 585; Ackerman, 469; Reimer, 381; R. Anderson, 420; R. Quinn, 351; G. Jundstrom, 380; L. Murray, 400; E. Beck, 503; H. Beck, 382; B. Weir, 422; Logue, 528; Herman, 394; Blum, 421; F. McCarthy, 420; M. J. Cable, 495; P. Riley, 441; A. Golvash, 452; Rebel, 451; Freund, 450; J. Brown, 379; H. Dunn, 480; H. White, 480; J. Lawler, 435; J. Cartright, 422; L. Weitzel, 327; Pritchard, 441; J. F. Dent, 457; R. Murray, 447; F. Brumbaugh, 449; W. Voelker, 489; Bieno, 433; Shearer, 472; R. Bastetes, 400; G. Deluca, 500; Hughes, 485; Rotonto, 453; DeWalt, 536; H. E. Wilson, 407; Owens, 555; Stockahauser, 472; S. Turvey, 477; G. O. Gillespie, 493; J. Murray, 548; J. Princin, 468; Magnes, 419; Renquist, 474; B. Myers, 447; C. Meheny, 440; L. Hamilton, 471; J. Huber, 443; Burkhart, 461; Summers, 464; Howarth, 477; Ebersberger, 500; Yohe, 434; Scanlon, 494; J. Bell, 420; E. Dawkins, 398; Nuss, 452; Bayles, 505; Selai, 538; J. Steimer, 440; D. Lynch, 456; E. Painter, 448.

M. Yubas, 470; S. Selai, 456; Bresnahan, 434; McLaughlin, 450; J. Herda, 545; J. Mascardine, 462; J. Fenas, 452; P. Noroski, 493; F. Senich, 500; E. Rossone, 464; M. Midlick, 448; C. ## Week's Ring Card

MONDAY.

**Willie Davies vs. Young Chappie, Bobby Richardson vs. Young Saylor, Jack Barry vs. Jackie Murray and Joe Todd vs. Jack Unglo, 8 rounds each, Motor Square Garden.**

**Freddie Boylstein vs. Walter Dickerson, 10 rounds; Chuck Semack vs. Frank Kopus, 8 rounds, and Able Witz vs. Sammy Gross, 6 rounds, Washington, Pa.**

**Phil Scott vs. Pierre Charles, 10 rounds, New York.**

**Dave Shade vs. Del Fontaine, 10 rounds, Chicago.**

TUESDAY.

**Stanley Simmons vs. Jack O'Connell, 10 rounds, Warren, O.**

**Walcott Langford vs. Bert Colima and Phil Krug vs. Joe Anderson, 10 rounds each, Los Angeles.**

**Eddie Barr in five-round bout, Chicago.**

THURSDAY.

**Phil Scello vs. Teddy Welch, 10 rounds, McKeesport.**

**Tod Morgan vs. Bruce Flowers (for world junior-lightweight title), 10 rounds, Boston.**

**National junior amateur championship preliminaries, Detroit.**

FRIDAY.

**Roberto Roberti vs. Otto Von Porat, 10 rounds, Chicago.**

**Corp. Izzy Schwartz vs. Frankie Genaro (for flyweight title), 15 rounds, New York.**

**National junior amateur championship finals, Detroit.**

## *Navy Boxers Win Collegiate Title*

PHILADELPHIA, March 17.—(AP.)—Navy overthrew Penn State boxers as intercollegiate champions here tonight, the Middies' glovemen winning the team championship by a point score of 19 to 18. The single point margin was the same by which Penn State won the title last year in the annual intercollegiate tournament.

# GOLF and TENNIS
By VERNON A. SWARTSFAGER

HEARD IN THE LOCKER ROOM

THE QUARTET SINGING.

*I'm nothing but a little wild flower,*
*Da da rah da rah da da,*
*Growing wilder every hour,*
*Da da rah da rah da da,*
*Nobody cares to cultivate me,*
*I'm as wild as wild as wild can be,*
*Da da rah da rah da da.*

*Bobby's lost his little goat,*
*Da da rah da rah da da.*
*It took a sail in a little boat,*
*Da da rah da rah da ha.*
*Now our Bobby's gonna grieve,*
*Cause that goat sailed o'er to Stephe,*
*Da da rah da rah da da.*

—Anonymous.

THE little bit of rhyme above just about expresses our anticipation of the opening of the golf and tennis season. With the coming of spring, the balm winds, eye-resting greensward, return of the vari-colored song birds, the blooming of the trees and the flowers—our thoughts turn to the great outdoors, and the beautiful playing places Dame Nature has provided for us. And the spirit of the thing moves us with delight, and gives a tingle of joy.

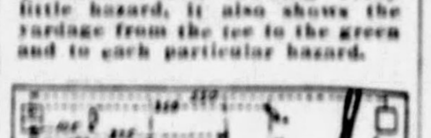
**To use the language of almost anyone—it won't be long now! One month from today and even the most pessimistic person will be trudging the links or facing the net. There are some folks, you know, who hesitate to brave the changeable weather of spring for fear of illness. And there are others who play the year round at golf—snow, rain, sleet, mud, temporary greens—and all that goes with it. For the tennis fans, they have the indoor courts—but there are hardly enough to go round, and the racqueter always is eager when spring comes to get out and play.**

We believe that this season is going to be one of the biggest in golf Western Pennsylvania has known for some years. It will be, for the greater part, confined to this district. There is no National tournament scheduled here this year; there should be numerous invitational events for men, women and mixed foursomes. The juniors are getting stronger and stronger with each successive year, and much is expected this season from them. Professional competition should be more keen; Bill Melhorn's debut in local tournament play should stir the boys to greater heights.

**Tennis should boom this season, also. Understand that a move is going to be made to try and get a regular tennis country club started, which would be a fine thing for the game in this district. The game is growing fast hereabouts, and there is no telling at this time what heights it will reach this summer.**

L. E. BIHLES of the Edgewood Country Club and Pittsburgh Field Club comes through with a novel scoring card for golfers. He sends us a copy of the card used at the Country Club of Havana, which is on the Isle of Cuba. The photographic extract herewith gives one an idea of what it is all about.

**Besides giving the number of the hole and par alongside of a little sketch of the layout of that particular hole, showing every little hazard, it also shows the yardage from the tee to the green and to each particular hazard.**



At the bottom of the card, the par and yardage, hole by hole, is given. Each nine holes at Havana is 3,190 yards and par 37, making the 18, 6,250 and par 72. A sketch of the hole on his card certainly ought to aid a man in playing a course for the first time.

**And speaking of Havana, we suppose Jack Dillon is down there still trying his best to work up a heavy tan.**

WALTER HAGEN, dramatic golf idol that he is, will make a quick jump from Hollywood to play Archie Compston, Giant English professional, in a 72-hole match for a side bet in the near future. The match is slated for April 27 and 28, according to Bob Harlow, Sir Walt's big blonde manager. Its 750 pounds a side on the wager. Understand Hagen will be in town Monday and will appear at a local department store. His many friends here will be glad to see him again.

**Hagen also will compete in the British open championship while abroad, so he may kill two birds with one stone—if any. The British open starts at Sandwich, May 7—and it was at Sandwich in 1922 that the Haig won his first British open title. He sails April 18 on the Aquitania.**

Was glad to hear Hannastown had signed Wes Walthour as its professional. A Greensburg lad, Walthour has been assistant professional to Jock Kennedy and George McBride at the Country Club of Allegheny County until this time. He starts work Monday.

**Walthour captured the first caddie-masters and assistant professionals tournament at the Longue Vue Club two years ago. This event was held under the auspices of the fatherly Caddie Welfare Committee of the Western Pennsylvania Golf Association.**

INDOOR golf is beginning to take a real hold at the two new links downtown and in East Liberty. The downtown course has had a number of tournaments for private clubs and other organizations, and the East Liberty layout management at this time is planning a big meet between 10 or 15 of the civic and luncheon clubs of that section of the city.

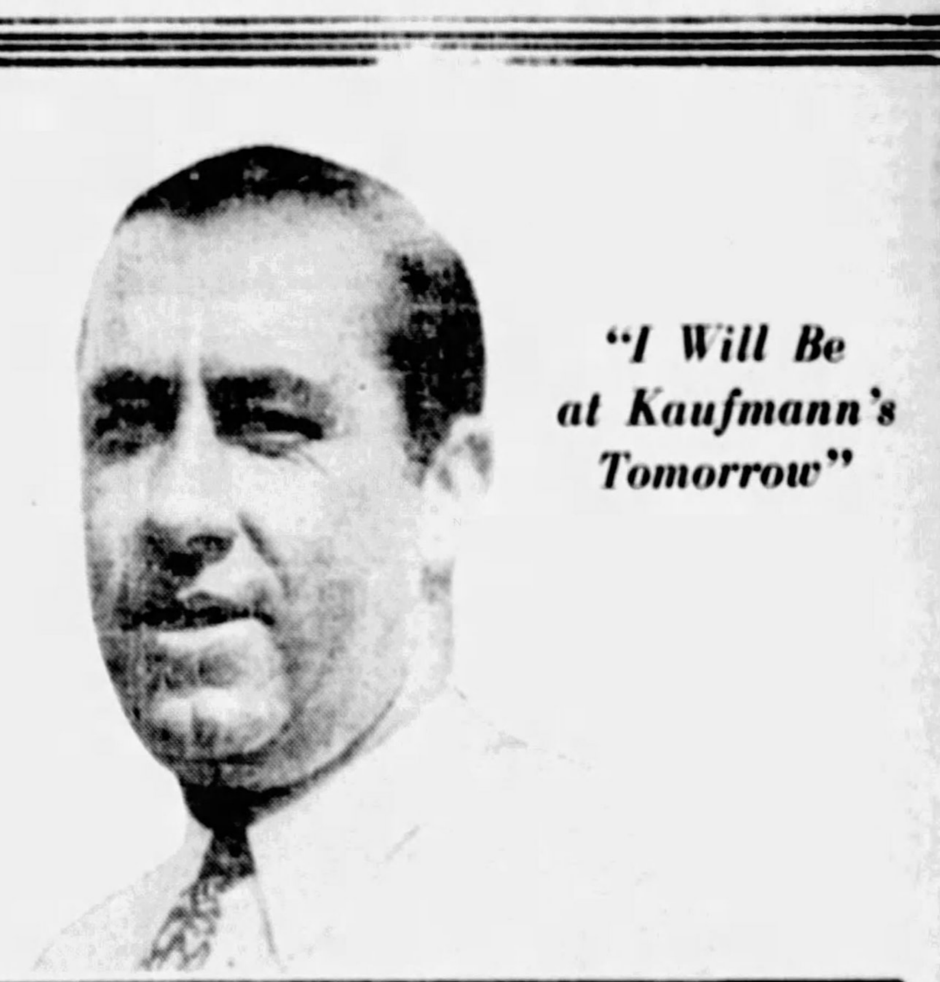
**One Poeliot had the pleasure of defeating Macarte by a 3 and 2 margin on the downtown course last week to cop the indoor title tournament of Union Trust. It was some match, too, from what we've heard of it. Two divisions played.**

The regular tournament of the downtown course has turned out winners in two out of three divisions so far. Fred Weppner, Stanton Heights star, met defeat at the

(Continued on Page 6, This Part.)

## Official

**JOHN M'NAMARA,** greenkeeper at the Pittsburgh Field Club, was elected first vice president of the Greenkeepers' Association of America at its national convention in Detroit several weeks ago. He was second vice president last year. McNamara is one of the best greenkeepers in this section. He was put into office at the same time Johnny Quaill of Highland was elected national secretary.



*"I Will Be at Kaufmann's Tomorrow"*

I WANT TO INVITE YOU to visit the special exhibition of Walter Hagen Golf Equipment for 1928 in the golf department of Kaufmann's.

See this *Ultra* line with its advanced features of construction; get the "feel" of the clubs I use . . . I designed these models for my own use, to help me in winning championships—and they have.

They represent all that I have learned in many years of tournament play, both here and abroad, and I believe they are the greatest contribution I could make towards reducing your score.

Walter Hagen

THERE IS PROBABLY no man in the world with a greater knowledge of golf and its requirements than Walter Hagen. The golf equipment he has created and which we are showing is truly representative of the knowledge and ideas gained in his many years of championship play both here and abroad. The greatest record in golf belongs to Walter Hagen—twice winner American Open Championship, twice winner British Open Championship, present and five-time winner of the American Professional Championship.

# Duquesne High Quint Looks to State Cage Crown

## GOLF and TENNIS by V.A. SWARTSFAGER

(Continued From Page Five, This Part)

hands of Hosenfeld, 1 up, in a close championship fight contest. In the third sixteen, Sauers set down Billy Tavano in the final. Tony Conforte and Tommy Dunn, the latter of Schenley links fame, have yet to meet for the honor in the second division.

**It is expected the tournament Press Anderson is promoting in East Liberty will go over big, inasmuch as many of the golfers are beginning to look forward to the opening of the out-of-doors season and wish to polish up on their putting and chipping. Indoor links, to our way of thinking, is a darned good way to do it.**

ACCORDING to James C. Stewart, president of the Western Lawn Tennis Association, the final round in the American Zone of the Davis Cup competition, will be played in Chicago, June 1 to 3.

**United States and Japan expected to be the finalists. The teams are in opposite brackets and both appear likely to come through at this time without extending themselves.**

The first match of the United States team will be played in Mexico City on May 19 against Mexico, the winner of which will play Canada in the semi-final round.

**Japan drew Cuba as its first round opponent and the winner of that contest battles China in the penultimate setto.**

**SHORT PUTTS**

SAW Col. Franklin Blackstone of the S. A. R. and Ambridge Country Club doing his stuff at the indoor school last week. He believes in getting ready early. For that matter he played eight holes at Ambridge last week—and now he knows what mud is when it is mud.

**Professional Whittingham, of a local department store, has joined the Wilkinsburg Country Club, we understand, as a member.**

The Pittsburgh Field Club held a dinner dance last night. McCormick's Orchestra provided the music.

**Everything is set at the Thornburg Country Club for a bigger and better season. When the club first started the percentage of good golfers was limited to almost one per cent; there is now a percentage of better than 20 per cent, thanks to the teaching of Jack Stewart. And don't forget, Jack will be back this year. The above-mentioned good golfers, by the way, aren't all 79 players—but they're a little above the average.**

## ALL-STAR

(Continued From Page Four, This Part)

weakening your team to some degree.

***The Conference Team***

**THE FORWARDS**

Delahunty, Westminster's scoring ace, was the outstanding forward in the Conference, which, unlike the district as a whole, produced fewer all-around stars than in former years. He and Ganzy Benedict of Duquesne, however, were fine players, good scorers, field generals and possessed real ability.

Rush of Bethany, a sophomore, was close behind Delahunty and Benedict, and Rubenstein, despite an injured knee, closed his collegiate career as a star. Friedman and O'Donovan were close behind the second team choices in ability and accomplishments.

**THE CENTERS**

Connors of Westminster, Vernon of Duquesne and Telfair of Bethany were all fair centers—good one night and poor the next. Connors is given the first team berth as his play generally was of higher order than that of either Vernon or Telfair. Telfair pressed him closely, however, and outplayed every other pivot man he was pitted against except Vernon and Connors.

**THE GUARDS**

Lewis of Westminster and Emerick of Geneva were easily the best in their positions. Rosenberg of Duquesne was ill early in the season and played a forward position for several games, which knocked him out of first team running. Of the two, Lewis and Emerick, Lewis, perhaps, was the best all-around player.

Hamil, Bethany's veteran, had an in-and-out year, though he deserves his second team berth. Berkman of Thiel, a forced player, showed to good advantage on the small Lutheran team and Frank of Waynesburg was the bright light of Waynesburg's drab year.

### *Tech Athletes to Be Varsity Clan Guests*

William Finkel, president of the Varsity Clan, the organization of lettermen at Carnegie Tech, has announced that each and every letterman and athlete yet an undergraduate at the school would be a guest of the clan at its annual theater party, which is to be held on Monday evening, April 16, in the Shubert Pitt Theater, when "Love 'Em and Leave 'Em" will mark the debut of the George Sharp Stock Company here.

### Y. M. H. A. RESERVES WIN

The Y. M. H. A. Reserves defeated the Sharpsburg Y. M. C. A. Reserves on the former's floor Saturday night, 47 to 19. Rubenstein and Closkey starred for the winners with 11 field goals apiece. The lineup:

| Y. M. H. A. Res—47. | | Sharpsburg Y—19. |
|---|---|---|
| Rubenstein | F | Riter |
| Josselson | F | Renzula |
| Greenberg | C | Durne |
| Closkey | G | Dewane |
| Wolowitz | G | Defazo |

Substitutions—Milton for Josselson, Hoffman for Deffazo. Field goals—Rubenstein 11, Greenberg 11, Closkey 7, Wolowitz 2, Milton, Riter 3, Renzula 2, Durne 2, Defazo, Hoffman. Foul goals—Y. M. H. A. 3 out of 8; Sharpsburg, 1 out of 9. Referee—Callahan.

***Illness prevents Gib Marsh from contributing his weekly article on the outdoors for today's issue. This feature will be resumed on next Sunday.***

## COACH HENRY'S FIVE TO PLAY AT GROVE CITY

### W. P. I. A. L. Champion Meets Northwestern Pennsylvania Titlist Tuesday.

### State College Play Begins Friday—National Meet in Sight.

By VERNON A. SWARTSFAGER

DUQUESNE, the outstanding scholastic basketball team of Western Pennsylvania, for it towered a full head and shoulders above all its fellow sectional champions in the W. P. I. A. L. and surely would have annihilated any City League team had it played one, is expected to rise to great heights—and in the very near future.

Coach Henry's schedule calls for play in the Grove City College elimination tournament Tuesday, and, not to be premature or anything like that, after it has copped that game, then to invade State College in quest of the Pennsylvania crown with the three other teams representing the other three corners of the state.

If Duquesne is fortunate enough to win both eliminations, and we think it has the ability and necessary endurance qualities, there is more than a chance hope that it will enter and play in the national tournament to be held in Chicago next month. And it will have just as much a chance to win there as any of the other teams.

**EXCEPTIONALLY GOOD QUINT**

Just because Duquesne whirled through the W. P. I. A. L. tournament, do not think for a moment that New Castle, Braddock and Monessen had weak teams. We believe that New Castle and Braddock particularly had strong teams—quints that would have smothered ordinary opposition. Monessen, while it had a brainy team, for all of its excellence was handicapped by small, lightweight players; the test of endurance calls for a team of huskies—and, they must be fast.

Coach Henry has a squad any school coach might dream of. His reserve material is good, yet it is seldom he has use for it. The five men on his regular team—Kowallis, Kocheran, Long, Rice and Ciesynski—are built well for endurance, fast afoot and use headwork and teamwork in their variety of plays to such good advantage that good teams such as New Castle and Braddock are stopped before they get going.

We believe Duquesne has an extraordinarily fine quint this year, and that it will swing through the Grove City and State tournaments with ease, provided it isn't struck with stage fright—a little thing that almost upset the works in the Braddock tilt last Monday, when Kowallis was throwing the ball all around the court to no one in particular and fumbling the leather every time he was given a pass. If it remains a calm and collected and confident outfit, we can foresee high honors for it.

**PLAY AT GROVE CITY**

The crucial game for the Western Pennsylvania championship, then, hinges upon the outcome of Tuesday night's battle against the champion of the Northwestern Pennsylvania section in the Grove City College gym. Last year Sharon copped the honor at State. Erie East won the title here in 1926 and Uniontown's wonderful quint copped at Grove City in 1925. Sharon and Erie Central played Saturday for the right to play Duquesne Tuesday.

Only four teams, representing each section of Pennsylvania, will compete at State College this year. The contests will be played Friday night and Saturday afternoon of this week. The drawing will be made on Friday morning when the quartet of teams arrive. In the past eight teams have played at State College, but the system has been changed this year. Steelton captured the state title last year, and likely will compete again this year.

And then the tenth national scholastic cage tourney opens on April 2 and continues until the seventh—the winner at State College likely will be on hand when that event opens. Let us hope it is Duquesne.

Grafton, W. Va., High School has entered a team in the competition at Chicago for the National High School basketball championship, which opens on Wednesday of this week. Wilkes-Barre is the only team from Pennsylvania entered.

### How W.P.I.A.L. Tournament Teams Fared

PLAYOFF.

Friday, March 2—New Castle 36, Butler 21.

FIRST ROUND.

Wednesday, Feb. 29—Duquesne 40, Dormont 10.

Monday, March 5—Braddock 33, Har-Brac 25.

Tuesday, March 6—Monessen 41, Sewickley 33.

(Connellsville, Ford City, Monaca, New Castle and Fifth Avenue advanced through byes.)

SECOND ROUND.

Wednesday, March 7—New Castle 37, Monaca 17.

Thursday, March 8—Duquesne 32, Connellsville 8.

Friday, March 9—Braddock 32, Ford City 20.

Saturday, March 10—Monessen 25, Fifth Avenue 21.

SEMI-FINAL ROUND.

Monday, March 12—Duquesne 36, Braddock 18.

Tuesday, March 13—New Castle 28, Monessen 16.

CHAMPIONSHIP FINAL.

Friday, March 16—Duquesne 42, New aCstle 13.

SECTIONAL CHAMPIONS.

Section 1, Har-Brac; Section 2, Sewickley; Section 3, New Castle; Section 4, Monaca; Section 5, Monessen; Section 6, Ford City; Section 7, Duquesne; Section 8, Braddock; Section 9, Dormont; Section 10, Connellsville; Section 11 (City Section) Fifth Avenue.

## SHOTS and PASSES by Julius Levin

(Continued from Page 2, This Part.)

the outstanding industrial circuit operating in this section.

This team, boasting such veteran performers as Robertson, Hitzel, Lahr, Martin, Hartman, Bowser, Bell, Fullerton and Kraft, had little trouble defeating the best in the league and rightfully deserves its title as champions.

Robertson led the team in individual scoring with 47 field goals and 25 fouls in 40 attempts. Lahr was close at his heels with 45 field goals and 18 foul goals in 41 attempts.

PENN FIVE of Sharpsburg, Webster Hall and an all-star team, organized by Charley Hyatt, Pitt star, will be among the contestants in the annual West Penn junior and senior basketball tournament, scheduled next Saturday in Monongahela City.

The leading clubs in Western Pennsylvania have been enrolled in this tournament, staged under A. A. U. sanction, and indications are that close and hard-fought games will mark the competition. Leonard C. Healey of Monongahela City is in charge of the tournament.

WHEN the New York Celtics meet the former members of the Pittsburgh Morrys here next Saturday night, the contest will be under the supervision of Joe Goldman, one-time manager of the Morrys.

Goldman no longer takes an active part in promoting professional games, but has agreed to come out of his retirement long enough to handle arrangements for next Saturday's game at Duquesne University.

Interest in the annual appearance of the Celtics here is high and plans have been made to accommodate a large turnout of fans on the Bluff floor. The Celtics, who are scheduled to defend their title as world's champions, will come here with their regular lineup, including Davy Banks, leading scorer in the American Pro League; Nat Holman, Pete Barry, Lapschick, Dehnert and John Whitty.

The Lou Gordon Juniors and the Red McMahans of the South Side will settle their dispute for the junior championship in the preliminary game. This contest is the third and deciding game of a three-game series, the first two games having been divided.

## Junior High School Champs

**RETAIN CITY TITLE**— Basketball squad which won the city junior high school championship for Westinghouse High School for the second successive season, going undefeated in 12 games, including playoffs with Latimer, winner of Section II, and Fifth Avenue, winner of Section III. Left to right, back row—Assistant Manager R. Little, J. Miller, Coach J. Harskey, T. Goeddell and Manager J. Holt. Middle row—J. Hays, J. Stazio, H. Harrison, H. Wadsworth, William Wyld and J. McHugh. Front row—H. Bruwelheide, H. Wendell, J. Ware, Capt. B. Dye, H. Ness and S. Limonoff.

## SWIM

(Continued from Page One, This Part)

the one over the Irish were the outstanding accomplishments of the season, for the Army was considered to have the strongest team in the East, while Notre Dame had been undefeated in the West prior to the setback suffered in its own pool at the hands and for that matter, the feet, too, of the Pitt stars.

Pitt compiled a point total of 267 points in the six meets against a mere 117 for its opponents.

The stars of this Pitt team, if individual stars can be picked out were Capt. Wright, Bowen, Mango and Lithgow.

Wright, the retiring captain, holds three university records outright and is a joint holder with other members of relay teams of three others. His marks in the 40, 50 and 100-yard free style races are high, and within seconds of National A. A. U. and collegiate records. He has come very, very close to cracking the 220-yard free style mark held by a teammate, Valentine.

As a member of the 160, 220 and 400-yard relay teams, swimming as ancher man, the Panther captain had much to do with the setting of school and district records in these events.

With the exception of the 440-yard free style race, members of this year's team hold all university records and eight out of the 13 were set this year. Valentine is the 220-yard free style champ. Mango holds the 100 and 150-yard backstroke records and Swenson is king in the 100-yard breaststroke. Pete Bowen, who plays football and runs the dashes on the track team, is the holder of the 200-yard breaststroke record and unofficially has tied the national collegiate mark on several occasions.

Dave Lithgow, while he does not hold a record alone, swims on three champion relay teams, the 200 and 400-yard and medley squads. Bowen is a member of the 220-yard relay team and Mango of the medley.

The only record that has not been cracked by one of this unbeaten team is the 440-yard free style, which Butts set up in 1926, when he swam the distance in the remarkable time of 6.12.

## AT the TRACKS

### Saturday's Results

#### New Orleans.

First race, 4½ furlongs—Fluctuate, 110, L. Schaefer 3.20 3.60 3.20; Helen Davis, 107, N. Duff ... 4.80 4.60; Lafayonnet, 110, W. Dellow ... 4.20. Time, :56 1-5. [illegible]

Second race, 6 furlongs—Medley, 112, E. Horn ... 4.20 3.60 3.00; Force, 102, R. De Perna ... 14.40 8.40; Reveroften, 110, W. Dellow ... 6.00. Time, 1:14 2-5. Muldoon, Little Colonel, Gad, Dreama Lee, Phil McCann and Creole Star also ran.

Third race, 1 1-16 miles—Grand Dad, 110, Allen ... 9.00 8.00 out; Capt. George Foster, 112 Horn ... 4.80 out; Futurant, 110, T. Root ... out. Time, 1:50 1-5. Flaherty and Anaconda also ran.

Fourth race, 6 furlongs—Beggar Boy, 105, C. Landolt ... 10.60 5.60 4.20; Brilliant, 104, V. Moore ... 4.60 3.20; Tanale, 108, A. Abel ... 3.20. Time, 1:15 1-5. Fire On, Shasta Lad and Florence Mills also ran.

Fifth race, 1 1-16 miles—Fly Hawk, 107, C. E. Allen ... 7.40 3.60 3.20; William Penn, 104, W. W. Long ... 4.80 3.80; [illegible], 108, J. Jones ... 4.00. Time, 1:48. Jack Higgins, Bessie, Wolfe and Mush Dear also ran.

Sixth race, 1 1-16 miles—Morocco, 112, C. Landolt 13.60 8.60 4.20; Mandale, 109, R. Crees ... 14.60 6.40; Denny Cooney, 109, R. Leonard ... 5.00. Time, 1:51 1-5. Respond, Thistle Glad, Jennifer, Merengue, Miss Iingan and Col. Campus also ran.

Seventh race, 1½ miles—Villager, 103, T. Root ... 9.00 3.80 2.40; Torcher, 113, R. Leonard ... 3.00 2.40; Adele W., 98, M. Meyer ... 4.80. Time, 2:11 2-5. Arabian, Frightful, Lanell, Letter Six and Scotland Forever also ran.

#### Havana.

First race, 6 furlongs—Miss Bale, 102, C. Meyer ... 7-10 1-3 1-6; Ponce, 107, Guerra ... 1-1 2-5; Ferneine, 92, Shropshire ... 7-5. Time, 1:15. Arreves, His Own, Mary Agnes, Suzuki and Alice Bonnie also ran.

Second race, 6 furlongs—Furenze, 100, H. Fisher ... 6-1 5-2 6-5; Charles Robinson, 109, Gleed ... 3-1 5-2; Edna Truesdale, 104, Gwynn ... 2-5. Time, 1:14 1-5. George Mehas, Wager, La Pettie, Marabou, Lower Five, Pop Starr, [illegible] and Archibald also ran.

Third race, 6 furlongs—Agnes Call, 104, Meyer ... 3-1 1-1 2-5; San Dance, 104, Gleed ... 2-5 1-3; Accomplish, 110, Hebenstein ... 2-1. Time, 1:13 3-5. Fireshade Girl, Marshal, Yes, Valence, Flit also ran.

Fourth race, 1 mile 50 yards—Queen Trenton, 112, Fisher ... 2-1 4-5 out; Reputation, 112, Gwynn ... 2-5 out; Bucky Harris, 112, Thomas ... out. Time, 1:43 1-5. Seth's Hope and North ern Pass also ran.

Fifth race, 1 mile and 50 yards—Pliades, 107, Persa ... 12-1 2-1 3-5; Lizak, 107, Gwynn ... 1-1 2-5; Sunbalmond, 105, Gleed ... 1-2. Time, 1:46 1-5. Ten Sixty, Loyal Legion, McAlister, Jr., Ball of Speed also ran.

Sixth race, 1 mile and 50 yards—Splinters, 107, C. Meyer ... 5 1-2 1-4; Miss Emma, 98, Guerra ... 7-10 1-3; Best Friend, 112, Thomas ... 2-5. Time, 1:44 2-5. Tidbit, Sue Barker, Uncle Seth, Beatrice Morse and Rosemary Ryan also ran.

Seventh race, 1¼ miles—Peurile, 105, Shropshire ... 6-1 5-2 6-5; Liberation, 110, J. Smith ... 7-5 7-10; Intimidation, 97, C. Meyer ... 1-2. Time, 1:30 2-5. Diversity, Caleb Hope, Breeze Girl, Johnny Baker, Seth's Flower Bandel and Archibald also ran.

#### Tia Juana.

First race, 4½ furlongs—Gessnded, 109, Faerum ... 6.20 5.00 3.20; Violado, 115, Peterson ... 6.00 2.80; Master K., 118, Jones ... 4.00. Time, :55. Hill and Hill, Andrew F., Phil D., Love Charm, Troubadour, Maurice Ed, War Hawk, The Sabre, War Sight, Black Mary and Flard II also ran.

Second race, 5 furlongs—Kamehameha, 109, Arraud 18.00 6.00 3.80; Control, 112, Deford ... 3.80 3.80; Reminder, 112, Turner ... 3.00. Time, 1:02 1-5. Sir Albert, Anchorage, My Chance, Circus Lady, Here Wampus, Magic, Minnie Rombo, Mana, Golden Sunset, Teanie Weenie, Mandie and War Castle also ran.

Third race, 1 mile—White Lights, 105, Arraud 14.00 5.00 4.20; Charleston Hope, 109, Rose ... 5.00 2.60; Dots Boy, 108, Rennie ... 3.20. Time, 1:42 1-5. Roy Roy, Six Sixty, St. Leonard, Estrella G., Mildred Ruth, Shasta Daily, Lotisha, Peter Pierson and Great Finisher also ran.

Fourth race—Club house course—San Carlos, 112, Francis 4.20 3.20 2.40; Boss Hughes, 112, Richardson ... 128.00 19.40; Sweep Easy, 101, H. Philpot ... 3.80. Time, 1:37 1-5. Lord Arnegal, Miss Chatterton, Portola, Air Castle, Irish Princess II, Green Spring also ran.

Fifth race, 5 furlongs—Rockmore, 107, Jones ... 4.20 3.00 2.40; Anne Hay, 105, Herring ... 3.80 3.20; Sweepla, 92, Kelly ... 4.00. Time, 1:13 4-5. Rag Bag, Keno Sir, Nautilus, Shasta Monk and Cry Baby also ran.

Sixth race, 1 mile—Herdsman, 109, Brown ... 57.80 25.00 10.60; Heathervale, 96, Pendergrass ... 8.20 3.60; Princess Erna, 109, Arraud ... 6.40. Time, 1:41 1-5. Kit North, Cockscomb, Marmonia, Runner, Goldsborough, Go Gold, Muriel H., Fox Lady, Sunday also ran.

Seventh race, 6 furlongs—Sandy Man, 94, H. Philpot ... 22.60 8.80 3.80; Phun Real, 100, Pendergrass ... 10.80 5.40; Sergeant Seth, 109, Hardy ... 3.80. Time, 1:12 1-5. Euclid, Short Price, Conquistador, Lorena Marcellia also ran.

Eighth race, club house course—Shasta Flapper, 99, Arraud 4.60 3.20 2.40; Greta, 99, H. Philpot ... 4.60 2.80; Raymond Dale, 108, Luther ... 2.40. Time, 1:36 3-5. Better Luck, Try Me, Margie K. and Marietta also ran.

Ninth race, 5½ furlongs—Time Exposure, 101, Richardson ... 6.20 2.80 2.60; Privately, 104, Luther ... 3.00 2.60; Cuba, 109, Critchfield ... 4.00. Time, 1:06 4-5. Dr. Crabtree, Lillian L., Ferrena Seth, Knighthood, Virginia Carlton also ran.

Tenth race, 1 1-16 miles—Firth Of Tay, 112, Richardson ... 8.80 4.20 2.80; Almagren, 104, Inselone ... 10.20 4.40; Resourceful, 105, Duplease ... 3.00. Time, 1:47. Shasta Grafton, Golden Sweep, True Boy, Florenda also ran.

### Sunday's Entries

#### Havana.

First race, $800 claiming, 3-year-olds and up, 6 furlongs—*Funny Bunny, 107; Paul Smith, 109; Headline, 112; *Mally S, 92; Totaro, 97; *Torch Girl, 102; May Bar, 107; Harp of the North, 112; *Riot, 107; *Ponce, 102; *Rome, 97; Crafty Saint, 107; Night On Time, 112.

Second race, $800, claiming, 3-year-olds and up, 6 furlongs—Cheating Cheaters, 107; *Verten, 107; Bronco Girl, 102; *Sister Sue, 102; Tea Barry, 102; *Lotharto, 102; *Alice Bonnie, 92; Captain Stevenson, 102; *Davelle, 102; Captain Jack, 112; Julie, 107; *Clinging Vine, 102; *Lure of Gold, 102; His Own, 112.

Fourth race, $800, claiming, 4-year-olds and up, 1¼ miles—(a)Rock Bomb, 107; Black Monk, 107; *Chiapas, 105; *Supervisor, 104; *Little Man, 109; *War Son, 105; *(b)Hardshell, 109; (a)Bucko, 107; (b)Blue Frank, 107; Bunbury, 110; *Conjecture, 102; Marengo, 105; *Chick Bell, 105; Inskeep, 110. (a)Whitehill entry; (b)Irwin entry.

Fifth race, $800, claiming, 3-year-olds and up, 1 mile—*Griego, 107; Golden Shore, 108; Lake Rock, 103; *On the Jes, 97; *Blue Lane, 95; *Glassfull, 105; *Thomas Lynn, 106; *Goldsborough, 98; *Della Wing, 95; *Hoperwal, 95; *Waikiki, 99; Tom Brype, 95; *Golden School, 91; *Snowshire, 93; *Heatzin, 109; *Mission Lad, 97.

Sixth race, $800, claiming, 3-year-olds and up, 1 mile—*Common Gold, 108; *San Carlos, 105; Isuman, 111; Agnate, 105; *Farnell, 105; Yokohama Girl, 114; Bon Fils, 103; *Ferrash, 111; Shasta Bishop, 106; *Count Vista, 106.

Seventh race, $1,000, the Imperial Valley handicap, 3-year-olds and up, 6 furlongs—Pat, 110; Pauve, 97; Old Kickapoo, 110; Proctor Hug, 94; (b)Shasta Rose, 92; (a)Lorena Marcellia, 95; (b)Shasta Bullet, 121; Wirt G. Bowman, 98; (b)Shasta Pine, 93; (a)Conquistador, 105. (a)Irwin entry. (b)Pantages entry.

Eighth race, $85,000 added, the Coffroth handicap, all ages, 1¼ miles—(Horses in order of post position)—Bonnie Omar, 100; (a)Woolbridge, 95; Grippenmund, 96; Light Carbine, 108; General Diskin, 95; Shasta Gold, 102; Bob Rogers, 94; (b)Red Cliff, 101; (c)Port Hole, 95; Sun God II, 111; Cantankerous, 101; Wirt G. Bowman, 95; (b)Riprap, 102; Doctor Wilson, 100; Alexander Pantages, 99; Carlarie, 107; Crystal Pennant, 100; (c)Handy Mandy, 110; Master David, 90; (c)Deep Thought, 95. (a)Bowman and Crofton entry. (b)Mrs. Louise Viau entry. (c)Three D's Stable entry.

Ninth race, $800, claiming, 3-year-olds and up, 1 mile 70 yards—Tod Sloan, 109; Patent, 109; *Liberty, 104; *Dr. Clark, 104; *Sandy Man, 109; Red Ranner, 106; *Jack Dempsey, 95; *Prospect, 100; Rosaire II, 112; *Rosaber, 99.

Tenth race, $800, claiming, 4-year-olds and up, 1 mile and 70 yards—(a)Bern Dear, 104; (a)M. J. McNulty, 106; Shasta Donna, 106; *Olive Dexter, 99; *Rapier, 103; Beowale Smile, 111; *Judge Caverly, 99; Ginger Pyle, 111; Almgren, 108. (a)Nanootus entry.

Eleventh race, $800, claiming, 3-year-olds and up, 6 furlongs—Lieut Seth, 118; *Ann Curtis, 92; *Knighthood, 103; Dolly Ray, 110; *Don K., 110; *Adolphus, 101; *Walmano, 110; *Ministor, 103; *Harbinger, 113; *Broadmoor, 110; Herenbel, 101.

## BOWLING

(Continued From Page Four, This Part)

duckpin tourney to be conducted by the East Liberty Bowling Association on the Market Square Recreation Alleys during the first two weeks of April is attracting entries from all over the Tristate duckpin district and the list will far surpass any previous event of this organization. The events for women, including singles, doubles and five-women teams, already have attracted a record entry.

Rules of the American Bowling Congress governing tourney play will be in force and the alleys will be equipped with automatic pinspotters, so essential in tournament bowling.

Twenty prizes will be awarded in each of the regular events, as well as several prizes for those rolling the highest scores in all events. It is estimated that the total award will exceed $2,500. The tourney is open to all duckpin bowlers. Entry blanks may be had by addressing East Liberty Bowling Association, Market Square Recreation, 109 Market street, or by calling Court 9191.

**NEW A. B. C. LEADERS**

KANSAS CITY, Mo., March 17.—(AP.)—Charley Zehman, Chicago, a member of the Soper Brothers team, rolled 685 to take first place in the singles of the American Bowling Congress tonight. He displaced Capt. George S. Jarrett of New York, who had taken the lead this afternoon with 680.

Zehman had no errors in the 30 frames, although one split prevented him from pounding into higher figures.

The bowling of Joe Porto, who shot 276 in his last game put him and his teammate, Mort Lindsey, New York, at the top of the list in the two-man event with a score of 1,286. Porto made nine straight strikes in the last 10 frames.

A. Hiltenbrand and Barney Spinella, bowling in the same shift with Porto and Lindsey, scored 1,277 to go into second place. Spinella, last year's all-events champion, had games of 233, 225 and 192, a total of 652, to add to 548 in the five-men event and 671 in the singles for an all-event score of 1,871. His last year's all-events total was 2,014.

BUFFALO, March 17.—(AP.)—J. Bozeman of Los Angeles won the three-cushion championship of the Amateur Billiard Association of America here tonight, when he defeated Lewis M. Volger of Indianapolis in the final game, 50 to 18, in 49 innings. Bozeman went through the week's play without a defeat.

The final standing:

| | W. | L. |
|---|---|---|
| J. N. Bozeman, Los Angeles | 8 | 0 |
| Lewis Volger, Indianapolis | 6 | 2 |
| Laurence Milligan, Tulsa, Okla. | 5 | 3 |
| Monroe Messinger, Detroit | 5 | 3 |
| Dr. L. P. Macklin, St. Louis | 4 | 4 |
| Robert Lord, Glen Ellin, Ill. | 3 | 5 |
| Dr. A. J. Harris, Chicago | 3 | 5 |
| E. E. Wainwright, Pittsburgh | 2 | 6 |
| Samuel Carder, Buffalo | 0 | 8 |

Today's results, in addition to the final: Monroe Messinger defeated E. E. Wainwright, 50 to 23, in 25 innings; Dr. L. P. Macklin defeated Dr. A. J. Harris, 50 to 36, in 67 innings; Laurence Milligan defeated Robert M. Lord, 50 to 28, in 73 innings.

## Classy Field In Coffroth

SAN DIEGO, Cal., March 17.—(AP.)—Twenty of the best horses in training at the Tia Juana race track are entered for the annual running tomorrow afternoon of the Coffroth Handicap, the richest American turf prize, and which this year is expected to net the winner approximately $100,000.

The race is to be the eighth on a card of 11 events and will be run over a distance of one and one-quarter miles. Horses of all ages are eligible for the purse, which is to be $85,000 added, and which next year is to be increased to $100,000 added.

Entries, together with the weight, they are to carry and the jockeys who are to ride them, are as follows:

| | Weight. | Jockey. |
|---|---|---|
| Bonnie Omar | 100 | C. Lindseth |
| Woolridge | 95 | A. Pendergrass |
| Grippenmund | 96 | P. Francis |
| Light Carbine | 108 | G. Fields |
| General Diskin | 95 | E. Arraud |
| Shasta Gold | 102 | J. Inzelone |
| Bob Rogers | 94 | S. Heinert |
| Red Cliffe | 101 | F. Renals |
| Porthole | 95 | ..... |

# FINANCIAL Local Securities MARKETS

# LOCAL MARKET FAILS TO HEED GOTHAM FUROR

### Prices Here Hold to Narrow Range With Trend Toward Diminishing Trading.

The sensational trading in the New York market last week was not reflected on the Pittsburgh Stock Exchange. Securities prices here held to a comparatively narrow range and the volume of business was inclined to diminish rather than expand. While the record single day's business for all time was handled in New York on Friday, the daily turnover here was unusually light. A steady tone prevailed in the market, however, and the tendency in many cases was moderately higher. One notable exception was Carnegie Metals, which slipped back unostentatiously after having bulged up to a new high record the previous week. While the stock did not suffer a wide decline, the support was such that attempts to take profit around the recent top forced the price back to within two points or so of where the last upturn in the shares started.

Glass issues were rather dull, but a steady market for the various stocks prevailed the greater part of the week. Trade reports on the industry indicated no change in general conditions from those of the previous week which, however, were much better than at the turn of the year.

**FUELS SAG**

In the fuel division there was a sagging tendency evident most of the week. Oil and gas stocks, however, did not lose much ground. Such declines as were recorded were attributed more to lack of interest in that division than to any efforts to dispose of stocks. While some of the leaders of the oil industry have been candidly bearish [illegible] outlook, even from the low [illegible] depre[illegible]sion in which the [illegible] finds itself at the moment, the trading public appeared to be inclined to "copper" the statements of such oil men as President Farish, of Humble Oil, and Sinclair, of Sinclair Consolidated. The latter company's stock, incidentally, indulged in a sharp spurt on the New York Stock Exchange at the close of the week, going to the highest price since 1924.

Mr. Sinclair, a week previous, had expressed himself as unfavorably impressed with the oil outlook, and Farish, two days previous, had stated that the industry might as well make up its mind that low crude prices were permanent, not temporary. In the fact of these views from the higher-ups, the majority of oil share traders evidently did not unload their holdings, but, apparently, were willing to take on a few shares of this and that company as their likes and dislikes dictated. However, there is no question that there is a visible over-production of crude and probably some important new discoveries of which the public knows little or nothing.

**CORK ADMITTED**

Admission of Armstrong Cork Company shares to the trading list here provides a wider opportunity for public investment in one of the city's large businesses, heretofore owned by a comparatively few individuals. Armstrong is only one of many concerns which have been recapitalized over the last two or three years and shares offered in the public markets. Its history is closely linked with the industrial progress of the city.

Formal trading in the shares will begin Tuesday. Recent dealings in the stock have been handled in the local curb market recently. The listed stock represents a 4-for-1 split-up of the old shares. Current quotations are around $70 a share.

## Dividends Declared.

The Allegheny Trust Company 2½ per cent quarterly, payable April 1.

The Crucible Steel Company common $1.50 quarterly, payable April 30 to record of April 15.

Burroughs Adding Machine Company, 75 cents quarterly, payable June 11 to record of May 25.

## Rediscount Rate.

The discount rate of the Federal Reserve Bank of Cleveland on all classes of paper is 4 per cent.

## Foreign Exchanges.

NEW YORK, March 17.—Foreign exchanges steady. Quotations (in cents):

Great Britain—Demand, 487⅝; cables, 487⅞; 60-day bills on banks, 483⅞.

France—Demand, 3.93⅛; cables, 3.93⅛.

Italy—Demand, 5.27⅞; cables, 5.28⅛.

Demand: Belgium, 13.92½; Germany, 23.90; Holland, 40.21¼; Norway, 26.69; Sweden, 26.81½; Denmark, 26.77½; Switzerland, 19.25; Spain, 16.86; Greece, 1.32; Poland, 11.35; Czechoslovakia, 2.96¼; Jugoslavia, 1.76; Austria, 14.10; Rumania, .62; Argentina, 42.80; Brazil, 12.00; Tokio, 46.86; Shanghai, 65.37½; Montreal, 100.03¼.

## Foreign Money Market.

LONDON, March 17.—Bar silver, 26 5-16d per ounce. Money, 3½ per cent. Discount rates, short and three months bills, 4¼ @ 4⅛ per cent.

PARIS, March 17.—Prices were firm on the Bourse today. Three per cent rentes 67 francs 15 centimes. Five per cent loan 97 francs 80 centimes. Exchange on London 124 francs 2 centimes. The dollar was quoted at 25 francs 41½ centimes.

## Cottonseed Oil Market.

NEW YORK, March 17.—The cottonseed oil market was moderate, active and firmer today, closing with net gains of 8 to 16 points on week-end covering, combined with cotton house buying and support from spot oil interests. The firmness was due to steadier outside markets, especially lard and cotton. Refiners sold, but the absence of pressure generally helped to bring about the rise. Sales, 8,300 barrels. Prime crude, 8.25c; prime summer yellow spot, 9.70c; March closed, 9.70c; May, 9.75c; July, 10.13c; August, 10.24c; September, 10.40c.

# COTTON PRICE GOES HIGHER

NEW YORK, March 17.—(AP.)—The cotton market was higher today on continuation of yesterday's buying movement, stimulated by relatively firm Liverpool cables and reports of rains in the Eastern belt. Prices made new high ground for the movement, May selling up to 19.28c and closing at 19.23c, compared with 19.07c at the close the previous day. The general market closed steady at net advances of 13 to 17 points.

The opening was firm at an advance of 16 to 19 points in response to higher cables and the unfavorable view of the weather map. Initial prices attracted much week-end realizing, and there may have been a little Southern selling. Offerings were absorbed on reactions of 8 or 10 points from the best, and the market steadied up in late trading on continued trade buying, combined with covering and a moderate commission house demand. Closing prices were within a few points of the best.

Rains reported in the eastern belt were considered excessive, while more rain would have been considered more favorable in parts of the western belt, where the weather was clearing and colder. These features were probably factors on the advance in Liverpool, which was considerably better than due on the New York close of yesterday.

Private cables said there had been good trade calling with London, local and Indian buying in the English market, also an improved demand for cotton piece goods from

The amount of cotton on shipboard awaiting clearances at the end of the week was estimated at 121,340 bales, against 184,550 last year.

Spot cotton, 19.15c. Range on futures reported by A. E. Masten & Co.:

# STEEL OUTPUT TO SHOW GAIN IN 1ST QUARTER

### March Expected to Mark Up Increase Over Last Year as Did January and February.

By B. E. V. LUTY

Steel mill operations continue to swing in accordance with the usual seasonal trend, being a trifle higher this month than last. Both January and February recorded gains over the same months of last year, and this month will not be much if at all under last March. The quarter will probably show a gain of 1 to 2 per cent over the first quarter of last year.

The gain over the December quarter is already well established at not under about 30 per cent. Mill shipments of finished products have increased in at least the same proportion, proving that there will be a large increase in steel company earnings over those in the December quarter, which made such a poor showing. Average realized prices are a trifle higher, and unit production costs should be a trifle lower, supplying a slight addition to the large increase in earnings indicated by the increase in tonnage. Earnings increases of less than 30 per cent will be impossible to explain, and the chances are that the increases will average considerably more.

**BACKLOG MAY SAG**

It is altogether probable that this month will show a decrease in unfilled obligations. According to the experience of 1926 and 1927 such a decrease would be a belated one, as both those years started with January decreases, while this year there have been increases, the Steel Corporation showing 302,073 tons gain in January and 122,242 tons gain in February. As a general rule the last month of a quarter rather than the first two months should show an unfilled tonnage increase, by the making of contracts for the new quarter, but this time there were extensions of contracts earlier in the year, whereby there is relatively little contracting being done this month, large buyers being already well covered.

Fears of a few weeks ago that there might be a sharp curtailment in steel shipments in the second quarter, on account of prices, have since been dispelled. Apparently the program of mills in various finished lines was to demand considerably higher prices for second quarter, and such prices have been announced, already representing the common everyday market on small lots, but it has lately become clear that large buyers are covered for deliveries well beyond April 1 at substantially the first quarter prices. There are various reports of such contract extensions, as well as some concrete evidence, one point being that the cold finished steel bar makers have receded from their position of asking an advance for second quarter. They have been making contracts at the old price of 2.70 cents, justifying a presumption that they will continue to secure their raw material, hot rolled bars, at the 1.80-cent price. The ordinary open market on bars, shapes and plates has been 1.90 cents of late, subject to some shading by small mills. In sheets and strips large buyers are covered for deliveries some time beyond April 1 at more favorable prices than seemed likely a few weeks ago.

**PRICES ADVANCED**

In rails, pipe and tin plate there have been no price advances. In substantially all other finished steel products asking prices have been marked up somewhat sharply in the last three months. Old prices, or slightly advanced prices, prevail to such an extent that average invoice prices received this month are but slightly above those of last quarter, while next quarter will not average much higher at best. The trend, however, is in the direction favorable to the mills, and perhaps after all, with trade rather dull throughout the second half of last year, the mills might not have done so badly if they had merely avoided declines.

It would be contrary to the uniform precedent of the last four years for steel production to run higher next quarter than this. Predictions are that there will be no more than a small decline, perhaps matching that of last year, which was 5 per cent. In 1924 there was a very sharp decrease.

Automobile production is as heavy as could possibly be expected in the circumstances. February production outside of Ford was a trifle greater than total production in February of last year, but the gain is fictitious, as there was one more working day last month. Non-Ford production will probably peak next month, Ford production not until after June. Steel shipments to the automobile trade are now at close to their maximum. The Ford Motor Company will be a heavy buyer of sheets, but its other steel will come largely or wholly from its own plant. The company has just made some important purchases of automobile sheets at the full price of 4.15 cents. It is related that the forming operations on the new model involve exacting requirements for the sheets.

**IMPLEMENT TRADE GOOD**

The agricultural implement industry continues to run at a very high rate, with good prospects for the next few months. Distribution of building material, in sheets, pipe, nails, etc., makes a very fair comparison with conditions of a year ago. The pipe trade as a whole is not in as good position as a year ago, having the same light demand for casing and other well material, and thus far being behind last year in line pipe business, which was particularly large in 1927. There have been many natural gas line projects on foot, but actual placing of orders is problematical.

Fabricated structural steel lettings reported in the past two weeks have run heavy, at 45,000 tons and 37,000 tons, respectively, and the average in the year to date is 30 per cent above last year's average. Freight car buying, on the other hand has been disappointing, but as there was little buying last year there is no room for much loss.

The scrap market does not make a favorable showing. Mills have reduced stocks and are very reserved as to buying. In the past week a mill picked up some 5,000 tons of heavy melting steel scrap at $14.75, representing 25 cents decline in the market, which has now lost 75 cents of its dollar advance in December.

# NOTES AND COMMENT

**TUG-OF-WAR IN STOCKS**

The market was in a turmoil at the close yesterday as brokers were swamped with orders for both buying and selling account. The trade was so heavy that the stock exchange tickers continued to reel off quotations for 41 minutes after trading on the floor had ceased with the 12 o'clock bell. Trading attitude seemed to be pretty evenly balanced and the purchases matched against the sales, kept the market on a fairly even keel. The trend, however, was downward and it was evident throughout the session that heavy profit-taking was in progress. Total sales for the session were 2,162,500 shares, the heaviest two-hour turnover in the history of the exchange. Sales from 11 to 12 o'clock reached the stupendous total of 1,334,000 shares, a trading pace of over 22,000 shares a minute. The Street was impressed with the manner in which the market absorbed the selling, but forecasts as to what tomorrow's session will bring forth were conflicting. It was very evident that the bears had accomplished little in the way of getting stocks down to where the short side showed any profit and bulls were standing in the breach confidently taking all offerings.

**PULLMAN DIVIDENDS**

Asked concerning reports that directors of Pullman, Inc., at their next meeting might increase dividend rate, now $1 quarterly, Edward F. Carry, president, said: "Of course I can talk only from a personal standpoint. I have no recollection of the matter having been discussed by the board, but if we continue to grow we will have to increase the dividend." Pullman, Inc., for 1927 should show earnings about the same as in the previous year, Mr. Carry said. Pullman Co., the predecessor company, for 1926 reported net income of $14,124,754 after taxes and charges, equivalent to $10.51 a share earned on 1,344,197 shares then outstanding.

**UNITED STATES LEATHER**

The United States Leather Company reports for the year 1927 net income of $2,217,259 after interest, depreciation, federal taxes, etc., equal after prior preference dividends to $5.75 a share on 249,743 participating Class A stock and $1.78 a share on $97,610 common shares. Net income in 1926 of the predecessor, Central Leather Company, was $524,909.

**COPPER OUTPUT GAINS**

Production of copper by the principal producing countries of the world in February totalled 145,461 tons over January, according to the American Bureau of Metal Statistics. Output for the two months aggregated 245,947 tons against 276,207 tons in the 1927 period.

**MONTANA POWER**

The Montana Power Company reports for the year 1927, consolidated net income of $2,613,703 after taxes, interest and depreciation, equal, after preferred dividends to July 1, to $6.59 on 496,333 common shares, against $2,954,078 in 1926. The preferred was redeemed in July.

**JONES TEA REORGANIZATION.**

Reorganization of the Jones Brothers Tea Company as the Grand Union Company was proposed today in an offer to stockholders. Stock in the new company, under the plan, will be exchanged for that of the old on a share for share basis. All the preferred stock of the Jones Brothers Tea Company and all the stock of the Oneida County Creameries Company are to be acquired by the Grand Union Company.

**FEWER FAILURES REPORTED**

Commercial failures in the United States this week are figured at 476 by R. G. Dun & Co., against 519 the week before and 479 a year ago.

**WHEAT STOCKS DECLINE**

The Department of Agriculture has issued a report on stocks of wheat in country mills and elevators on March 1, 1928, showing there were 74,646,000 bushels, which is 12,000,000 bushels or 14 per cent less than a year ago. Wheat stocks were smaller than a year ago in all sections of the United States except the western states.

**HUDSON ON 5-DAY SCHEDULE**

Beginning at once, Hudson Motor Car Company will go on a five-day week production basis. "This is not to be construed as a lack of demand for our products," said R. B. Jackson, president. "We find that the manufacturing economies effected by the five-day week outweigh the advantages of having a few more cars to sell. It will only mean 1,800 cars off the scheduled March production. Retail sales in the first half of March were 40 per cent ahead of the like period in February. We have not changed our plans for April, and the field reports we get indicate good business ahead."

**INTERNATIONAL TELEPHONE**

International Telephone went to a new high record. Excellent buying has been coming into the stock for more than a week and, while nothing of a sensational nature is looked for, the point is made by the purchasers that steady expansion in the company's activities should be reflected in increased earnings in the future.

**OHIO OIL COMPANY**

Net income of Ohio Oil Company for 1927 declined to $3,510,372 equal to $1.46 a share, from $13,536,904 or $5.64 a share in 1926. Figures for 1927 are exclusive of $2,000,000 excess tax reserve for 1926 not required and credit of $1,864,199 tax adjustment with the government, both of which were credited to profit and loss.

**COLUMBIAN CARBON**

The Columbian Carbon Company reports net profit of $2,622,982 for the year 1927, as compared with $2,618,622 the previous year. There are 402,000 shares of stock outstanding.

**ALLEGHENY FINANCE CORP.**

The Allegheny Finance Corporation, with offices in the East End Trust Building, has changed ownership and management, it was announced yesterday. The new officers are J. S. Thomas, assistant treasurer of the Spang Chalfant Company, president; E. C. Griswold, vice president of the Union Acceptance Company, first vice president; W. S. Diggs, of Hoover & Diggs, insurance, second vice president; A. A. Ross, secretary of the Union Acceptance Company, secretary and treasurer. The concern is engaged in the small-loan business.

**PEERLESS RUMOR FALSE**

Recent reports that W. C. Durant is interested in the pending reorganization of the Peerless Motor Car Corporation have been flatly denied by Peerless officials and by spokesmen for Mr. Durant. In regard to the rumors L. R. German, general manager of the Peerless Motor Car Corporation, said: "I believe Mr. Durant owns no stock at all and has no present financial interest in our company or in its future plans. The parties who have recently acquired stock interest are men of ability and are friends to us. Their association with us will add materially to the company's strength. There is no disagreement among the stockholders of the company. Continuity of the present policies and executives is assured. The company was never so strongly entrenched as now and its continuous prosperity is assured."

**CHAIN STORE EXPANSION**

The substantial gains in sales reported by the principal chain store systems so far in 1928 are in conformity with the two previous years and are only partly due to increased number of stores in operation, according to students familiar with the industry.

Classified in two representative groups of twelve stores each, it is apparent that the gains of the stores known as "5-and-10s" are generally of even trend, while wider gains and greater fluctuations due to seasonal influences are shown by the "miscellaneous" stores, which deal in many categories of goods ranging from radios, sporting goods and shoes to drugs, groceries, bread and other comestibles.

The February sales of twelve leading "5-and-10" amounted to $42,992,575, against $38,116,087 in February last year, a gain of $4,876,488, or 12.8 per cent. For two months the sales were $81,550,949, against $72,572,148, a gain of $8,978,801, or 11.9 per cent. The January gain was 8.4 per cent. The sales of twelve miscellaneous companies in February totaled $35,244,946, against $28,831,510 in February last year, a gain of $6,413,436, or 22.2 per cent. Sales for two months were $68,916,966, against $57,036,395 last year, an increase of $11,879,641, of 20.8 per cent. The January gain was 19.4 per cent.

**CONTINENTAL BAKING**

Continental Baking class A stock held steady in the face of the announcement that directors had passed the quarterly dividend due at this time. The stock had been on a $4 annual basis since the beginning of 1927, previous to which payments were made at the rate of $8 a year for the calendars 1925 and 1926. Steadiness of the stock yesterday indicated that the decline in the stock over the past two months or so had been in anticipation of dividend suspension. Last January the stock sold above 80. Last week it reached 30, subsequently rallying a few points. Yesterday's price was around 34. The company issued a statement which said: "Although in the report of estimated sales and earnings for the first 10 weeks of 1928 there was nothing to disturb belief of directors that earnings for 1928 would be satisfactory, it was also shown that a considerable amount of cash could be spent to advantage in a program of rehabilitation of existing plants. Continuance of this program of expenditure," in the opinion of directors, "is essential and should improve net earnings of the company materially." Amos L. Beatty was elected a director. He was formerly chairman of the Texas corporation. The officers and finance committee were re-elected.

**MACKAY'S RADIO SUPPLIES**

Federal Telegraph Company, affiliated company of Kolster Radio, will supply the Mackay companies with all radio equipment to be used in its chain of stations. A high-powered transmitter is planned for Sayville on a wave length of 2,400 meters.

**OIL WELL SUPPLY OUTLOOK**

"Regarding 1927 operations of National Supply Company, James H. Barr, chairman, says increased drilling and huge supply of crude oil in Seminole area early last year practically stopped drilling operations elsewhere and finally resulted in shutdown movement in Seminole. 'As a consequence,' he says, 'our sales the first quarter were exceptionally good, gradually declining the balance of the year. Decrease in sales in latter part of the year was largely responsible for large accumulation in cash appearing in the balance sheet, which cash, we expect, will be again employed when drilling activities increase. The company is in remarkably good condition, both as to facilities, personnel and organization. While the condition of the oil industry today is not such as to lead us to expect any immediate marked increase in our business, it is reasonable to expect a continued gradual improvement."

**DISSEMBLING JUNK AUTOS**

An interesting experiment in Kansas City, Mo., which, if successful, may mean the eventual saving of $10,000,000 to $15,000,000 a year to the American automotive industry is reported by E. L. Cord, president of Auburn Automobile Company. The test is in the form of scientific dissembling of broken down automobiles. As a result of its success, Kansas City dealers who formerly had in stock many cars priced at $25 today have few for less than $100. To cut down economic waste in the trade, the dealers encouraged the formation of the United Auto Wrecking Company, which was incorporated on June 20, 1927, and up to December 1, last, had purchased 450 pleasure cars and 40 trucks. The wrecking company set out to buy in used cars at junk prices ranging from $20 to $45. It dissembles every car completely. All electrical parts, glasses and accessories are tested, cleaned, priced and assorted according to importance and size. The good parts are binned for future sale and the worthless parts are junked. Fenders, bodies, steel wheels, axles and frames are cut into strips and in this form are sold at an average price of $5 per ton, thus netting a profit. Starting with virtually no resources beyond the value of an idea, the new company has built up a business which carries into five Mississippi states.

# 60 G. M. CHIEFS GET $125,000 WEEKLY 'PAY'

### Newest Miracle of Profit-Sharing Makes Them Over Million in Last 10 Months.

By EARL REEVES.

(Copyright, 1928, by Universal Service.)

NEW YORK, March 17.—The salary of the chairman of the board of Standard Oil of New Jersey is $125,000 a year.

The "salary" of each of 60 chief executives of General Motors has been approximately $125,000 a week for the last 10 weeks.

This is the newest miracle in profit sharing, and it grows out of the great "bull movement" in General Motors which culminated in a new high record price of 172 set on the stock during the short session of the stock exchange today.

On January 10, General Motors was quoted at 130. Since that time the appreciation has been $52 on the share.

**60 IN GROUP**

The "super-executives," 60 in number, who were elected less than five years ago to membership in the famous Manager Securities Company, could take out their pencils today and by a little rough figuring arrive at a conclusion that an average of a million and a quarter has been added to the individual share in that company in less than 10 weeks. This was true because the Manager Securities Company owns one thing, and one thing only; and that is common stock in General Motors.

A recapitulation, in brief statistical form, of what has happened to these men and their holdings challenges attention.

Pierre Dupont and Alfred P. Sloan, chairman and president, respectively, of G. M., are credited generally with formulating this biggest profit sharing scheme in history. General Motors was formed by the amalgamation of many units. Chiefs of these units and many other men who fought through the ranks to key positions were listed as "senior executives" and given a share in the so-called Managers Securities Company, which was permitted to buy a huge block of Dupont General Motors stock on a partial payment plan. On the average, the men themselves put in $80,000 each. Then this happened.

**DIVIDENDS LARGE**

In 1923 each share of the Managers' Securities Company—or each executive—was entitled to $70,000 in regular dividend and profit-sharing percentage.

In 1924, this "extra bit" was $110,000.

In 1925, each executive was entitled to $100,000 in regular dividends alone, while his profit-sharing quota was $180,000 for the year.

In 1926 the two figures totaled $290,000.

While in 1927, the big "melon" was a "recapitalization" which amounted to a 100 per cent stock dividend.

That is one side of the story of what happened when General Motors promised its executives a share in earnings beyond a certain rate; for the other side of the story it is necessary to turn to the Stock Exchange. These "dividends," regular and extra-profit, never have been divided; the Managers Securities Company not only held onto the common stock, but has bought more, and the appreciation in value of this co-operatively owned block has made the average "senior executive" a millionaire more than five times over. Men who put in $80,000 less than five years ago, own an equity worth five and a quarter millions today. The "average" annual earnings of these "super executives" has been more than a million dollars a year.

**TREASURE CHEST LOCKED**

And a final peculiar feature is that the "chest of gold" is locked until 1930. In order to clinch their great profits, General Motors executives must maintain the corporation on a profitable basis at least until 1930, when the by-laws of the Managers Securities Company provide for its dissolution and the distribution of profits then accrued.

Wall Street would like to know just how much the executives have added to the "pot," by purchases over the counter, during the climb which culminated in an 11-point gain this week.

# NEW YORK Official Quotations STOCKS

# STOCKS CHURN ABOUT IN WILD HALF-SESSION

**Traders in Dark as to Exact Market as Ticker Lags Behind 25 Minutes.**

By BROADAN WALL,
Universal Service Financial Editor.

NEW YORK, March 17.—Another feverish half-session on the stock exchange today resulted in a highly irregular closing. For the greater part of the two hours, traders were in the dark as to the exact market, the ticker running from 23 to 25 minutes behind actual quotations on the floor and at times the ticker was printing prices several points away. Transactions approximated 2,000,000 shares, almost as large as last Saturday when the first 2,000,000-share Saturday in stock exchange history was established. Cotton and the grain markets were strong and foreign exchanges quiet and firm.

Opening prices were buoyant and the market seemed inclined to follow up previous sharp advances. General Motors again assumed leadership and advanced to a new record high. The remainder of the market failed to respond briskly and when the first signs of hesitation appeared the railroad and public utility stocks were brought forward and took over the leadership.

**MARKET BROADER**

The market as a whole was much broader than in previous half sessions, greater public participation becoming evident in both these two groups. Central advanced to a new high for the move and other rails likewise spurted. Lackawanna proved a favorite, buying being stimulated by expectation that it will be accorded good treatment in the eastern merger settlement.

United States Steel was taken in hand and given a 2-point whirl upward and it held over a point of this gain. There was considerable profit-taking noticeable in other industrials and their average price was almost a point lower. International Match preferred, which had scored a sharp advance during the week, sold off sharply. Corn Products on the other hand jumped 2 points on favorable earnings reports.

Real feature of the market was the action of the public utility shares. International Telephone and Telegraph, which has been recommended by numerous brokers, added almost seven points to its price, reaching a new record for all time. This company has interests in many foreign countries and is constantly expanding. American Power and Light initiated the brisk buying of the utilities. It gained over five points and report was heard that the company planned to acquire Montana Power.

**N. Y. SHARES JOIN RISE**

The New York utility shares joined in the advance, Consolidated Gas enjoying a sizeable gain on fairly heavy buying. Brooklyn Edison and Brooklyn Union also were higher, being stimulated by knowledge that the powers-that-be in the local situation are gradually working out details for their consolidation.

Expansion of bullish activities into the public utility and railroad sections of the market was welcomed by those active on the long side who were inclined to view with some misgivings the recent wild action of some of the industrials. The railroad stocks at least are not commencing wild gyrations at record-breaking levels. Furthermore, the entire railroad picture has been improved substantially now that there is definite indications of a truce among the big systems in the East. A definite betterment in freight traffic would help materially in convincing skeptics that the rail shares are privileged to higher prices.

Actual bank statement disclosed excess reserves of $45,308,000, which compared with a deficit in reserves of $3,021,000 a week ago.

## The Coffee Market.

NEW YORK, March 17. — Steel unchanged.

NEW YORK, March 17.—Coffee futures were higher today on further trade buying and covering, promoted by talk of a firmer tone in the cost and freight situation. Rio contracts opened at an advance of 5 to 12 points and sold up to 14.90c for May, closing at net advance of 8 to 12 points. Santos contracts closed at an advance of 10 to 15 points. Estimated sales, Rio, 18,000 bags; Santos, 7,000 bags. Closing quotations: Rio, March, 16.20c; May, 14.80c; July, 14.45c; September, 13.90c; December, 13.70c; January, 13.55c; March (1929), 13.30c. Santos, March, 21.75c; May, 21.30c; July, 20.55c; September, 20.10c; December, 19.30c; March (1929), 19.00c.

Spot coffee dull, Rio 7s, 16⅝@16¾c; Santos 4s, 22½@23c. Cost and freight offers included Bourbon 3s and 5s at 22.25c. Rio exchange on London 1.128d higher; dollar buying rate unchanged. Rio market 325 reis higher to 150 reis lower; Santos unchanged. Brazilian port receipts, 42,000 bags; Jundiahy, receipts, 21,000 bags.

# BULLS' DRIVE ECLIPSES ALL OTHER EVENTS

**Technical Market Conditions, Rather Than Industrial Developments Responsible.**

By W. S. COUSINS.

NEW YORK, March 17.—Back again in the spotlight, the bull movement in speculative stocks in the second week of March easily eclipsed all other financial features of the month.

In contrast to the disappointing Wall street experts who are generally revival of spring business in important lines, the speculative fever has been gradually spreading, and the ally accurate in reading the "signs of the times" have already begun to raise the danger signal.

Technical market conditions, rather than industrial and business developments, were doubtless responsible for the bulk of the sensational advances in the market's speculative leaders.

An overconfident bear contingent figured too broadly on the slumping business in the first two months of the year, the increase in unemployment, the poor earnings reports for 1927, and, last but not least, the threatened cudgels over the backs of the bulls by the reserve bank heads.

At last, said the bears, our time has come. Suiting their action to the word, they began in early February to "sell their heads off"—selling the stocks they did not own, always a risky business when the sap is running up the trees, according to the sages of Wall street.

**INVITED DISASTER**

They invited disaster by entering a condition which virtually permitted the bulls to name the price at which they would be permitted to cover and the bulls, flushed with their successes of the last four years and with overflowing coffers as the result of huge market profits made in stock ventures, went about their work coolly and deliberately.

There can be no question of a technical corner in Baldwin Locomotive, Radio and a few other closely-held stocks. The Stock Exchange authorities do not recognize a corner as long as stock is available for loaning purposes and until such time as it is shown that a free and open market is not maintained for a stock in question. Without strong-handed manipulation, a stock like Radio, paying no dividend and having shown nothing yet in the way of spectacular earnings, would never have jumped 30 points over the course of a few days. Of course, the shorts made it much harder for themselves by being compelled to bid furiously against each other for the stock, but they will find little sympathy for themselves on that score.

The rise in General Motors stock was an entirely different matter. Here is the stock of a company which in the last four or five years has made sensational strides in the perfection of its mechanical processes, the improvement of its products, the expansion of its plants and the output of its cars and other products. Its directors have shown great liberality in their treatment of stockholders and employes, and a wide clientele of enthusiastic investors has been built up. Compared with other stocks, in the ratio of net earnings to market prices, General Motors had been selling far out of line.

Last, but not least, the General Motors family was substantially backed by the most powerful, and at the same time, the shrewdest banker-investors of the country, the Morgan and Dupont interests. As a further evidence of their unbounded confidence in the future of their own corporation, the officers and employes of the company spent $30,000,000 for 200,000 shares of common stock at the highest price at which the stock ever sold, up to the time of purchase. Knowledge of this transaction electrified the speculative district, and doubtless attracted investment as well as speculative buying.

**AMERICAN BUSINESS HEALTHY**

Compared with any of the pre-war years, and with all post-war years up to the end of 1925, last year makes a favorable showing. Compared with 1926 there has been a decided falling off in the earnings of steel, oil, textile and other industrial corporations, and railroad earnings in 1927 were off about 7 per cent from the previous year.

On the other hand, sufficient gains were recorded in the net income of other corporations and groups to offset a large share of the shrinkage in the earnings of the corporations under review. There were almost as many newly inaugurated and increased dividends last year as there were suspensions and decreases. The oil industry made a good fight against almost overwhelming handicaps, and put the industry in a fair position to enjoy a profitable year.

What of present conditions in American industry? Since the turn of the year the steel manufacturing industry, generally regarded as the most accurate barometer of general business conditions in America, has moved up from a 65 per cent basis to a 90 per cent basis in the operations of its manufacturing facilities. It has twice increased the market price of steel products $1 a ton and will shortly announce a third increase.

The automobile industry already has made good headway in making up for the deficiencies of 1927. Prominent manufacturers like Studebaker, Hudson and Chrysler report that both their domestic and foreign business in January and February of this year have surpassed all previous records for that month, while General Motors continues the sensational expansion which has featured its activities in the last four years.

# LIVESTOCK MARKETS

## Union Stock Yds., Herrs Island

Brinkman, Wood & Beck, live stock commission merchants, furnish the following quotations:

Cattle—Receipts light; market steady. Good to choice, $13.25@13.50; good, 1,300 to 1,400 lbs., $11.85@13.10; medium, 1,200 to 1,300 lbs., $11.75@12.75; tidy, 1,050 to 1,150 lbs., $12.25@13.00; fair, 900 to 1,100 lbs., $9.75@11.50; common, 700 to 900 lbs., $7.00@8.25; common to good fat bulls, $6.00@10.00; common to good fat cows, $4.50@9.50; heifers, 700 to 1,100 lbs., $7.00@12.25; fresh cows and springers, $50.00@125.00.

Hogs—Receipts, 6 double decks; market ruled higher. Extreme heavy hogs, $8.40@8.75; light heavy hogs, $8.75@9.00; heavy mixed, $9.00@9.25; mediums, $9.30@9.40; heavy yorkers, $9.30@9.40; light yorkers, $8.50@9.50; pigs, $7.50@8.25; roughs, $6.50@7.25; stags, $4.50@5.50.

Sheep and Lambs—Receipts light; market steady. Prime wethers, $11.00@11.50; good mixed, $10.00@10.50; fair mixed, $8.00@9.00; culls and common, $4.00@6.00; culls to choice lambs, $13.00@17.00; culls to choice clipped sheep, $3.00@9.00; culls to choice clipped lambs, $10.00@14.25.

Calves—Receipts light; market weak. Veal calves, $15.50@16.00; heavy and thin calves, $5.00@13.00.

## Chicago

Hogs—Receipts, 36,000 head; better grade hogs 240 pounds down active on shipping account; strong to 10c higher than Thursday's average; spots on 140 to 160-pound weights up more; weights 250 pounds up around steady with Thursday's average; top $8.65 paid for closely sorted 190 to 210-pound weights; bulk better grade 170 to 220 pounds, $8.40@8.60; 230 to 260-pound butchers, $8.20@8.45; bulk better grade 140 to 160 pounds, $8.00@8.50; pigs largely $6.50@7.25; bulk packing sows, $6.90@7.40.

Cattle—Receipts, 1,500 head; most killing classes strong to a shade higher; trade fairly active; lower grades predominating; most steers selling at $11.75@13.00; best, $13.50; lower grade fat cows and cutters in much broader demand than Thursday; most low cutters, $5.25 with mixed low cutters and strong weights at $5.50@5.75; heavy sausage bulls, $8.00@8.25; light vealers, $12.00@13.00; small killer kinds, $13.50@14.50; selected offerings up to $15.00.

Sheep—Receipts, 6,000 head; better grade lambs 94 pounds down, active; 15 to 25c higher; kinds over 97 pounds draggy about steady; top handy weights to traders, $16.75; bulk good lambs 90 pounds down, $16.00@16.25; medium light weights down to $15.00; good to choice 94-pound Montanas, $16.15; 95 to 102 pounds offerings eligible, $15.50@15.75; 82 to 87-pound clipped lambs, $14.15@14.25.

## East Buffalo

Hogs—Receipts, 1,600 head; holdovers, 1,005 head; market slow; few 170 to 225 pounds, 15 to 25c lower at $9.00; choice 245 pounds, $9.10; lighter weights steady; pigs, $8.00@8.25; few light lights, $8.50; packing sows, $7.00@7.50.

Cattle—Receipts, 50 head; market steady; week's top steers, $14.25; bulk, $11.00@13.00; best heifers, $11.75@12.25; good cows, $8.75@10.00; cutters, $5.50@6.50.

Calves—Receipts, 25 head; good to choice vealers quotable steady around $16.00; cull and common, $8.50@12.00.

Sheep—Receipts, 300 head; market steady; good to choice 88-pound lambs, $16.75; cull and common mostly $12.00@15.00; fat ewes quotable $8.00@9.50.

## New York

Beeves—Receipts, 1,160 head; market steady; steers, $8.25@14.50; state bulls, $5.00@8.75; cows, $4.00@8.00.

Calves—Receipts, 1,379 head; market irregular; veals, common to prime, $7.00@16.50; light weight culls, $5.00@6.00; buttermilks and fed, $6.00@8.00.

Sheep and lambs—Receipts, 4,340 head, all consigned direct; no sales.

Hogs—Receipts, 550 head, all consigned direct; no sales.

## Cincinnati

Hogs—Receipts, 2,000 head; leftovers, 1,206 head; market steady to 10c higher; bulk good and choice 170-240 lb. butchers, $9.00@9.10; few 250-300 lbs., $8.50@8.90; desirable 140-160 lbs., $8.00@8.60; most 120-130 lb hogs, $7.25@7.75; packing sows largely $7.00@7.25; pigs, 90-110 lbs., $6.00@6.50.

Cattle—Receipts, 150 head; market steady.

Calves—Receipts, 100 head; market steady; top vealers, $14.50.

Sheep—Receipts, 25 head; market quoted steady; shorn lambs, $14.00 down; wooled lambs, $16.00; ewes around $7.00.

## Seat on Exchange Goes for $320,000

NEW YORK, March 17.—(AP.)—Value of membership on the New York Stock Exchange has risen to $320,000, sale of a seat having been arranged at this new record figure, an increase of $5,000 over the previous transaction. The identity of the purchaser will be made public later.

## East St. Louis

Hogs—Receipts, 4,000 head; mostly 10c higher; bulk 220 pounds down, $8.65@8.75; top, $8.75; 230 to 260 pounds, $8.35@8.60; no heavies on sale; packing sows mostly around $7.25, odd lots pigs, $5.50@7.50, according to weight.

Cattle—Receipts, 700 head; calves, 150 head compared with close last week, low-priced steers and medium bulls 25c higher; other steers, fat cows and vealers 25c lower; butcher yearlings, 25c to 50c higher; low priced cows and all cutters steady; tops for week, steers and mixed yearlings, $13.25; yearlings, $13.00; heifers, $12.50.

Sheep—Receipts, 400 head; for week, fat lambs strong to 25c higher; other classes unchanged; no strictly choice lambs on sale; bulk, $15.75@16.00; week's top, $16.00; fat ewes, $8.50@9.50, according to weight.

# BUSINESS Commodity Markets COMMERCE

# IMPROVEMENT IN INDUSTRIES EXPECTED SOON

### If Activity in Steel Continues, Others Sure to Make Better Reports, Col. Ayres Believes

CLEVELAND, O., March 17.—If the activity in the steel business continues a few weeks longer, it is almost a certainty that better reports from other industries will be making their appearance, according to Col. Leonard P. Ayres, noted statistician and vice president of the Cleveland Trust Company. Col. Ayres' bulletin on business conditions says:

General business is improving; activity in the fundamental industries is increasing, and credit conditions continue to be favorable. There is clear evidence of this despite the fact that there is a good deal of unemployment and a great deal of discussion about it. For several years past there have been four fundamentals of American prosperity so truly basal in character that general business has improved or declined about in proportion as their combined contributions have been favorable or unfavorable.

Of course, the first and foremost of these four factors is the condition of ease and availability of credit accommodations. At the present time interest rates are not quite so low as they were during the latter part of last year, but they are at most reasonable levels nevertheless, and credit accommodations are readily available for business uses on easy terms.

**ACTIVITY INCREASED**

The other three basal factors are the conditions in the three fundamental industries of building construction, iron and steel, and automobiles. In all of these activity has increased notably since the beginning of the new year, and is now at or close to record-breaking figures.

During February a greater tonnage of steel ingots was produced than in any previous February. This is not to be accounted for merely because the month this year had an extra day, for the average daily output as well as the total production for the month reached new high figures.

Automobile output was about 330,000 cars and trucks, which is somewhat less than the corresponding production for February of 1926 and 1924, but not much. It is clear that if the Ford output had not been unexpectedly retarded a new high record for the month would have been established in this industry also. Building construction is starting off the year at close to the highest volume that it has ever attained at this season. Moreover, the present prospects are that this activity will continue, and that 1928 will be another year of very large volume of new construction.

**OTHERS NOT SO GOOD**

Most of the other important industries are not doing as well as these three. This is reflected not merely by the reports from the industries themselves, but also by the records of car loadings which have been running this year a little below the normal figures and showing only slow improvement.

Despite a good deal of unevenness in trade and industry and transportation the conditions and the prospects of business are distinctly encouraging. Perhaps the most hopeful element of all is the marked activity in iron and steel, for the products that this industry is turning out are being purchased by other industries which do not place orders for them unless and until they have definite need for them.

If the producers of iron and steel can continue to make and sell their materials in about the present volume for a few more weeks better reports from other industries will soon be making their appearance.

# NEW YORK BOND MARKET

NEW YORK, March 17.—(AP.)—With the smallest aggregate of new issues since the first week of the year offering limited competition, listed bonds today continued to follow a firm trend. The week's total approximated $75,000,000, compared with $127,000,000 in the preceding week.

Although there were evidences of the customary week-end profit-taking, it did not become general. Missouri Pacific 4s and Wabash 5s were among the few important issues which were depressed by realizing sales. On the other hand, several prominent railway issues were briskly accumulated. New Haven 4½s and Denver, Rio Grande and Western 5s sold at their best prices of the year. Further recoveries were made by the Seaboard issues, but the new St. Paul liens ruled at or a little below yesterday's close.

New Orleans Public Service 5s assumed the leadership in the firm utility group, advancing a point to 100⅝, duplicating their year's high. Among the convertibles, Andes Copper 7s reached new 1927 high ground on large purchases and gains of a point or more were recorded by Kayser 5½s and Commercial Cable 4s.

Youngstown Sheet and Tube 5s which weakened last week on the failure of the project to merge with Inland, were bought in large amounts at advancing prices.

French government issues continued to advance in new high territory in further reflection of the retirement of the 8 per cent dollar bonds, but other foreign obligations were fractionally irregular. The United States government division was quiet at steady prices.

# THE PRODUCE MARKET

The demand for all lines of fruit and vegetables was dull at the local wholesale produce district Saturday. All vegetables were sold at about unchanged prices. The fruit market was slack. No change was made in the prices.

A decrease of 1½c per pound was made in the quotations on butter. The new prices will go into effect Monday. The egg and cheese markets closed firm at unshaken quotations.

The poultry market closed easy and the quotations were unchanged. The demand was fair and the supplies were liberal.

Carlot supplies were liberal, a total of 572 cars being on track. Arrivals included 11 cars of apples, 1 beets, 15 cabbage, 2 carrots, 2 cauliflower, 2 celery, 1 chicory, 5 lettuce, 9 onions, 11 orange, 11 spinach, 1 radishes, 31 potatoes, 1 sweet potatoes, 3 tomatoes and 1 parsley.

HAY AND GRAIN.

RECEIPTS.

Pennsylvania Railroad—One car of straw, 16 shelled corn and 1 oats. Baltimore and Ohio Railroad—One car of shelled corn and 3 hay.

# WHEAT TAKES LEADERSHIP IN RISE OF GRAIN

### Reports From Mills, Elevators Construed as Bullish; Corn Hits Peak But Drops.

CHICAGO, March 17.—(AP.)—Unexpected scantiness of wheat supplies in country mills and elevators brought crowds of brokers back to the wheat pit today and swung the market upward. Meanwhile, corn rose to fresh top price records for the season, but fell off under heavy profit-taking.

Rye finished at the highest level yet for the present crop.

Closing quotations on wheat were unsettled, ⅛c to 1c net higher, with corn ⅜c to ⅝c down, oats unchanged to ⅛c lower, and provisions at 5c to 20c advance.

In addition to stimulus given to wheat buying as a result of the United States Government report showing comparatively meager stocks of wheat on hand at country mills and elevators, new advices were current from Chicago crop observers pointing to likelihood of big abandonment of winter wheat acreage both in the central west and the southwest as well. Trade leaders meanwhile gave special emphasis to the fact that official figures telling of 12,000,000 bushels reduction of country mill and elevator stocks as compared with last year, were about 16,000,000 bushels under the estimates of private experts.

A sensational aspect of the government report, one unofficial authority said, is that there is 40,000,000 bushels of wheat unaccounted for after allowing for increased seed requirements for winter wheat. He added that it is evident that either the original supply was overestimated or else that there has been a domestic disappearance upon a much greater scale than last year.

The outstanding feature of today's trade in feed grains was that export business was done both in corn and oats, with prices also on about a working export basis for barley, an unusual situation.

Provisions owed their strength to buying of July lard for Europe.

## The Silk Market.

NEW YORK, March 17.—Raw silk quiet.

# Quiet Tone Noted in Wholesale Markets

**31 ADVANCES, 18 DECLINES**

NEW YORK, March 17.—Generally quiet, but fairly steady conditions, with unusually few price changes of outstanding importance, featured the wholesale markets for the commodities of chief consumption this week, there being only 49 alterations recorded in the list of quotations collected by Dun's Review, of which 31 were advances and 18 declines. In last week's compilation 42 reductions contrasted with 37 increases; in a similar comparison for the corresponding week a year ago 39 out of 69 changes were downward.

**FOOD INDEX UNCHANGED**

NEW YORK, March 17.—Bradstreet's Food Index Number for this week is $3.34, as compared with $3.34 last week, $3.32 two weeks ago, and $3.42 for the week ending March 17, 1927. This week's number is unchanged from last week, but shows a decrease of 2.3 per cent from the like week a year ago. Of 83 commodities of all kinds, 15 advanced as compared with last week, 12 declined and 56 remained unchanged as follows:

Increased—Wheat, red; corn, oats, corn flour, tallow, sugar, raw; sugar, refined; eggs, hogs, sheep, lambs, cotton, wool, half-blood comb; linseed oil, spelter.

Decreased—Wheat, spring; barley, butter, coffee, cotton-seed oil, beeves, oleo oil, condensed milk, brown sheetings, hides, tin, rubber.

Unchanged—Flour, rye flour, pork, mess; hams, ribs, salted; ribs, smoked; lard, cheese, tea, tapioca, beans, peas, apples, peanuts, potatoes, rice, molasses, raisins, currants, prunes, lemons, hops, Pacific; hops, N. Y.; evaporated milk, macaroni, print cloths, gray goods, ginghams, wool, fine comb.; kerosene, petrol., crude; gasoline, leather, hay, pig iron, basic; pig iron, Bess.; pig iron, south'n; steel billets, Bess.; steel billets, O-H; steel rails, steel bars, car wheels, old, Phila.; car wheels, old, Chic.; steel scrap, Pitts.; steel scrap, Chic.; cast iron, Chic.; wire nails, tin plants, coke, copper, lead, antimony, yellow pine, W. Va. spruce, Douglas fir, alcohol.

# NEW YORK CURB MARKET

NEW YORK, March 17.—(AP.)—Canadian Marconi for the third consecutive day established a new curb market record for turnover, transactions in this issue today totaling 292,300 shares, the greatest volume of half-day trading in one issue in market history. Total sales were 469,300 shares, also a new high record for a half day. The previous record was 460,000 shares on January 7.

Although there were numerous advances to new highs, week-end profit-taking caused price reductions throughout the list. Canadian Marconi, which had opened at 7½ and moved to 8, slumped to 7¼ and closed at 7⅛, off ⅝ net. Marconi Wireless of London, which has been strong in sympathy, closed off ⅛.

Keystone Steel and Wire again had a sensational rise, climbing 21 points to a new high at 271 on the strength of reports of a pending stock split-up and a possible merger. Casein soared 20 points to a new high at 205. Railroad issues showed new activity, with strength apparently based upon renewed confidence in consolidated plans. Pittsburgh and Lake Erie and Atlanta Great Southern common advanced 2 points each and the preferred 5, but New Orleans and Great Northern sagged 4 points to a new low at 28.

Bancitaly had a net gain of 3 points, Chesebrough Manufacturing gained 9 and Glen Alden, which was weak yesterday, advanced 7 points. Firestone Tire and Hood Rubber moved up another 3 points each. Tubize Art Silk touched a new high at 610, up 5 points net, and Celanese and Courtaulds made smaller gains.

Profit-taking causes losses in American Rolling Mills, Melville Shoe, Crowley-Milner, National Sugar Refining, U. S. Smelting, U. S. Gypsum and a few others.

Utilities were irregular. American Light and Traction and Puget Sound were at new highs, but other gains were limited and several issues showed small losses.

Pipe lines were under pressure. Prairie and Illinois sagged, but Cumberland moved up about 2 points and New York Transit touched at a new high at 35.

## *Reserve Increase Shown by Report*

NEW YORK, March 17.—(A. P.)—The actual condition of clearing house banks and trust companies for the week shows excess reserve of $45,308,160. This is an increase in reserve of $50,329,990 compared with the week before, when a deficit in reserve of $5,021,830 was reported. The detailed statement follows:

Loans, discounts, investments, etc., $6,206,047,000, increase $38,428,000; cash in own vaults, members Federal Reserve Bank, $56,583,000, decrease $2,144,000; reserve in Federal Reserve Bank of member banks, $686,877,000, increase $60,694,000; reserve in own vaults, non-member state banks and trust companies, $9,741,000, increase $226,000; reserve in depositaries, non-member state banks and trust companies, $10,851,000, decrease $17,000; *net demand deposits, $4,905,839,000, increase $78,852,000; time deposits, $764,213,000, increase $221,000; aggregate reserve, $707,249,000; excess reserve, $45,308,160, increase $50,329,990.

*United States deposits deducted, $74,233,000.

Summary of state banks and trust companies in Greater New York, not included in clearing house statement: Loans, discounts, etc., $1,480,414,300, increase $33,946,800; gold, $5,172,300, decrease $329,200; currency and bank notes, $22,040,100, decrease $289,700; deposits with Federal Reserve Bank, $134,656,600, increase $23,395,200; total deposits, $1,500,705,000, increase $40,798,500; total deposits eliminating amounts due from reserve depositaries and from other banks and trust companies in New York and United States deposits, $1,432,128,500, increase $35,392,100. Banks, cash in vault, $37,993,300; trust companies, cash in vault, $124,056,700.

## The Sugar Market.

NEW YORK, March 17.—Another advance of 1-16c featured the raw sugar market today on continued buying by operators, with spot prices advancing to the basis of 4.58c for Cuban, duty paid. Sales reported included 19,000 bags of Philippines and 7,000 bags of Porto Rican due early in April at 4.58c and 32,000 bags of Philippines and 40,000 bags of Cuban for prompt and April shipment at 4.58c.

Firmer spot market and reports of a firmer market abroad, with an increased demand, were responsible for strength in the raw sugar futures, which closed at net gains of 3 to 5 points. The market opened steady at 1 to 2 points advance and although there was a good deal of realizing or liquidation, offerings were well absorbed. On a renewal of covering and buying by houses with European and Cuban connections prices worked higher and closed at about the best of the session. Near months showed the maximum gains. Approximate sales, 59,150 tons. March closed 2.89c; May, 2.95c; July, 2.99c; September, 2.98c; December, 3.03c. The refined sugar market was firm but trading was light with prices unchanged at 5.90@6.10c for fine granulated.

## The Dry Goods Market.

NEW YORK, March 17.—Cotton goods were firmer and steadier today with sales of moderate volume in the gray goods division. Silks were in steady demand. More interest was shown in new fine worsteds for dress goods for fall. Clothiers reported a quickening in the retail business the past week. Burlaps held steady at Calcutta and sold in small lots here.

This week's Market Letter contains a resume of the economic situation and also discusses the current status of

# Doris Wants to Hang in Pretty Dress

## DREADS DEATH IN PRISON GARB; IS LOSING HOPE

### Attorneys Keep Up Fight to Win Stay for Ex-Pittsburgh Girl, Convicted Killer.

International News Service.

MONTREAL, Que., March 17.—Doris Palmer, 26-year-old American girl, who is scheduled to be hanged in Valleyfield next Friday, wants to die in a pretty frock of her own choosing and not in prison garb. She has asked her mother, Mrs. Hazel Greco, of Chicago, to buy a black silk dress of fashionable design for her. Doris was born in Pittsburgh, Pa.

The condemned girl wants to have the dress delivered to the women's jail here before she departs next Wednesday for the scene of the execution.

"My poor child is losing hope of clemency and she is preparing for the worst," the mother said today.

**SOLACE IN CHAPLAIN**

Doris attends church services in the jail every day and is frequently in communion with Father Brault, the prison chaplain. When her thoughts are not occupied with spiritual things she becomes hysterical and confides to the Good Shepherd nuns that she is terrified by the vision of dying on the scaffold.

She brightened somewhat after a conversation at the bars of her cell with Attorney W. E. Crebart, of Mt. Vernon, N. Y., who, with R. L. Calder and J. A. Legault, her trial lawyers, are endeavoring to stay the execution. The three attorneys decided that Legault should go to the Bordeaux Prison, eight miles away, to confer with George McDonald, who is scheduled to die with Doris at the same hour for the murder of Adelard Bouchard, a taxicab driver.

**MAN MAY CONFESS**

McDonald has been reported as willing to tell the "true story" of the shooting of Bouchard. If he will do this, Doris' lawyers are convinced, she will be absolved and they may be able to save her from the gallows.

However, the many Canadian people who have indicted hopes that the girl would be reprieved on purely humanitarian grounds, continue to pin their faith to the clemency recommendation of the trial jury. In that recommendation, urged on the Canadian authorities by 12 jurors on the day Doris and her husband were sentenced to death, they see a chance that she will escape, particularly as it stands aloof from politics or outside influence which might creep into the case in the final days before the execution.

"We recommend the girl, Doris Palmer, to the clemency of the court," the foreman of the jury said at that time.

At Valleyfield prison, scene of the execution, plans went forward for the double hanging. The spot where the gallows will be set up has been staked off and other details attended to. Unlike the case of Ruth Snyder at Sing Sing prison, New York state, no newspapermen will be allowed to witness the execution.

## When Is Horse An Auto? When Driver Is Oiled?

MAYBE G. M. Weber quenched the thirst of his team of farm horses with gasoline, fitted them with balloon shoes and guided them with a steering wheel.

Maybe Mr. Weber discarded the conventional "Whoa!" and "Giddap" for such modern commands as "Brake!" "High!" or "Low!" or "Reverse!"

For Mr. Weber, whose team pulled its wagon into a parked automobile, damaging the machine, was arrested for violating the automobile laws.

City Physician J. W. Clark examining Mr. Weber, 55, of R. F. D. No. 2, Dorseyville, said the farmer was driving his team while under the influence of liquor. He will have a hearing in Traffic Court.

## HARRIS HOUSE TO OPEN MAY 1

The Harris Amusement Company announced Saturday that the Harris South Hills Theater—"South Hill's first metropolitan playhouse"—will open about May 1 in West Liberty avenue, Dormont.

The theater will be the latest link in the chain of 40 theaters which was founded by the late Senator John P. Harris. And it will be affiliated with some 400 theaters in America whose common interests have enabled them to present improved programs in motion pictures and stage attractions. Performances at this theater will be continuous.

Situated at West Liberty avenue, Dormont avenue and Lima way, the Harris South Hills Theater is, in a sense, a central point for the South Hills region. It was constructed by a South Hills contractor, Fred A. Becker, and is said to have the largest capacity of any of the suburban playhouses.

"Wide, comfortable opera chairs have been installed," the company's announcement reads, "in rich velour upholstery that harmonized with the general color scheme."

## New Theater for South Hills

IN HARRIS CHAIN—Here's how the new Harris playhouse, the South Hills, will look upon its completion. It is being erected in Dormont and will open about May 1.

## 500 Attend Dance By McCreery's Aid

More than 400 members and friends of McCreery's Mutual Aid Association attended the St. Patrick's dance and card party held Saturday night in McCreery's. Alexander MacLachlan was honorary chairman for the affair and Arthur C. Kaufmann was general chairman, with J. B. Swinney, president of the association, in charge of arrangements. There was a "moon-on-the-shamrock" dance by Miss Ellen Washabac and Earl Haig, and Miss Christine Gemmel also gave a dance. C. E. Dovey was present as a clown and Jack Thompson was the humorist. Miss Diane Greenberg did a solo dance.

## Fire Ruins Building Near Irwin, Routs 5

JEANNETTE, Pa., March 17.—Joseph Baney, his wife, his parents and a younger brother fled in their nightclothes when fire swept the Baney Building, three miles south of Irwin, early today. The blaze destroyed the building, in which there were two apartments, a confectionery store and a poolroom and damaged the store of Lawrence G. Brablak, adjoining. Total damage amounted to $13,000.

## An Old Recipe to Darken Hair

By JANICE RANDALL

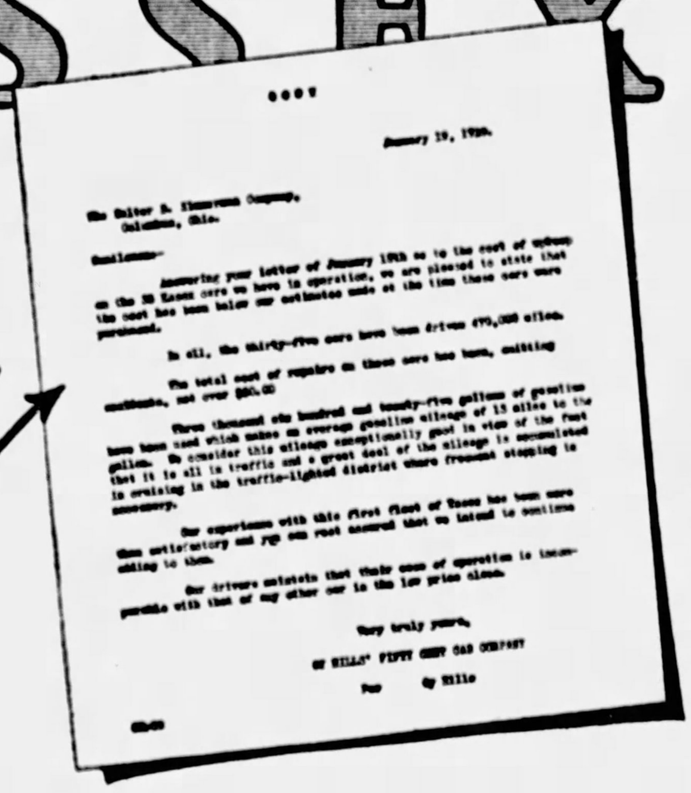
Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded streaked or gray. Years ago the only way to get this mixture was to make it at home, which is mussy and troublesome.

Nowadays we simply ask at any drug store for 'Wyeth's Sage and Sulphur Compound.' You will get a large bottle of this old-time recipe improved by the addition of other ingredients, for only 75 cents. Everybody uses this preparation now because no one can possibly tell that you darkened your hair, as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time, by morning the gray hair disappears, and after another application or two, your hair becomes beautifully dark, thick and glossy and you look years younger.

35 Essex Super-Sixes
470,000 Miles
$50 Repair Costs

ESSEX Super Six

Please Read



January 19, 1928.

The Baker R. Simonton Company,
Columbus, Ohio.

Gentlemen:

Answering your letter of January 18th as to the cost of upkeep on the 35 Essex cars we have in operation, we are pleased to state that the cost has been below our estimates made at the time these cars were purchased.

In all, the thirty-five cars have been driven 470,000 miles.

The total cost of repairs on these cars has been, omitting
[illegible], not over $50.00

These thousand six hundred and twenty-five gallons of gasoline have been used which makes an average gasoline mileage of 13 miles to the gallon. We consider this mileage exceptionally good in view of the fact that it is all in traffic and a great deal of the mileage is accumulated in cruising in the traffic-lighted district where frequent stopping is necessary.

Our experience with this first fleet of Essex has been more than satisfactory and we can rest assured that we intend to continue adding to them.

Our drivers maintain that their cost of operation is incomparable with that of any other car in the low price class.

Very truly yours,
[illegible]

Coach . . $735
Sedan (4-door) 795
Coupe . . 745
(Rumble Seat $30 extra)

All prices f. o. b. Detroit, plus war excise tax

Buyers can pay for cars out of income at lowest available charge for interest, handling and insurance

Spring Salon
Beginning Today
Many New and Unique Features
Open Evenings

The great qualities that recommend Essex to fleet and business buyers everywhere are the same that give it foremost favor with the individual buyer—value, economy, smooth 6-cylinder performance, long-wearing reliability, and riding ease that makes a day of driving 'cross country or through city traffic with ease to car and comfort to passengers.

Today's Essex, in every detail of beauty, performance, comfort and fineness, is far ahead of the great predecessor which made these records, outselling every "Six" at or near the price almost two to one.

Until you ride in the new Essex Super-Six you have no conception of how fine a car can be at this price.

# THE MEN THAT WORK

Copyright, 1928.

EVERYTHING that men possess, including freedom from savagery, comes from labor with mind or muscle, or a combination of muscle and mind.

As human beings have slowly progressed from the cave to the skyscraper, from ignorant savagery to rulership of the earth, work has been divided as follows:

Conquest and enslavement of men by war. Conquest of Nature by science, labor and skill.

The monuments of the world, with few exceptions, honor the memories of fighters and killers only.

The most magnificent equestrian monument on earth, the statue of Colleoni, by Verrochio, in Venice, immortalizes a *condottiere*, a fighting brigand whose sword was for sale to the highest bidder.

There is in all Venice no monument to honor the endless thousands that built the beautiful city on the Adriatic swamp.

Nor is there in any great American city a monument to the workers that made this country what it is.

* * *

The GREATEST of our public monuments is fortunately well chosen and deserved, the noble monument to Washington at the nation's capital.

Is it not time that some monument were erected to prove that a civilized nation appreciates the workers that make it what it is?

Thousands of brave men pushed our frontiers steadily forward, conquering Nature, clearing and cultivating land, actually MAKING the United States.

Prosperity that we enjoy is built on machines, good roads, great ships, bridges, railroads, mines. LABOR CREATED THEM ALL.

Twenty-four million automobiles increase the happiness of the American people. Labor built them all. Labor is unrecognized.

* * *

One of the seven wonders of the world was the Colossus of Rhodes, a statue of bronze standing at the entrance to a great harbor, so huge that ships sailed between the statue's outstretched legs. Labor built it, but it was not built to honor labor. Centuries ago it fell to the ground, because of an earthquake, perhaps. The fragments, cut into small pieces, loaded on camels' backs by an ingenious Jewish merchant were taken away to be sold as old metal.

Some day the world will build a monument greater than the Rhodes Colossus to honor the COLOSSUS OF LABOR. It will not be, as suggested in this picture, a statue of a mechanic in working clothes, but will take the form of some great institution of learning, some magnificent, super-public school, or some legislative hall in which laws will be passed recognizing the grandeur and the rights of human labor, and realizing those rights in written law.

* * *

The greatest monument of all, a monument to all of the people, is A JUST LAW.

Human intelligence should find a way to express in law and to ENFORCE BY LAW the great truth that "the laborer is worthy of his hire," and the more modern truth, that any nation disgraces itself if it fails to employ men willing to work.

Only a few days ago in the Senate Mr. Wagner, of New York, expressed in a few words the most important truth heard in Washington since the death of Abraham Lincoln. He declared that government, and all men with a sense of justice, should wage war "against involuntary idleness, which is as monstrous and unthinkable as involuntary slavery."

* * *

It is NOT that the world owes any man a living.

But it IS true that civilized government owes AN OPPORTUNITY TO EARN A LIVING to every man willing to work.

A government that permits one man to say to another, "you shall be my slave and work without pay," is abominable. Time and conscience ended that.

It is equally outrageous that men should be told "there is no work for you. You must do the best you can, skimp, do without, or starve with your family until it suits me to employ you again."

The serious statement made by Senator Wagner, that there are four million men unemployed in the United States, is a disgrace to the United States, to the intelligence of its government and to its great industrial leaders.

*Monuments of all sorts are built for so-called greatness of all sorts, but no monument is erected to honor the men that have really built the world.*

*Wholesale killers have their monuments, kings that spent their lives riding comfortably on the backs of their people are made more or less "immortal" in monuments of bronze and marble.*

*The workers of the world, the great patient army that have built the cities, conquered the deserts, and civilized the world—NO MONUMENT TO THEM.*

There are in the treasury hundreds of millions of surplus. In the United States unlimited work is needed and should be done.

The Mississippi should be made safe.

Thousands of miles of good roads are needed, from ocean to ocean, from Canada to Mexico.

Great canals should be built from the Great Lakes to the Atlantic Ocean and to the Gulf of Mexico.

And great sources of power going to waste in the Colorado River and elsewhere should be harnessed and the wasted waters used to irrigate arid regions and supply great cities.

The uses for labor are unlimited here, and the wealth to pay for needed work is practically unlimited.

* * *

In New Zealand, where the people are close to their government, the welfare of workers is the first thought. In Summer when labor is needed in the country, government public works are diminished; in the slack Winter season public works are doubled, that the unemployed may work.

If a man seeks work at some distant point, railroads owned by the people take him to seek the work. If he does not find it the railroads will bring him back, charging no fare either way. If he finds work he pays his fare. Fools would call that socialism in America.

* * *

It is not suggested that methods of a country with small population and advanced radical government be copied in the United States.

But it is asserted that to leave in idleness men willing to work is a disgrace to this rich country, a danger to those that control the nation's wealth.

It is for the latter to find ways to use all the intelligence and labor that this country possesses.

The first and greatest monument to labor and justice should be an intelligent law, born of benevolent public spirit among the rich and powerful, that would ABOLISH INVOLUNTARY IDLENESS AS THE GREAT CIVIL WAR ABOLISHED SLAVERY.

*A man willing to work and unable* TO FIND WORK is more miserably unhappy than the slave.

"What could be done now to help the unemployment situation?" One answer is given here in extracts from an article recently published by William Randolph Hearst under the heading, "TO MAINTAIN PROSPERITY, MAINTAIN EMPLOYMENT."

## *To Maintain Prosperity, Maintain Employment*

***Extracts from a Statement Published Recently by William Randolph Hearst.***

The basic problem, which now and always confronts the community, is how to maintain general employment at liberal wages.

As long as we have general employment at liberal compensation, we will have general prosperity.

As long as we have general prosperity, we will have large and growing consumption.

As long as we have increasing consumption, we will have increased production and a sustained demand for labor, resulting in general employment.

* * *

Reduction in the price of a product habitually increases sales.

The cost of production is decreased first by labor-saving machinery; second by utilizing the machinery for longer hours, because these additional hours require no additional interest on the investment in machinery, no additional rent, and but a small percentage of additional overhead.

* * *

As has already been stated, and is generally conceded, reduction in the price of a product stimulates the consumption and makes possible the profitable disposal of the increased product.

Therefore, it is obviously desirable to double the running time of machinery wherever possible—not by overtime at increased labor rates, but by additional crews at regular labor rates.

In order to accomplish this, the employer must have the intelligent co-operation of the worker.

* * *

It is essential, therefore, that workingmen should co-operate with employers in increasing production and reducing the cost of production as far as consistent with maintaining a high standard of wages.

The main thing that the working people have a right to insist upon is that they shall secure THEIR PROPORTION OF THE ADVANTAGE OF THE INSTALLATION OF LABOR-SAVING MACHINERY.

But their proportion of the advantage should be secured by a gradual increase in wages and a gradual decrease in working hours.

In other respects they should cooperate with the employer to their utmost to reduce the COST of production and increase the QUANTITY of production, and make possible the employment of more crews on a longer run of machinery.

* * *

The workers must realize that conditions which create a demand for labor are the only conditions which create permanently a high standard of wages.

The prime object of the employer—and to a still greater degree the prime object of the workers—should be a decrease in the cost of production and an increase in the amount of production, and a consequent increase in the employment of labor and a consequent improvement in the purchasing power of the masses.

WILLIAM RANDOLPH HEARST.

# NEW YORK DAY by DAY by O. O. McIntyre

## Any Fish Today, Leddy? Giddap, Napoleon.

A STORY comes to me a little late about the initial efforts to publish that much discussed book, "The President's Daughter." It had been placed in the hands of a literary agent who was to hawk it about the editorial marts.

He surrounded the manuscript with great mystery and secured the ear of magazine editors by telling them he wanted to speak to them of a topic that could not be discussed over the phone. Then he piloted them to a safety deposit vault where the manuscript was kept.

Editors had to read it in the coupon clipping room. Not one of them would touch it with a 10-foot pole, although each one realized it was a smashing circulation making tale.

It is to the credit, too, of the book publishing world in general that with one exception they would not publish the volume. The one exception was a publisher, heretofore considered fairly reputable who organized secretly another company or guild to put the book on the market.

It had a first ballyhoo sale, but today it is in the cut rate shelves. The book may or may not have been true, but there was no evidence in the volume that proved conclusively it was authentic. No good purpose was served in its publication save to prove again that hell hath no fury like a woman scorned.

### Society of Friendly Criticism

Bruce Reynolds, the author and playwright, writes me a good idea. He thinks the time is ripe for an organization to be known tentatively as the Society of Friendly Criticism. Its members may feel free to criticize shortcomings of others anonymously and, of course, constructively. Just the other day an orchestra leader told me of a letter he had received correcting two glaring errors in pronunciation. It was unsigned but helpful. "Had he signed his name," he said, he would have likely offended me. As it was I felt he was my friend."

Human nature being what it is people are sensitive to criticism of friends, unless it is done in this sort of anonymous manner. In my work, too, I have received coutless valuable criticism which has been of inestimable value, but being fairly human myself I have appreciated it most when it came from the kindly anonymous.

* * *

Every writer receives his quota of nasty anonymous mail but it does no good. The spirit behind it is mean tempered and the vicious anonymous writer has been proved to be always abnormal. There is, however, a kindly and friendly anonymity which I believe the world needs. For instance, one of my closest friends has a trait that is objectionable even to those who know his excellent qualities. If he could be told kindly, it would save him from much of the dislike that is now his.

* * *

"Stiff as a plank" is another Broadway term for getting that way.

* * *

The West Indies seem to have had the popular call for New York tourists this winter. Passenger trade to Carribean was never so heavy.

### Post Card Trade Big

Visitors to New York, someone has discovered, spend more than $2,000,000 a year sending post cards back home. We thought up a good crack about this, but its dirty.

HE'LL DRINK INK IF YOU OFFER IT.

A new form of senseless humor has sprung up in the sophisticated weeklies. Here is a sample from one of them:

There is a story current along Broadway that concerns a prominent pickle dealer and one of the younger and more beautiful actresses. It seems that this Mister had been very attentive to this Miss's cousin who lives in a suburb of Philadelphia and dances and plays in an unusual manner. Meeting in Child's at the luncheon hour, she asked him:

"Have you seen Anna?"

His answer is still causing laughter among the theatrical profession and some movie stars.

* * *

One of the attractions in a Bowery curio hall is a fellow who will drink a bottle of ink brought in by any customer.

* * *

Mrs. Vincent Astor seems to be devoting all of her time to charity. She rarely attends social affairs, though it is said she could easily become the New York society leader. Her husband is going in for yachting.

* * *

Milton C. Work gave up the legal profession to become a bridge expert and his income is now in six figures annually. A daily bridge column is syndicated in 175 newspapers and he writes a monthly article for 30 odd athletic club magazines. He is co-editor of the Auction Bridge Magazine and he teaches teachers at an enormous tariff. He is 63 years old.

* * *

And on the other hand Bobby Jones, the professional golfer, has given up golf to go into the practice of law.

### Vaudeville Being Reformed

Vaudeville has gone in for many reforms—banning smutty gags, certain racial delineations and such. It should banish trained animal acts as the next step. Dogs, bears, monkeys and horses are, whether intentional or not, badly mistreated to make a living for their masters. They are kept in cramped quarters in dark cellars and otherwise denied a freedom that is their right. They chiefly entertain children and they can be better amused in some other fashion.

* * *

The vogue of Texas Guinan has gone the way of many happy Broadway memories. She has no successor, but with the death of the night clubs her hostessing popularity waned. After all, Texas has had her fun.

* * *

Along came Houston, Texas, and copped a national convention and all eyes are turned on the Lone Star State. For several years—bragging again—I have been shouting about Texas. It is larger than Germany and has an abundance of all the natural resources. The climate is not quite as pleasant as California, but is generally agreeable the year round. It will be the next boom state. Pin that in your hat.

# SIDEWALKS of PITTSBURGH by Havey Boyle

## Reporters of Other Days Were Good Financiers.

*REPORTERS, perhaps, used to be better financiers than the present-day group. A story may illustrate the resourcefulness of a former Pittsburgh reporter who chuckles every time he thinks of the tale. Here is an outline:*

*A steamship office in Pittsburgh had supplied two young newspapermen with transportation to Europe and return. A third reporter planned to go, too, but something turned up to keep him home. However, he went to New York with his two friends to bid them bon voyage.*

* * *

"NOW," said the stay-at-home as he slapped his friends on the back, "if you run short over there just cable me and I'll see that you're taken care of." If they had asked just how he could not have told them.

### Bad Run at Cards

*THE stay-at-home busied himself with affairs of his work and play in Pittsburgh. One night he had a bad run at cards. He lost about $20 and he was forced to gingerly tender a check which he hoped somehow he could make good the next morning before it cleared. He was a little worried about the check as he went to his work the next morning, and he hoped the office cashier had had a good breakfast.*

* * *

THE reporter opened his desk to find the usual stories from the morning paper to be boiled. There was a letter or so. One of the letters was in a curious envelope. He looked at it closely and discovered it was a cablegram. It was from one of his two friends in Europe who was now frantically cabling for something like $100 so he wouldn't have to stay in Europe for the rest of his life. He had, it later developed, his pass to come back home on, but unfortunately, extremely unfortunately, the steamship which had supplied the pass had, while he was in Europe, gone kerflunk—that is to say the steamship company, through the loss of one ship, and considerable money, had failed and consequently the pass the European traveler owned was a scrap of paper.

### Simply a Great Break

*THE ordinary man, first seeking a bare $20 to make good a check, and now confronted with the responsibility of collecting $100 to rescue a friend abroad, might have wilted. But not so our Pittsburgh reporter-friend. This, simply, was a great break.*

THE HELPER GETS HELP

* * *

HE FOUND an excuse to get out of the office early and carrying the cablegram visited not only his friends, but all the Pittsburgh friends of the man who was stranded in Europe. He got $100 quite easily, but, of course, did not stop there. He got $20 more on the strength of that eloquent cablegram. In fact, maybe he got $5 or $10 extra, just to play safe. At any rate he always felt that that cablegram of distress from Europe was one of the finest things he ever saw.

* * *

*WHEN the traveler returned he was naturally grateful, but the stay-at-home said: "It was really nothing. I enjoyed doing it. In fact, if I hadn't received your cablegram I would have been disappointed you did not call on me."*

### Wire Helps the Helper

THE cablegram, of course, had allowed the stay-at-home to clear off his dubious $20 check, had supplied him with a little extra until pay day, had got $100 for the traveler, and the great and striking beauty of the whole thing was that none of it had to be paid until the once-stranded European returned home.

* * *

*"JUST think,' ruminated the other day our former-reporter friend who had received the cablegram, "how I have advanced since those days in the newspaper game. Then I worried about borrowing such a trifling sum like $20. Now, having left the game, I have advanced to that point where I can borrow much more without nearly so much trouble." There is subtle humor in that.*

# COLLEGE HUMOR THE BEST COMEDY IN AMERICA

COPYRIGHTED, 1928, BY THE COLLEGIATE WORLD PUBLISHING CO, THROUGH BELL SYNDICATE.

"She was only a stableman's daughter."
"Well?"
"—and, she looked it!"
—*U. of S. Calif. Wampus.*

Sentimental Caller: And does your daughter play any of the songs of yesterday?

Proud Mother: Indeed she does. Darling, play *Valencia* for Mr. Elder.

—*Grinnell Malteaser.*

Farmer Corntassel: Now that yer gal's graduated from college, does it do you any good?

Farmer Burns: Wal, I guess so. Seeing as she was a co-ed, I put her out in the fields yesterday, and durned if she didn't shock the wheat!

—*Reserve Red Cat.*

"Say, my good man, why do you always read the tabloids?"

"Well, I reada deesa pap' because I can'ta read!"

—*N. Y. Medley.*

"Look here, Carlona, it may not kill you when Ah hit yon, but you'll starve to death bouncin'!"

—*Virginia Reel.*

Out West—Where men are men and the great open spaces are under the flapper's eyes.

—*Wabash Caveman.*

I love,
You love, he loves,
A question arises in me—
How does that go
In French?

—*Orange Peel.*

FABLE

A dog was carrying a piece of meat across a bridge. As he crossed the stream he saw the image of another piece of meat in the water. He laid the meat he was carrying carefully onto the bridge and jumped into the stream. In a moment he reappeared, climbed back onto the bridge, and walked off with both pieces of meat.

Moral: Them as has, gits.

—*Blue Bucket.*

"Whatcher putting your thumb in yer liquor for?"

"If the nail stays on I'm going to drink it."

—*Arizona Kittykat.*

He (worried): I don't feel right about this powder of yours on my coat.

She (nonchalantly): It's quite all right. I have plenty more in my compact.

—*Dartmouth Jack o'Lantern.*

"I can't get along with my wife."

"Why not?"

"All she does is ignore me."

"Ignore you?"

"Yes, and if there's anything I dislike, it's ignorance."

—*West Point Pointer.*

The eternal triangle doesn't worry the young father half as much as the flannel one.

—*Northwestern Purple Parrot.*

George (to clerk): I say, feller, could you take that red tie with orange spots out of the window for me?

Clerk: Why, certainly, sir. Pleased to take anything out of the window any time, sir.

George (with look of relief): Thanks awf'ly, ole top. The beastly thing bothaws me every time I pass this way.

—*Ghost.*

She has this much sense anyway. She never gets on a horse because she doesn't want to be mistaken for Lady Godiva.

—*Yellow Crab.*

Cheer Leaders Spend Quiet Evening At Home.

—*Michigan Gargoyle.*

A senior wrote a letter to his girl (touring Spain) and one to his rival. He sent the letters to the box with a prep. Later . . .

"You mailed my letters?"

"Sure, but you made a mistake—you put the two-cent stamp on the Spanish letter and the five-cent stamp on the other.

"So you added more stamps, I hope?"

"Don't think I'm so stupid. I just changed addresses."

—*Ohio State Sun Dial.*

"I'm going home to Mother," she sobbed, "and I never want to see you again."

"Too late," he said, "your mother went home to grandmother last night."

—*Wisconsin Octopus.*

"How come that holdup beat you up after you had taken all those lessons in boxing?"

"He did it while I was trying to put on my boxing gloves."

—*Grinnell Malteaser.*

"Sam, Ah'm gonna bring yo' to yo' knees!"

"How yo'-all gonna do 'at?"

"Ah'm gonna start a crap game!"

—*N. Y. Medley.*

Campus Cop: Hey, you can't smoke in here.

Student: I'm not smoking.

Campus Cop: Well, you've got a cigaret in your mouth.

Student: Yeah, you got pants on, but you're not panting.

—*Reserve Red Cat.*

*Our idea*
*Of the strongest*
*Guy*
*In the world*
*Is one who takes*
*Two pianos,*
*Stands them on end*
*And plays them like*
*An accordion.*

—*Oregon Orange Owl.*

"Come see the mole I just caught!"

"I didn't know moles were contagious."

—*Penn. State Froth.*

Irate Hotel Guest Phoning to Office: Say, whatsa big idea? Somebody's running up and down the halls and I can't catch a wink of sleep.

Apologetic Clerk: I'm very sorry, sir, but you see, we have no control over the fire department.

—*California Pelican.*

THE WAY AMERICANS SEE EUROPE

"And in Venice, my dear, we had the most wonderful evening of bridge with the Pattersons."

—*Goblin.*

"Porter, I say, porter! Don't let that man off here with me! He is not of my station."

"Whaffo'?"

"He comes from a lower berth!"

—*Dartmouth Jack o'Lantern.*

Frosh (at first sorority party): May I sit on your right hand at dinner?

His Hostess: I may need it to eat with, but you may hold it a while.

—*Desert Wolf.*

The conservative Scotchman says, "I'd give a thousand dollars to be one of those war millionaires."

—*Okla. Whirlwind.*

"You can't get on without a pull," said one passenger to another on boarding a crowded street car.

"And you can't get off without a push," returned his companion as he pressed the button to signal for the next stop.

—*Ghost.*

"Who fiddled while Rome burned?" asked the school teacher.

"Hector."

"No."

"Towser."

"Towser! What do you mean? It was Nero."

"Well, I knew it was somebody with a dog's name."

—*Tawney Kat.*

WELL! WELL!

*Little Willie, tired of play,*
*Pushed sister in the well one day.*
*Said Mother, as she drew the water,*
*"Indeed, it's hard to raise a daughter."*

—*Goblin.*

"I thought you were going to be engaged to Eddie,"

"I was, but the ring he bought me was too small so we called it off."

—*U. of S. Calif. Wampus.*

Him: Where did you get the new hat?

Him: It's a present from the wife. I came home early yesterday and found it on the table.

—*Illinois Siren.*

The modern woman has been weighed and found wanting—everything under the sun.

—*Goblin.*

"Dat's a good looking gat you got there, pal."

"Ye'ah, me mudder gave it to me on me sixth boithday."

—*Carolina Buccaneer.*

An old gentleman walked up to a small Negro boy who was sitting on the curb trying to eat an exceedingly large watermelon, but who was not making very much headway.

"Too much watermelon, isn't there, Rastus?" inquired the old man.

"Nossuh, boss," responded the small black boy, "not enough niggah."

—*V. M. I. Sniper.*

Her: I've discovered the cause of one hundred per cent of all divorces!

Him: Remarkable and what is it?

Her: Marriage.

—*Ohio State Sun Dial.*

If Adam came back to earth the only thing he'd recognize would be the jokes.

—*Wisconsin Octopus.*

# ROPINC THE NEWS by Will Rogers

## Grooming Democratic Delegates for Houston.

WELL, all I know is just what I read in the papers. Been an awful lot in the papers lately about just who and what is to compose the New York Deligation to the Democratic Convention at Houston. At first they thought well, we will just go ahead and have the regular Deligates like we always have. Then someone got to thinking, "Well they wouldent be the right kind to use down there. The Kellys, Obriens and Donovans, and Murphys and Izensteins and Levys and Gumbles. We got to dig up a different gang. Well they started in trying to figure out what style and manner of person to send.

### Picking the Delegates

They got to inquireing around to find out. But none of Tammany's Braves had ever been to Houston so they couldent speak with much authority on just what type of Politician Houston was most partial to. If they had just had some one who knew it would have been easy, for they have every style politician in the world. So they started in with the basic idea that we got to send people that use their knife only when there is really something to cut. "We got to kinder raid the social register and see if we cant cull a bunch that will knock 'em off their seats in Houston with their social standing. Find people who have spent more time in a drawing room than they have in a caucus room. If a ward healer shows up and looks like he wants to go, knock him so unconscious he wont come too till after the Deligation have gone."

Try and find ninety Democrats that sleep in pajamas. Be sure there is ninety tooth brushes leave with the Deligation. Watch their language and don't let a sign of a dialect creep in. Now you may not get ninety of the above type who are boni fide Democrats, but fill out with what dissatisfied Republicans you can find. They will be so far from home that no one down there will know how they ever voted before.

### Old Boys Yelping

They started looking for 'em but they was having a tough time filling the bill. Well then the old boys that's been doing all the voting for the Democratic Organization for years, why he heard of all this highbrow stuff, so he yelped, "Say Youze Guys, Whats de big idea Cull? Us birds was good enough to set all summer in Madison Square Garden and listen to the yapping of de Yokels! We voted ourselves black in the face at every precinct for years fer Al! So whats the big idea we dont get to make the tek down to de real noise? We Guys wants to see west of de Hudson jes as bad as you High Hat Bloaks."

Well, with all this percolating around, it kinder made a dent in the main Committee, and they started in to try and salve the "Regulars" over. But in the meantime the "Scouts" had come in and announced that they just couldent find ninety "Highbrows," and that the Republicans that they approached all just through force of habit wanted too much of a fee. So it looked like the high hat idea had fallen through. It looked bad for a typical Tuxedo Deligation. So the Committee got off on another tack, they conceived the idea of trying to get some wealth mixed up in it. When they saw that Intellect was kinder short handed, they made offers to every wellknown wealthy man to loan his person to them for the duration of the Convention and make Al look like he was coming with the backing of "Big Business."

### Old-Time Southerns

But "Big Business" was doing so good under Cal that nothing Al could offer them would make them switch. Cal had handed them everything but the mint, and they saw no way that Al could improve on that. But the "Steering" Committee was still resourceful. "Well we have fell down on Intellectuals, and Wealth. What could be the matter with sending some old Time Southerns, that loved the south so much they just couldent stand to stay there and see it suffer, so they moved to New York? You know the south is great on names and tradition, so we can round up a bunch of these old Babies that have still got their long coat, black hat and string tie."

The old Boys hadent been doing much since the Bar days closed, when they used to work off their Southern accent on poor suspecting visitors from south of the Montgomery and Ward line. They used to strike up an acquaintance, and before it ended the other fellow had paid for quite a snack of "Juleps."

You see the Committee was bound to not be represented by the regular voters. Not only the votes of their ninety deligates, but the impression of the Deligates was what they wanted to get over. Houston couldent possibly be hostile to an old decendant of Lee, or Jefferson, all of which could very easily be arranged by a little coaching on history before the Deligation started. Of course these men hadent been allied with Tammany Hall, but for this their first trip to the dear old Southland in years, they could swallow their pride, along with anything else that showed up on the Journey. Their names would loan distinction and prestige that would awe the boys from Arkansaw and Texas. When the New York Deligation was polled and the good old Southern names would follow each other in rotation with never a Hebraic or Gaelic tint to it, it would make the Baptist brethern start to open their eyes and realize that New York might have some good in it after all.

### "They're Christian Folks, Like Us"

It will make the old Protestant boys realize that these are some of their own Countrymen after all, when they discover that they are not going to mass or Synagogue. "Why they are Christian folks, just like us; they dont go to Church anywhere!"

Course this New York deligation can only represent them while at the Convention, because they perhaps havent registered to vote in New York for years. But if they make the Deligation look like something for just the duration of the Convention, why the experiment will have worked out. O. K. Lot of the old boys will have to brush up on their southern accent. Its kinder rusty, and is a little overdrawn to what they will hear down south. But its a great idea, sending somebody who don't represent Tammany Hall. I wish America could send somebody to our Conferences that dident represent us. We might not lose so much. They are going to have the Deligates introduced to Smith after they get back from the Convention. They got em busy now memorizing the name.

WE'LL HAVE TO BE CAREFUL WITH THESE DELEGATES

# ARTIE by George Ade

ARTIE AT THE WEDDING—"At a Conservative Estimate" He and Mame Were the Stars.

**THE STORY SO FAR:**

**Artie Blanchard is a young office worker with a great side talent for wise cracking. Each week he relates to his fellow white collar slaves, Miller and Hall, the latest sensational developments in his own private life. After, Artie relates with gusto his success at a church social and a very conservative poker party, he tells of his meeting a new sweetheart, Mamie, and his subsequent Lothario-like conquests. Artie confesses that he and Mamie have quarreled owing to excessive jealousy on Artie's part. Soon after the rift in the lute, however, Artie accidentally re-establishes himself in her good graces. It looks like they are in love with each other. The most recent development is the wedding of a girl friend of Mamie's with Artie slated as the best man.**

### CHAPTER XI.

A LARGE yellow rose drooped from Artie's lapel as he came into the office on Thursday morning.

"Ting-a-ling, the bells will ring."

As he sang this, he put one hand behind his ear and stood in the listening attitude so commonly affected by neat song-and-dance artists.

"Aha! The best man, I believe?" said Miller, moving back from his desk and regarding Artie's specialty with keen delight.

"You know it," replied Artie, "you know it. I was the stroke oar at the doin's, and it's a conservative estimate when I say that me and Mame was the hit o' the piece."

"You got through all right, then?"

"A little slow on the getaway, but I made a Garrison finish. I was runnin' in strange company, too, but as soon as I got the pace they couldn't head me."

"Tell me all about it. You and Mamie really stood up with them, did you?"

"Did we? Ain't I tellin' you we led the league? I give Mame a wad o' roses that laid over anything the bride could flash, and mebbe you think she wasn't in good form. Oh, boy! She looked, gee, just beautiful! Some of 'em mebbe had flashier scenery, but this little girl, with her flossy gown and the flowers, beat the best of 'em. I'll back her against all comers, bar none."

"By George, Artie, you are hard hit," said Miller, laughing.

"You're dead right there, an' I make no bones about it. She's got me landed and strung. Say, you must think I'm a prize boob to set around here and give up my insides to you about her, but I'll tell you, Miller, you're the only man that I'd tell some things to, and I spill it to you because I know that you're a good fellow—and understand that—puttin' aside all this kid talk—"

"That's all right, Artie. You needn't be afraid of me telling any one. There is nothing to be ashamed of, anyway. Every man falls in love sooner or later."

"Love! There's a word that used to sound like bunk to me, but on the square, that's what I've got. It's a sure-enough case. Where's Hall?"

"I think he's out collecting today."

"I'm glad of it. I don't like to say too much in front o' that boy. He don't known any more'n the law allows, and since he's picked up that ukelele I think he hears funny noises under his bonnet."

"Are you going to tell me about that wedding?" asked Miller, impatiently.

"Well, it was a whiz! We didn't break into the sassiety notes, but that's Kosher in our set. It took all day to pull it off. Mame told me to come straight to the Connelly house, because she had to go there early in the morning. Her and the other Connelly girl was handlin' the bride.

"When I got there, there was a big jam in the front room—Mame's mother, old man Connelly, Tommy Bradshaw—he was the groom, you know—one o' Tommy's brothers from the South Side and a chilly egg by the name of Parker, some relation to Tommy. This frosty party was doin' the touch-me-not business all day, an' you couldn't get him to take his gloves off.

"Tommy—new suit, new topper, new shoes. He was washed and combed till he didn't look right. I think he overdone it, myself. And say, you ought o' seen him when Mame's mother started to razz him."

"How was that?" inquired Miller.

"Oh, the old girl's got a fast line! You see, here was Mrs. Connelly settin' there sobbin' and bawlin' around as if she was goin' to bury the daughter instead of stakin' her to a cigar store. That worried old man Connelly, and so Mame's mother tried to jazz up the crowd by ridin' with Tommy. She'd say: 'Well, Mr. Bradshaw, you're a very handsome man in your weddin' clothes,' and then throw me the wink. Then she'd ask him if he'd back out if he had the chance and how many girls he'd been engaged to before. She had him fussed up till he couldn't say a word. No use, though; Mrs. Connelly kept moppin' her eyes and every little while sayin', 'Ah-h-h-h,' like that. I guess it wasn't put on, though. She was probably broke up. Women are different."

"Oh, yes," assented Miller, "she hated to lose her daughter."

"I don't believe it was that. She claimed it was the happiest day of her life, and then as soon as she said it she commenced to bawl again. But you ought 'o seen old man Connelly. Oh, he's a great old Tad—has charge o' the trucks for some factory. They say he makes good money. Well, yesterday he was up against a new proposition. He was all togged out and had a collar that was chokin' the life out of him. All he could do was to kind o' trail after the others. What do you think? At the church he wanted to slide into a back seat and let the rest of us go up front. 'Come on,' I says; 'be a good fellow and stay with us.' He said he could see all right from where he was, but his wife yanked him out and made him stick."

"How did you get to the church?"

"W'y, we give a big parade—five cars we had. I hadn't hardly had a chance to see Mame in her new clothes till we got in the bus with Florence and Tommy. Florence had about twenty yards o' thin mosquito-bar stuff hangin' to her and was made up great, but even at that she couldn't get better'n place with Mame in the runnin'.

"She's a nice girl, though. She was all fussed and so was Tommy. All the way to the church they didn't say more'n 20 words, and that was about how glad she was the sun had come out and wantin' to know if Mr. Parker was in the car behind. Tommy grinned and looked foolish.

"To tell the truth, I got kind o' groggy myself when we stopped in front of the church and piled out. Mame was all right, though. She froze to me and steered me through without a bull. There was a wait just inside when old man Connelly balked on 'em, but after that everything went smooth."

"Well, what did you have to do?" inquired Miller, with growing interest.

"I done nothin' but stick to Mame. Tommy agreed to a lot o' business that's enough to set any boy a-thinkin' if he goes against the game.

"Oh, I forgot; it was right in the dead serious part, just when Florence and Tommy put their lunch-hooks together. 'They're off,' I whispered to Mame, and she came purt' near bustin' out and queerin' the whole act. She panned me good and hard for it afterwards."

"What did you do after the ceremony?"

"Say, the ceremony was just the first part o' the show. When we got out o' the church Florence's mother was cryin' again and kissin' everybody except me and the old man. We did a run-around on her. They loaded up the carriages again and all but us four went back to the house. We went over to get some photographs."

"Oh, I see."

"Well, I should say so. You've always got to have one o' them bride-and-groom pictures in the house even if there's nothing to eat. They wanted me and Mame to go along, so we rode over and watched 'em."

"Tommy was all right by that time. He'd got his nerve back, and he was real peppy, kiddin' me and Mame, and sayin': 'That's all right. Some time I'll come and see you two hitched up.' Wasn't that a raw deal, huh? There I was—I'd never said nothin' to Mame about the marry idea, and he was takin' it for granted that everything was set. He was pretty fresh about it.

"But Mame—say, she passed it off smoother'n silk. She just give him the ha-ha and says: 'That'll be all right. You'll get your bid when the shootin' match comes off.'

She didn't call it a 'shooting-match?'"

"Naw! I'm just tellin' you, you know. Well, they got their pictures, Florence settin' down with the flowers in her lap and him standin' behind with one of his fins kind o' hid in that mosquito bar. Then we all drove back to the house to feed our faces."

"Oh, you had a wedding breakfast?"

"I hope to tell you! That was where I cut loose. I made a speech, just for a kid, you know, but it started 'em—all but that cold guy. We fed an' then we smoked and danced, and old man Connelly played the saxophone—rotten, thank you. Mame was the star, too. Don't forget it.

"Honest, we had a good time. Them people up there's good enough for me. No frills, but they're on the level, and when it comes down to cases they're just as good as a lot of people that make a bigger front. They got hearts in the right place.

"It's like a man out at the boat club says, 'If you can't travel with the bell-cows, stick to the gang! That's wise talk, too."

Shall Artie go into politics? He needs a bankroll. Read his pro and con arguments in The Sun-Telegraph next Sunday.

# One Girl to Another by Lloyd Mayer

## Sandie and Mother Come to New York

"MY DEAR, I'm all asKEW and asKANCE, no less—I mean I'm PRACticably on the verge of colLAPSE at this point because I'll simply NEVer reCUPerate, or whatever you call it, from this odd CRUISE that Mother and I went on with this BOY, Trellyvan TreMAINE, in this treMENdous YACHT of his, my dear, because we ACtually had the WILDest TIME!

"I mean we were s'posed to go on BOARD this old CRAFT in New YORK, my dear, and I VOW I NEARly had hysTERics because I mean getting MOTHer to New YORK was the most HECtic exPERIEnce because this Dr. FORtescue and I had to keep sort of BOOSTing her into TRAINS and things and dashing madly round with SMELLing salts and we were s'posed to meet RONald CURIe in New YORK, my dear. He was a day LATE and this BOY who owned the YACHT was SIMply RIPping and when Ronald DID arrive he looked like NOTHing HUman because he'd been off on a TOOT or something and MOTher was simply FURious at my inVITing him to go on the CRUISE because she doesn't apPROVE of him, as you KNOW, my dear, because he's an Artist and she's NEVer forgotten the BEDtime party he gave for me in his STUdio—can you BEAR it, my dear?

* * *

"WELL, ANYways, it was POSitively perVERted getting Mother OFF in the FIRST place because I mean she's so NERvous and all, my dear, and of course I did EV'rything in the WORLD FOR her at this point, but she was AWfully Irritible, sort of, because I mean just the least little THING had her all-of-a-BIB-and-TUCKer.

"Dr. FORtescue sort of left EV'rything to ME about arRANGing the trip to New YORK and all and I was sort of DASHing round VAGUEly for DAYS, my dear, trying to sort of CLOSE the HOUSE and get the TICKets and all!

"REALly, my dear, I was all-of-a-DOOlah because about five MINutes before the TRAIN left and we were STILL sort of LEAPing MADly up and down STAIRS looking for Mother's umBRELla or BALbriggans or something the TELephone began ringing Violently, my dear, and it was this BOY I haven't seen for Aeons who had SUDdenly decided he simply HAD to call me UP from SALT Lake CITY or some odd place like that.

"I was ACtually TOO imPRESSED because I ALways aDORED him, my dear, but I thought he was MARried YEARS ago or something and I was so exCIted about this TELephone call from him and all that I just sort of VAGUEly hung onto the reCEIVer and GIGgled WEAKly at INtervals while MOTHer threw CATfits, my dear, and kept beon to the TELephone and trying to exPLAIN to this youth that we had about two SEConds to catch our TRAIN and all, when I SUDdenly remembered I hadn't the reMOtest idea what I'd done with the RAILroad tickets, my dear, so I sort of SHOUTed to MOTHer asking her if I'd given them to HER, whereupon she proceeded to FAINT in Dr. FORtescue's ARMS, my dear.

"I had to dash MADly for some BRANdy and the TAXI driver arrived at this point and said if we wanted to catch the TRAIN we'd better take an AERoplane or something because we only had three MINutes at this point and I was on the VERGE of colLAPSE, no less, and I told Dr. FORtescue I thought I was going to FAINT, my dear.

"So he made me take a treMENdous swig of BRANdy and then HE had quite a swig and beTWEEN us we managed to get MOTHer into the TAXI and then the TAXI driver had some BRANdy because he said he was afraid he couldn't make the TRAIN unless he had a STIMulant of some sort at this point.

* * *

"SO WE tore MADly down TOWN, my dear, and JUST made the TRAIN by the skin of our TEETH whereupon MOTHer proceeded to have hysTERics and we had to give her some more BRANdy and assURE her we'd brought along her BALbriggans and umBRELLA and things—can you BEAR it, my dear? And then, Dr. FORtescue and I had LUNCHeon together and he was AWfully aMUsing and told me a lot of TERribly funny STORies about some of his PAtients only I was emBARrassed to TEARS by some of them because they were sort of risque.

* * *

"GOSH, I hadn't the vaugest IDEA how Late it was at this point. I'll have to LEAP hither and YON imMEdiately, but I MUST see you again NEXT Sunday, my dear, because I want to tell you LOADS more about this exCRUciating CRUISE because it was SIMply WILD, my dear—I mean I ACtually DO!"

(Copyright, 1928, by Heart Newspapers.)

*"We were supposed to get aboard this old craft, my dear, and I nearly had hysterics."*

# BETWEEN the LINES by K.C.B.

*DEAR K. C. B.: I am a "cop" and I wish you would say a few words for the benefit of mothers in-law. Mine came for a visit seven weeks ago and doesn't seem to realize what the length of a visit should be. She has never forgiven my wife and me for getting married. Now, my wife and I have a small family and only a small apartment, and she being here puts us into cramped quarters. I have asked her to go, but she declines, and the result of it all is that my wife and I are now at swords' points.* "K. O. P."

MY DEAR K. O. P.
* * *
THE MESS you're in.
* * *
IS JUST a mess.
* * *
THAT EVER has been.
* * *
SINCE MARRIAGE began.
* * *
AND WILL ever be.
* * *
I DON'T know.
* * *
WHAT I would do.
* * *
IF I were you.
* * *
JUST AS you don't know.
* * *
BUT I know darned well.
* * *
WHAT I'D like to do.
* * *
JUST AS you know.
* * *
WHAT YOU'D like to do.
* * *
AND YOU can't do that.
* * *
AND THERE you are.
* * *
AND SO it seems.
* * *
THERE'S NOTHING to do.
* * *
BUT SIT and wait.
* * *
OR GET up and go.
* * *
AND NOBODY knows,
* * *
BUT JUST yourself.
* * *
WHAT GOING would mean.
* * *
AND I don't know.
* * *
WHAT I would do.
* * *
IF I happened to be,
* * *
YOUR MOTHER-IN-LAW,
* * *
I THANK you.

(Copyright, 1928.)

# GRIN AND BEAR IT

### Alternative

"Nothing but an operation will save your life," said the surgeon.

"What will it cost?" asked the doomed man.

"A hundred dollars."

"But I haven't got a hundred dollars."

"Then we must see what pills will do."

* * *

### Fisherman's Luck

"Yes, it was the biggest fish I have ever hooked—and before I realized it I was pulled clean out of the boat!"

"You must have got a nasty wetting."

"Not a bit of it. You see, I fell on the fish."

### Gallonage

He had just bought a car. His wife went with him on a few expeditions, and did not hesitate to criticize her husband's driving.

"Hello, old man," said a neighbor one evening. "I see you've got a car. What do you get out of her?"

"About forty thousand words to the gallon."

* * *

### Anachronism

Very Modern Girl (to fiance): "Freddie, what a charming little ornament you have sent me. But what is it? It's made of gold, but it's not a brooch, or a ring, or a bracelet. I have never seen anything [illegible] it."

He: "It's a thimble."

# FORTY-SECOND COUSINS

*Each Endeavoring to Act His Age.*

*by J.W.M'GURK*

"SO GEORGE SPELVIN HAS MARRIED HIS WIFE AGAIN."

"YES, I WONDER HOW MANY TIMES THEY'VE GOT TO DO THAT BEFORE SHE BECOMES HIS PROPERTY."

"MOTHER IS RIGHT, I GUESS THE MAN TO MARRY SHOULD BE ONE WITH THE SAVING HABIT WELL DEVELOPED."

"OH, NO DOUBT ABOUT IT, BUT IMAGINE BEING ENGAGED TO AN EGG LIKE THAT!"

THERE'S SOMETHING WRONG WITH THIS CAKE YOU'VE BAKED, WIFIE— IT'S NOT BAD, BUT IT CERTAINLY ISN'T RIGHT."

"NONSENSE, THE COOK BOOK SAYS IT IS DELICIOUS."

"AND HOW IS THE PATIENT, NURSE?"

"YOUR HUSBAND IS WANDERING IN HIS HEAD, MADAME!"

"OH WELL THEN HE WON'T STRAY FAR."

"SPEAKING OF BRILLIANT MARRIAGES, NOBODY IN MY FAMILY EVER MADE ONE."

"SOMEBODY IN MINE DID— MY WIFE."

"I DON'T SAY YOU WERE NOT SOBER LAST NIGHT ANDREW, BUT EVERYBODY AT THE PARTY SAW YOU TRYING TO LIGHT A CIGAR FROM THE FACE OF YOUR LUMINOUS WATCH."

# FESTIVAL OF TUNES FORECAST IN THEATER CARDS

## HEADS OF WINNERS -:- IN TALES YOU'LL SEE -:- DEPICTED ON STAGE

BEATRICE LILLIE, comedienne, and the Four Nightingales, who come to spend a week in the Nixon in a musical comedy production, "She's My Baby." Miss Lillie is the star and the Nightingale Foursome give primise of soothing the eye as well as the ear.

WILLIAM C. GORDON and Vera Ross, as they appear in "Iolanthe," and Suisabell Sterling, Lois Bennett and Bettina Hall, in "The Mikado," the latter opening the Gilbert and Sullivan repertoire in the Alvin Monday night for the week.

## *Songbirds Flutter About Our Stage in Opera and Comedy*

**Programs Another Evidence of "Why We Behave Like Human Beings."**

**By WILLIAM J. LEWIS.**

IT WILL be surprising if, at the end of a couple of weeks, the stages of our theaters are not carpeted with feathers. The influx of songsters prompts the thought. It is difficult the refrain from the suggestion that those who control the destinies of our playhouses must have found there was no breakfast food in the larders one morning and had to satisfy their hunger with birdseed.

Last week we had music. Beginning Monday there will be music. The week following there will be music. We, who have so much trouble to get little Sophronia to do her daily hour at the piano and little Master Webster to scratch the fiddle where it itches the most, marvel at the skill of these theater managers who are able to marshall such an army of the musical do their devoirs at the shrine of Orpheus.

With so much lyricial theater to set our minds in metrical grooves it is not at all unlikely that at the end of another fortnight we shall all be finding our thoughts streaming along in a rum-te-tum-tum fashion and that we shall chorus "and he polished up the handle of the big front door," when we speak of the early beginnings of the big dealer in products of the dairy and the heanery.

I know there is some psychologic or biologic basis for all of this, and I might be able to tell you what it is, but you probably know anyway if you have been careful to remember what you have read in Dr. Dorsey's "Why We Behave Like Human Beings." You may even get an inkling from the title of Dr. Dorsey's work. You will note it's not "Why We Are Like Human Beings," but "Why We Behave Like Human Beings." It will be just another hint to imply that it is all a matter of behavior. To strengthen the clue, it is suggested that you bark back to the days when a song was part of your childish game, like "London Bridge Is Falling Down," etc.

In short, you are being given so much music because your behavior of a lifetime indicates that you like it—that it is part of you. You are only a child grown up and the things that appeal to you are much the same as those that appealed to you as a child, only they are grown up, too. You still play "Ring Around Rosey," but of a more mature version, when you go to the musical show, only your participation is vicarious. You permit someone else to play your part while you watch in a critical capacity.

All of which brings this article to its raison d'etre, as we French Canadians have it. The foregoing paragraphs were inspired by the so musical past week and the so tuneful prospect contained in the coming of Gilbert and Sullivan repertoire and the musical comedy, "She's My Baby."

The Gilbert and Sullivan festival is to be given in the Alvin by the Winthrop Ames Company, which has revived several of the old favorite operas of this immortal pair with striking success elsewhere. The order in which the pieces will be presented is, Monday and Friday nights and Wednesday matinee, "The Mikado; Tuesday and Thursday nights and Saturday matinee, "Iolanthe;" Wednesday and Saturday nights, "The Pirates of Penzance."

"She's My Baby" comes to the Nixon with Beatrice Lillie as the star. Miss Lillie is remembered as the featured comedienne in Charlot's Revue. Clifton Webb is the chief comic in "She's My Baby," the music of which is by Richard Rodgers, set to lyrics of Lorenz Hart. Miss Lillie is a native of Canada, but she is widely known as an English actress. In private life she is the wife of Sir Robert Peel.

Coming events cast their shadows before, so we find the Pitt dark, a condition ominous of the close of the regular season in that theater and the resumption of stock by the George Sharp Production Stock Company a few weeks hence.

The Davis presents its Keith-Albee vaudeville with a stellar light from musical comedy in a featured place on the bill, Winnie Lightner, in "A Song a Minute." The photoplay will be "The Wise Wife," impersonated by Phyllis Haver.

The Academy's bid for patronage is in Carrie Finnell and her "Redheaded Beauties," a burlesque attraction.

Popular priced variety and motion pictures make up the programs in the Harris, Loew's Aldine and Sheridan Square, while feature photplays and stage presentations will be the bills in the Penn and Stanley.

COMEDIAN

MILO, comedian, is a feature of the stage show, "Dancing Brides," to open Monday in the Penn.

MAGICIAN

HARDEEN, brother of the late Houdini, will present an act of magic on the Harris stage.

## NO WOMEN IN THEATER, ERVINE BAN

**By ALAN DALE,**

*Famous Dramatic Critic of Universal Service.*

NEW YORK, March 17.

IT IS reported that no less an authority than St. John Ervine has deliberately thrown down the gauntlet to theatergoing ladies, and, in an outburst of shimmering iconoclasm, has said: "The great day of the theater was when there were no women either on the stage or in the audiences."

Thus doth the disgruntled St. John (otherwise Sinjun) dispose of the coruscant masses of highly bedizened, highly perfumed, and highly chatty ladies who fill our effulgent lobbies, as well as all the lovely stellar actresses, and all the charmers who are not precisely actresses but just on the stage. I admit that when I contemplated the full fervor of Mr. Erskine's fulmination I was amazed to the bursting point. Even to imagine the theater minus lady is something that I couldn't do, shouldn't, and wouldn't if I could. To emphasize his point, he has announced that he would permit no woman under 40 to enter his theater, which is of course as good as saying over again no women.

If there are any women over 40 (except Mrs. Whiffen) I have never met 'em and never expect to meet 'em. Woman's stationary age I have discovered, is 27! Twenty-seven she reaches occasionally. Beyond 27 she does not budge. And I do not blame her in the least.

(Continued on Page Eight, This Part.)

## *Sullivan Music, Gilbert Words, Ideal Operetta*

**Three of the Best of the Savoy Masterpieces Will Be Staged in Finest Style.**

**By GEORGE SEIBEL.**

WHEN I say that the three Gilbert and Sullivan operas to be presented at the Alvin Theater this week are the most beautiful and satisfying productions ever made in this country, and perhaps anywhere, it is not hearsay nor faith in the gaudy verbiage of press agents. It is the calm conclusion of one who has seen and heard all three in New York—and has heard "The Mikado" probably 20 times during 40 years. Winthrop Ames has put the quaint Gilbertian humor into rich caskets of scenic and sartorial loveliness, with the appropriate accompaniment of Sullivan's magical melodies and rhythms.

"Iolanthe," least known of the three, has all the charm of a fairy tale, all the laughable zest of a good joke, and some of the prettiest music ever evoked by the most distinctive of British composers. For it is a mistake to regard Sir Arthur Sullivan as a mere purveyor of tinkling tunes. He composed "The Lost Chord" at the bedside of a dying brother. He set the music to "Onward, Christian Soldier," the words being S. Baring-Gould's, and gave the church militant its most inspiring battle hymn.

He ventured into grand opera with "Ivanhoe," which was sung 168 consecutive times—and has not been revived only, perhaps, because of the expense entailed by a proper production. Scores of hymns and songs, several oratorios and cantatas, place Sullivan somewhere near Rossini, who was his admired friend.

"The Pirates of Penzance," composed in America, has furnished us one of our most popular airs—everybody knows it as "Hail, hail, the gang's all here," but it's a Pirate Chorus. "The Mikado" was a craze for years as "Pinafore" had been, and still is as popular as ever—though in 1907 a revival in England was forbidden, for fear of wounding the susceptibilities of Britain's Japanese allies.

Just as Sullivan must not be regarded with indulgent condescension, so William Schwenck Gilbert deserves a rank far above a mere funster. In fact, he is an English Aristophanes, and only his dexterous wit keeps him from being considered a very dangerous person. He has said worse things about the British aristocracy, the army and navy, and many another sacred institution, than Bernard Shaw ever said. But he smiled when he was saying such things. G. K. Chesterton has pointed out "The Mikado" as an example!

"In that play Gilbert pursued and persecuted the evils of modern England till they had literally not a leg to stand on, exactly as Swift did under the allegory of Gulliver's Travels. Pooh-bah is something more than a satire; he is the truth."

### *Jack of Many Trades*

Gilbert has seen a great deal of life in various callings. He had been in a government office, in the army, at the bar of law; he had even studied for a master mariner's certificate and built himself a yacht. It was as a playwright he finally made his mark, after his "Bab Ballads" established his reputation as a humorist. Plays like "Sweethearts" and "Pygmalion and Galatea" maintained themselves in stock repertoire for years.

The playwright and the composer did not find each other at the beginning of their careers. Gilbert's first librettos were set to music by Frederick Clay. Sullivan's first operatic work was with words furnished by the humorist, F. C. Burnand. When they became associates, and their first joint effort, "Trial by Jury," scored a success, the long series of Savoy Theater hits produced by D'Oyly Carte kept the world laughing and humming for a quarter of a century—and the mirth and music still are in the air.

Back of it all is a terribly serious point of view, which Gilbert

(Continued on Next Page.)

FROM MUSICAL COMEDY

WINNIE LIGHTNER, who has won honors on the musical comedy stage, will headline the vaudeville bill coming to the Davis Monday.

VAUDEVILLE

HELEN MASON is one of the featured vaudeville players coming to the Sheridan Square.

## *Jazz Possibilities In Art Expression Displayed in Opera*

**American Musicians Fail to Achieve Spirit Of Native Development.**

**By J. FRED LISSFELT**

SINCE first hearing jazz, I have been a staunch believer in its possibilities as foundation material for present-day music. When I consider jazz, I am not thinking of the many unpardonable distortions of great music that have been created for the dance hall, but rather of the novel rhythmic and orchestral effects invented by college fellows (I have taken the trouble to catechize many of them) who know scarcely a note or any academic formula of music. These fellows, unhampered by any tradition, have really created an American idiom, perhaps not esteemed, but sincerely recognized and studied by all countries save our own, an idiom that is surely finding its way into all music that seriously reflects the spirit of our day.

Now I am on the lookout for music and musicians who best interpret this spirit. Paul Whiteman proved to be disappointing. His present vaudeville stunts are a poor development of his original attempts to organize players with genius for improvising this new music. He recognized the novelty of this music, but I believe, never saw its possibilities as art. Gershwin tried to cast the new amalgam in old moulds and found his "Rhapsodie in Blue" quite lopsided. John Alden Carpenter did a little better in his ballet, "Skyscrapers," but the texture of this work is too delicate, its style is too cosmopolitan to be really American. Most piano compositions heard at the festival for modern music in Salzburg last summer had caught the jazz contagion. There were sonatas, suites of dances and nocturnes flavored with Negro music and a paraphrase of Zez Confrey's "Kitten on the Keys" that was marvelous music. All composers of these works were clever enough, but everyone just missed the bulls-eye; none of them felt that little shoulder movement that is born with the American.

All music circles are now agog over the jazz opera "Jonny Spielt Auf" (Johnny jazzes 'er up), written by the Czek, Ernst Krenek, and played at the Leipzig opera. At first conductors would have none of it and now they are madly seeking contracts for its presentation everywhere in Europe and at our own Metropolitan Opera House in New York City. It is the hit of the day.

Krenek is a product of Vienna and Berlin, where he learned to take art seriously, and then graduated in Paris, where he learned to take art not so very seriously. He has no "isms" and expresses himself. If his music is atonal, he says he would like some one to explain just what that means. He creates what he feels, and, judging from his opera libretto alone (he is his own librettist), he feels the spirit of the day.

The young Negro, Jonny, having conquered all Europe with the fascinations of his jazz band, realizes that inter-racial marriage is not regarded in the same light on both sides of the Atlantic. He begins to court a prima donna, when he learns he has two strong rivals, a composer and a violinist. The unrestrained carryings-on of this quartet and a chambermaid are the plot for the opera. In the last act, the violinist is run down by the train that is carrying the eloping singer and Jonny towards America (there is no epilogue at the American frontier); the station clock changes face, becomes the whirling earth on which the transfigured Jonny sits fiddling, while earthly creatures all join in the mad orgy of modern life.

Musically the opera must be gripping, and as in Strauss' "Salome" or "Elektra," whether one wills it or not, the drama alone compels attention. I am told the jazz element in the music has been most successful, and only in the last act, when the music becomes more seriously classic, is the opera at all weak.

## *Returns to Lead Roles*

ANNE CORNWALL, star of Parmount-Christie comedies, has completed her contracted series of two-reelers, her final film being "Love's Young Scream," and is planning now to return to leading roles in feature pictures. She has been alternating between comedies and the more pretentious productions.

MEET GUS

WE MEAN Gus Edwards. He's bringing a new show to the Stanley stage Monday.

# OPERA, COMEDY, VAUDEVILLE, BURLESQUE, PICTURES

## CURTAIN CALLS by GEORGE SEIBEL

### William Williams

The handsome tenor who sings Nanki-Poo and other stellar roles with the Gilbert and Sullivan troupe here this week is a Pittsburgh boy. William Williams went to old Central High School, and later was a classmate of Elmer Kenyon, president of our Drama League, at Harvard. While at college he played with the Toy Theater in Boston, a well-known Little Theater at that time. Later he appeared in Pittsburgh at the Davis with the Morgan Dancers. Then he was the juvenile with several productions in New York—the last being "My Son," in which Emma Dunn was the star.

### Woodman Thompson

And there is still another Pittsburgh boy mixed up in this Gilbert and Sullivan revival. It is Woodman Thompson, responsible for some of the most beautiful scenic settings. Every one interested in the drama in Pittsburgh knows Woodman Thompson, who got his training out at the Tech School of Drama, and is now one of the most important men in the metropolis. He designed George Arliss' recent "Merchant of Venice" production.

### And James Light

Still another Pittsburgh boy is directing the rehearsals of a new old play to be produced in New York on April 9 at the Provincetown Playhouse. James Light is also a product of our dramatic school. The play he is putting on is Mrs. Centlivre's famous comedy, "A Woman Keeps a Secret," a new version of which has been made by Arthur Hornblow. The play has not been presented here in over a century, and as the author died in 1723 she will not be at the opening night.

### Arthur Hohl, Too

The fact that Bayard Veiller's drama, "The Trial of Mary Dugan," has now been running about six months in New York also emphasizes the fact that one of the principal parts, the District Attorney, is played by Arthur Hohl, born on Mount Washington. He played the principal role for nearly two years in "White Cargo"—and that play was made from the novel of a Pittsburgher, Ida Vera Simonton. All in all, Pittsburgh is today cutting a very wide swath in the theatrical field.

## Academy Card Is "Redheads"

CARRIE FINNELL and her "Redheaded Beauties" will be the attraction in the Academy presenting a burlesque replete with travesties and comedy sketches. Miss Finnell will be conspicuous in the diversions, introducing the dances which are her specialty. Benny Moore, the chief merrymaker, has new drolleries and he will be seen in his Italian impersonations. Billy Gordon, eccentric Hebrew comic, will appear in several of the comedy skits. Prominent in the cast are Pearl Henderson, Bea Moore and Peggy Smith, a trio of bed-headed singers. One of the principals, Mickey Dale, a diminutive singer, has the distinction of having one of the biggest voices in burlesque. Ted Lewis and Russell Smith aid in the fun-making and appear in specialties. The red-headed chorus consists of 16 girls. Tangara and her girls will be seen in specialties. There will be a midnight show Tuesday.

### WITH DOG

HERE IS one of the Royal Gascoynes, whose act, featuring a performing dog, comes to the Aldine stage.

## Alvin Offers Comic Opera

WINTHROP AMES will present his Gilbert and Sullivan Opera Company for a limited engagement of one week only in the Alvin beginning Monday. The three operas this organization has sung in New York during its engagement there will be presented in Pittsburgh. "The Mikado" will be sung Monday and Friday nights and Wednesday matinee; "Iolanthe," Tuesday and Thursday nights and Saturday matinee, and "The Pirates of Penzance" Wednesday and Saturday nights. Probably for the first time in theatrical history, it is said, a comic opera company comes with the exact cast and productions seen in New York, unchanged save for two chorus girls. In the company are Lois Bennett, Vera Ross, Bettina Hall, Suissabell Sterling, Paula Langlen, Virginia Fox, Fred Wright, William Williams, John Barclay, J. Humbird Duffey, William C. Gordon and George C. Lehrian. Sepp Morscher is the musical director.

## Hardeen Tops Acts in Harris

IN the Harris, beginning Monday, Hardeen, brother of Houdini, known as "The Master Illusionists," will present "A Maze of Mysteries," which includes creations willed him by his famous brother. One of these is known as "The Flight of Time." Hardeen will accept any challenge. Any store or merchant can build a packing case or other receptacle and Hardeen will make his escape after being nailed or sewed in the box. He also challenges any police officer to produce handcuffs from which he cannot escape. Other acts include Lew Hawkins, "The Chesterfield of Minstrelsy," Cy Plunkett and Helen Mason and others. The photoplay feature will be "Her Summer Hero," with a cast including Sally Blane, Hugh Trevor, Duane Thompson and others. An organlogue, comedy screen features and other attractions will complete the bill.

## Guest Star in "Sun-up" Cast

THE dramatic organization of the Young Men and Women's Hebrew Association will present "Sun-up," a play of the North Carolina Mountains, at two performances—one Sunday night and the other Tuesday night. Mrs. Mary Frances Lihou, guest actress from New York, will play the leading role. Others in the cast will be Florence Lebowitz, Milton Brauman, Harold Weinberger, William Forrest, Samuel Gladstone and Theodore Epstein.

## *Gilbert, Sullivan*

(Continued from Preceding Page.)

in one of his early plays, "Charity," expressed in the words: "I believe in the morality of God Almighty, and not in that of Mrs. Grundy."

### *Public Exploder*

He ...as lampooned militarists, sham esthetes, sham philanthropists, highbrows and hypocrites of all kinds—official stupidity and graft have been pilloried as mercilessly as his friend Dickens did it. If he made fun of Socialists in "Utopia Limited," he also made fun of nationalists and patriots in half a dozen operettas, including "Pinafore" and "The Mikado." Listen to Nanki-Poo:

"But if patriotic sentiment is wanted,
I've patriotic ballads cut and dried;
For where'er our country's banner may be planted,
All other local banners are defied!"

Or listen to the eulogy of Ralph Rackstraw:

"For he might have been a Russian,
A French, or Turk, or Prussian,
Or perhaps Italian!
But in spite of all temptations,
To belong to other nations,
He remains an Englishman."

Gilbert will always have a place of honor as England's "Public Exploder," laying powder mines of intellectual merriment under the ancient buttresses of bunk. But his dynamite is delicious, and wedded to Sir Arthur's music it is irresistible. So we may expect that "Iolanthe," "The Mikado," and "The Pirates of Penzance" will attract capacity audiences during this Gilbert and Sullivan week at the Alvin.

## Girl Sextet Sheridan Act

THE vaudeville in the Sheridan Square Monday, Tuesday and Wednesday will be topped by Maddock's Mascots, a sextet of Melody Maids. Six pianos are played in unison and in solos. While one sings or dances, the remaining five provide the accompaniment. The photoplay feature will be George O'Brien and Lois Moran in "Sharp Shooters." The Great Lester, ventriloquist, will make his re-appearance. Elizabeth Solti and Co. have a dancing act. The Gaines Brothers are known as the "Cuban Athletes." Morgan & Lake, in a dancing act, and John Edward Mitchell in an organlogue will complete the bill. For the last half of the week Jack Russell and his Pickaninnies, a group of six girls, will present a song and dance offering called "Southland." The photoplay feature will be Monte Blue in "Across The Atlantic," Helen Moretti, a Pittsburgh girl; Jack Anthony and Harry Rogers, "Two Retired Banana Merchants;" Frances & Frank in an aerial act; Vera Sabina & Co., and other attractions will complete the bill.

## Free Talks To Be Given

EUGENE FERSEN, nephew of the late Count Leo Tolstoy, will give a series of three talks on "Man's Latent Powers and How to Develop Them" in Soldiers' Memorial Hall Tuesday night he will speak on "Capitalizing Your Hidden Powers." "Banishing Fear and Worry" will be Wednesday night's subject. Friday night he will speak on "Making Life Pay." The lectures will be free to the public.

## Rogers' Talk On March 27

THE cowboy humorist, Will Rogers, will appear on the lecture platform in the Carnegie Music Hall March 27, under the management of May Beegle. Rogers' talk, it is pointed out, is liable to be about anything or anyone. But his reputation gives assurance that it will be funny and entertaining.

### BURLESQUE

CARRIE FINNELL is featured in "Red-headed Beauties," new burlesque vehicle in the Academy.

## Comedienne Is Davis Star

THE headline feature of the Keith-Albee vaudeville program in the Davis, beginning Monday, will be Winnie Lightner in her new vaudeville offering, "A Song a Minute." The screen feature will be "The Wise Wife." Other stage features will be Jack Fulton and Peggy Parker, presenting "Diversions a la Carte," with songs and patter; Jack Hanley, comedian, in his original act, "What the Well Dressed Man Will Wear," and Alice Zeppilli, prima donna of the Chicago Opera Company and the Opera Comique, Paris. "The Wise Wife" is based on a story by Arthur Somers Roche, published serially in the Cosmopolitan magazine. In the cast are Phyllis Haver, in the role of the wife who keeps her husband's love in spite of the vamping of Jacqueline Logan; Tom Moore, Joseph Striker and Robert Bolder. "Topics of the Day" and views of latest happenings will be shown.

## Aldine Gets Irene Renee

EARL BRONSON and Irene Renee will headline the vaudeville bill in the Aldine, beginning Monday. In their act, "The Opportunity Contest," they will be assisted by a company of five dancing and singing girls. "Tin Types," presented by Yorke and King, with Roy Fant and Madeline Lee, will be another important act. Royal Gascoynes, featuring "Teddy," a balancing dog, will be another feature. Harry Smith and Jack Strong will present "Voices From the West," a song act; Joe Page and Nona Class will offer "Dance Eccentricities in the Air." The feature picture will be "The Opening Night," with Claire Windsor and John Bowers.

## *From Fight To Pictures*

BARRY NORTON, one of "The 4 Devils," F. W. Murnau's elaborate production for Fox, broke into pictures through the prize ring. He came up from Buenos Aires to see the Dempsey-Firpo fight in New York, and then toured the country. Winding up in Hollywood, he decided on a picture career, and is now far along the way to world-wide prominence.

## Nixon Offers English Star

ON Monday night, in the Nixon, Beatrice Lillie (Lady Peel) opens an engagement in a new musical comedy, "She's My Baby," in which she has just closed a successful run in the Globe, New York. In the cast are Clifton Webb, Jack Whiting, Ula Sharon, Pauline Mason, Nick Long, Jr., Frank Doane, Phyllis Rae, the Nightingales, John Tiller's eight Little Cocktails and a bevy of show girls. The music and lyrics of "She's My Baby" are by Richard Rodgers and Lorenz Hart. Edward Royce staged the production, which is sponsored by Charles Dillingham.

## Flotilla Gets Al Katz Band

AL KATZ and members of his recording Kittens orchestra will appear in the Venice Restaurant this week in their first Pittsburgh engagement. Katz's unit also will play in the Flotilla Club nightly. Bebe Falvo and his revue, featuring new acts, will be on the Flotilla Club program.

## Stock Director Is to Return

EDWIN VAIL, who was stage director of the George Sharp Production Stock Company in the Pitt last summer, will return to act in the same capacity when the company opens its second season in the Pitt Theater, April 9.

The play selected by Manager Sharp for the initial performance is "Take My Advice," a comedy by Elliott Lester, which recently closed the Belmont Theater, New York, and has just been released for stock.

Players who will appear this season include Anne Forrest, Mabel Kroman, Gus Forbes, Matthews Smith, Robert Lawrence, Louise Gerard Huntington and others.

### DIRECTOR

EDWIN VAIL is director of the George Sharp Production Stock Company which will open in the Pitt April 9.

## Newman Talk Tuesday Night

E. M. NEWMAN will give another travel talk in the Carnegie Music Hall Tuesday night. His subject will be "Paris by Night." He also will discuss the Pyrenees and the French Alps. In connection with his lecture, Mr. Newman will present a motion picture, in colors, of the Folies Bergere revue, and will show scenic views taken in the French mountains.

## Band Revue On Penn Stage

"DANCING BRIDES" is the title of the band revue that will be presented on the Penn stage for a week, beginning Monday. Milo, well-known comedian, heads the cast. Jese and Jules Walton will be featured in a wedding waltz. Charles Woodruff, formerly featured in "The Love Song," will sing. Edith and Dick Barstow will offer a tap dance. Comedy dances will be presented by Clay Stearns and the Leonora Girls also will be featured in terpsichorean entertainment. Don Albert, director of the stage orchestra, will act as master of ceremonies. The photoplay will be "Rose Marie," featuring Jean Crawford.

## Jones' Dance Monday Night

OLD-TIME dances, sponsored by Johnny Jones, are held in Barth's Studio, Liberty avenue, every Monday night. Music for the dances is furnished by Joseph Kaine and his orchestra.

## Stanley Gets Gus Edwards

GUS EDWARDS, composer of "Schooldays" and 500 other stage vehicles, will bring his newest creation, "Ritz-Carlton Nights," to the Stanley stage Monday. In it he presents some new youthful American talent. His company is further augmented by Ray (Rubberlegs) Bolger, Vivian Martin, from musical comedy; the Reynolds Sisters and Senorita Armida. The Stanley Concert Orchestra will be under the direction of Phil Spitalny, guest conductor. The photoplay will be "The Heart of a Follies Girl," starring Billie Dove.

## Waltz Contest In Danceland

MONDAY, Tuesday, Thursday and Saturday nights are devoted to social dances in Danceland, Olympic Theater Building. Monday night has been set aside as prize waltz night. The management offers a prize to the best waltzing couple, the audience acting as the judges. Paul Eagleson's Bachelors will furnish the music.

# SILENT DRAMA VISUALIZES MANY ANGLES OF LIFE

## POPULAR PLAYERS -:- ROMANCE, ADVENTURE, LAUGHS -:- IN NEW PHOTOPLAYS

UNDER DAZZLING theatrical lights Larry Kent and Billie Dove do their romancing in "The Heart of a Follies Girl," Stanley and Regent photoplay.

LOIS MORAN is only a sailor's sweetheart in "Sharp Shooters," coming to the Olympic and Sheridan Square. And her sailor has a girl in every port.

WALLACE BEERY has his ups and downs in the comedy, "Wife Savers," Grand and Liberty booking. Meet him as an Alpine climber.

CLAIRE WINDSOR impersonates a stage actress in "The Opening Night," in Aldine and Cameraphone.

HOUSE PETERS is a member of the Northwest Mounted and Joan Crawford as the heroine in the picturization of the musical production, "Rose Marie," new Penn photoplay attraction.

# *Screen Version of "Rose Marie" One Of New Pictures*

### Billie Dove Film and Beery-Hatton Comedy Also in Week's Bookings.

**By MILDRED FILLMORE**

"GRACIOUS me!" I overheard a little woman say in the Stanley one night last week, "he's died." The "he" referred to was Herr Emil Jannings, eminent character actor. And, as you know if you saw "The Last Command," Emil not only "died," but he "died" impressively. It was another unforgettable Jannings episode—that death scene. As for its realism—well, I had quite a shock when I read somewhere, a few hours later, that Emil is alive and hard at work in another picture, "The Patriot."

It's quite a far jump from the Red Revolution in Russia to the dazzling lights and glamor of the Ziegfeld Follies. But the jump is to be made on the Stanley and Regent screens, where Monday will find Billie Dove supplanting Jannings and Russia with her starring film, "The Heart of a Follies Girl." The picture is based on one of Adela Roger St. Johns' magazine stories. Lowell Sherman, who lent trouble to the plot of Greta Garbo's last film opus, is again a villain of a sort with Billie. Larry Kent handles the heroics.

Joan Crawford is coming to the Penn to carry on where Doug Fairbanks left off. Speaking of Doug, after seeing him jump, climb and romp in "The Gaucho," I'm wondering if Clarence Darrow didn't miss a bet when he failed to introduce Mr. Fairbanks as a witness at the famous Tennessee evolution trial. Joan's picture is "Rose Marie," the movie version of that popular musical piece, which has played on the Alvin stage ever so many times. Joan, of course, has the title role. The photoplay is said to offer many fine scenic effects, sequences having been filmed in such places as the Yosemite National Park, the Feather River Canyon and the Santa Monica Mountains. James Murray, a young fellow who is reported as being a "wow" in King Vidor's "The Crowd," yet to be seen here, plays hero to Joan. The cast includes House Peters and Creighton Hale.

Another drama of stage life, "The Opening Night," is to be seen in the Aldine and Cameraphone. Claire Windsor is the star. And there ought to be lots of romance and "situations," for there are two leading men—John Bowers and E. Alyn Warren. John is a matinee idol, who loves Claire. And Alyn, well, he's only Claire's husband.

Ha, boys and girls, there's laughter in the air. Wallace Beery and Raymond Hatton are headed this way. Their picture, titled "Wife Savers," is booked for the Grand and Liberty. When the film opens, we understand one of them is a waiter in the restaurant and the other is the boss. Then the war comes along and we find the two in uniform, with their importance in life reversed—for the waiter is a lieutenant and the erstwhile boss is company cook. The pair also do some cavorting in the Swiss Alps. Ford Sterling and Zasu Pitts, a couple of other film funsters, are in the cast. One of the funny things about it all is that Wallace doesn't want to be funny. He threatened to quit Paramount if he wasn't put back in heavy dramatic roles. And, we hear, he's to have his way.

The glamor of the uniform continues to lend glamor to our movies. George O'Brien is coming to us—to the Olympic and Sheridan Square screens—as a sailor boy, one of those nice sailor boys with a girl in every port. But Lois Moran is one girl in one port who refuses to be left behind. So she goes after her sailor boy. I shudder to think what grandmamma would say about a girl chasing a man all over the world. P. S.—The title is "Sharp Shooters."

It was "Across the Pacific" for Monte Blue, cinematically speaking, at the time of the Philippine insurrection. Now its "Across the Atlantic" for him in his new film, coming to the State, which deals with the aviation phase of the World War. I like Monte. He's a good actor. I hope the plot of the new picture gives him better opportunities than those afforded him in other recent vehicles.

"The Wise Wife" is booked as the Davis photoplay. In it Phyllis Haver portrays a wife who keeps her husband's love against the vamping of another feminine charmer. Tom Moore plays the husband, whose mind wanders from the hearth fire. Jacqueline Logan is "the other woman." It will be interesting to see if the movies have discovered any new embellishments for the eternal triangle.

The Cameo will present a reissue of "St. Elmo," one of John Gilbert's early pictures for Fox, and also "The Keeper of the Bees," based on the Gene Stratton-Porter story.

Cleve Moore and Sally Blane are among the featured players in "Her Summer Hero," coming to the Harris. This picture concerns a college youth, who serves as a life guard at a summer resort during vacation.

"Quality Street," film version of the Barrie romance and starring Marion Davies, is among the attractions booked for the Schenley and Kenyon.

That's all, for today. I'll see you at the movies and I hope the ushers will greet you merrily.

## "Rose Marie" Film in Penn

THE screen version of "Rose Marie," the popular musical play, comes Monday to the Penn. Joan Crawford appears in the title role. Scenes of the picture were filmed along the American River in Yosemite National Park, the Feather River Canyon in Northern California and the Santa Monica Mountains in Southern California. James Murray, youthful actor and a comparative newcomer to leading roles, is one of the featured players. Others in the cast are House Peters, Creighton Hale, Gibson Howland, Polly Moran, Lionel Belmore and Gertrude Astor. The stage show will be "Dancing Brides."

## Billie Dove in Stanley, Regent

BILLIE DOVE is the star of "The Heart of a Follies Girl," which will open Monday as the photoplay in both the Stanley and the Regent. While the plot, it is pointed out, develops the drama and romance of a Follies girl away from her theatrical environment, many of its sequences depict scenes of the famous girl show both front and back stage. The picture is based on Adela Roger St. Johns' magazine story of the same title. Larry Kent is the hero. The cast includes Lowell Sherman, Mildred Harris and Claire Selwynne. A new Gus Edwards' vehicle will be seen on the Stanley stage. Vitaphone features will be offered in the Olympic.

## *Child Cast With Pola*

AMEDA ALLEN, child actress, has just been engaged to play the part of a two-year-old child in Pola Negri's starring picture, "Three Sinners," upon which she is now at work at the Paramount studio. Warner Baxter plays opposite Miss Negri.

# BITS ABOUT MUSIC AND AMUSEMENT ACTIVITIES

## FOUR WEEKS SEASON HERE GUILD PLAN

ARRANGEMENTS have been completed by The Theater Guild of New York whereby the first line acting company of the guild will play a four-week engagement next season in the Nixon. Guild productions heretofore have been restricted to New York, and when they were sent on tour, they went out under a management other than that of the guild. That organization has now expanded to the point where it will duplicate its annual New York seasons on tour and its productions will be under its own management and equipped with its own New York casts.

This means that Alfred Lunt, Lynn Fontanne, Dudley Digges, Margalo Gillmore, Earl Larimore, Henry Travers, Eliot Cabot, Tom Powers, Glenn Anders, Ernest Cossart, Helen Westley, Philip Leigh, Morris Carnovsky and occasional guest players of the guild will be seen in Pittsburgh in roles which they created in New York.

An important feature of the guild's visit will be the installation of the subscription system, which has been the foundation of the organization's remarkable success in New York during the past 10 years. A theatergoer who wishes to attend the entire series of plays to be given here will be enabled to buy seats for them all at a reduction on the box office price. It is hoped that 5,000 subscribers will be enrolled here for the guild's first season.

The Guild also will present two other plays apart from the season of the acting company. Their casts are composed of players outside the Acting Company. They are "Porgy," one of the hits of the current season and now at the Republic Theater, New York, and "Strange Interlude," which is Eugene O'Neill's nine-act play now engaged in playing for five hours nightly in the John Golden Theater, New York.

The plays which will be presented by the Acting Company during its local season will be selected from the following:

"The Guardsman," by Franz Molnar; "The Second Man," by S. N. Behrman; "Arms and the Man," "The Doctor's Dilemma" or "Pygmalion," by Bernard Shaw; "The Brothers Karamazov," adapted by Jean Croue and Jacques Copeau from the Dostoievsky novel; "Marco Millions," by Eugene O'Neill; "R. U. R." by Karel Capek, and "Volpone," modernized by Stefan Zweig from the old Ben Jonson original.

Of these plays, it is practically certain that "The Guardsman" and "Marco Millions" will be presented here.

## John Gilbert Cameo Star

TWO feature pictures are on the new bill in the Cameo. One of these is a re-issue of the Fox film, "St. Elmo," one of the earlier productions featuring John Gilbert. The other is the picturization of Gene Stratton-Porter's "The Keeper of the Bees." The Gilbert photoplay is based on the widely read novel of the same name, which also has been dramatized on the spoken stage. The cast includes the late Barbara La Marr, Bessie Love and Warner Baxter. A short comedy and news pictures are on the program.

## "Summer Hero" Harris Picture

THE college student on vacation, has been taken as the background for the motion picture, "Her Summer Hero," coming Monday to the Harris. Hugh Trevor and Duane Thompson have the leading roles. The plot concerns the adventures of a college life-guard and his wealthy sweetheart at a fashionable summer watering place. It is featured by swimming races, daring rescues from the dangers of the sea and love scenes. James Pierce and Sally Blane are in the cast.

## Marion Davies For Schenley

"EAST SIDE, WEST SIDE," with George O'Brien and Virginia Valli, will be shown Monday and Tuesday in the Schenley. "Quality Street," to be shown Wednesday and Thursday, is the screen version of James Barrie's stage play. Marion Davies is the star. Friday and Saturday the feature picture will be "The Enemy," starring Lillian Gish. A stage attraction, news reels and "Topics of the Day" will be shown at every performance during the week.

## *Roland for Clift Play*

GILBERT ROLAND, signed to play opposite Norma Talmadge in "The Woman Disputed," with Henry King directing, had to have his romantic Spanish sideburns and his thick, wavy hair clipped close to his head in order to make him look like an Austrian in this Dennison Clift play. Gilbert will play the role of a young officer.

## *Directs New Sills' Film*

BENJAMIN CHRISTIANSON, Swedish director, is wielding the megaphone on Milton Sills' new picture, "Nightbirds."

WISE WIFE

PHYLLIS HAVER plays the title role in "The Wise Wife," Davis photoplay booking.

## NO WOMEN IN THEATERS, ERVINE BAN

(Continued From Page Five, This Part.)

To be older than 27 is to be ridiculously punctilious.

Mr. Erskine's dislike of feminine audiences seems to lurk in the fact that women—at least he says so—wait for hours in queues to see plays "which the police ought to stop." And why not?

It behooves women, as our wives, our mothers and our sweeties, to know exactly what we should be permitted to see, and to stamp these productions either with their approval or their disapproval. Men, ribald, vulgar and lacking in finesse, could scarcely be trusted to pass on these difficult productions. They visit these doubtful shows in order to have a good time. Women go there to see what men regard as having a good time. Mr. Erskine firmly believes that there ARE women over 40, because he says that he'd only admit them, after subjecting them to close examination. Ha! Ha! Mr. Erskine alleges furiously that women also attend plays just to see the frocks which actresses wear. He fails to remark that men often attend plays to see the frocks which actresses DON'T wear. At least women seem to prefer that actresses should wear frocks, which I regard as an expression of their supreme modesty, Mr. Sinjun Erskine to the contrary notwithstanding. If it is true that women really go to the theater to see frocks, I think it is quite gorgeous and altruistic of them.

There would be no dressmakers if men attended the theaters alone. Perhaps bead factories would be the only popular industries. Clothes mean a lot—a lot of clothes. I fail to understand Mr. Erskine's apparent disapproval of them. Surely, surely he could not indorse bathing suits. This inveterate Londoner should be invited to New York just to study our dear little theater lobbies, crowded with lady in 57 varieties. There is nothing like it in London, I hereby assure him. It would be a liberal education for him to see our dear little feminine patrons rushing out to the sidewalk to smoke prettily, jostling rude discourteous men, and reveling in it all.

Finally, and also in conclusion, Mr. Erskine complains that his generation created a splendid theater, whilst this one has made a rotten theater. Of course, to mature minds, the past always lords it over the present. Mr. Erskine looks backward with the fatuous glance of reminiscence, carefully omitting the fact that things in the past have been infinitely worse than they are in the present. My memory is tolerably faithful—in fact, frightfully so. I can recall no better theater than that we have with us just now. The multiplication of theaters has multiplied the good as well as the bad. We have more bad plays, and we have more good ones. I am perfectly willing that my Aunt Tabitha shall go to the theater to see what she thinks is good for me to see and also what is bad for me to see. Evil be to him—and likewise to her—who evil thinks.

*Honi soit qui mae y pense.*

SOLDIER

MONTE BLUE again appears in the uniform of a soldier in his new film, "Across the Atlantic," State booking.

## SLAPSTICK TOO OFTEN IS FORCED

By LOUELLA O. PARSONS

*Motion Picture Editor of Universal Service*

LOS ANGELES, March 17.

COMEDY in movies has reached a dangerous stage—a place where there is a proneness to exaggerate situations and distort scenes until the simplest comedies become broad absurdities.

The modern urge to make people laugh is with us so strong that Hollywood producers and directors are sacrificing sentiment, beauty and even romance to achieve a Sennett situation.

It's perfectly all right for Ben Turpin to stand on his head or Chester Conklin to be hit on the place sacred to spankings, for a laugh, but who likes to see our comediennes go through these same torturing moments.

I don't believe Marion Davies, Bebe Daniels, Clara Bow, Constance Talmadge or any of the girls who are filmland's most successful comediennes, need to resort to such extremes. Certainly "The Patsy" has enough real comedy without any slapstick additions. If Marion Davies had been forced to do rough and tumble stuff, getting the contents of the Sunday dinner in her face, the story would have suffered and it wouldn't have been half as amusing, nor could we have called it one of the most successful of the recent comedies.

We like to see Marion funny one moment and wistful and appealing the next. You cannot associate pathos directly with slapsticks. Even Charlie Chaplin's world-famous comedy does not offer cheap slapstick and pathos together. Some of his scenes may border on the ridiculous but there is sure to be a balance. Any suggestion of slapstick is not associated with the Chaplin subtleties.

Bebe Daniels' comedies are always well received and Bebe frequently goes to the comedy extreme, but she does not lose sight of dramatic values and you cannot get any such values with exaggerated, improbable comedy situations.

Wallace Beery and Raymond Hatton started out on a crest of popular approval after their comedies, "We're in the Navy Now" and "Behind the Front." Then they made a succession of films that had no rhyme or reason, just a series of foolish scenes that didn't mean a thing. Today, the team of Beery and Hatton is dissolving. Wallace Beery, who is one of the finest actors in pictures, is returning to character roles.

"Tillie's Punctured Romance" is a sad, scrambled edition of continuous rough and tumble play. It's about as unfunny as any picture I have ever seen. Usually audiences will laugh just to announce they are looking at a comedy but there was a silence in the theater where "Tillie" was shown that was ominous.

In other words, "Tillie's Punctured Romance" needs a better story. There is no comedy funny enough to be able to stand up without the backbone of a plot. Louise Fazenda dresses like a comic valentine. Miss Fazenda is an artist at broad comedy. There is no one who does exactly her kind of roles, but her "Tillie" was a solo, unsupported by plot, continuity or proper team work.

Broad comedy is, of course, permissible at times when it is used to describe character. For example, Norma Talmadge's characterization of "Kiki" was enhanced when she and George Arthur engaged in a rough and tumble fight. Such a battle was not out of place because it was a part of this gamin who fought with her fists when self-preservation became necessary.

Gloria Swanson used broad comedy with excellent effect in "The Humming Bird," also the story of a Parisian gamin. She best described the girl's character by these comedy situations.

Yet "Sadie Thompson," easily Gloria's best picture, hasn't a thought of slapstick. Sadie Thompson's character is defined with clothes, a trick walk and by certain little mannerisms that are done with art and finesse.

William Haines' comedies are individual because he uses broad comedy only for characterization.

Any director will tell you it is far more difficult to make a successful comedy than to direct the most gorgeous spectacle or the most throbbing emotional drama. This is simply because some of the people have caviar tastes and enjoy subtleties, while others lean towards corned beef and cabbage and want their humor so obvious that it is unmistakable.

A sense of humor varies in every one and few comedies have unanimous appeal, but directors and producers can refrain from forced situations. This exaggeration is not only apparent in the movie scenes but in the titles. Heavens, what a lot of junk is offered in the name of humor!

Sometimes the witticisms are so old they have whiskers. You groan at certain similes that would be taboo in any newspaper. And you moan at puns that are so bad they should have been retired with the bustle and hoop skirt.

Yet, with all this, the producers and the directors have their side. You cannot visit the studios without realizing how much thought is put into comedy and how hard everyone is striving to furnish laughs.

## Lois Moran in Sheridan Film

GEORGE O'BRIEN and Lois Moran come to the Sheridan Square screen for a three-day run Monday in "Sharp Shooters," heralded as a comedy-drama of French East Africa and New York City, with a Navy background. Exteriors for the foreign sequences were filmed off the Pacific coast in Los Angeles harbor and at Royal Palms. O'Brien has the role of the hard-boiled gob, who has a girl in every port. Lois Moran appears as an Oriental dancer.

ROMANCE

MARION DAVIES plays the heroine in the Barrie romance, "Quality Street," a Schenley and Kenyon booking.

## Free Recitals On Big Organs

HAYDN'S "Symphony in D Minor," called the London Symphony, is included on the program for the Sunday afternoon free organ recital to be given by Dr. Charles Heinroth at 4 o'clock in Carnegie Music Hall. This is one of the 12 symphonies composed by Haydn in England. Also on the program is Chopin's "Nocturne in E Flat." Other numbers include overture to "Tannhauser," Wagner; gavotte from "Mignon," Thomas; Le Cygne (The Swan), Saint-Saens; introduction and Passacaglia, D Minor, Reger; Spring Song, Macfarlane; Toccata in C Minor, Fleuret.

The Sunday afternoon free organ recital will be given at 3 o'clock by Dr. Caspar Koch, city organist, in Carnegie Hall, North Side. Mrs. L. Wallace Ohl, contralto, will be the guest soloist and Lyman Alny Perkins will play the piano accompaniments. The Persian Suite, by the young American composer, Stoughton, will be given in its entirety. Other organ numbers will be Concert Overture, d'Evry; In the Church, Novak; Toccta, Mailly; March on a Theme by Handel, Guilmant. In addition Mrs. Ohl will sing two groups of songs.

## "Wise Wife" Davis Film

"THE WISE WIFE" will open Monday as the photoplay feature in the Davis. It is based on a story by Arthur Somers Roche. Phylis Haver has the role of the wise wife, who keeps her husband's love, against the vamping of a siren, played by Jacqueline Logan. Tom Moore is seen as the husband, whose affections are divided, for the time, between the two charmers. Others in the cast are Joseph Striker and Robert Bolder. The headline stage attraction will be Winnie Lightner, formerly featured with George White's "Scandals" and "Gay Paree."

## Two Films for Cameraphone

THE photoplay in the Cameraphone Monday, Tuesday and Wednesday will be "The Opening Night," starring Claire Windsor. E. Alyn Warren and John Bowers have the leading male roles. The plot is unfolded against the background of theatrical life. "Women's Wares" will be shown the last three days of the week. The cast includes Evelyn Brent and Bert Lytell, and concerns a shopgirl in a big city. There will be a midnight performance Sunday night, presenting the Windsor film. News pictures and short comedies will complete the various bills.

## SPANIARD TO DIRECT SYMPHONY

By MME. COBINA WRIGHT

*Famous Songstress and Society Leader.*

NEW YORK, March 17.

ENRIQUE ARBOS, distinguished Spanish composer who has come to America as guest conductor of the New York Symphony, and his wife were passengers on the S. S. Manuel Arnus, which docked a few days ago. While on the water, the twelfth anniversary of their wedding took place. The passengers got wind of it, and on the morning of March 9, the day of their wedding to their great surprise, they were awakened by a serenade outside their cabin door. The strains of Schuman's "Traumerei" first greeted them, but suddenly the music changed, breaking into wild and fantastic Spanish dance music. Afterwards, a letter was presented to them by the purser inviting them to a special luncheon given in their honor, the piece de resistance proving to be a wedding cake with 12 candles on it.

Mrs. Arbos tells me that she was completely bowled over by her first glimpse of our city, and she thinks that our big buildings resemble a vast assemblage of Eiffel Towers. They made her quite dizzy at first, and she rather feared the spirit which might lurk behind these formidable, cold buildings. However, they have found their welcome here in New York beyond anything they had expected and hospitality is awaiting this charming couple on every side.

Mrs. Arbos is singularly beautiful, and her husband is a most original man with great wit and a sense of humor. He loves to tell stories. He told me that during his student days in Germany he was arrested for some youthful infringement of the law and taken before the magistrate who was very severe with him.

"Is this the first time you've been before the court, and have you ever been in prison?" asked the stern representative of the law.

"It's the first time since I was three months old," replied the culprit.

The magistrate sternly reprimanded him for undue levity before the court, whereupon Arbos, very much impressed, explained carefully that when he was three months old his nurse took part in an argument so violent that stabbing ensued. She and her youthful charge were taken into custody where the baby remained until rescued by his family.

It has been a week of gaiety and celebration for our distinguished visitor, Maurice Ravel, who has not only been feted on all sides ever since his arrival, but whose birthday a few days ago was the signal for several parties in his honor.

Some time ago, while dining at my house, Ravel expressed a desire to hear some of the music written by George Gershwin, who also was one of my guests, but, as I had already arranged a program with Hall Johnson and his singers and Miss Abby Mitchell, it had to be postponed. So on his birthday, last Wednesday, his wish was granted by Eva Gauthier, who invited Gershwin and Ravel to meet again under her hospitable auspices. Ravel was first given a dinner party by Lisa Roma, who has been singing on tour with him, and when it was over, Miss Gauthier stopped for him and they all went to the apartment of Chester Fentriss for a musical evening.

Miss Gauthier, herself, had given a dinner party—a stag affair—and had as her guests Oscar Fried, Liede Tedesco, Thomas Bosworth, Milo Gibbs, Robert Pichenot and Jean Whitman. All evening Gershwin played his jazz music, which never fails in its fascination and charm, and Ravel was profoundly interested. Gershwin, I may say, has set his heart on mastering composition in order to write music of a more serious and classical tradition, and he plans to leave America shortly, in order to begin his studies anew. Ravel told me afte wards that he marveled at the courage of this young man, who in the face of such success and adulation in his own field of jazz, was willing to forego the fruits of his universal fame and busy himself in his studies abroad.

"We've all been through these years of self-denial and discipline," said Ravel, "but it was before we had tasted recognition, not after, and I wonder if this remarkable young man will have the courage and stamina to stick it out. I shall watch his progress with intense interest."

On Sunday evening, the Damrosches entertained in Ravel's honor, and that most talented of feminine pianists, Yolanda Mero, enchanted the distinguished gathering of guests by playing more beautifully than I have ever heard her play before.

The entire musical world greeted Felix Salmond and Dr. S. Rumschisky on the occasion of their joint recital in Town Hall. Accomplished artists, both their concerts was a great success. It is very difficult to add to the praise already bestowed on Salmond, he is such an impeccable artist. He stirs ones soul to such an extent that one is left under the spell for hours afterward.

(Copyright, 1928, by Universal Service.)

FEATURED

SALLY BLANE, youthful beauty contest winner, is a featured player in "Her Summer Hero," Harris booking.

## Miss Windsor Aldine Star

"THE OPENING NIGHT," a picture of theatrical life, will open Monday on the Aldine screen. Claire Windsor, in the film, portrays the stage-star wife of a show producer. She is supported by two leading men, John Bowers and E. Alyn Warren. Bowers is seen in the role of a popular matinee idol. Warren portrays a pathetic sort of individual, who gives all for love and dies in misery, while he is being mourned a hero. The picture is said to blend the glamor of the stage, the romance of the sea and the bliss of home life. Five vaudeville acts will be on the bill.

## Barrie Film For Kenyon

"QUALITY STREET," starring Marion Davies, will be the photoplay feature in the Kenyon Monday, Tuesday and Wednesday. It is based on the Sir James M. Barrie romance. Conrad Nagel plays the leading male role. "East Side, West Side" will be the picture Thursday, Friday and Saturday. The cast includes George O'Brien, J. Farrell MacDonald and Virginia Valli. Three vaudeville acts will be on both bills. Amateur week will be observed in the Kenyon, beginning April 2, during which time local talent will vie for honors.

## Beery Film in Grand, Liberty

"WIFE SAVERS," the newest comedy co-featuring Wallace Beery and Raymond Hatton, will open Monday in the Grand and Liberty. Starting off in a Brooklyn restaurant, with Beery as head waiter and Hatton as one of his underlings, the situations lead to the Swiss Alps where the two are members of the A. E. F. Hatton, a pert second lieutenant, is now the boss, and Beery is nothing but a company baker. The ways that Hatton conceives to humiliate his erstwhile boss are the basis for many of the sequences. Ford Sterling, Zasu Pitts and Tom Kennedy also are in the cast. A brief comedy, "Topics of the Day" and news pictures are on the bills in both theaters.

## Monte Blue on State Screen

"ACROSS THE ATLANTIC," a Monte Blue starring vehicle, will be shown in the State this week. Blue appears as the younger son of a rich manufacturer, who runs off to war and loses his memory when his fighting plane is shot down. His identity is restored in an episode, which is climaxed by a long flight across the ocean to France in a stolen plane. Edna Murphy, Robert Ober and Burr McIntosh are in the cast. A comedy and news pictures will be offered.

## Olympic Has Sailor Hero

"SHARP SHOOTERS," a picture of love and adventure in various world sea ports and featuring George O'Brien and Lois Moran, comes to the Olympic screen Monday. Miss Moran plays the role of a little dancer in a dive in Morocco. To this resort come George, Tom and Jerry, American sailors. George, impersonated by George O'Brien, is attracted to the girl and wins her love. But when sailing time comes, he waves goodby. How she follows him and makes him realize her great love leads to the climax. The Vitaphone program will feature Frank Richardson in song hits, Sarah Padden in a dramatic playlet, and Harry Wayman's Debutantes, a feminine jazz band.

# Patricia Pitt Says:

## "Post-Easter Plans Only Bright Spot In Society's Realm"

MAKING bricks without straw is mere child's play in comparison with the task of discovering the activities of our somnolent society in Pittsburgh these days. We can take vicarious trips to Palm Beach or Europe, occasionally tell of an interesting engagement or two, or discuss the plans of our post-Easter brides—but that's about all.

I have heard about a most unique party which one of our local society matrons, Mrs. Henry R. Rea, attended down in Palm Beach on Thursday. The hosts were the E. T. Stotesburys, of Philadelphia, and they gave a water sport luncheon at one of the swimming clubs for Mrs. Stotesbury's daughter, Mrs. Douglas MacArthur, who arrived there this week. It seems that a buffet luncheon was arranged around the pool and while the guests nibbled on the delicacies, they watched a contest of water sports held by other guests. There was a balloon relay swimming race between teams captained by Paul Pryibil and Howard Brokaw, which was won by the former, and in a comedy race for men, the contestants were handed bundles of clothes which they donned and raced thus attired. A relay race by women, carrying oranges in their mouths, was won by Hope Richardson, and, more or less safely aboard a mattress, Frazier Jelke and Miss Richardson paddled their way to victory in the next event. Mrs. William J. Hyde, Frances Gillmore and Eleanor Chase were the winners in a pajama parade.

### Shady Side Plays

THE grounds of the Shady Side Senior School, out on the Fox Chapel road, are soon to be landscaped, I understand, and on Thursday night there is to be a performance of two plays at the junior school in Ellsworth avenue to raise money for this purpose. Mrs. Charles F. C. Arensberg is not only the chairman for the benefit but she is directing one of the plays, "Leroux and Ledoux," and also will be in the cast. The others who will take part in this play are George Hamilton, Henry Fisher and Mr. Arensberg. "Outclassed" is the name of the other play, and it will be given by four members of the Gargoyle Club of the academy, directed by Ray E. Hurd. In the cast are William Miller, Alexander Hill, Edward Davison and George Acheson.

Mr. Hurd, too, is to give a reading, accompanied by Carl Schluederberg, and Ferguson Webster will give piano numbers.

Mrs. Arensberg is being assisted in planning the affair by Mrs. James C. Rea and Mrs. Clinton Bradley.

### Gargoyle Club

THE Gargoyle Club is going to present its play on Friday night, too, when, with girls of the Ellis School, they will give a benefit program in the gymnasium of the Ellis School. Besides the play, there will be living pictures, a humorous monologue and three dancing specialties given by the girls. After the program, I understand there is to be general dancing.

Several society women have interested themselves in this benefit, among them being Mrs. Hobart Bentley Ayers, Mrs. R. M. Chester, Mrs. Henry E. Cole, Mrs. John Z. Collier, Mrs. Oliver K. Eaton, Miss Sara P. Ellis, Miss Marie Elder Craighead, Mrs. C. E. Loft, Mrs. Samuel A. McClung, Mrs. George [illegible] Mohler, Mrs. H. Edwin Pol-

MISS KATHRYN KEALLY, daughter of Mr. and Mrs. Harry Keally, of Wallingford street, has left for Montreal, Canada, where she will be for the next three months. Photo by Bachrach.

MISS MARGARET HAMILTON is the second daughter of Mr. and Mrs. Charles Lee Hamilton, who make their home in Beaver avenue, Sewickley. Photo by Parry.

### Woods Wedding Date

A DATE in mid-April has been chosen by Mary McCann Woods, daughter of Mr. and Mrs. Thomas Woods, of Sewickley, for her marriage to Edward Alexander Proctor, of Detroit, son of the James M. Proctors, of Washington, D. C., it was announced during the week. April 18 is the date selected for the wedding, which will terminate an engagement announced in November.

### Engagement Announced

MARION BEESON'S engagement to Alexander Verner Wasson was one of the interesting bits of news announced during the week—yesterday, to be exact. Marion, you know, is the daughter of Charles Edmund Beeson, of Morewood avenue, and her fiance is a son of Judge Henry Grant Wasson, of Devonshire street.

### Will Wed In April

ANOTHER April date announced during the week was Saturday, April 21, which has been taken for the wedding of Sara Eleanor Thorp, daughter of the Charles Monroe Thorps, of Maple avenue, Edgewood, and William Forker Whitla, son of Mr. and Mrs. James P. Whitla, of Sharon. The ceremony, I hear, is to take place in the Community Presbyterian Church of Edgewood.

### Miss Lewis' Betrothal

THE William H. Lewises, of Devon road announce the betrothal of their daughter, Eleanor Vail Lewis, to Dr. George Fance Foster, of the Pittsburgh Athletic Club, during the past week. Dr. Foster is a son of the William

## Climbers Repulsed In Effort to "Crash" Exclusive Circles

By CHOLLY KNICKERBOCKER
(Registered U. S. Patent Office)

NEW YORK, Saturday, March 17.

MODERN society and the Lenten season!

In other days, when Manhattan society was a smaller, more restricted group of pedigreed souls, it was considered nothing short of social suicide to arrange and preside over gay, festive parties during the Lenten season.

"The Age of Innocence-ites" frowned heavily upon the intrepid New York hostess who issued cards for a formal dinner or a ball during the penitential period and woe betide those who failed to don the proverbial sack cloth and ashes.

Today Gotham society celebrates the advent of Ash Wednesday and then promptly and conveniently forgets it is Lent. No longer is the social calendar for forty days and forty nights devoid of entertainments; no longer do the renowned social "lights" of the Metropolitan's golden horseshoe cover the glittering diamonds in their tiaras with stove blackening, to dim the rays of the sparklers; no longer do hostesses force their less opulent friends to go dinner-less by canceling all large prandial events between Ash Wednesday and Easter.

### Times Have Changed

New York's Mayfair has grown to such amazing proportions and there are so many cliques anxious to squander ducats on entertainments, the season in town cannot possibly end with the beginning of Lent, without the distressing spectacle of a galaxy of hostesses "all dressed up with no one to entertain."

To ease their consciences—and let there be no doubt in anyone's mind about New York's hontons possessing consciences—the social "merry-go-rounders" purchase boxes and blocks of tickets for the numerous subscription balls given in the name of "sweet charity" during Lent.

Yea, verily, the days when the Lenten season called for, nay demanded, the smart set's closing up shop and going into retirement are no more.

Modern society's Lenten slogan seems to be "buy tickets and on with the dance!"

There are, to be sure, the Lenten sewing classes, arranged by kindly ladies who give over certain mornings each week during Lent to wielding a needle for the poor and needy.

And what a hub-bub there is each year over these Lenten sewing classes.

### "Climbers" Are Barred

If you are not in society and are possessed of the thought that anyone so disposed can bring her sewing basket and join the classes in question, banish the thought immediately. Without azure blood flowing in your veins, 't is well nigh impossible to attain the more illustrious of the Lenten sewing classes, and the annual struggle on the part of the feminine candidates for social honors to "crash" the exclusive classes is something akin to a rush on a bargain counter.

Many reputations are ruined and cardiac organs broken in the fight to drop a few stitches in the distinguished homes of the elect, and I know of one "climber" who has tried in vain for eight years to gain membership in one of the super-exclusive classes.

Then Lenten sewing classes, of course, do no end of good.

But they certainly stir up much social strife in the "climber" ranks.

## Comment On Local Society

Continued from Page 1, This Part.

M. Fosters, of Toronto, Canada. There will be a June wedding, I understand.

### Will Wed Eastern Man

AN engagement of a local girl to an eastern man was made known during the week when the Forest R. Eyers, of Shady avenue, announced that their daughter, Lelia Jane, is to marry Bradford Preston Young, son of Mrs. Rebecca C. Young, of Taunton, Mass. Miss Eyer is a graduate of the Ellis School and of Fayre College, Lexington, Kentucky, and her fiance was graduated from the Massachusetts Institute of Technology in 1926.

### P. C. W. Tea

TOMORROW afternoon there is going to be a tea given in the drawing room of the Pennsylvania College for Women by graduates of Dilworth Hall. After the business meeting a musical program will be given by Mrs. C. Frederick Newman and Miss Mildred Eiler, both of whom are alumnae. Mrs. Thomas Pringle, of Reynolds street, is in charge of the affair.

### Washington Wedding

A LARGE wedding which will unite two members of well-known Pennsylvania families is to be held on April 4 when Esther Mary Baird, daughter of the William A. Bairds, of LeMlyne avenue, Washington, Pa., will marry Charles Henry Heppenstall, of Philadelphia. The ceremony is to be performed in the First Presbyterian Church of Washington.

### Girls' Club Bazar

DOWN in Sewickley, plans are under way for a cabaret and bazar which is to be held on Saturday evening, April 21, by the Girls' Club of St. Stephen's Episcopal Church in the recreation room of the parish house. There will be an orchestra for dancing, and the girls of the club will entertain their guests with singing and dancing. Supper is to be served, of course.

Mrs. James Barlow Cullum, Jr., is president of the club and is acting as chairman for the entertainment. Elizabeth Hays is in charge of the publicity and the sale of tickets, and the decoration and music are being arranged by Mrs. Helen Sleerman Williams. The bazar will be conducted by Mrs. Raymond Ganner and Mrs. Oscar Rosenfeldt, while the refreshments will be in charge of Mrs. Gertrude Wirsing.

## Miss Harris Weds Brooklyn Man

MR. AND MRS. EMANUEL G. HARRIS, of Wellesley avenue, announce the marriage of their daughter, Miss Selma Harris, and Louis Fried, of Brooklyn, N. Y., which was solemnized last Sunday by the Rev. Dr. Samuel H. Goldenson. Mr. and Mrs. Fried have left for Palm Beach and Havana, and after April 15 will be at home in New York.

## Washington Alumni Will Hold Bridge

THE Pittsburgh branch of the Washington Seminary Alumnae Association will hold a benefit bridge party Saturday, April 14, in the Pittsburgh Athletic Association clubhouse. Mrs. Wilson Ferguson, president, has appointed Mrs. Edgar McKean as chairman.

## Legion Auxiliary Plans Card Party

ALLEGHENY COUNTY COUNCIL, AMERICAN LEGION AUXILIARY will hold a card party Wednesday afternoon in Oppenheim-Collins' auditorium. Mrs. A. Farley is general chairman, assisted by Mrs. Gladys Jennings.

## Was Recent Bride

*MRS. EUGENE MONTGOMERY MEYER will be remembered as Miss Martha Hoge, daughter of Mr. and Mrs. George Ira Hoge, of Crafton, before her recent marriage.*

## Miss Pearson Weds At Beaver Falls

ANNOUNCEMENT has been made of the marriage of Miss Maude Idalia Pearson, of Beaver, and Alexander James Grant, of New Brunswick, Canada, and Newark, N. J., which was solemnized March 9 in the home of the bride's garndmother Mrs. Elizabeth Pearson, of Beaver Falls, by the Rev. Dr. Floyd W. Barr. After April 1 Mr. and Mrs. Grant will be at home in South Center street, Orange, N. J. The bride is a graduate of the Pittsburgh Musical Institute and Mr. Grant was graduated from McGill University.

## Woman's Club Will Meet at Luncheon

MRS. JOSEPH B. DRAKE, president of the Woman's Club of the City of Pittsburgh, will be chairman for the regular club meeting Tuesday afternoon which will take the form of a luncheon and reception for past presidents. The program will be featured by vocal solos by Mrs. Vida McCullough McClure and readings by Mrs. J. Charles Wilson. Mrs. George D. Herwig is accompanist. Hostesses are Mrs. John P. Teets and Mrs. W. L. Sheppard.

## Marriage Discussed By Club

"MARRIAGE and Its Meaning and Responsibilities," as discussed by Mrs. Max Wierry, made a topic of interest for Prytaneum Study Club members at their meeting Monday in the home of Mrs. George Lloyd, Eleventh avenue, Munhall. Mrs. J. E. Campbell spoke on "The Court of Shattered Dreams." Mrs. W. S. Stevens on the popularity of Wellsburg, W. Va., where 500,000 marriage ceremonies were performed last year. Mrs. J. W. Snodgrass gave extracts from the marriage laws of Pennsylvania and Mrs. J. M. Norris read a humorous poem appropriate to the subject. As special guests there were Mrs. Edward A. Kratz and Mrs. W. C. McClure, both of Homestead. Mrs. Port Eckles, Prytaneum president, will be hostess for the next meeting on March 27.

## Eastern Stars to Hold Novelty Dance

THE annual card party and novelty dance of South Hills Chapter No. 302, O. E. S., will be held Friday night in the Pentalpha Club, Arlington avenue. There will be a moonlight dance, a rose dance and a snowball dance. Mrs. Amanda Trott is chairman, assisted by Mrs. Elizabeth Wagner, Mrs. Henrietta Franks, Mrs. Louisa Garnham and Mrs. Anna Keil.

## Scull Chapter to Convene Tuesday

ON Tuesday afternoon the Sarah Amelia Scull Chapter of Mt. Vernon Seminary will meet with Miss Harriet Patterson, of Beechwood boulevard.

CATERING

## East End Club Has Luncheon

MRS. EDWARD M'CARTNEY was hostess in her home on Broad street for the East Liberty Woman's Club luncheon which the home economics committee served last Monday. In a talk by the Rev. Dr. Albert Edward Day, which followed luncheon, it was stressed that no nation can be destroyed while it possesses a good home life and that America can be safe only by home training in character and discipline. The speaker emphasized the value of co-operation between parents and children and the need of intelligence, clear thinking and Christianity. Mrs. A. F. Earnest, chairman of the American home department, was assisted by the home economics committee.

## Purity O. E. S. to Hold Card Party

PURITY CHAPTER No. 411, O. E. S., will give a card party Wednesday night in the Moose Temple. Mrs. Sarah D. Cooper is chairman.

Joyous sparkle . . . rare, dry flavor . . . "Canada Dry," *the drink of connoisseurs*

"CANADA DRY" is served at the embassies in Washington. It is served at the Savoy in London . . . at St. Moritz . . . in tens of thousands of homes in the United States. There must be some reason for this universal appeal.

"Canada Dry" is made from pure Jamaica ginger and other absolutely pure ingredients! It contains no capsicum (red pepper) to give it a bite and tang. It is blended with a care and skill which come from generations of makers.

This is really the reason for the distinction of "Canada Dry." The result? A really fine ginger ale which you can distinguish from all others—inferior imitations too—as you distinguish a rare old wine. No wonder it is drunk wherever distinguished people gather! No wonder you w ant to serve it to lend that final note of elegance to your dinners!

"CANADA DRY"

AN ADDRESS of DISTINCTION

An Apartment
You Will Want to See TODAY

THESE apartments, now nearing completion, are the latest expression of the older and more leisurely way of living. The arrangement of the suites, with their spacious rooms, combine the conveniences of the modern-day apartment with the intimacy of the private dwelling.

*The Rental Executive Will Show You the Model Suites Today*
*(Completely Decorated and Furnished)*

The building is practically under lease now. However, a few choice suites of 6 and 7 rooms with 2 and 3 baths are still available. Those who are contemplating having their home in Morewood Gardens are advised against delay. The rental executive, on the premises, will be at your service, *today*.

# STATE FEDERATION HEAD TO ATTEND MEETING HERE

## AMONG THE CLUB WOMEN ACTIVE IN THIS WEEK'S AFFAIRS

MRS. A. K. McMillan is president of the Young Women's Club, which will have its monthly gathering Tuesday of this week. Photo by Parry.

MRS. ALBERT P. RIGHTOR is president of the Wilson College Club, which will have its annual Easter luncheon on Saturday. Photo by Trinity Court

MRS. JOHN A. FRICK, president of the State Federation, will be honor guest at the district meeting here on Thursday.

THE Dickens Fellowship study class, under the direction of Mrs. D. G. Fowler, will have its meeting tomorrow night.

MRS. WALTER S. CHURCH is active in arrangements for the Wellesley Club's benefit at the Alvin tomorrow night. Photo by Trinity Court

## *Mrs. John A. Frick Is Coming Here for District Sessions*

By MRS. CHARLES M. BREGG

MRS. JOHN A. FRICK, of Allentown, who was elected president of the State Federation of Pennsylvania Women at the annual convention here last October, will pay her first return visit to the city Thursday, when she will be honor guest and one of the speakers at the southwestern district's annual meeting. The sessions, which will open at 10 o'clock in the William Penn Hotel, will be presided over by Mrs. J. E. McKirdy, southwestern district vice president. Mrs. Frick will make the opening prayer following assembly singing of the Rohrer "Pennsylvania."

The short business session which will follow will include reports from Mrs. Ralph W. Johnston, state chairman of international relations; Miss Gertrude Mc. Kinney, of Butler, state chairman of law enforcement; Mrs. John M. Phillips, chairman of the state American home department; Mrs. Irwin L. Gillespie, district chairman of juniors; Mrs. Maude Thresher, of Jeannette, district chairman of legislation, and Mrs. S. M. Byers, of Washington, district chairman of public instruction. The remainder of the morning will be devoted to a talk on club institutes by Mrs. Alfred A. Crooks, of Norwood, state chairman of club institutes, who will supplement her address with a forum on the same subject.

Luncheon is to be served at 12 o'clock on the seventeenth floor of the hotel. Mrs. Frick's address will, of course, be the high light of the afternoon and a musical program of excellence is being arranged, in addition. Miss Florence M. Dibert, of Johnstown, second vice president of the General Federation of Women's Clubs, has been invited to be present and, in the event of her acceptance, she, too, will speak, her talk concerning the national club movements. The program events will be concluded by a reception in Mrs. Frick's honor.

## *'Y' Dinner Speaker Selected*

MISS THYRSA W. AMOS, dean of women at the University of Pittsburgh, and Miss Mary W. Green, dean of women at Carnegie Institute of Technology, will be speakers at the annual intercollegiate Young Women's Christian Association membership banquet at the Congress of Clubs on Tuesday.

The committee arranging the banquet includes Doris Shoop, president of the Pitt Y. W. C. A.; Marjorie Snodgrass, president at Tech, and Virginia Rae, president at Pennsylvania College for Women.

## To Give Bridge For Alliance

AN event of interest to Outlook Alliance members will be the benefit bridge party which Mrs. E. B. Heyser will give tomorrow afternoon at her home in Amber street for the club's philanthropic work. Members of the hospitality committee will assist.

## Worthy Matron Is Guest at Dinner

OFFICERS of Fort Pitt Chapter No. 130, O. E. S., and friends of the worthy matron, Mrs. Nina M. Rubert, were guests at a dinner and reception given Wednesday night in the Fort Pitt Hotel. Covers were laid for 60 and cards followed the dinner.

## Dance to Be Held By C. D. A. Court

COURT LAMBING No. 772, Catholic Daughers of America, will hold its annual dance and card party April 20 in the Knights of Columbus ballroom, Fifth and Bellefield avenues. Miss Elizabeth McBride is general chairman.

## Wednesday Club To Meet in Home

THE Wednesday Afternoon Club of Carnegie Institute of Technology will meet this week in the home of Mrs. O. T. Geckeler, Bausman street. Assistant hostesses will be Mrs. J. B. Rosenbach, Mrs. B. P. Hoover and Mrs. F. J. Evans.

Hamilton Beach *Vacuum Cleaner*
WITH MOTOR-DRIVEN BRUSH — BALL BEARING MOTOR

**At a Price You Can Afford**

You can now have what you've long wanted—the finest of Motor-Driven Brush cleaners.

This is the greatest Hamilton Beach ever built. Its Triple Action combines Powerful Suction, Beating Brush Action and Sweeping Brush Action. It gets surface dirt, lint, etc. and all *deeply embedded dirt*—the principal cause of rug wear.

And remember, it costs no more than most machines than only *clean* by suction *alone.*

Expect great things of this quality machine. Compare it with any regardless of price for speed, *thorough* cleaning, ease of handling and Long Life. You won't be disappointed.

**TWO-YEAR GUARANTEE**
**Built to Last a Lifetime**

Because only the highest quality of materials are used and the finest workmanship employed, the entire machine (including belt, bag and brush) is guaranteed for *Two Years.* Its Ball Bearing Motor *Never* needs oiling.

**REDUCED SELLING COSTS**
**Make Low Price Possible**

Ask the Hamilton Beach Dealer to tell you how increased production and a Selling Plan that eliminates wasteful selling methods make possible this low price. If you don't know the dealer nearest you, write us for his name and complete details.

**HAMILTON BEACH MFG. CO., Racine, Wis.**
Subsidiary of Scovill Mfg. Co.—assets over $33,000,000 and a record of 125 years of successful manufacturing

***To Regain a Healthy Girlish Complexion***

If you would have a clear, fresh, girlish complexion, use ordinary mercolized wax as it produces natural skin beauty. The wax, procurable at any drug store, completely absorbs a sickly, aged, rough, coarse or blotched skin, revealing the healthy young skin underneath. Its work is done so gradually, day by day, that no inconvenience is caused. Mercolized wax brings out the hidden beauty. To quickly remove wrinkles and other age lines, use as face lotion 1 ounce powdered saxolite and

## NOTABLES COME BACK TO U. S. ON ILE DE FRANCE

**Plane Catapult Added to Ship's Equipment; First Voyage Since Lay-Up for Repairs.**

The Ile de France, of the French Line, arrived in New York last week, making the trip from Havre in less than six days on her first voyage since the lay-up in Havre for repairs to turbines.

A number of minor changes were made while the boat was out of service. A terrace cafe was installed on the sun deck aft, and the smoking room was enlarged. A catapult for launching airplanes at sea was built into the after deck.

Among those returning on the Ile de France last week were Ray Long, editor-in-chief of the Hearst publications; O. O. McIntyre, columnist; Carlos Noel, ambassador to the Argentine Republic; Akio Kasama, Japanese delegate to the League of Nations, and Guy Arnoux, French painter.

The France sailed last week from New York for the third Mediterranean-Moroccan cruise with all first-class accommodations filled. Mrs. Oscar S. Straus, widow of the former United States ambassador to Turkey, was among the passengers.

Pierre de Malglaive, resident director of the French Line in New York, recently denied rumors that the steamer Paris might soon be converted from a first-class express liner to a cabin class ship. The Paris is one of the newest trans-Atlantic liners.

The French Line has given an order, however, for a new cabin class liner to be larger and faster than the DeGrasse. The new ship will be built by the Penhoet shipyards at St. Nazaire, which constructed the Ile de France and other French liners, and will be ready for service in 1930.

## HUNGARIANS TO VISIT HERE

The largest group of Hungarians ever to visit the United States on an official mission arrived in New York last week on the White Star liner Olympic to take part in the unveiling of the Kossuth monument. More than 200 of this party will visit Pittsburgh Wednesday.

The Kossuth monument, a nine-foot bronze figure of the leader of the Hungarian revolution of 1851, is the work of John Horvay, one of the foremost Hungarian sculptors. It was designed as an expression of gratitude to the people of the United States for aid rendered to Kossuth. Earth from every province in Hungary will be placed at the foot of the monument in New York.

Those who make the additional excursion to Pittsburgh will be guests of honor at banquets arranged by the local Hungarian societies in the Central Athletic Association Hall, 208 South Craig street, and at the William Penn Hotel.

## Moraine Lake Fed From Glaciers

IN ALBERTA— Fed from the melting snows on 10 encircling peaks, Moraine Lake in the Canadian Rockies of Alberta, Canada, reflects the mountains in its clear blue waters. The lake is reached by motor from Lake Louise and is visited by many lovers of the outdoors who travel on the Canadian Pacific.

## DIAMOND BANK TRAVEL LIST

These passenger bookings are reported by Charles G. Andrews, manager of the travel department of the Diamond National Bank:

Minnekahda, London to New York, Lilian Allman; Bermuda, Bermuda to New York, Mr. and Mrs. William E. Cox; Reliance, West Indies cruise, Mr. and Mrs. Walter H. Ecker, Mrs. Sarah W. Birmingham, Mrs. Renwick McWilliam, Lewis Z. Birmingham, Mr. and Mrs. George Franklin, Edward R. Schaefler; George Washington, New York to Plymouth, Paul Carraux; Majestic, New York to Cherbourg, Mr. and Mrs. L. G. Fleming; Coamo, San Juan to New York, Mr. and Mrs. H. Goldbloom; Duilio, New York to Naples, Mr. and Mrs. James C. Simpson; City of Honolulu, Honolulu to Los Angeles, Mr. and Mrs. Howard J. Griffiths.

### N. German Lloyd Liner to Use Plane

North German Lloyd liners are now using Pier No. 2 at Christopher street, New York. This is with the exception of the steamer Columbus, which will use Pier No. 68 at West Forty-fifth street. The Columbus has been equipped with a Junkers seaplane which will be used in speeding mails and in taxi service from ship to shore on cruises.

### 6,000 Ships Move America's Freight

Approximately 6,000 ships of 32 countries participate in moving passengers and freight of the United States.

## MELLON BANK SHIP BOOKINGS

These steamship bookings have been reported by William A. Fitzpatrick, manager of the travel department of the Mellon National Bank.

Southern Cross, Rio de Janeiro to New York, Mrs. A. S. Hunter, Laetitia Hunter; Veendam, West Indies cruise, Mrs. James E. Brown, Mrs. E. D. Wilmore; Bermuda, Bermuda to New York, James McIntosh, Bennett M. Livezey, Mr. and Mrs. J. Merrill Wright; Bermuda, New York to Bermuda, Mr. and Mrs. F. B. Snowdon; Olympic, New York to Cherbourg, George L. McCook; Aquitania, Southampton to New York, Mr. and Mrs. Bennett Oliver, Mr. and Mrs. R. S. Richards; Manchuria, San Francisco to New York, Mr. and Mrs. William T. McCullough, Miss B. Elizabeth McCullough; Columbia, New York to Puerto Colombia, P. S. Barry, H. S. Barry; Dixie, New York to Los Angeles, via New Orleans, J. W. Arrott, Sr.; Ile de France, New York to Paris, Mr. and Mrs. Pitt McCoy Nutty.

## LUTHERANS TO TOUR EUROPE

The Lutheran Lakeside Chautauqua Committee announces that many Pittsburghers are planning to take the Lutheran tour to Europe arranged by that organization. The Lutheran group will start from Cleveland on July 9 and will proceed to Montreal, where they will board the steamship Albertic, which is scheduled to arrive at Southampton on July 17.

Sightseeing tours will be made through England, France, Holland, Germany and Switzerland. Special stops will be made at Eisenach and Worms, Germany. The party will arrive home August 15. Management of this tour has been placed in the hands of Paul R. Kuhlman, of Loudonville, O.

## New Home Planned By Club

THE meeting of the Beechview Civic Club, held Tuesday evening, was one of the most interesting of the season. The speaker was Dr. Luba Robin Goldsmith, who talked on "Better Health" and what the club might do in the way of community work. Miss Dorothy Schroder furnished the music.

The club elected a house committee to consider the question of building a new home on its lot or of purchasing a house in the community suitable for club purposes, this committee to report at the April meeting.

The music section will meet at the home of Mrs. Ross Altwater Tuesday evening and the literary section will meet at the home of Mrs. B. S. Redderer Monday evening. The April meeting will be the annual session which the club holds at the Beechwood school when the program will be furnished by the pupils.

### Bookfellows Head Active in Miami

MRS. MARIE FELLO PHILLIPS, of Pittsburgh, national president of the Bookfellows' Library Guild, who is visiting in Miami, has been taking part in literary programs of the Miami League of American Pen Women. Mrs. Phillips was a speaker at a recent luncheon given by the organization in honor of the national president, Mrs. Grace Thompson Seton, and on this occasion Mrs. Phillips' novel was reviewed by Mrs. Vivian Larramore. The writers' group of the Pittsburgh Bookfellows met Monday night in Carnegie Library for the discussion of dialogue in fiction, the members contributing original examples for criticism.

### Women to Meet For Child Welfare

THE regular meeting of the South Hills Woman's Club was held in the Bane school on Monday evening, with Mrs. Mayme James presiding. The next social affair, on March 26, will be known as "child welfare night." Mrs. Alice Kohler is in charge of the program and Mrs. Lillian McGibbney is hostess chairman.

### Wilkinsburg Club To Hold Card Party

THE Wilkinsburg Civic Club is giving a benefit card party next Friday afternoon and evening in the V. F. W. home, Ross avenue. Under Mrs. C. R. Reed's chairmanship, the committee includes Mrs. Howard Gullan, Mrs. John Dean, Mrs. George W. Fisher, Mrs. Edwin H. Pitzer, Mrs. H. C. Schuler and Mrs. F. G. Hickling.

### Fortnightly Club Will Meet Thursday

THE Elizabeth Fortnightly Club will have its regular meeting on Thursday with Mrs. David Kerr as hostess. "Items of General Interest" will be discussed by various members, this constituting the entire program. The club will conduct a sale for the blind next Saturday.

### Sharpsville Girl to Wed Bellevue Youth

MR. AND MRS. GEORGE R. DICKSON, of Sharpsville, Pa., have announced the engagement of their daughter, Miss Aimee Louise Dickson, to Earl Wayne McKissock, son of Mr. and Mrs. John McKissock, Jr., of Bellevue. An early summer wedding is planned.

## Liner's Visit First At Island in Year

One hundred and forty-nine lonely Britishers, self-appointed to a marooned existence on the isolated island of Tristan da Cunha, are celebrating the visit of the Canadian Pacific liner Empress of France, which recently visited this colony and outpost of the British Empire en route from Buenos Aires to Cape Town. In a cable message from Cape Town, the Empress of France reported that she had made a successful call at the island, and that this was the first ship that had visited the lonely spot for a year, since the call of a former cruising liner, it was also stated that the passengers considered this one of the most romantic and interesting aspects of the whole cruise to date. The Canadian Pacific liner is conducting the company's first cruise to South America and Africa, having left New York on January 24.

Some 100 hardy inhabitants were received aboard the Empress, many of whom had never been on board a steamship. Good fortune favored the transfer of several tons of gifts, which were loaded on rafts, as the sea remained calm and almost rippleless. Three and a half tons of gifts were sent by Her Majesty Queen Mary.

After an eight-hour stop, the Empress of France departed with a year's accumulation of mail from the island and letters from the Rev. A. C. Pooley, British missionary on Tristan to E. W. Beatty, President of the Canadian Pacific Railway Company, expressing his gratitude and that of the islanders for the generous efforts of their organization in helping to convey gifts and news of the world to Tristan da Cunha.

## 3 NEW NIPPON SHIPS NAMED

The three new motor-driven trans-Pacific liners which are now being built for Nippon Yusen Kaisha have been named after Japanese shrines, following the usual N. Y. K. custom. The two being constructed at Nagasaki for launching early spring in 1929 will be called the "Asama Maru" and the "Tatsuta Maru," while the one being built at Yokohama for service in 1930 will be called the "Chichibu Maru." The latter named after the H. I. H. Prince Chichibu.

These three vessels, when completed, will be unsurpassed for luxurious travel from San Francisco to Japan and China. The Diesel oil burning engines will add to the cleanliness aboard ship, reduce vibration and materially shorten the length of passage. These ships will be of 23,000 tons, 25,000 h. p., 19 knots speed and will make the run from the Pacific coast to Japan in 15 days.

### Seaboard Trains 95.7% "On Time"

The Seaboard Airline average of on-time trains in February over the entire system was 95.7 per cent, according to J. M. Stuart, Pittsburgh agent. The best records were made by the Florida divisions.

## FIRST NATIONAL SHIP BOOKINGS

J. Paul Ford, assistant manager of the steamship department of the First National Bank, reports these bookings:

Karlsruhe, New York to Bremen, Mrs. Maria Weissman; Bermuda, Bermuda to New York, Mr. and Mrs. John Barclay, Jr.; Yarmouth, West Indies cruise from Miami, Mr. and Mrs. Sherman Smith; Lara, New York to Maracaibo, O. M. Stephens; Baltic, New York to Liverpool, Miss Lily Brown; Caronia, New York to Liverpool, John Betten; New Amsterdam, New York to Rotterdam, Miss Emilie Renziehausen, Mrs. Millie Sprunger; Olympic, New York to Cherbourg, Mr. and Mrs. Luke Budoever; Veendam, West Indies cruise, Mr. and Mrs. A. G. Hamilton; Ile de France, New York to Plymouth, Mrs. Simon Patterson, Mrs. Donald Rodgers; Munargo, New York to Nassau, Mrs. F. T. McClintock, Mrs. Nina McClintock, B. U. McClintock.

### Heinrich Will Sail For London in July

Carl Heinrich, of Pittsburgh, will sail on the Cameronia early in July for London to attend the International convention of Dancing Masters of the World.

### Pgh. Passenger Club To Install Officers

The Pittsburgh Passenger Club will install officers for the year following a dinner March 24 at the Chatham Hotel. The new officers are: President, John H. Carter; vice president, Samuel H. McLean; treasurer, S. W. Sankey; secretary, L. A. Charlier. New members of the executive committee are J. J. Doyle, R. C. DeHaven and T. E. Smith.

# Dormont Club Sees Pageant

DORMONT NEW CENTURY CLUB enjoyed an unusually fine program on Friday afternoon, when Mrs. Edward O. Tabor presented a "Pageant in Picture, Song and Story," of the noble women in history and literature. Mrs. A. B. Wells, of the program committee, introduced the speaker, and Mrs. R. S. Thorpe was chairman of hostesses.

The club's musical department will meet tomorrow afternoon at the home of Mrs. Harry D. Schmid Hillsdale avenue. Joint hostesses will be Mrs. H. W. Lowe and Mrs. Norman Davy. Following the current musical news discussion by Mrs. B. B. Byers, Mrs. John Snyder will read a paper about modern music by foreign-born Americans. Mrs. Harold G. Ewens will direct the choral rehearsal period.

On Tuesday afternoon the home economics department will meet with Mrs. M. W. White, Mississippi avenue, Mrs. J. D. Renshaw being the joint hostess. Miss Helen B. Stevens, of the Public Health Nursing Association of Pittsburgh, will speak.

In the Junior Auxiliary, which will meet Tuesday night at the home of Mrs. H. G. Shrewsbury, Kelton avenue, Mrs. C. K. Smith and Miss Oneta Tressler will discuss domestic and foreign current events, and Miss Esther M. Hawes, metropolitan general secretary of the Pittsburgh Y. W. C. A., will discuss work for and with young people.

## Historical Society Holds Meeting

AT the meeting of the Woman's Historical Society of Pennsylvania Monday in the Congress of Clubs the business session was presided over by Mrs. Philip Kussart, president, Mrs. I. N. Baker, chairman for the day, taking charge of the exercises. Papers were read as follows: By Mrs. W. J. Dorning on "The Underground Railroad in Pennsylvania During the Civil War;" Mrs. James McGaw, a paper prepared by Miss Elizabeth Hamilton, now absent from the city, on "Camp Life During the Civil War;" and Mrs. J. Howard Greig, on the "Battle of Gettysburg." A musical program was presented by Mrs. William Munn, soprano, accompanied by Mrs. Charles Zapf, who also played several piano numbers, and Mrs. Harold Elder Frederick furnished readings. At the next meeting of the society, March 27, there will be the annual election of officers.

## Dormont Mothers to Sponsor Film Show

THE child study department of the Dormont Mothers' Club is sponsoring a motion picture benefit in the Dormont Theater for the scholarship fund Thursday and Friday of this week. The department met Tuesday evening in the home of Mrs. J. L. Johnson, of Texas avenue, and heard an interesting talk by Prof. W. P. Allen on "Preparing for Myself." Other program features were a duet by Miss Helen Sutton and Miss Betty Angle and a solo by Dr. Catherine Bartley, accompanied by Mrs. C. G. Louis.

## Syria Ladies Club To Meet Saturday

THE March meeting of the Syria Ladies Social Club will be held in Syria Mosque on Saturday afternoon with Mrs. Albert W. Ebert, president, presiding. A musical program will be in charge of Mrs. Elsie Breese Mitchell. The next social affair of the club is planned for March 27.

## Cleven to Address Peace League Here

DR. N. ANDREW N. CLEVEN, who attended the Panama conference, will address the dinner meeting of the Women's International League for Peace on Saturday evening in the Congress of Clubs. The meeting at 7 o'clock is open to the public.

## Will Sing in Oakmont

*MRS. WILLIAM WILSON COLLEDGE, a member of the Woman's Club of Oakmont, is to be one of the soloists at the club's musicale on March 27.*

## Squirrel Hill Club Will Discuss Plays

THE Squirrel Hill Community Club will have an evening meeting next Friday in the Roosevelt School. As speaker there will be Elmer Kenyon, president of the Pittsburgh Drama League, who will discuss current plays.

## Mt. Lebanon Club Studies Erksine

THE literary department of the Mt. Lebanon Woman's Club met Friday at the home of Mrs. L. L. Hadley, Kenmont avenue, and reviewed "American Character and Other Essays" by John Erskine. The dramatic department will have a meeting Monday at the home of Mrs. J. J. O'Donnell, Ashland avenue, and will continue the reading of "The Return of Peter Grimm." Mrs. M. L. Gardner, of Orchard drive, will be hostess to the music department on Friday afternoon.

## Pioneers Daughters Will Give Play

MRS. WILLIAM J. ASKIN, Mrs. Jane Sprague and Mrs. Reed Anderson will assist the hostess when the Keystone Chapter, Daughters of American Pioneers, meets Thursday with Mrs. C. V. Van Winkle, of the Ruskin. A musical program in charge of Mrs. Frank Sumney will be given by Betty Y. Flaster, violinist, accompanied by Mrs. Gertrude Kerr Swartz. Mrs. Sumney will sing. Mrs. Frederick B. Chalfant, founder of the Better Magazines Council of Allegheny County, is the scheduled speaker. Her topic is "The Off-color Magazine." The program, which is in charge of Mrs. Robert M. Ewing, will also include current events by Mrs. S. H. Augustine.

## Dr. Day to Give Talk In 'Y. W.'

THE second of the Lenten supper talks on "Jesus Visits Pittsburgh" will be given by the Rev. Dr. Albert E. Day on "He Is Lost," at Central Branch Y. W. C. A., Tuesday at 8 o'clock. Miss Kathryn Kirk, president of the girls' council on education, will preside and Miss Hazel Bell Withrow will lead the singing. At 7 o'clock Miss Sara M. Soffel will lecture on current events and in the course on "The Undiscovered You," at 8:15 Miss Virginia Alexander will speak on "Why the Smart Gown?" Miss Alexander is an instructor in costume design at Margaret Morrison College and has recently returned from a six months' period of study in Paris. During the class hours on Tuesday, student work in paint craft will be on display in the lobby.

## Nickleby Talks To Be Continued

UNDER the direction of Mrs. D. G. Fowler, the study class of the Dickens Fellowship will continue the discussion of "Nicholas Nickleby" at the meeting tomorrow night in the Fort Pitt Hotel.

## Literary Club Tea Tomorrow

THE Pittsburgh Literary and Musical Club will have its spring musicale tomorrow afternoon in the Woman's City Club. The hour is 2:30, and the program is to be followed by the usual tea.

## Addresses Quotarians

*MISS IVY M. SLOAN was one of the speakers at Monday's meeting of the Pittsburgh Quota Club.*

SUNDAY, MARCH 18, 1928

# AUTO MAKERS SEE GREATEST PRODUCTION

## MANY PLANTS OPERATING AT CAPACITY

**Industry Absorbs Most All of Unemployed — Optimistic Detroit Attracts Jobless.**

By RAY PRIEST.

DETROIT, March 17.—The automobile industry is all optimism. The manufacturers of motor cars annually have been establishing new production marks, and now in 1928 they anticipate productions that stagger imaginations. And it is confidently predicted that the output will have reached 5,000,000 before December 31.

Detroit is reflecting this optimistic attitude of the automobile makers. Employment in this city today is only about 6,000 under the highest peak ever reached here. The largest employer, Henry Ford, is within 11,000 of his highest peak.

**SCHEDULES HIGHER**

Despite this condition and the every day increase reported by the Employers' Association and the Ford Motor Company, there are many men out of work here, due largely to those who have rushed in from the outside upon learning of the huge automobile production plans of this city.

Outside Detroit, reports from Oldsmobile, at Lansing, Mich.; Franklin, at Syracuse, N. Y.; Auburn, at Auburn, Ind., and the Chevrolet transmission plant and the Willys-Overland plants at Toledo indicate that those factories are producing at capacity.

Oldsmobile factory schedules call for 8,000 cars for domestic shipment in March. H. H. Franklin states that retail deliveries of his cars for the period October 1 to March 1, were 28 per cent greater than the corresponding months last year. At Auburn night crews have just been added in an effort to increase the production capacity of the plant.

**ORDERS EXCEED OUTPUT**

The Chevrolet transmission plant is building 150,000 sets of transmissions in March, it was reported.

The Willys-Overland Company is still behind on Whippet orders. The company reports a similar condition in Willys-Knight orders. Every effort is being made to complete the expansion plans, started in January, at the earliest possible date.

Ford's schedules are being increased slowly. Upon the return of Henry Ford from his brief rest in Florida, it was announced that fewer cars would be built for the next few months than was generally anticipated. The schedule planned for July is now understood to be for 2,000 cars daily, in the face of 10,000 daily that was expected during that month.

**OPENINGS DELAYED**

Assembly plants around the United States that were scheduled to be opened immediately, have been delayed from one week to five weeks.

Because of the extraordinary activity in the Fordson and Highland Park plants it is safe to predict that some time during August or September the Ford Motor Company branches will start with a sudden bang to produce almost 12,000 cars daily.

## A Few Simple Rules Make Car Easy to Keep Clean

**LITTLE EFFORT**— Helen Furin shows how easy it is to keep the upholstery clean in the Marmon 68 sedan, provided by the Marmon Company of Pittsburgh.

**LIGHT RUB**— A light rubbing is all that is necessary here to keep the bright trim in neat appearance, provided it is done often.

**QUICK WORK**— Instead of carrying the electric cleaner to the garage, the chauffeur removes and then uses a broom on the rugs.

**ECONOMY**— When washing the car, be sure to see that all mud is cleaned from the tires and from around spokes of wheels.

**OFTEN NEGLECTED**— It is just as important to keep dust off the car top as it is to keep it off the finish.

**PROFITABLE WORK**— Car washing bills can be kept at a minimum by simply dusting the car just before it is taken out of the garage.

## CAR CLEANING ADVICE FREES WOMEN FOLK

**Years of Drudgery Pass and Brighter Outlook Comes With Few Simple Rules.**

By SUE LYLE.

A playful March lamb, accompanied by early spring weather and heralding the automobile touring season, last week brought to attention that our famous housecleaning period is with us once again. Of course we don't have all the drudgery that our mothers experienced, thanks to electricity and modern time-saving devices, but we do have many more things to look after, not the least of which is the family automobile.

Keeping the family car clean is not a chore to be mulled over, and clean that car must be if we are to ride in it. And so here we are, with a task that cannot be entrusted to many men and a labor saver that threatens to absorb all the time and pleasure it gains for us.

**SLAVERY THREATENED**

Keep that car clean; a demand that threatened to enslave all womankind, was a problem that demanded solution. For a year I faced the problem, regularly protesting the dole I paid for car washing, and fighting the time and energy I spent in dragging the electric cleaner out to the garage to effect a brighter car interior.

After many, many weeks of such existence I consulted a friend's chauffeur, and what a relief it was to hear him tell me that washing was not the safest way to keep a car clean. Frequent washing, he said, will keep the car clean, but it also will remove the finish. And a car that has lost its finish is a very hard car to keep clean, he added.

**DUST IT CAREFULLY**

These few words of advice led to further questioning and brought this good rule: "Never take your car out of the garage without dusting it carefully." This, he explained, prevents the dust from accumulating layer upon layer, sticking to the paint and eventually penetrating the paint surface.

And then I learned that a wet car should never be left to dry in the garage or out in the sun, for the water is apt to eat its way under the paint surface and leave faded spots. When this does not happen, the water leaves the imprint of the drops and these become excellent dust catchers which only vigorous washing will remove.

**GLOSS EASILY RESTORED**

The quickest and most efficient way to dry a car on these occasions is with the use of a chamois. It absorbs the water quickly and seldom leaves any marks if it is clean. This takes only a few minutes of time and if the next day the car is dull looking, a light rubbing with a soft cloth will restore the gloss.

The troubles of cleaning the interior are not so easily overcome. This is particularly true of the family car and children will insist on getting shoes on the seats. The addition of an old electric cleaner to the garage equipment seems to be the most economical move here, or the advice of the salesman who has since sold me a leather upholstered car which is easily cleaned with a damp cloth. But there still remained the floor rugs which demanded frequent cleaning, and I continued to lug the cleaner to and from the house. Being lazily inclined, I again consulted my friend's chauffeur and now I remove the rugs carefully from the floor of the car, place them on a clean spot in the driveway and sweep them thoroughly.

# Auto Makers to Continue Study for Better Lamps

## OIL RESEARCH FURTHERED AT ANNUAL MEET

**February Production 40 Per Cent Above January—Set Dates for National Displays**

NEW YORK, March 17.—Recognizing that head lamps and motor fuels offer a field for further engineering improvements, the National Automobile Chamber of Commerce voted at its recent spring meeting to support further headlight research by the Society of Automotive Engineers and joining with the American Petroleum Institute, is continuing the fuel research of the United States Bureau of Standards.

Car and truck production of the membership for February was reported as 325,776, which is 40 per cent higher than January, and 29 per cent above February a year ago.

Dates of the 1929 automobile shows were decided on as January 5-12 for New York and January 26-February 3 for Chicago.

S. R. Rice, chairman of the taxation committee, reported that there is a wide interest on the part of automobile purchasers in the repeal of the automobile excise tax which has been passed by the House of Representatives, but has not yet come before the Senate. If this popular interest is recognized by Congress, he expects the repeal will become effective at this session.

In co-operation with the Society of Automotive Engineers, the Rubber Association of America, the chamber voted to work out a program for the reduction of the number of tire sizes, in order to effect automobile manufacturing economies with ultimate savings to the public.

## LARGE HOODS SHOW TREND

"Bigger and better than ever" is the way F. R. Sears, president of the Elcar Motor Company, characterized the 1928 shows. "With the automobile exhibits in New York, Pittsburgh, Philadelphia, Chicago and other large cities things of the past, some summary of their attainments and innovations can be attempted.

"Records for attendance and for the size of the displays were broken in practically every city. Enthusiasm was never greater. The keynote in most of the displays of the leading manufacturers was an added luxuriousness and a more comprehensive and artistic use of color in many tones and combinations. The low-hung new body designs and the large hoods featured by Elcar and several other leading automobiles have struck the popular fancy and promise to influence materially car design in the future."

## ILLUSTRATING AUTO GROWTH

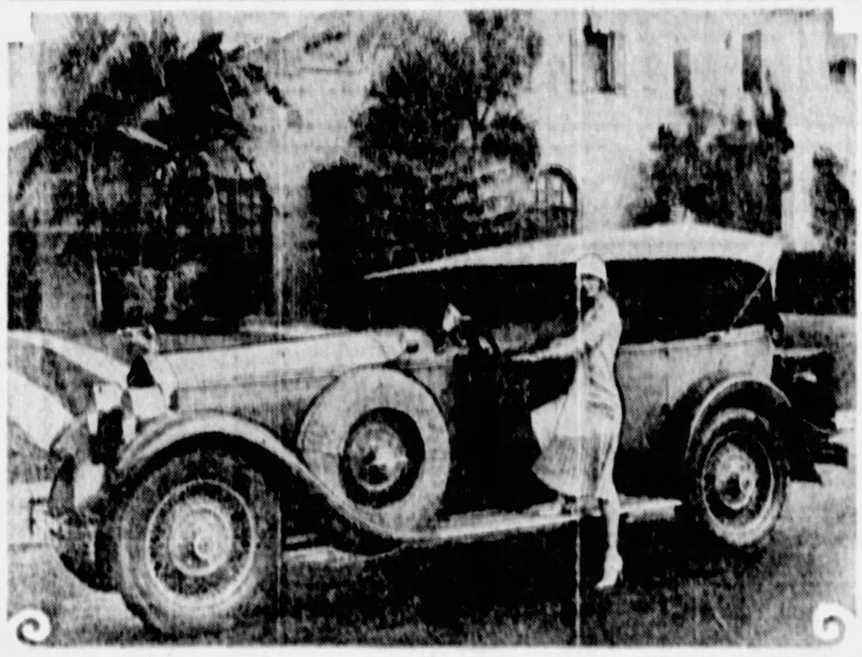
"The fact that there are more automobiles in America than telephones graphically illustrates the importance of the industry," says T. S. Johnston, assistant to W. C. Durant of Durant Motors, Inc. This and other amazing things concerning the industry hardly 30 years old is found in the book, "The Automobile Industry: Its Economic and Commercial Development," by R. C. Epstein. Here are a few of the facts he sets forth:

"In 1908, W. C. Durant, then president of Buick, predicted that the time would come when a million automobiles a year would be made. He was laughed at even by his brother manufacturers. But eight years later, 1916, more than a million cars were produced, and in every year since 1916 the production of motor vehicles has exceeded that figure.

"In 1920, more than two million vehicles were made in the United States; in 1923, well over three million; in 1925 and 1926, slightly over four million a year. Twenty-two million motor vehicles are registered in this country. In sheer rapidity and magnitude, the growth of automotive transportation in the United States constitutes one of the most amazing developments in all economic and commercial history.

"A more recent development," says Mr. Johnston, "is Elizabeth, N. J., now the home of Durant Motors, Inc., which had in 1920 a population of 95,000. In 1921 Durant Motors opened the largest factory under one roof in the automotive industry here and the present population is conservatively estimated at 118,000."

## Gilda Drives a Packard



FOR RECREATION—Gilda Gray, the vivacious dancer in "The Devil Dancer," finds rest and contrast from her vibrating, undulating dances by driving a smooth running Packard phaeton. She is here shown about to take a spin in her car from in front of her home in Hollywood.

## KREIS JOINS MARMON STAFF

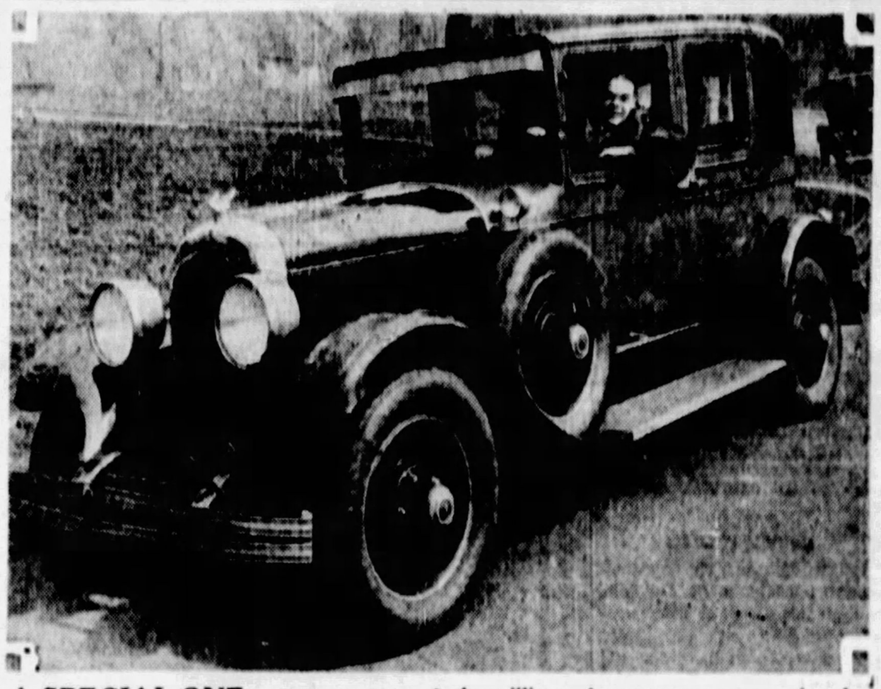
Announcement of the second addition to the Marmon experimental engineering staff from the ranks of America's foremost automobile racing drivers has been made by Col. Howard Marmon, vice president in charge of engineering for the Marmon Motor Car Company.

Pete Kreis, one of the new school of drivers, who nevertheless has made an enviable record in his four years on the speedways of the United States and Europe, has joined the engineering department of the Marmon company. In doing so, he becomes associated with Earl Cooper, the famous veteran pilot, who has also recently joined the Marmon experimental staff.

Not only has Kreis established himself as a leading driver through his efforts on speedways in the United States, but he has scored noteworthy achievements in Milan, Italy, where the best cars of America and Europe meet yearly in speed competition. In 1925 Kreis was leading the Italian Grand Prix when his car hit a turn. He was forced to retire from the race, but he had already broken the record for the track by driving the distance—a fraction over six miles—in 3 minutes 29 1-5 seconds. In 1927 he was third in the Grand Prix of Europe, also held at Milan.

Kreis has driven in many of the important races in the United States since his first race in 1924 at Culver City, when he finished fifth in a 250-mile event. He placed in the annual Indianapolis 500-mile race in 1925 and when illness forced him to abandon plans for the 1926 classic, Frank Lockhart drove his car to victory.

## His Father's Son Buys a Car



A SPECIAL ONE—This is Pat Rooney, son of the famous Pat Rooney of the stage, who recently joined the ranks of the millions of motor car owners when he purchased a Chrysler 72 sedan, a special job, from the Samson Motor Company. He is shown in his new car.

## Willys-Overland Sets New Standards

Two equally striking moves by Willys-Overland have marked the start of this year. The sensational price drop on the Whippet, which was announced early in January, and the introduction of a third model to the Willys-Knight line of six-cylinder cars, at the lowest price ever set on any Willys-Knight, have focused attention on this organization, states Guy Rea, of the Rea-Seager & Co., distributor.

The sales records achieved by the Whippet since the present prices were announced have been outstanding in their relation to general motor car sales in the low price range.

The reception of the Willys-Knight Standard Six, which was announced nationally during the middle of February, has resulted in a heavy demand for this car on the part of thousands of motor car buyers who find in the low prices set on this model their first opportunity to buy a car built by Willys-Overland with a Knight sleeve valve motor.

In both the low priced Whippet and the recent addition to the Willys-Knight line, distinctive features of design and equipment are offered. The Whippet is featured by perfected body lines and full equipment. The Willys-Knight Standard Six is featured by an unusual amount of room in a car of its price, by novel creations in body lines and body decorations and through the use of a non-breakable steering wheel, foot control of the headlights and dimmers and a new and highly decorative instrument board panel.

## *Chicago Seeks to Protect Pavements*

Because overloaded trucks are ruining more than $1,000,000 worth of city paving annually in Chicago, municipal authorities are placing portable truck scales in commission, with inspectors touring streets and weighing suspiciously heavy trucks when discovered. Violators of the weight ordinance are arrested on the spot.

## WILLYS-KNIGHT MOTOR EXHIBIT

Special demonstrations have been arranged by Rea-Seagert Company, Willys-Overland distributor, 5800 Baum boulevard, to show the outstanding mechanical features of the entire Willys-Knight line of cars, emphasizing especially the new Willys-Knight Standard Six which was recently introduced by the Willys-Overland Company.

These demonstrations disclose the actual operation of the Knight sleeve valve engine as compared with the operation of power plants of other design.

## *London Building Chauffeurs' Hotel*

A hotel for the exclusive use of chauffeurs is being constructed in London, England. Each room will be equipped with a telephone so that employers can call their drivers at any time. On the lower floors of the building there will be a garage.

## OLDS RECORDS BEING BROKEN

LANSING, Mich., March 17.—All previous production and shipment records of Oldsmobiles in this country are being exceeded this month, according to a statement by Oldsmobile officials. This record production will be required to meet the retail demands.

Factory schedules call for the production of more than 8,000 Oldsmobiles for domestic shipment this month. During the first 10 days of March the daily average to total this allottment had been exceeded both in the number of cars manufactured and shipped. Officials reported that the schedule would be filled or exceeded.

The record-breaking rate of production and shipments of Oldsmobiles this month follows an exceptionally high mark registered in February. Domestic shipments last month showed a large gain over shipments made in February, 1927.

## KNIGHT DRIVEN 665,000 MILES

More than a half-million miles of service is the record of a Knight-engined car that has been in continual service as an ambulance at the Toronto General Hospital for the last 15 years. Placed in service in 1913 this car has traveled a total of more than 665,000 miles in its errands of mercy over the streets of Toronto and nearby points.

The Knight sleeve-valve engine employed in the Toronto hospital's ambulance is the same type of power plant used in the Falcon-Knight six and other Knight-engined cars. According to officials of the Falcon Motors Corporation of Detroit, builders of the Falcon-Knight line of cars, each year has seen a more decided trend on the part of motor car buyers toward cars using a Knight sleeve-valve engine for a power plant. This is said to be caused by a realization of the advantages of this type of engine over motors of other designs.

## HUPP OUTPUT AT HIGH LEVEL

Operations at the highest rate ever attained are now being carried out in every department of the Hupmobile plants, DuBois Young, president and general manager, states in reply to requests for information on the Hupmobile outlook.

"Sales by our distributors and dealers throughout America are the largest they have ever been at this time of year," Mr. Young said. "More unfilled orders for retail delivery are on their books than at any previous time in their history. This is the time of year when motor car dealers ordinarily are carrying a large stock of cars against the heavy spring demand. Hupmobile dealers, however, are virtually without cars. They have been delivering them to owners as rapidly as they have been received from the factory. Only a few of our dealers have more than a week's supply of cars on hand.

"The splendid reception accorded the first of our three new 'Century' cars is a matter of history. That given the two new 'Century' eights has been equally imposing."

## EXPLAINING INVAR STRUT

Almost 10,000 automobile showrooms throughout the country have echoed the question, "What is an invar strut piston?"—the new type introduced in the Bigger and Better Chevrolet on January 1. O. E. Hunt, chief engineer of the Chevrolet Motor Company, answers this question for the thousands of people who have seen the new car and asked about this outstanding feature.

Invar, according to Mr. Hunt, is a contraction of the word invariable. It is the name coined to describe the metal used in making the piston "strut," which is cast as an integral part of the piston just above the pin hole and has its ends firmly embedded in the metal forming the piston face.

"Invar," Mr. Hunt explained, "is les responsive to heat or cold than any other metal known. It is a special nickel steel alloy of extreme toughness and rigidity, and is practically the same metal as that used by the United States Bureau of Standards to construct its gauges, and in the manufacture of precision instruments.

"A light alloy piston expands when heated, which means that unless this expansion is properly controlled, excessive clearance must be allowed between the piston and cylinder walls to prevent sticking and scoring, resulting in piston 'slaps' and oil 'pumping.' This control is effected in the Chevrolet piston by use of the strut, which permits a clearance of only .0025 inches between the piston and the cylinder wall as compared to .004 and .005 in clearance with a piston that has no controlled expansion."

## Build New Cars For 500-Mile Race

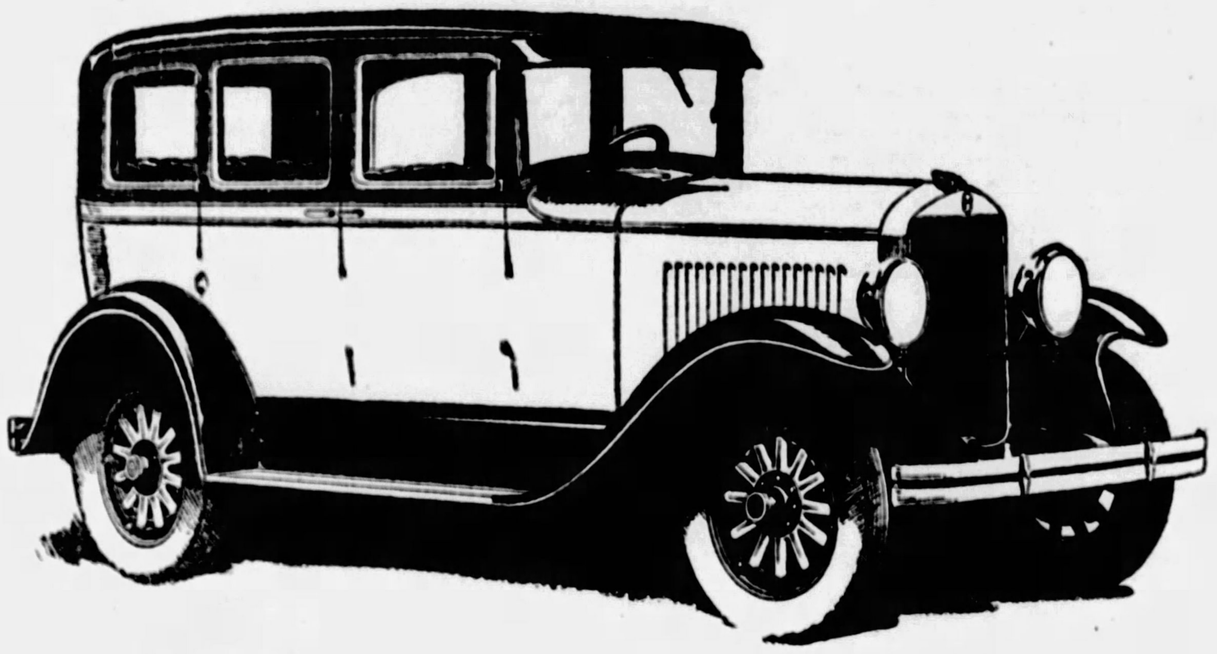
INDIANAPOLIS, Ind., March 17.—Several cars are under construction for the International 500-mile race to be held at the Indianapolis Motor Speedway, May 30, merely to test the qualities of small parts.

Most everybody knows, of course, that there are values in the motor mechanism of an automobile. But Mike Boyle of Chicago is about $50,000 curious to find out just what type of valve will best withstand the terrific gruelling of a 500-mile race and come out at the finish to the best advantage.

So he is buying and building four automobiles just to satisfy his personal curiosity in the biggest race in the world.

Cliff Woodbury of Chicago, dirt track star who climbed to unusual fame in speedway racing, will have charge of the driving arrangements for the quartet of racers Boyle plans to race here, but which have not yet been entered.

# Principles We Have Seen Proved



In the new line of Graham-Paige motor cars we have earnestly endeavored to embody the principles we have seen proved, and the refinements we have found desirable, in many years of automotive experience.

Joseph B. Graham
Robert C. Graham
Ray A. Graham

A wide variety of models and body types—prices beginning at $860. Illustrated is Model 610, 5-passenger Sedan, with seven bearing crankshaft, $875. All prices f. o. b. Detroit.

# Brakes of Modern Automobile Easier to Adjust

## FOUR-WHEEL TYPES DOUBLE LIFE OF LINING

**Safety Devices of Present-Day Were Classed Menace To Traffic Four Years Ago.**

By An AUTOMOTIVE ENGINEER.

Wonderfully effective brakes are provided on this year's cars. At the show held in January there was not a car on the floor, regardless of price, that was not equipped with four-wheel brakes. When one thinks back to the years of 1922 and 1923 when the Battle of the Brakes was raging hotly all along the Detroit, Cleveland and South Bend fronts, it is rather amazing that this condition should exist. It is not easy to forget the statements made by some of the leading manufacturers that four-wheel makes were a menace and a danger. Today they are being accepted by these same makers as a necessary provision for safety—and, of course, that is what they were intended to be all the time.

Probably the greatest advance in braking design is the ability of the engineers to make the brakes self-energizing. By this is meant that the forward motion of the car is utilized to help apply the brakes, therefore, a much lighter foot pressure is necessary to give the desired braking effect. This is very valuable with the four-wheel brakes because the criticisms against the first of these braking systems were very largely on the basis that it took too much foot pressure to obtain the proper braking effect. This was particularly bad for women drivers who felt that the car was not in perfect control and could not be stopped in sufficiently short time or space.

**CAREFULLY DESIGNED**

The self energizing brake has to be very carefully designed and made, or else the action of the brake is apt to be so violent that the slightest touch of the foot will fairly stand the car on end. It is safe to say that now, however, almost perfection has been attained in this respect on some of the braking systems now available. The braking effort is directly proportionate to the amount of pressure exerted by the foot, and while the pressure does not have to be heavy, the brakes are not self-energizing to the extent where they will lock the wheels unless fairly heavy pressure is exerted by the driver.

The introduction of four-wheel brakes into the lower priced cars hastened a cleaning up of the details and a simplification of the mechanism. This is always true in automotive design. Let a valuable mechanism be discovered in the ranks of the higher priced cars and be so valuable an addition to automotive engineering that the general public wants it, it soons finds its way to the lower priced cars and then it becomes simplified to such an extent that its original designer would never know it.

**ADJUSTMENT NEED LESSENED**

This is much the case with the four-wheel brakes, particularly the internal type. The use of the four-wheel brakes speeded up the practice of using the transmission for the emergency or hand brake. The brakes on the four wheels, or the service brakes, are more generally the internal type. It is quite a feat to make a good internal self-energizing brake. The external brakes were self-energizing because of wrapping action of the band around the drum. This was often apt to be severe, particularly in damp weather. With the internal brake the self-actuating action is obtained in some cases by a relative movement of the brake shoe, as compared with the center of the drum. This gives an eccentric or toggle action which is very effective.

Regardless of how effective the brake system may be there is need for occastonal adjustment. On the hydraulic type of brakes, which also are being made today in the internal self-energizing style, the necessity is just as great as it is on the mechanical. It is a fact, however, that the frequency of the adjustment necessary is not nearly so great as was the case with the two-wheel brakes. The fact that the braking area is doubled, or nearly doubled, not only has the effect of distributing the wear over twice as much surface, but also gives that much more surface for the dissipation of heat, so that the brakes are working at a lower temperature, with the result that the lining stands up longer.

Do not make mechanical brake adjustments on the linkage, but make the adjustment on the nut at the brake itself. Adjustments on the linkage will throw the center distances between the pivot points out, and are apt to spoil the brake action. Adjust brakes as soon as the brake pedal gets near the foot board when the brakes are applied hard.

## Little Girl Shows How

**HOLDS CAR**—To demonstrate the action of the new air brakes adopted by Chandler, an official of the Chandler-Cleveland Motors Corporation placed a small girl in the driver's seat, while the car stood on a steep grade, had her place her foot on the foot brake and then released the emergency brake. The little girl easily held the car in place, said C. H. Kenney of the Pittsburgh Motor Corporation.

## FINE CARS MADE IN U. S.

America has obtained a lead in the art of manufacturing fine automobiles that will never be overcome by the rest of the world in the opinion of Oscar Cupper, distributor for the Packard Motor Car Company in Germany. The popularity of America's best cars is growing in Europe he says.

The picture with the American small car, I believe, is somewhat different," said Cupper, while on a visit to the Packard plant in Detroit. Europe is girding now for a real fight to wrest the small car business in the European market away from the United States. The fine car market, however, can never be taken away from America."

Cupper was for many years a well-known race driver in Europe. He was in the automobile business in England for a number of years and has been closely associated with all branches of the industry in several other countries of Europe. His observations are based on first-hand study of conditions both in England and on the Continent.

## Exceptionally Roomy

**EVERY CONVENIENCE**—In this five-passenger coupe on the Cadillac chassis, Fisher body designers have provided an exceptionally roomy five-passenger compartment, with the additional convenience of a large, enclosed luggage compartment under the deck.

## CADILLAC V-8 VALUE BILLION

More than $1,000,000,000 has been invested by the motoring public in cars produced by the Cadillac Motor Car Company since its introduction of the V-type, 90-degree, eight-cylinder engine. This represents more than half of all the money invested in cars at and above the Cadillac price range during this period, says R. P. McAllister of the McAllister Brothers, distributor.

While this total of purchases has been built up during 13 years, the movement has been greatly accelerated recently, and one-third of the total amount has been spent by owners during the last three years. Production schedules have repeatedly been raised upward and the company has completed a program of plant expansion and factory rearrangement for a further increase this year.

## New Records Rise At Studebaker Sales

More than $500,000 worth of business recorded, 29 used cars sold last Sunday, and all departments exceeding their quota, these are a few of the high lights that are marking the Studebaker Sales Company of Pittsburgh million-dollar march sales campaign, reports G. D. Jay, Jr., sales manager.

"We will more than exceed our quota of more than a million dollars' worth of business in March," said Mr. Jay, "thanks to the cooperation of The Sun-Telegraph. March, never before a good month for retail automobile sales, this year will see the breaking of all sales and service records. The sale of 29 used cars last Sunday is a record that promises to stand for a long time. It reduced by half our stock of used cars.

"Sales of Studebaker and Erskine cars in this city last month also attained new high marks, as did the national sales for January and February. Actual deliveries of the Studebaker Sales Company during the month just closed were the greatest of any February in history and exceeded those of the same month last year by 50 per cent.

"This is in line with the national increase enjoyed by the Studebaker Corporation, which also experienced the best February in its history, exceeding sales for February of 1927 by 31 per cent. Sales of Studebaker and Erskine cars in January also set a new-time record for the month."

## AUTOISTS TAKE ALCO SERVICE

"Pittsburgh motorists in large numbers have responded to our invitation to make our service station their headquarters for tire equipment and service," declared C. E. Hamilton, president of the Alco Tire Company, 3560 Bigelow boulevard.

The new Alco store was opened about a month ago when the company moved from its old location at 3301 Bigelow.

"Car owners," Mr. Hamilton said, "appreciate our efforts to provide the most complete line of tire and service facilities in the city for their convenience and they are coming to our new quarters in larger numbers to have their tire needs taken care of.

"We carry a complete stock of Goodyear tires featuring, of course, the famous all-weather balloon, but including a tire that is competitive in every price field—all turned out in the Goodyear factories.

"If it is a truck or bus tire or service on these types, we have ample facilities to take care of these needs also at our other service stations—15 Second avenue and 6208 Broad street."

## NEW OAKLAND PLANT READY

PONTIAC, Mich., March 17.—Last week, less than four months after the first rattle of pneumatic hammers signalized the commencement of the latest expansion project of the Oakland Motor Car Company, the new $3,000,000 car assembly and shipping buildings for the Oakland all-American six were completed and pronounced ready for the installation of conveyors, processing equipment and machinery.

The new structures provide the company with 380,191 square feet of additional floor space besides five more railroad shipping spurs, four of them entirely within the walls of the shipping building. The company now has 10 tracks in its private "railroad yard."

Two assembly lines will be installed and space has been provided for a third assembly line such as was added recently in the Pontiac six assembly plant which parallels that of the Oakland six. Minimum production capacity of each line in the new Oakland plant is 40 cars an hour.

### *Light Color on Tanks Saves Gas*

Refining companies of the United States paint their gas tanks a light color to save petrol. The light tones of the tanks reduced the temperature from 150 to 116 degrees.

## Franklin Pioneer Tells of First Race

"Many things have happened in the motor car world in the last 17 years," says Ralph Hamlin, pioneer dealer in Franklin motor cars, of Los Angeles, Cal., who was recently a visitor at the Franklin factory at Syracuse, N. Y.

"The present 60-mile with comfort Franklin is a long way ahead of the cars of the same make that were being sold in the early days.

"My first real 60-mile-an-hour clip with this car was made in the Los Angeles-Phoenix Desert race in 1912 when the Franklin finished first by a wide margin over as weird a list of contestants as ever were gathered in a fight against every kind of known odds.

"Today, the roads between Los Angeles and Phoenix are as different from the roads in those days as the cars which are making the trip today are different from the cars we were using then.

"Now it is a great popular route, driven for the most part over the finest of concrete highways, through a section which is world-famous for its crops of dates, cantaloupe, grapes and almost every known variety of fruit.

"In 1912 it was a trackless desert waste. The Franklin which won the test in 1912 was one of the first to use the induced draft air-cooling system. The route was over fair roads until we got a little way beyond Pasadena and then the struggle with the desert began.

"The water-cooled boys went out ahead, several days before the race, to plant barrels of water for use when the motors started to boil in the 100-degree plus temperatures.

"All of us wore baseball masks to keep the mesquite and buckthorn bushes from scatching our eyes out. Tires were deflated to half pressure so that the wheels would not sink into the sand.

"Banning, Beaumont, Indio, Coachella, today populous towns, were spots on the Sahara-like waste.

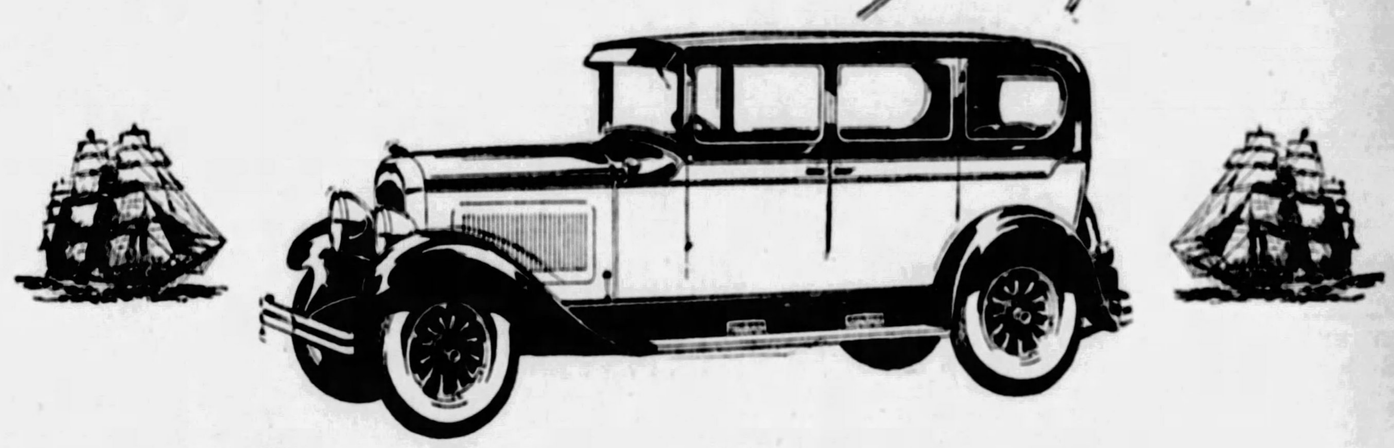
"Springs on the cars were tied down with iron straps to keep them from breaking. The first day took us to Yuma where we ferried across the river, at 100 feet above sea-level, on the most nondescript ferry. That night we slept under the cars to prevent tampering.

"In the morning we started out on time allowances established by our arrival the night before. The drag to Phoenix was a counterpart of the struggle of the day before. That year, a sudden cloudburst in the mountains along the Colorado River started a freshet in the Agua Frier River and we crossed on the railroad trestle in place of fording the stream. Then we went through hub-deep mud to the finish at the Phoenix fair grounds. Two laps around the fair grounds race track and the race was won.

"Many of the boys who were in that race have since made notable records on the race tracks. I called it my last race and have kept to selling ever since.

"Today, especially at this time of the year, when I sometimes make the trip for the pleasure of the scenery, I recall with considerable amusement, the rigors of the course the first time I covered it."

# Step into the Automobile



# In Port Today

This day of March, 1928, Reo announces the *1929* Flying Clouds.

Reo can give you *1929* automobiles in the heart of the 1928 season for a very, very simple reason.

Reo is an independent organization and a producer of only a moderate number of cars. Refinements, changes, new ideas can be put into and through production faster than in the huge immobile plants from which come most of America's automobiles.

Reo blue prints can materialize into Reo cars many, many months sooner than do those of other reputable automobiles.

As a result, the New Reo Flying Clouds give you today what other cars may try to give you one year from today—*in 1929.*

The New Reo Flying Clouds give you today a new fleetness, for one mile or one hundred, that will still be the envy of many cars—*in 1929.*

The New Flying Clouds give you today the ability to sweep from zero miles per hour to what you will, faster than many cars will do—*even in 1929.*

The New Flying Clouds give you today the agility in traffic, and steering ease that other cars will try to develop—*for 1929.*

The New Flying Clouds give you today distinctive new lines, sweepingly simple lines, that some other manufacturer may imitate—*by 1929.*

The New Flying Clouds give you today luxurious interiors that someone else may copy—*for 1929.*

The New Flying Clouds give you today the riding ease that many cars will strive to have—*for 1929.*

The New Flying Clouds give you today the four-wheel internal expanding (not external contracting) hydraulic brakes that safety demands may force many other cars to adopt—*in 1929.*

These things can be yours in March, 1928, in the New Flying Clouds, for the very simple reason that Reo blue prints become Reo automobiles many months sooner than do those of other reputable cars.

Step into the *1929* automobile—the New Flying Cloud—and try it out yourself.

"Wrecked Cars Made Like New"

## "MOTORIST, THINK SAFETY!"

## *Burden of Prudence Not on Pedestrian*

ANYONE alert enough to be on the streets of the downtown district is alert enough to get through lines of moving vehicles, said a transportation executive recently.

It sounds impressive and complimentary, but it is not true, and it is a false view to take of traffic problems.

Motorists might interpret similarly a recent court decision that the burden of prudence is on the pedestrian when stepping into traffic. He must look carefully about him before stepping from the curb, said the judges, and continue his caution unflaggingly.

But that interpretation also would be false. It is doubtful that the courts are absolving the motorist of responsibility. And, even if, by judicial verdict, the blood of the pedestrian is on his own head, there is a higher and finer law—the law that each of us is his brother's keeper.

The courts may absolve us in case of accident, but there will always remain the suspicion that if the foot had been readier for the brake and the car not traveling so fast the accident might not have happened.

No court can fix boundaries for conscience. They may rule that a pedestrian must be prudent, must look all ways at once. So should the motorist. He should be the keeper of the pedestrian. He must be prepared for the person dodging from behind a street car or stepping suddenly from the curb. He must be prepared for a bewildered woman or child or man doing the wrong thing in traffic.

He must, even at the cost of traffic congestion, or of delay in reaching his own destination, do all that is possible to save others from their own carelessness.

That is the higher and finer law, not written on the statute books, which conscience alone must administer.

## *Again We Hear About The "Saturation Point"*

THE "Automobile Saturation Point" that statisticians love to talk about gets another black eye this week. More are coming.

Vice President W. T. Whalen, of the General Motors Export Company, in a private showing of a new film, "Around the World With General Motors," shows that only 12 per cent of General Motors products are sold abroad today.

They are to be found in 112 different countries.

What will happen when a few more hundred hustling young American salesmen slip over to these countries within the next 10 years and step that 12 per cent up to 50 per cent?

It is no exaggeration to state that there are millions of men now living who will see that time come.

And that proves that the saturation point for the energetic American automobile manufacturer is still a long way off.

That's a good thing for good salesmen interested in getting ahead by going East.

"How do you like your new car?" asked Boggs, of Robinson, who has a wife and five children.

"Well, I can't really say," replied Robinson. "I haven't had a rid in it yet."

* * *

An ash tray often turns a garden variety closed car into a Brougham.

* * *

But the word doesn't listen like it looks. It is spoken the same as in "A new Brougham sweeps clean."

"What keeps the world moving?" inquired the teacher on the first day of school.

"The traffic cops," was the almost unanimous reply, for this was a fashionable school and even the first grade pupils owned their roadsters.

* * *

"Didn't you have any better sense than to strike a match to see if your gas tank was empty?"

"Well, why not? It was a safety match!"

## COMPULSORY INSURANCE

Results of compulsory insurance in Massachusetts, the first state to adopt it, are now being judged in the light of actual experience. Motor vehicle fatalities and accidents for a full year during which the enforced insurance was operative, have been tabulated and the results reported.

Both the opponents and the proponents of the cause see in the 1927 record, which has been made available, ample support for their contentions. The opponents point out that registrations were lower in 1927 than in 1926 and that therefore the reduced number of fatalities loses some of its significance. They also point out that the personal injury reports showed a gain.

In 1927 there were 693 fatalities arising from automobile accidents. This was with a motor vehicle registration of 828,795. In the preceding year there were 705 persons killed with 836,111 cars on the road. The child fatality in the two years was 219 in 1927 and 234 in 1926. Injuries compared, 1927, 21,721, and in 1926, 22,551.

Motor Vehicle Registrar F. A. Goodwin is jubilant over the apparent justification of compulsory insurance. He claims there has been a marked improvement and that any other interpretation of the statistics is a perversion of the truth. He says:

"Fatality statistics for years have been absolutely correct in this state because the law requires an investigation of every fatal accident. This is not true with relation to personal injuries and we never kept complete records until this year, and they are not correct now and possibly never will be until every accident is thoroughly investigated, which is a practical impossibility.

"Before the compulsory insurance law went into effect two-thirds of those causing injuries were financially irresponsible and as a result many persons injured said nothing about it, but now we hear from all of them. Not only that, but thousands make claim for personal injury when they are not injured at all.

"The people who now point to the increase shown in personal injury statistics as an argument know these figures mean nothing. Thousands of occupants of automobiles involved in slight accidents have claimed personal injury in order to club insurance companies into paying them property damage claims."

## G.M. PLANTS USE NATIVE LABOR

Less than 5 per cent of American labor is used in General Motors overseas plants, labor in the country where the plants are located being given preference.

## YOUR CAR

How To Drive & Care For It

By — *Don C. Streeter*

*Service Manager of the Reo Motor Car Company*

TWO piercing eyes, two balls of fire, betray the lion's stealthy march across the veldt or the stalking tiger's sortie from his lair. But just as dangerous, yet common to our every day experience, are the headlamps of passing cars that meet us with a "glare," which means according to the dictionary "to look with piercing eyes."

But "piercing eyes" are not essential to a clear view of the road ahead nor do bright lights alone cause glare. But bright lights, improperly focused and adjusted, shine from left to right and from road to tree top, spary the approaching car with a venemous barrage of light and make driving dangerous for all concerned.

### HOW TO ADJUST YOUR HEADLAMPS

Much has been done by lamp designers, but the co-operation of car owners is still needed. The better cars use lamps of the most improved type having two filaments, one giving light far down the road, the other dropping the light close to the car for passing. But even with the best of equipment, the right illumination of the road will not be obtained, uninterrupted, without some intelligent effort to maintain the lights in proper focus and adjustment. A minor collision may affect a front fender and at the same time disturb the lamp adjustment, or the replacement of a bulb may affect the focus. Occasional checking alone will tell whether the lamps are still giving light that makes night driving both enjoyable and safe.

Where an electrical service station has the proper facilities it is best to let their experts do the work. Otherwise the owner of the car can do the job, placing the car so that the lamps are about 25 feet from the garage. The garage doors then act as a screen on which the light from the lamps may be thrown. Here it should form a wide flat pattern of light, with the brightest part no higher than the center of the lamps. Immediately above the light part should be a dark portion, an indication that the lights will not shine brightly in the eyes of an approaching driver.

### EFFECT OF PASSENGER LOAD

Before the height of the light beam is finally checked, however, the focus of each lamp should be tested. Where a lens is used to spread the light, it can be removed and the bulb moved in or out by means of the screw adjustment on the back, until a clear spot of light is obtained. This can be done with one lamp at a time, the other being covered. When each bulb has been focused, the lenses may be replaced and each lamp checked to see that it is tilted forward the right amount.

## The TRAFFIC COP

*ALL motorists are pedestrians, and as pedestrians they develop tendencies to disregard motor vehicular traffic. As a result many motorist-pedestrians are hurt. The Traffic Cop, in co-operation with the Traffic Police, will remind you to be cautious in walking, in this section every week.*

**When walking by a public garage, watch out! A car may come dashing out and hit you. Common sense says the driver should use his horn and stop when he nears the sidewalk, but there are a few drivers who fail to observe such precautions. It is best to assume that a car is coming out of every open garage door.**

"I hear you motored down to Jenkinburg. Did you happen to run across Tom Brown?"

"No, I think the ambulance surgeon said the name was Bill Simmons, but my insurance company has all the data."

## RIMES of the ROAD

*by Dudley Glass*

### THE ALL-WEATHER ROAD.

JUST about this time last winter
we put earmuffs on the kids,
Gathered robes to keep from freezing, put on chains to beat the skids,
Started out at dawn, though doubtful, and plowed on with deep alarm
Through the mud, to be at Grandpa's birthday dinner on the farm.
Fifty miles of rural highway—or 'twas called that on the maps—
Mostly slippery clay and mudholes, with a stretch or two, perhaps,
Where we'd hit some hard macadam and speed up a mile or so,
Never knowing if we'd make it, though we felt we had to go.
Grandpa had another birthday just last week, and once again,
All our family paid its visit
Though we started in the rain
We had never thought of trouble, not a worry on a mind,
As to ice or snow or mudholes or the kind of roads we'd find.
For the highway that we'd dreamed of was laid down, in "concrete form,"
Proof against the gods of weather, firm and hard in rain and storm.
And we sped where once we plodded. May good fortune speed the day
When the dirt roads and the mudholes will give place to real highways!

* * *

"Yes, ma'am, we'd be right grateful for some shoes for the children, and if you could help my old man get some easy job with short hours it would be nice," said the suffering woman to the charity investigator. "But we sure would be glad if you could have our car overhauled and let us have a good set of tires all around. We had a lot of trouble on the road yesterday."

* * *

The mummy in the museum bore the inscription:

"B. C. 650."

"Whatcher suppose that means, Bill?" asked one visitor.

"Must have been the license number of the car that killed him, British Columbia car, I reckon!"

* * *

The joy of caring for your car
Is one that does not cease;
For every Sunday morn we find
Some brand new place for grease.

* * *

UNCLE EB, HE SAYS:

Bobbed hair certainly does save a lot of trouble, and it looks good on some women. But when my car has trouble on the road I certainly do miss being able to borrow a hairpin off my wife.

(Copyright, 1928, Premier Syndicate, Inc.)

...and now

England's most Princely Car follows Buick to the Valve-in-Head Six Cylinder Engine!

One of Europe's royal cars—a car priced six or seven times as high as Buick—has recently adopted a Valve-in-Head six-cylinder engine embodying the same principles of design as the world-famous Buick power plant.

Valve-in-Head design was selected by this other fine motor car for the same reasons that it was selected by Buick twenty-four years ago—because it provides an unrivaled combination of power, getaway, smoothness, stamina and day-in-day-out dependability.

These are vital reasons why more people buy Buicks than any other fine automobile. They explain why England's most princely car has followed Buick to the Valve-in-Head six-cylinder engine.

WHEN BETTER AUTOMOBILES ARE BUILT BUICK WILL BUILD THEM

# Underground Roads Solution to Traffic Congestion

## PITTSBURGH AUTO TUBES POINT WAY

### Many Cities in U. S. Building Subterranean Highways; Dover to Calais Tunnel.

Underground life in buildings, tunnels and subterranean highways is becoming more of a reality than ever as these digging projects multiply throughout the United States, while other nations of the world are planning super-tunnels that will make the most modern of those of today seem small in comparison, a careful survey reveals.

Confronted by the ever-increasing traffic problem created by the automobile and aroused by prospects that this will be much worse within the next two to five years, many American cities and states are boring giant tunnels under bays, rivers and mountains and planning tiers of streets in their main business sections, the cost of which will exceed $100,000,000.

**PROVE FEASIBILITY**

The world-wide epidemic of tunnel building received its greatest impetus from the outstanding success of the Liberty tunnel in this city and of the Holland vehicular tunnel under the Hudson River, and the fact that they could be so efficiently ventilated by mechanical means. Tests proved that air conditioning made the air in the Liberty tunnel purer than that in the open spaces of Fifth avenue, despite the fact that thousands of automobiles pour out tons of the deadly carbon monoxide gas into the tunnel.

Several years ago a number of nationally known ventilating engineers declared that advances achieved in the science of controlled air would make it possible to economically manufacture ideal weather conditions for underground activities. The first big ventilating job completed was that of the Liberty tunnel which was cut through a mountain in this city, but which had been preceded by exhaustive ventilating tests conducted by the Bureau of Mines in co-operation with the Public Health Service and the American Society of Heating and Ventilating Engineers. In addition to these tests, engineers in the ventilating industry had constructed miniature tunnels in their laboratories to determine exactly the amount of air motion and change required to remove all carbon monoxide fumes. The benefits of all these experiments combined with the actual experience of operating the Liberty tunnel were applied to the larger and more spectacular tubes under the Hudson.

**OAKLAND PROJECT UNIQUE**

Of all the tunnelling and other subterranean projects now under way, the most unusual in conception and method of building is the giant, underwater vehicular tube connecting Oakland, Cal., and Alameda, under the Oakland inner harbor. This tube, which will be opened next July and will have cost $4,500,000, is 4,400 feet long and has an inside diameter of 37 feet which is seven and a half feet larger than the inside diameter of the Hudson twin tubes. It will contain two street car tracks and will be capable of handling a traffic flow of 2,000 automobiles an hour.

The tube is the first precast tube ever built in the world and its construction has been closely watched by engineers. The tube was precast in concrete and steel in 12 segments each 265 feet long and weighing 5,000 tons apiece. After the Oakland and Alameda approaches were built, the tube segments were floated into place and sunk. As each segment sank into place, it was joined to one already in place with a huge steel collar and concrete bulkheads at ends of the segments were then knocked out and joints further strengthened from the inside.

To ventilate these big tubes, fresh air will be drawn in at the portal building at each end. Sixteen-foot fans propelled by 100 horsepower motors will send fresh air into ducts underlying three-foot sidewalks on each side of the tube. Vitiated air will be drawn off through ceiling louvres at 15-foot intervals carried outward to each end in the attic chamber and released at portal buildings.

With the completion of the Moffat-Evans tunnel, which pierces the Rocky Mountains for more than six miles through the Continental Divide at an altitude of between 8,000 and 10,000 feet, the nation has a direct short-cut from Denver to Salt Lake City by means of one of the greatest engineering feats ever attempted. The tunnel—hewed through miles of solid rock—required three and one-half years to build and cost approximately $42,000,000. Trains rush through the tunnel at 50-mile speeds while automobiles are taken through on flat cars for a nominal charge. To drive dangerous gases and smoke out of the tunnel, huge fans were installed to blow 65-mile gales through the passage or a rate of 450,000 cubic feet of air a minute.

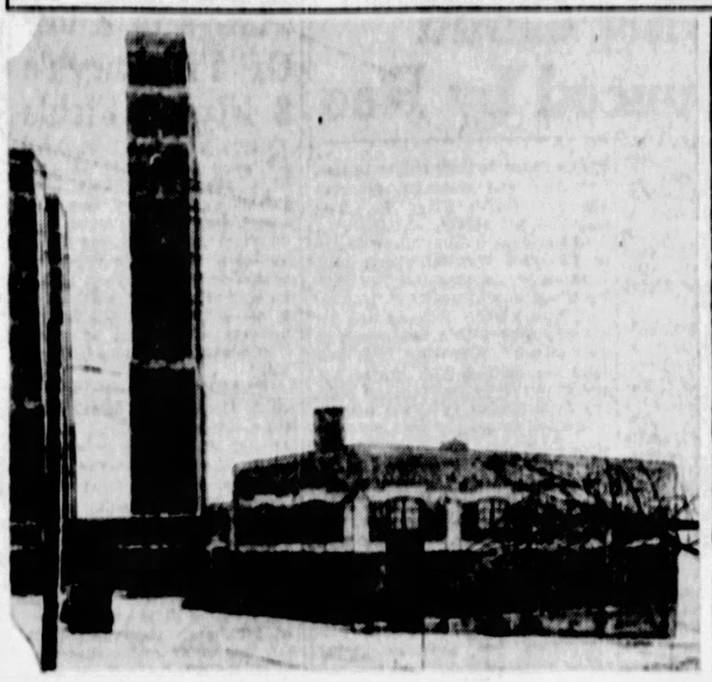
The City of Detroit has started the construction of a huge vehicular tunnel under the Detroit River to connect the heart of its business district with Windsor, Ontario. This tunnel, which will cost $15,000,000 and is to be completed early in 1930, will be 5,300 feet long, of which 3,000 feet will be under the river bed. It will have a roadway 24 feet wide and will permit three lanes of traffic. It will have a capacity of 1,500 automobiles an hour during the rush periods.

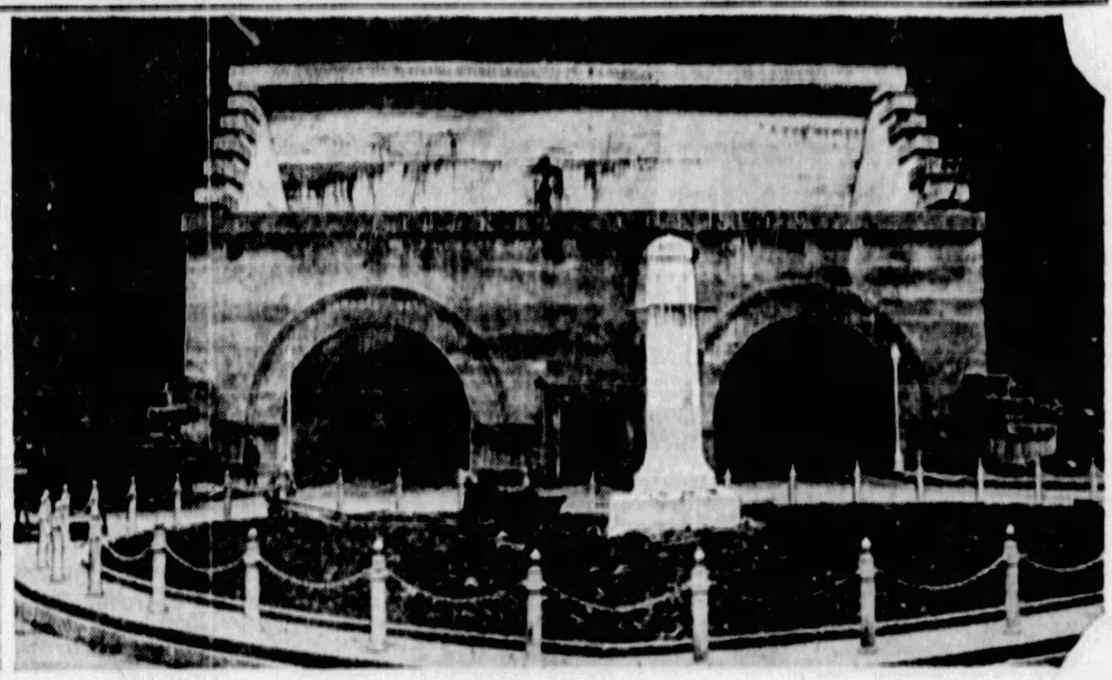
**"STAIRCASE" PASSAGE**

The City of Albany is planning a tunnel under the Hudson River to connect it with Rensselaer on the other side. Engineers who have completed the plans for the tunnel, which they figure will cost $5,000,000, have worked out a radical but efficient plan to facilitate the traffic. Automobiles will enter and leave the tunnel by means of a spiral "staircase" by means of which each vehicle would make two downward circles before reaching the tunnel level from the street. The tunnel will be 360 feet long.

The American fever for tunnel building has stirred the zeal of the Europeans. The British and French are now eager to construct a tunnel under the English channel between Dover and Calais. This, if accomplished, would be the world's greatest. Lionel Smith-Gordon, a Dublin banker, was in New York recently with several British engineers to inspect the Holland tunnel and especially its ventilating system. He believes the same system can be applied to the longer tunnel to connect England and France and he says that ample financial backing is available for the gigantic task. In drafting plans for the Dover-Calais tunnel, the engineers are figuring on the construction of an artificial island halfway between to house a huge ventilating building for pumping fresh air into the tunnel in addition to the use of monster fans at each end.

## Pittsburgh Vehicular Tubes Example for Projects in Other Cities





**SUPPLYING AIR**—These huge smoke stack-like structures supply fresh air for the twin Liberty tubes, first of the kind in the nation. The air in the tubes is said to be often purer than that on Fifth avenue.

**NORTH PORTALS**—These are the entrances facing the new Liberty Bridge, which will directly connect the tunnels with the downtown district. These tubes have been the pattern after which many other vehicular subterranean roadways have been and are being constructed in many cities through the nation.

## MARCH FAVORS CAR BUYERS

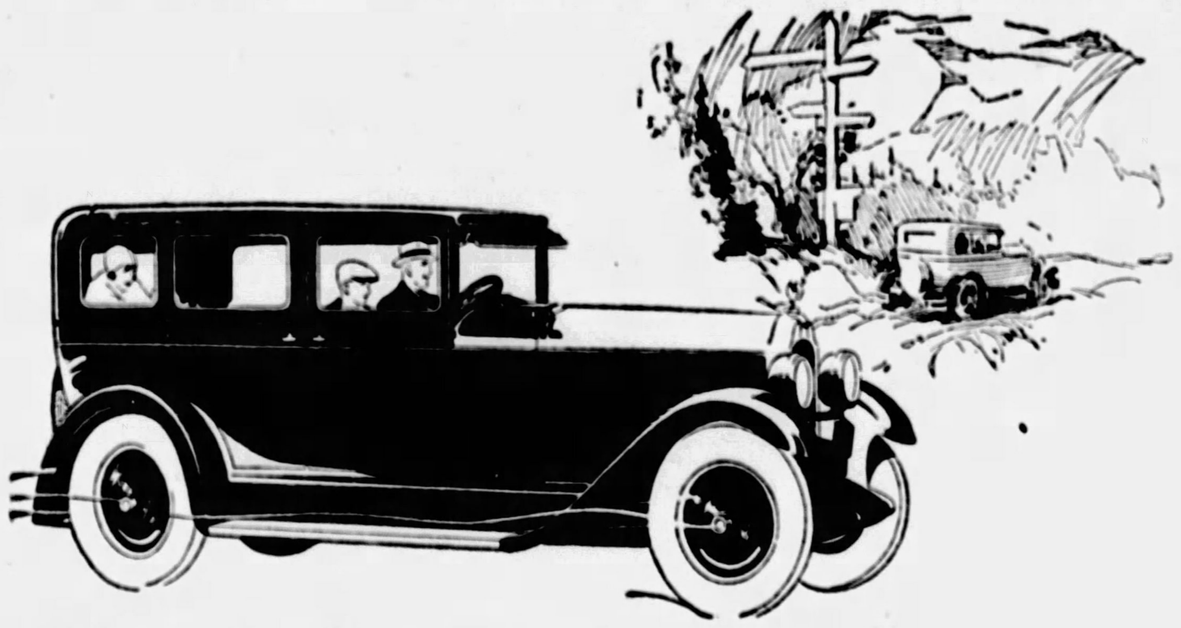
"The automobile business has long passed the stage of experiencing what might be termed seasonal buying, yet even though this is the case, March will always be considered an ideal month in which to consider the purchase of a new automobile," states C. H. Kenney, of the Pittsburgh Motor Corporation, Chandler distributor.

"By March, the majority of the most important automobile shows throughout the country are finished, new car models and prices are stabilized and distributors and dealers are enthusiastic to do business.

"The fact that the latter portion of March and the month of April is the greatest season for volume used car sales, brings owners the welcome advantage of getting the best possible price for the cars they are planning to trade in.

"Yet these facts, important as they are, do not constitute the only reason for buying a new car in March," Kenney declared. "By getting his new car in March the owner has an opportunity to break it in properly, to drive his first 500 or 1,000 miles after the streets have been cleared of slush and snow, and to enjoy the beginning of spring time.

"Then, too, the owner who buys his new car in March is assured of at least seven months of practically perfect automobile weather, and he can get the utmost in healthfulness and satisfaction from his new car."



# This is the year for sleeve-valve motor cars

THIS is the year of great motor values. This year Falcon-Knight Six offers the famous Knight double-sleeve-valve engine in a car of highest quality at a very low price.

This year many thousands of car owners will say: "Good-bye forever" to their old cars with leaking and sticking valves, carbon and mechanical trouble, and noisy, worn out motors.

This year they will buy the new Falcon-Knight Six powered by America's finest type of motor.

And this year they will enjoy driving the smoothest and quickest powered motor car they have ever known. They will learn "The feel of driving a Knight-engined car"—and they will glory in its power and speed.

Best of all they will own a motor that is free from carbon and mechanical trouble—a motor that never wears out.

Be sure to drive the Falcon-Knight Six before selecting a new car. Falcon Motors Corp., Detroit, Michigan.

New closed car prices $1095 to $1195 f.o.b. factory

# *Every day America's cars carry 912,000,000 pounds of water used as a substitute for air!*

## *1,250,000,000 pounds of plumbing to make the water do its work*

5 *motoring troubles that never worry the Franklin Owner*

No danger of water boiling over and spoiling lacquer finishes.

No fear of cracked cylinders or bursted radiators from freezing.

No thought of anti-freeze solutions or cold weather precautions.

No water hoses or gaskets to tighten—no plumbing. Franklin has 100 fewer parts to get out of order.

Such elaborate water-cooling systems—such an enormous amount of extra materials and superfluous weight are a great waste! A waste that is entirely eliminated by the Franklin air-cooled motor.

Much attention, worry and expense are caused by water-cooling—none by air-cooling. It is the most advanced and most scientifically designed cooling system today. Recent long-distance air flights give overwhelming evidence of its superiority. It is now generally adopted by Aviation.

One hundred fewer parts are needed to cool the Franklin than any other car. Weight is conserved—efficiency is increased. There is nothing to fill, drain, mix, tighten, lubricate, replace or repair—no water to boil, freeze or leak. No matter where you are—mountain or desert—or what the weather—biting cold or blistering heat—the Franklin Owner need never worry about the cooling system.

And air-cooling is only *one* advantage of owning a Franklin Airman. Consider Franklin's faster acceleration—long sustained high speed—new long-distance comfort—synchronized, 4-wheel brakes—smoother performance—beautiful colors and styles—smart interiors. These are some of the vital features that make motoring a thrilling joy to Franklin Owners.

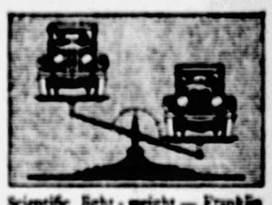
Study carefully what the Airman offers. Be sure to see it. Then arrange for a demonstration and learn the favorable terms on which Airman ownership may now be arranged.

No water to boil, freeze, leak or worry about. No radiator to fill.

Flexibility—responsible for Franklin's long life and freedom from rattles and squeaks.

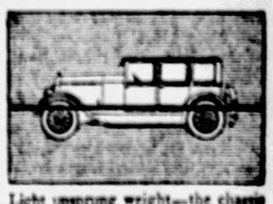
5 *motoring advantages only the Franklin can offer*

Air-cooling—the motor cooling principle definitely proved superior and now in general use by Aviation.



Scientific light-weight—Franklin Sedan weighs 15% to 25% less than other sedans of equal size.

Four full-elliptic springs—the total spring-length on each side is actually greater than the wheelbase.



Light unsprung weight—the chassis and springs reduce the shocks—the body rides smoothly.

(Combining The Pittsburgh Sunday Post and Pittsburgh Gazette Times)

## FIFTEEN BIG EVENTS SET FOR AIR RACE

**Prizes Aggregate $135,000 For Winners at National Meet at Los Angeles.**

LOS ANGELES, March 17.—Completing almost all preliminary details for the holding of the national air races here the middle of next September, the Air Race Association of California yesterday drew up a tentative list of events for the meet. Prizes totaling $135,000 will be awarded the winners of the different races.

The race association has been actively at work since the National Aeronautic Association voted to allow Los Angeles to hold the 1928 races. Final details, including an estimate of the numbers of eastern and northern aviators who will attend, and the final site for the races, are expected shortly. It is estimated that $300,000 will be required to finance the week of races and the international aeronautical exposition that will be held with it.

**LIST OF EVENTS**

The proposed events for the race weeks are as follows:

1. Relay race, open to all type airplanes powered with original type OX motors. Four teams, five ships to a team. Race, 30 miles, each ship to fly two laps of a three-mile course. Prizes, $1,500, as follows: $750 to each pilot of the winning team; $75 to each pilot of the second team; $50 to each pilot of the third team; $25 to each pilot of the fourth team.

2. Free for all, open to all type ships powered with motors of 510 cubic inches displacement or less. Race, 45 miles, 15 laps of three-mile course. Prizes, $2,500, as follows: Winner, $1,250; second, $600; third, $400; fourth, $200; fifth, $100.

3. Free for all, open to all type ships powered with motors of 720 cubic inches displacement or less. Race, 30 miles, 10 laps on three-mile course. Prizes, $1,500, as follows: Winner, $750; second, $400; third, $250; fourth, $100.

**OPEN PLANE RACE**

4. Free for all, open to all type open cockpit planes, two or more passengers, powered with motors of 800 cubic inches or less, carrying a total of 340 pounds, which includes weight of pilot. Race, 75 miles, 15 laps of five-mile course. Corkscrew not to be entered. Prizes, $1,500, as follows: Winner, $1,500; second, $800; third, $500; fourth, $250; fifth, $200; sixth, $100.

5. Free for all, for Aviation Town and Country Club of Detroit trophy, open to all type cabin planes powered with motors of 800 cubic inches or less, and carrying passenger or ballast of 340 pounds in addition to pilot. Race, 75 miles, 15 laps of five-mile course. Prizes, $4,000 as follows: Speed—First, $750; second, $450; third, $300; fourth, $200. Efficiency—First, $1,200; second, $700; third, $400; fourth, $200.

6. Free for all, for Detroit News Air Transport trophy, open to all type cabin planes, single or tri-motor. Speed and efficiency contests. Planes to carry a minimum payload of 1,000 pounds, which load shall not exceed Department of Commerce rating of par load capacity. All planes to obtain and forward to contest committee, with entry blank, a certificate of such par load rating by the Department of Commerce. Prizes, $5,000, as follows: Speed—Winner, $800; second, $500; third, $200. Efficiency—Winner, $800; second, $500; third, $200.

**FOR THE JUMPERS**

7. Parachute jump for precision. Prizes (total), $1,000. Daily prize of $100 to jumper coming closest to the spot for each three days of the meet. Total, $300. Final prize to the contestant averaging the closest jump to the spot for the three days of the meet. Winner, $500; second, $200; third, $100; fourth, $50.

8. Observation type airplane race for Liberty Engine Builders Trophy (military only). Prizes: Individual trophy awards to first four winners. Race, 120 miles, 12 laps of 10-mile course.

9. Pursuit race for Navy planes. Prizes: Individual trophies for winner and second place. Race, 50 miles, five laps of 10-mile course.

10. Pursuit race for Army planes. Prizes, individual trophies for winner and second place. Race, 50 miles, five laps of 10-mile course.

11. National Guard race, open to any two-place airplanes in the service of the National Guard at any point in the United States. The planes will carry a total load of 340 pounds, this weight to include pilot and to be in addition to gas, oil and water. Cockpits may not be covered. Race, 100 miles, 10 laps of 10-mile course. Prizes, $1,000, as follows: Winner, $500; second, $300; third, $150; fourth, $50.

12. Free for all military pursuit plane race, for Spokane Spokesman-Review trophy. Race, 120 miles, 12 laps of 10-mile course. Prizes, individual trophies to winners of first four places.

**LONG-DISTANCE EVENT**

14. Special race, open only to Army Reserve and National Guard airplanes and pilots using PT type airplanes powered with 150-horsepower Hispano motors. Race, 15 miles, five laps of three-mile course. Prizes, $300, as follows: Winner, $250; second, $125; third, $75; fourth, $50.

### 210,132 Debark at Cherbourg in 1927

CHERBOURG, France, March 17.—There were 210,132 tourists landed here from trans-Atlantic steamers during 1927, which proves that the traffic is not on the wane, as this number was 9,168 more than were landed in 1926.

## It Felt Like a "Pocket" Anyway

**THAT YOUNGSTOWN BUMP**—H. H. Campbell, left, is insisting to J. S. McFeatters and J. Warren ("Smitty") Smith, manager Mayer Field, Bridgeville, that the "bump" they got the other day over Youngstown, O., was an air-pocket, despite the fact that it is now definitely established that there is no such thing as an air-pocket. Mr. Campbell, who flew from Indianapolis to Pittsburgh with Mr. McFeatters and "Smitty" as they brought in a new Ryan monoplane from San Diego, tendered his "hosts" a dinner at the Penn Lincoln, Wilkinsburg. A pleasant time was had by all.

## TAIL SPINS

by WALTER CHAMBERS
• Aviation Editor •

THE town bids fair to be flooded with new airplanes this summer. Twenty have been delivered here since January 1. Jack Morris is on his way from Denver to Rodgers Field with a new Eagle rock. Jack Smith is due in San Diego today for another Ryan monoplane, the third Mayer Aircraft has sold since the holidays.

* * *

Like the trees which last week started to bud, aviation in Pittsburgh is almost ready to bloom. There seems little doubt now that before winter comes again three or four air lines will be in operation from here in all directions. Talk of commercial companies continues, with a new "prospect" looming up almost every day. Two new private fields are being contemplated in conjunction with the new municipal airport which, it is rumored, will provide a circle 4,000 feet in diameter, a hundred acres of factory sites and a couple of factories at the beginning.

* * *

The report of John E. Sommers, airways superintendent, Department of Commerce, who week before last inspected "six or eight" sites suggested for the new airport, is expected almost daily now. Then the committee will make its report to the Chamber of Commerce, which in turn, if it is adopted, will refer it to the city and county officials, who have promised to provide the money.

* * *

James W. ("Jimmie") Walker, chairman of the Washington County Board of Commissioners, is another new aviation enthusiast. At the dinner which H. H. Campbell tendered in honor of J. S. McFeatters and Jack Smith, who returned two weeks ago from San Diego in a new Ryan, Commissioner Walker told of plans for a new airport in Little Washington. He promised "some" help from the county.

* * *

Incidentally that was one of the best dinners we have attended in some time. It was in a private dining room in the Penn Lincoln, Wilkinsburg's new hotel. Mr. Campbell, who uses airplanes to advantage in the business of the Republic Casualty Company, sounded the keynote of new thought in aviation when he predicted a sky filled with commercial planes. He flew in from Indianapolis with Smith and McFeatters, and the day before closed a deal which meant an $8,000 premium for his company.

* * *

Cliff Ball attracted thousands to his model display Friday and yesterday in the Penn McKee Hotel at McKeesport. Models of almost every plane now being manufactured in the United States were there, but there still was an even greater attraction, Clarence D. Chamberlin, whose flight to Europe with Charles A. Levine last summer in the Columbia placed him among the immortals in American aviation, was an interested visitor to the display. And hundreds came in the hope of seeing him there.

* * *

Chamberlin's book, which takes Mr. Levine rather severely to task for the way the flight was handled, is now having a record sale. Our copy was stolen from the sanctum three times in as many days by enthusiasts hereabout.

* * *

Getting back to the Chamber of Commerce airport committee, local fans are indeed fortunate in having interested in aviation such men as comprise it. An added incentive to satisfaction is that the resolution which created the committee provides also that they "shall assist in every way in the development of Pittsburgh as an aviation center."

* * *

Arthur E. Braun, president, Farmers Deposit National Bank and a director in more than 20 big corporations, is chairman of the committee. Other members are A. L. Humphrey, president, Westinghouse Air Brake; John F. Casey, contractor; H. H. McClintic, of Marshall-McClintic; James Francis Burke, Pittsburgh attorney and legal counsel to the National Republican Committee; Morris Knowles, Internationally known Pittsburgh engineer, and William L. Monro, president, American Window Glass Company.

* * *

In their investigation of more than 150 sites suggested for the new airport, members of this committee became "sold" on aviation. Their interest in it six months ago was, at the most, nominal. Now they are all enthusiastic. They have done their work with painstaking care, we happen to know. In the name of aviation, we thank them.

* * *

Robert H. (Bob) Hancock, who keeps the government ships at Rogers Field in tip-top shape, as many can testify, opened his aviation ground school Friday in the most suitable building he could find. It's in Sycamore street, Etna, and while it is some distance out of Pittsburgh proper, it was the nearest thing he could find with doors large enough to handle the two planes with which the school begins.

Actual flying will not be included in the course, but from past experience in dealing with Bob at the field, no one is going to get away with anything short of perfection in aviation ground work.

### Offenders Paid Million in Fines

A total of 303,039 persons received traffic summonses to appear in the Traffic Court of New York City last year. The offenders paid $1,324,604 in fines. The magistrates sitting in the courts sent 825 persons to jail.

## 1929 Flying Cloud Announced by Reo

Many advanced features of design and construction, as well as new steering and riding ease, new external beauty and more luxurious interiors, must all be included in any adequate description of the 1929 Flying Cloud, just announced by the Reo Motor Car Company and the R. E. Loughney Motor Company, distributor here.

The 1929 Reo Flying Cloud, it is claimed, is exceptionally easy to handle and operate and is particularly smooth on the get-away, this smoothness being largely due to a new type of clutch plate, the face of which is slightly dished. This clutch is larger and more serviceable in addition to the fact that it has a dampening device embodied within it. This device is installed to relieve any irregular power impulses from the motor.

The 1929 Reo Flying Cloud is provided with an oil level gauge which can be read from the dash. This new oil level indicator is a decided improvement as an addition to the usual oil pressure guage which does not in any way tell the quantity of oil in the crankcase and only registers so long as there is sufficient oil to maintain pressure. The oil pump on the 1929 Reo Flying Cloud is larger, as is also the inlet to the pump. Another improvement in the oiling system of the new 1929 Reo Flying Cloud is found in the filter, through which every drop of oil passes before reaching the bearings.

The new 1929 Reo Flying Cloud is equipped with rubber block spring shackles. This construction does away with 12 bolts and bushings which would ordinarily have to be greased every 500 miles to prevent wear and noise. Another decided advantage of the rubber block spring shackles, which are standard equipment on the new 1929 Reo Flying Cloud, is their ability to control front end shivering, allowing the new Flying Cloud to travel smoothly and surely.

Still another feature which further increases the value and convenience of the new 1929 Reo Flying Cloud is a combination ignition and transmission lock located on the dash and within easy reach of the driver. Removing the key from the ignition lock breaks the circuit to the ignition coil and locks the transmission in either neutral or reverse to comply with different state laws.

The new Reo Flying Cloud is announced as a 1929 automobile, according to Reo officials, because it gives today the riding ease, the handling ease, the safety braking, the simple vigorous lines, the carefully appointed interior and the ability to get up and go which buyers would ordinarily expect no sooner than a year from now.

Although the previous Flying Cloud broke all Reo production and sales records, the new 1929 Flying Cloud, with all its year-ahead advantages, is expected to greatly surpass the popularity of its predecessor, Reo officials believe.

### Drive New Car to Authorized Station

A good idea in getting a new car is to drive it around to the authorized service stations which cover various parts such as tires, rims, ignition apparatus, horns, starting devices, batteries, speedometers. These are usually guaranteed by their respective manufacturers and service stations may make initial adjustments at a charge that may save you many a dollar later.

## Things to Know Of Pittsburgh's 3 Flying Fields

BETTIS FIELD — Dravosburg, near McKeesport. D. Barr Feat, manager; Clifford Ball, Pittsburgh-Cleveland air mail contractor. Air mail leaves Bettis Field 2:30 p. m. for Cleveland. Mail must be in Pittsburgh postoffice not later than 1:30 p. m. Mail due from Cleveland 1:45 p. m., but is sometimes delayed because of lateness of transcontinental connections in Cleveland.

MAYER FIELD—Mayer Aircraft Corporation, Washington Pike, Bridgeville. C. P. Mayer, owner; J. Warren ("Smitty") Smith, manager, chief pilot, instructor. No scheduled flying service during present season.

RODGERS FIELD—Municipal Airport, near Aspinwall. Capt. Thomas S. Voss, U. S. Army, commandant. Robert H. Hancock, engineer; Jack Morris, Rodgers Field or Aero Club of Pittsburgh, Aspinwall, civilian instructor and commercial pilot. No scheduled flying service during present season.

### New Instrument for Study of Mechanism

Research engineers have for several years used strobiscopes to enable them to study the movements of mechanisms that are too rapid for the eye to follow. At the annual meeting of the Society of Automobile Engineers, held recently in Detroit, a new instrument called the Strobarama was shown, which is such a radical development of the stroboscopic principle that it is not comparable with any of the generally known types.

## AERO SHOW SPACE SOLD

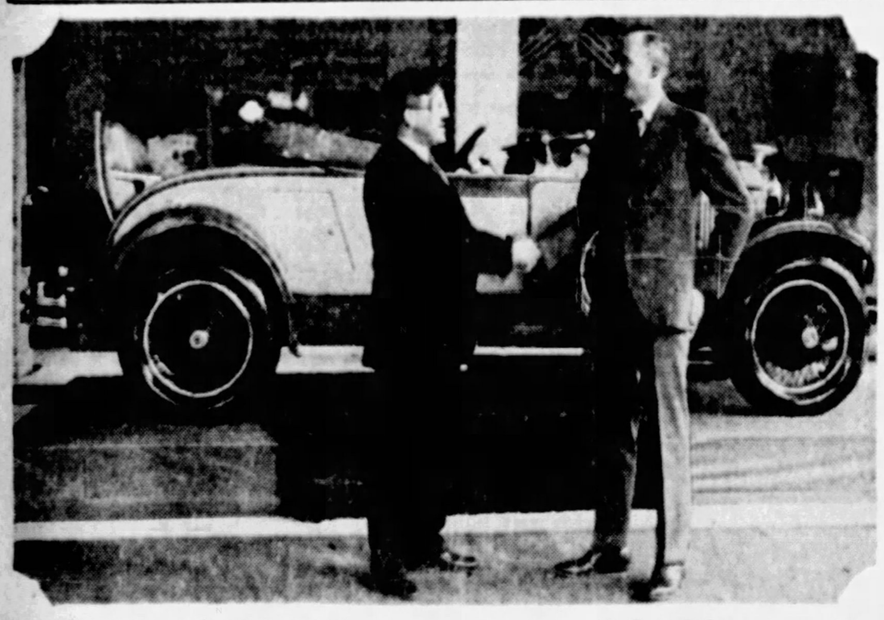
Universal Service.

DETROIT, March 17.—All available space for the All-American Aircraft Show, to be held here April 14 to 21, has been sold out, the committee managing the show announced today. This body included representatives of Ford Motor Company, General Motors and Packard Motor's airplane engine division, as well as local aircraft manufacturers.

No larger collection of aircraft, motors and accessories has ever been housed under one roof than will be revealed here, declared Ray Cooper, show manager, who is working in connection with the United States Department of Commerce and the United States Aeronautical Chamber of Commerce. The latter body has detailed "Smiling Jack" Harding, of round-the-world flight fame, as its agent here to aid in staging the show.

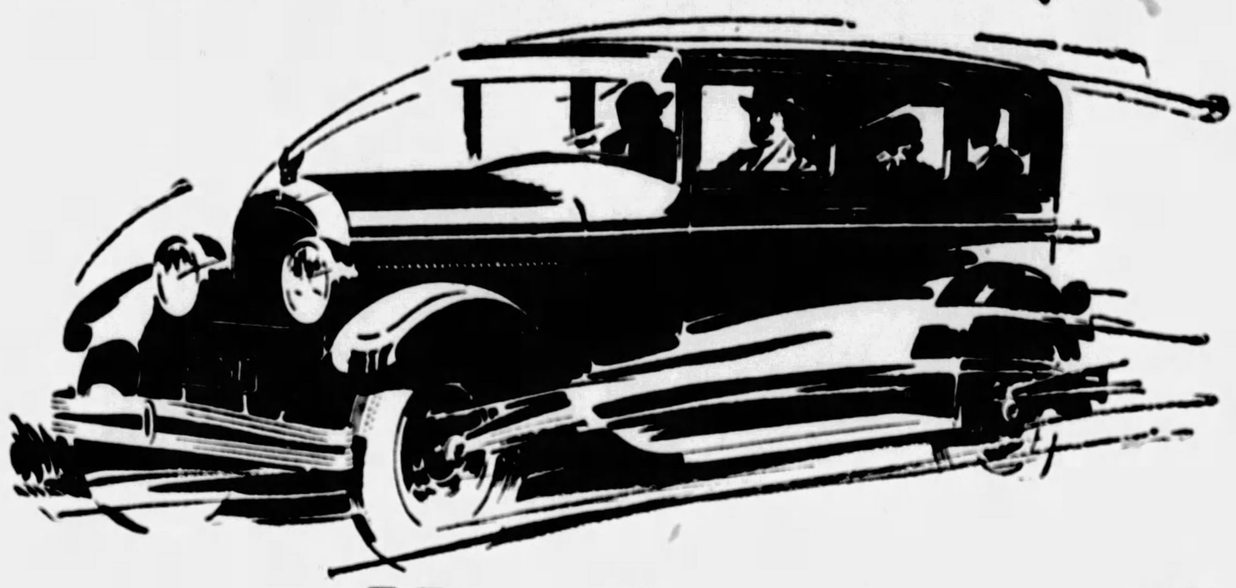
"There will be 61 planes on exhibition by 40 different makers, and at least six of the best known aero engines, while about 40 odd makers of accessories also will exhibit," Cooper said. "There will be almost 100,000 square feet out of the 166,000 feet available devoted to airplanes alone and many new types will be revealed here for the first time," he said. "There will be historical and educational exhibits, as well as one of model airports," Cooper added. He is making an effort to persuade Col. Charles A. Lindbergh to spend at least one day in Detroit during the show.

## Famed Tenor Selects His Car



**DURING STAY HERE**—The Silver Masked Tenor continued his preference for the Oakland All-American Six during his stay in this city last week. He is shown here with C. A. Rehtmeyer, president of the Oakland-Pontiac distributing organization which bears his name, who provided an Oakland car for the use of the tenor while in this city.

# First comes CHRYSLER "72"



## .....all others trail

**Chrysler "72" performance makes all other performance in its field seem as out-of-date as last year's license plates. All you have to do is to ride in a "72," and drive it to appreciate the difference.**

**Only Chrysler's great engineering staff and precision manufacturing organization—only Chrysler Standardized Quality—could have produced such performance results.**

**Only Chrysler engineers could have developed 75 smooth horse power from an engine of such moderate size, insuring economy and long life, as well as extraordinary power.**

**You can, at will, do 72 miles an hour and more—velvety, easy miles—due to this unique and vibrationless engine with *counterweighted* seven-bearing crankshaft.**

**It takes mountain grades at constant acceleration. In traffic, the "72" flashes to the fore with characteristic Chrysler get-away.**

**The safety and simplicity of Chrysler's self-equalizing hydraulic four wheel brakes insure positive braking on all four wheels at one time and make Chrysler brakes surer.**

**Go to any Chrysler salesroom and ask for a "72" demonstration. Drive the car where and as you will. Demonstration will prove to you just how much better the "72" performs.**

*Illustrious New Chrysler* **"72"—Two-passenger Coupe (with rumble seat), $1545; Royal Sedan, $1595; Sport Roadster (with rumble seat), $1595; Four-passenger Coupe, $1595; Town Sedan, $1695; Convertible Coupe (with rumble seat), $1745; Crown Sedan, $1795.** *All prices f. o. b. Detroit, subject to current Federal excise tax. Chrysler dealers are in position to extend the convenience of time payments.*

**New Chrysler "Red-Head" Engine**—*designed to take full advantage of high-compression gas, giving 12% greater torque with greater speed, power and hill-climbing ability; standard equipment on all body models of the 112 h. p. Imperial "80," also standard on the roadsters, and available at slight extra cost for other body types, of the "62" and "72."*

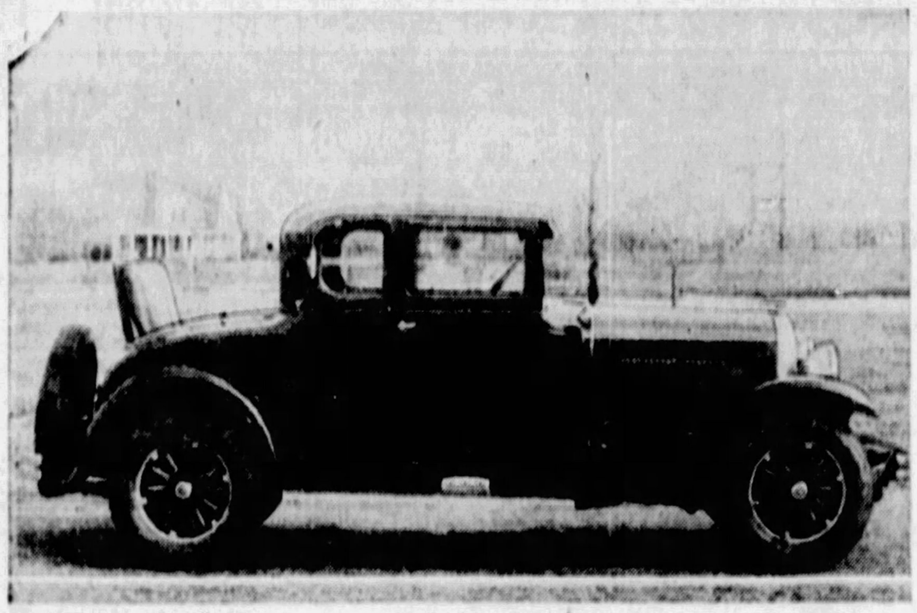
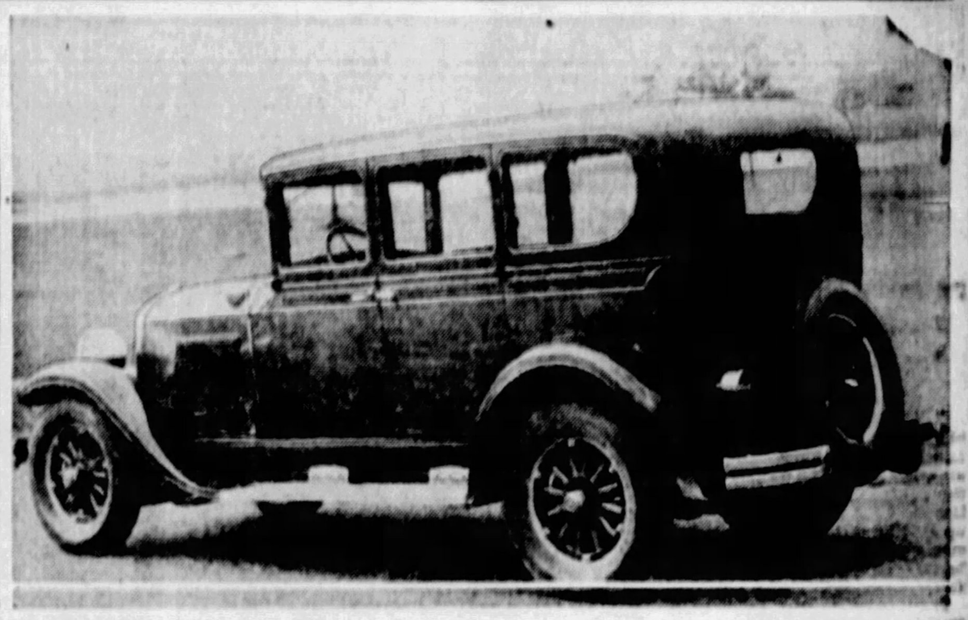
# Substantial Stocks Hold Tire Prices on Even Level

## The Most Modern of Automobiles, First of 1929 Creations of Motor Car Designers





**FLYING CLOUD**—In the 1929 Flying Cloud coupe the Reo company has one of its most attractive models. These new cars embody many new and important mechanical and comfort features, and are described as the cars a year ahead.

**STYLE-POWER**—A narrower and longer radiator with a smart tapering hood make the new 1929 Reo Flying Cloud easy to look at.

**NEWEST SEDAN**—The new Reo Flying Cloud is made in five body types, all of which, including this sedan, will be placed on display here by the R. E. Loughney Motor Company, distributor of Reo and Wolverine cars in this district.

## Spring Replacement Market to Be Strong

DETROIT, March 17.—Irrespective of the current weakness of the crude rubber market there is nothing in the present situation which would warrant tire price reductions now or in the immediate future, according to B. H. Cram, industry authority. This applies on both original equipment tires and replacement tires. Manufacturers produced heavily during the winter months and dealers stocked liberally for the spring rush. Therefore warehouse stocks of manufacturers are heavy and dealer stocks also are substantial. Under terms of their annual spring dating agreement manufacturers are committed to protect all their dealers against price decline up to May 15 of this year. Manufacturers also are committed for an average of 90 days on rubber around 40 cents a pound.

It will thus be fully 90 days before the makers can take advantage of the lower level of crude rubber costs. Price reductions now would compel producers to take substantial losses on all finished goods inventories, in addition to the substantial write-down necessary on crude material inventories. It is estimated that between $250,000,000 and $325,000,000 now is tied up in finished goods. Manufacturers point to the fact that tire prices were reduced about 20 per cent in 1927 and are now the lowest in history and that a further price cut would seriously injure the financial stability of the entire industry.

Tire production has been tapered slightly since the middle of February due to the extreme weakness of the crude rubber market which has served as a temporary damper on both dealer and consumer buying and in view of the current condition manufacturers are seeking to avoid increases in present inventories. Irrespective of crude costs it is believed that the motoring public will soon be forced to buy tires actively, for the last winter has been extremely favorable for motoring and has brought about perhaps the heaviest tire wear of any winter in the history of motoring. This naturally will force many motorists into the early spring replacement market and will break much of the present buying apathy.

### $79,000,000 FREIGHT BILL

During 1927 a freight bill of over $79,000,000 was paid to railroads in the United States and Canada for the transportation of General Motors products and raw materials.

### *Canada's Motor Car Industry Growing*

The Canadian automobile industry has reached the stage where the majority of motor cars used in the Dominion are made in Canada and are practically equal in value to imports.

## Hudson Gets Patent On "F-Head" Engine

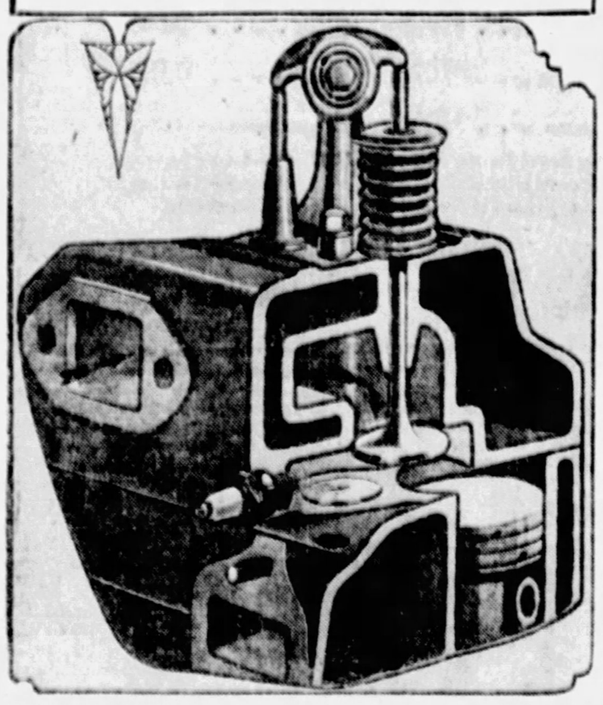
Announcement is made by the Hudson Motor Car Company that it has been granted patent rights on the "F-Head" high compression motor which has been used in all Hudson Super-Six cars since early last summer. The patent—No. 1,656,051, relating to internal combustion engines—covers the entire arrangement of valves, spark plugs and combustion chamber.

A Hudson engineering executive says the patented design is important, because it permits high compression benefits in a large motor like the Hudson Super-Six. High compression, it is said, has proved a far more difficult problem with large motors than with those of smaller dimensions. The task has been accomplished in motors specifically designed for anti-knock gasolines, but the Hudson design is intended for any standard or even sub-standard fuel.

With the new patented design Hudson motors now are built with a compression ratio of almost 6 to 1—or 20 per cent above the average—with correspondingly high standards of acceleration, fuel economy and power. The company engineers say that it is practically impossible to make the motor knock under even the most adverse operating conditions. The motor is described as the liveliest, most powerful and economical Hudson has ever built.

In the patented F-Head design, the intake valve is located in the head of the motor and the exhaust valve at the side. In a way, the motor is valve-in-head as to intake and L-Head design as to exhaust. The intake valve opens to admit fuel in a location just above the exhaust valve. Hence, it is stated, the incoming fuel is drawn directly over the exhaust valve—with a dual effect. First, all "wet" particles of fuel are subjected to the heat of the exhaust valve and chamber, which tends to vaporize them and make them fit for clean and speedy combustion. Secondly, the exhaust valve is subjected to enough of this cooling action so that it never becomes excessively overheated.

### Raising Compression



**AND SPEED**—Presenting the "F-head," latest of Hudson patents. This valve, spark plug and combustion arrangement of the Super-Six motor is said to give a high compression with any gasoline.

### *Water and Ammonia Cleans Upholstery*

Leather upholstery in the open car requires periodic cleaning and dressing, if it is to look its best and wear reasonably well. In this cleansing process, some make the mistake of using gasoline and kerosene. These have the effect of drying and cracking the leather.

The proper agent is household ammonia mixed with a generous quantity of water. Applied with a soft cloth, it will free the leather from spottiness. A good leather dressing then should be applied.

### *India Building Concrete Roads*

Experiments are being made in India with concrete roads. Two long stretches have been laid in the vicinity of Benares. Another concrete highway is to be laid through Allahabad.

### *Soot Plays Big Part in Tires*

Plain, every day soot, similar to that which used to gather on lamp chimneys, plays an important part in the wearing qualities of tires.

Carbon black, a very light powdery material, has become one of the most important compounds used in tire construction. Before the World War, zinc oxide was used in large quantities to strengthen rubber, adding miles to the life of the tire by increasing its resistance to abrasive wear, adding to its tensile strength and toughness. Lamp black and gas black were used but in small quantities and chiefly as a coloring agent.

### *Germany Uses New Night Sign*

Several cities in Germany have installed a series of novel detour and other automobile signs clearly visible at night. These signs have no lights of their own, but reflect the light of the approaching car.

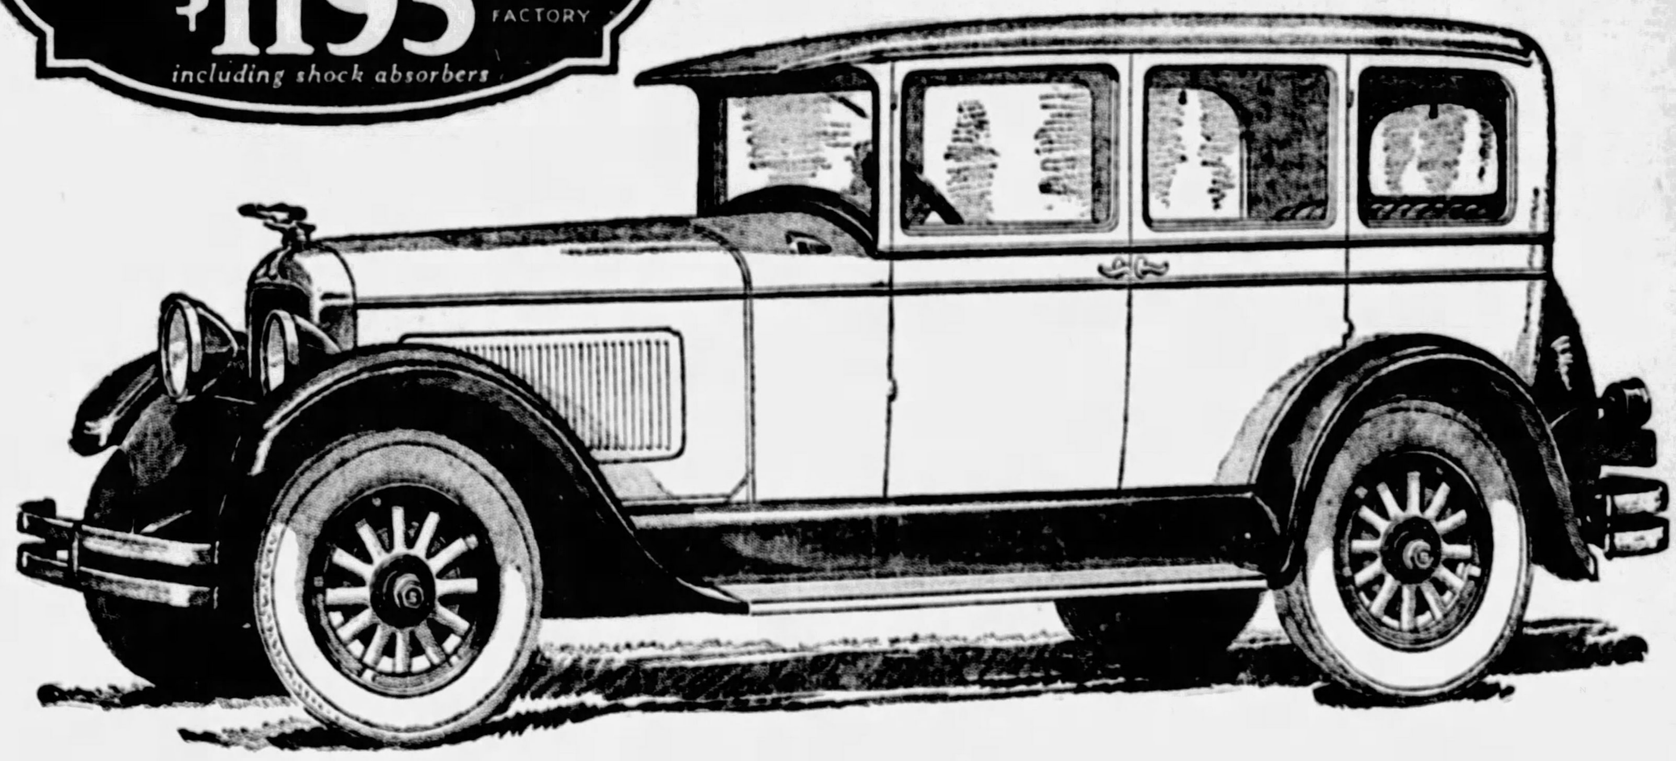
# STUDEBAKER

The Great Independent

THE Dictator 4-DOOR SEDAN $1195 FOR FACTORY

including shock absorbers

55% more power
65 smooth miles per hour



STUDEBAKER engineering genius has increased the new Dictator's horsepower from 45 to 70 and added to its speed. But its cost to you has not been increased. And the new Dictator engine is actually more economical of gasoline than ever before. It delivers a perfectly paced 65-miles-an-hour—accelerates like a rocket—possesses the flexibility of the finest 6-cylinder construction.

*Holds record for cars under $1400*

Proof of the new Dictator's advanced performance was established when a stock Dictator sedan traveled 24 continuous hours at better than mile-a-minute speed. No stock car under $1400 has ever equaled this record.

*40-mile speed even when new*

Due to advanced engineering practices, precision building, high quality materials and rigid inspections which this new Dictator receives, it can be driven 40-miles-per-hour the day it is delivered. No laborious 20-mile-an-hour breaking-in.

*Lubricate only every 2500 miles*

Studebaker engineers have also eliminated the necessity of oil change to but once every 2500 miles. Chassis greasing has been reduced to 2500-mile intervals through a unique system of magazine high-pressure lubrication.

*Engineering genius and traditional quality*

Throughout its design the new Dictator is the product of advanced engineering development—yet its One-Profit price is still only $1195, f. o. b. factory, and it bears a famous name—Studebaker—the highest guarantee of motor car excellence!

THE STUDEBAKER LINE

| Models | Brake Horsepower | Miles per Hour | PRICES (f. o. b. factories) |
|---|---|---|---|
| PRESIDENT EIGHT | 100 | 80 | $1985 to $2450 |
| The COMMANDER | 85 | 72 | $1495 to $1695 |
| The DICTATOR | 70 | 65 | $1195 to $1295 |
| ERSKINE SIX | 43 | 62 | $795 to $965 |

*Shock Absorbers Standard Equipment On All Studebaker Models*

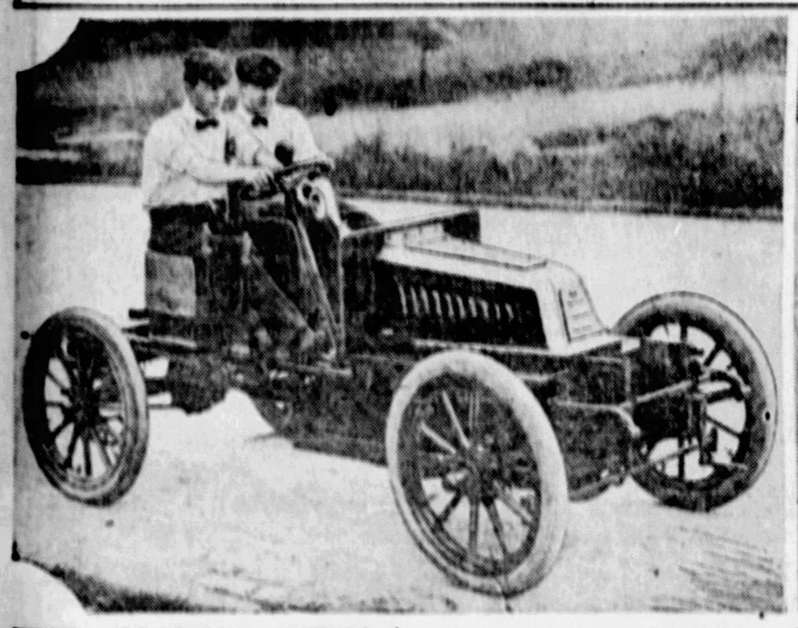
**3941 California Ave., N. S.** — *Telephone LInden 3858*

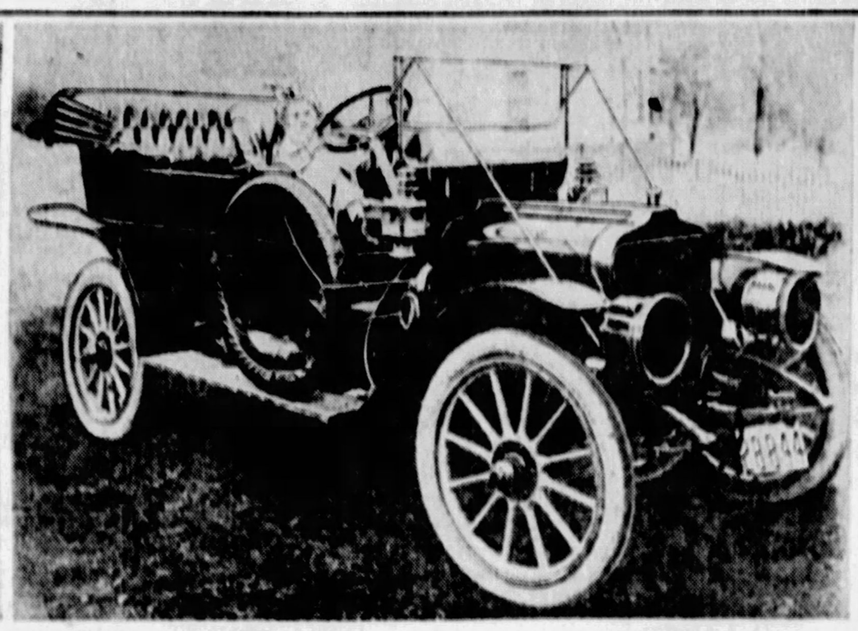
# A. A. A. Officers to Plan for Greatest Auto Migration

## Many Were the Thrills of Motoring in These Cars of Yesteryear

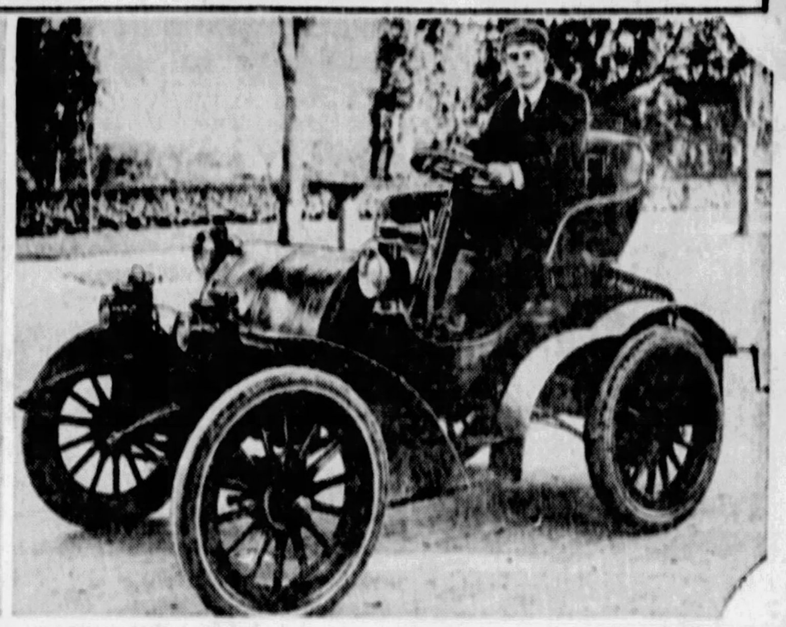
*Send Old-Time Photographs to Automobile Editor, Sun-Telegraph*



**THE FRENCH INFLUENCE**—One of the first Richard Drozier cars, a French creation, to be received in this city in the early days of the motor car industry. At the wheel is O. E. Vestal and his passenger is C. C. Clark.



**TAKING SHAPE**—The car pictured here is one of the early model Seldens, the photograph having been made in 1909. It pictures the early car assuming the shape of the auto as we know it. It was owned by William A. Haller, of Crafton.



**A RECORD CAR**—This machine was driven from New York to Canada and return, a distance of 1,600 miles, July 8 to 22, 1901, a remarkable record at that time. It is a Gasmobile and the driver was O. E. Vestal, of this city.

## FOURTH MEET TO BRING 957 SECRETARIES

### National Motor Leaders to Address Executives on Bettering Service to Members.

WASHINGTON, March 17.—How it may extend and make even more [illegible] its many services to its [illegible] ever-growing membership of motorists generally will provide the keynote of the fourth annual conference of secretaries and managers of local clubs of the American Automobile Association which will be held in Washington March 21-23.

Coming on the eve of the period which is expected to see established the greatest motor migration in history, the conference will bring to Washington the executive personnel of a majority of the 957 clubs that make up the nation-wide chain of the A. A. A.

**EXCHANGE OF IDEAS**

Secretaries and managers from Pacific Coast clubs, from the South, Mid-West and Atlantic seaboard already have made reservations for the conference and it is now evident that virtually every state in the union will be represented.

Providing an opportunity for an interchange of ideas among club executives from all parts of the country and enabling national officials of the A. A. A. to acquaint their representatives in the field with every detail of the broad program contemplated for 1928, the conference is expected to be one of the most successful in the long history of the organization, the statement declares.

In addition to the addresses by prominent figures in local, state and national motor club circles, the delegates will hear several nationally known leaders in other fields discuss subjects pertinent to the motor club movement, including motor taxation and national road development.

**TO SIMPLIFY PATH**

General sessions of the conference will be devoted to discussion of the main features of the organization's program. Important among these are those services devoted to simplifying the path of the motor traveler. That this is an ever more important duty of the motor club is evidenced by the fact that last year local A. A. A. clubs mapped 10,000,000 individual motor tours.

## Chryslers Japanese Coronation Cars

When Japan's new Emperor proceeds from his Tokyo palace next fall to ascend his "high august seat" in Nippon's ancient flower capital, his procession will faithfully reproduce in all respects but one the time-established ceremonial observed by the long list of his forebears who have preceded him along the triumphal way to Kyoto. This one respect will be that the members of the imperial household and diplomatic corps will ride in automobiles.

Already, although the sacred rice which the Emperor will offer to the spirit of his ancestors is barely planted, preparations for the brilliant coronation ceremonies are well under way and representatives of the Japanese government have bought five Chrysler limousines for use on the memorable occasion and thereafter by members of the imperial household.

The cars for this imperial use are appropriately of the Imperial "80" model, and embody all the sumptuous luxury associated with royal usage. They are contracted for delivery in May and are being fitted up in accordance with rigid specifications laid down by Japanese custom. Their color will be the exact shade of red which is reserved in Japan for the exclusive use of the imperial household, but alien hands are not entrusted with the delicate task of painting on them the royal crest which distinguishes all articles set apart for the Mikado's family. That function is to be performed by skilled artisans in Tokyo, who know by long practice the precise outlines of the symbol and who alone can portray them with the precision demanded by tradition.

## DODGE SENIORS IN 20 COLORS

Recent additions to the large and varied assortment of color combinations in which Dodge Brothers senior line is available have increased the number to 20, according to a statement received from the factory by Frank D. Saupp, distributor.

"Almost any day visitors in the 1,350-foot long assembly building, which is devoted exclusively to the production of the Dodge senior line and which is said to be the longest automobile factory in the world, will find cars in 20 different color combinations on the assembly lines," Mr. Saupp says.

"This opportunity of selecting a color scheme expressive of the individuality of the purchaser in contrast with accepting the 'sameness' of appearance which in the past has characterized almost all but custom built cars makes a strong appeal to the buyer. The wide variety of colors in which the senior line is now offered affords the discriminating buyer this opportunity without the delay of waiting for a special job to come through production and the added expense. Women, whose selections are generally influenced chiefly by beauty of line and color appeal, can almost invariably find exactly what they want in the large variety of senior offerings—something different."

## PAIGE ATTAINS RECORD OUTPUT

DETROIT, March 17.—Graham-Paige production figures, which have been mounting steadily ever since the introduction of the new line of cars at the New York show, attained a new high record in the week just closed, when for the first time a single day's output exceeded 300. The largest production for one day was 311 cars.

Although it is only two months since the introduction of the first passenger cars to bear the name of the three Graham brothers, the demand has already caused the breaking of all previous employment records of the Paige company, which the Graham brothers acquired last June.

The employes at the main plant in Detroit now number 3,630, which is 480 more than were ever before on the Paige payroll during its 18 years' history. In addition, the new Graham-Paige body plant at Wayne, near Detroit, employs 1,086 men, making a total for the two plants of 4,116. This total does not include the office employes of the two plants, to the number of nearly 400.

### *Half of Families Ride in Automobiles*

Of the 27,500,000 families in the United States, about 15,317,500 families, or 57 per cent, own motor cars.

## MILLION CARS IN 8 MONTHS

It required General Motors Corporation more than nine years to produce and sell the first million cars. Approximately 1,000,000 cars were produced and sold during the last eight months.

## Drive to Left In 14 Countries

The "drive to the left rule" is still in order in 14 foreign territories, headed by Great Britain, according to a recent survey.

There are 28 countries or principalities in which the American rule of driving to the right is legally enforced.

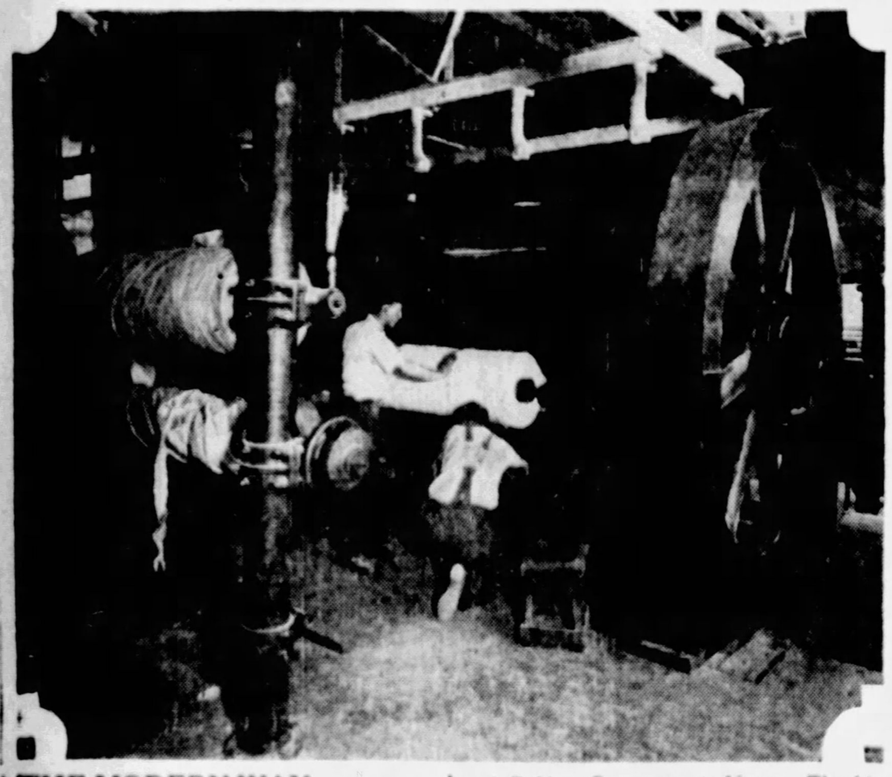
Following are the left-hand territories: Alderney, Argentine, Austria (except Vorarlberg), Czecho-Slovakia, Gibraltar, Great Britain and Northern Ireland, Guernsey, Hungary, India, Irish Free State, Jersey, Malta, Portugal and Sweden.

The countries in which the right-hand rule is enforced are as follows: Algeria, Belgium, Bulgaria, Canada, Dantzig (free city), Denmark, Egypt, Finland, France, Germany, Greece, Holland, India (French), Italy, Liechenstein, Lithuania, Luxembourg (Grand Duchy), Monaco (principality), Morocco (French zone), Norway, Poland, Rumania, Russia, Sarre Basin, Spain, Tunis, Vorarlberg (Province of Austria).

## TAVERNS OFFER FREE GASOLINE

Many roadhouses in Belgium, France and Holland are offering free gasoline as a trade inducement to automobile travelers. One sign was particularly noticed, bearing the invitation, "Stop for lunch and fill your tank."

## One Reason Tires Wear Longer



**THE MODERN WAY**—This is just one of a large number of processes designed to build more life into the tires of today. Here we see the giant Calendars employed in the factory of the Englert Tire and Rubber Company at Akron. The big rollers of this machine apply the rubber to the cord fabric under enormous pressure. The Englert Company recently opened its new quarters here at 3563 Bigelow boulevard.

# Comfort Assured by This *Really Big Car*

You expect it in an expensive car . . . that restful riding ease . . . that deep-cushioned comfort . . . that spaciousness which spells true motoring luxury. But do you know that you can enjoy it in a car of modest price . . . in this brilliant General Motors product . . . the All-American Six?

* * *

You can for these important reasons. Because the All-American Six is a really big car. Because its wheelbase length is 117 inches. Because its bodies by Fisher reveal all the generous leg-room and head-room . . . all the masterly construction . . . all the deep-seated luxury for which Fisher design and craftsmanship are internationally famed.

* * *

Because of its long springs and big, oversized tires. Because of its smoothness and silence at every speed . . . produced by a whispering brute of an engine . . . with 212 cubic inches displacement . . . 79-lb. crankshaft . . . the famous G-M-R cylinder head.

* * *

You'll enjoy real big car comfort. Naturally. Everybody does. And now that you can have it at such low cost, why not come in . . . see and drive the one car that offers it so inexpensively . . . the All-American Six?

*Special Sport Equipment*

Available on all body types: six wire wheels with tires . . . special front fenders with tire wells . . . two special tire locks and locking rings . . . collapsible trunk rack . . . $100 extra on open cars . . . $110 on closed cars . . . six disc wheels with same equipment, $75 on open cars . . . $85 on closed models.

# LUDWIG MARVELS AT 'OPEN DOOR' IN WASHINGTON

## *Simplicity of National Leaders at Close Range Impresses Him*

**SEEN THROUGH THE EYES OF GERMANY'S BIOGRAPHER OF THE GREAT**

*"MRS. WOODROW WILSON is more beautiful than her pictures...In talking with her Wilson becomes less of a problem to understand, he becomes more simple and real."*

*"DAWES is of a pure artistic temperament, but the best politicians are always a bit artistic."*

*"NO one in America could compare with Justice Oliver Wendell Holmes, the oldest and at the same time the finest man I have met in America."*

## 'THE WHITE HOUSE IS LIKE A DELICATE, REFINED WOMAN'

### "Coming from New York, One Will Be Soothed by the Capital's Pace—It Is So European."

**By EMIL LUDWIG,**

*World-Famous Biographer of the Great, who wrote the Life of Napoleon and other noted works, and who is now visiting the United States.*

A FINE country house, standing alone, dignified and simple, without a single sign of power being visible. To me there is no more beautiful and fitting symbol of the simplicity and candor of the American leaders than the White House.

We had expected to find here, just as in Europe, a castle or a palace. When I turn my thoughts from the pomp of the French kings, from the magnificence of the castles in Rome and Vienna, in Petersburg and Berlin, I find the homes of the newly-made presidents in Berlin and Prague, in Warsaw and Moscow, more magnificent because they were the castles of ancient kings. Soldiers guard the entrance, double doors made access difficult, the stranger is warned not to come nearer, for here, behind thick walls, in towers and dark room, dwells—POWER.

Only Switzerland, which has been a republic longer than America, has simple government buildings, and yet one cannot compare the house of the President of this smallest republic with the dignified and cheerful White House, which seems to invite each one to come beneath its old trees and see the representative of the greatest republic on earth.

### *'A Great Symbolical Street'*

There it stands now, like a delicate and refined woman between two menacing buildings which seem to flank her more as possessors than as lovers, and to whom she seems, with all her charms, to belong—the Treasury and the State department.

At first I was amazed that there was no statue of Washington to be seen in his own city. Then I noticed how the obelisk is to be seen from every window and I can understand how this presence of the founder acts as a model and a warning even to the most far-away part of the city.

A great symbolical street connects this lofty stone with the monument of Lincoln—the Founder with the Protector. What a beautiful thought, this wonderful and modest man in the darkness of a great room! There he sits, just on the boundary betwen the North and the South of his country which he united—and then suddenly I thought of Michael Angelo's Moses.

One always has a fear that some day he will stand up and with kingly might crash through the roof, while Lincoln, if he should stand up, would only quietly ascend the steps, start a conversation with the soldiers on guard, and then he would go into some of the small houses of the suburb and meditate upon how and where to do good.

### *"The Openness of America"*

If one comes from New York one will be soothed by Washington's pace—it is so European. People go about more leisurely, automobiles toot less, electrical signs turn more slowly, and the politicians themselves, who all over the world act as if they were the salt of the earth, here are not so terribly solemn.

Never before have I seen a foreign office with the doors standing open. In Europe the doors are double and the inner ones are padded. Here one imagines one is in the tropics, for the doors do not all reach the floor, and, without intending to eavesdrop, I plainly heard a conversation in the cabinet of the Secretary of State.

Most everything seems to be open in America. In the lecture rooms of our universities we do not dare to even open the doors. Here in America everyone can go in; dwellings are not enclosed by fences, the directors of big banks sit right beside their clerks and the sleepers on trains are only divided by curtains.

Within, the simplicity continues.

The smallest country in the Balkans has no more simple and plain room for receiving the ambassadors of foreign countries than this narrow blue room of the State Department, with its leather chairs. That the pictures of former state secretaries hang here and in other departments shows a gratitude which I have not been able to find in Europe.

### *"Mellon's Wonderful Melancholy Eyes"*

The second impression which I had and which harmonizes with the first, is that everyone looked so healthy.

Kellogg came in, snow-white and certainly over seventy, with head and hands slightly shaky, but sunburned a wonderful brown as if he had just come from St. Moritz. His movements were quick and youthful, even boyish. He was accompanied by his assistant, who seemed quieter and like an older mentor of this impetuous youth.

Over there, in the other house was Mellon, one of the finest heads in America. He is also brown and healthy, also over seventy, but in every motion, every word, he is steady, deliberate and thoughtful as a chess-player. His wonderful eyes have a melancholy glance and he is skeptical almost to cynicism. Only the eagle nose betrays the energy which made the son of a small lawyer rise to be one of America's richest men.

In talk and looks he is more like an artist. He defines the struggle of life as a great game, as a chance to win through one's talents. He sees no difference between work for his own profit, which he has done his life long, and work for his country, which he started when over 60 years old.

*Photographs by International Newsreel.*

*"SENATOR SHIPSTEAD, the fine son of Norway, is surely not so radical as people think. In Europe no one would call him that."*

*"SECRETARY MELLON'S wonderful eyes have a melancholy glance and he is skeptical almost to cynicism . . . Only his eagle nose betrays the energy which made the son of a small lawyer rise to be one of America's richest men."*

*"HOOVER is the most serious-minded man I have ever met."—Ludwig. The cartoons of Secretary Hoover, Vice President Dawes and U. S. Senator Shipstead on this page are by Conrad Massaguer, the noted Cuban caricaturist of famous personages.*

### *"A Real, True General"*

"At the beginning of the war," he said, "when the price of ships had soared, we were having a meeting of the shareholders and a certain man wanted to buy my ships from me at any price. I said to him: 'What shall I do with your money in my safe?' At night it makes me happy to think about my ships, that now one of them is in West Africa, another in Polynesia, or that a third lies in dock in Antwerp."

"Do you know," I asked him, "that you talk like the Merchant of Venice?"

He seemed uncertain as to whether or not that was a compliment and as I started upon the social question, he looked toward the clock.

The two imposing houses of Congress surprise one by their stillness. The countries in Europe have greater luxury, and when I compare the marble hall in Athens with the Senate in Washington, I am impressed by the quietness of the one and by the southern loudness of the other.

### Word Snapshots Of Eminent Statesmen.

Such signs of self-restraint on the part of the richest people on earth have important results, for where the government sets an example of splendor and pomp, the nation is only too quick to follow.

The writing table of the Vice President does duty as a lunch table, and so we sat with our knees rubbing against the narrow ends.

During lunch secretaries came and went, telephoned, brought messages and came to have papers signed. It seemed to be the tent of a general in war-time rather than the office of a Vice President in time of peace.

### *"The Mystery of Power"*

Dawes is a real true general—it is no courtesy title—he is even more than a general. I found him to be most courageous, full of speed and above all an enthusiast. There is an air of destiny about Dawes that I have missed in most Americans.

Dawes is of a purely artistic temperament, but the best politicians are always a bit artistic and therefore he does not interest me so much when he talks about the gold basis or the Dawes plan, as when the words slip from his tongue showing that he understands the mystery of power.

**"One cannot measure a man's courage by the position of authority he holds. Through opposition he will always be pushed further and further till he finally becomes more severe and courageous out of a mere sense of self-preservation."**

That was almost a definition of ancient tyranny.

Hoover is his opposite. He is the most serious-minded being I have ever met. If I had not lately seen a picture of him sitting with his dog and looking so pleasant, I would think that he had never laughed in his life—anyway never laughed in his office.

The room is bare, too light, the curtains are puritanical, the chairs are hard, the desk is empty. Everything about this man mirrored order and cleanliness, clarity and promptness.

With an absolutely unconscious feeling of opposition to this accurate world of his, I sat for a minute, upon the smooth, mirror-like writing-table. I am sure that he was far more shocked than his immovable face showed. He liked to talk in numbers, most of all in percentages. He is certainly the most objective being under the sun.

### *A Quaker and an Artist*

He is at the same time thoroughly unselfish and cold. Every German ought to be grateful to him. He laid his own plan for providing for a hungry enemy long before the armistice and this he submitted to the President.

Today he speaks most hopefully of Germany's future and of closer German-American relations. That is most important because he would never stoop to make a pretty speech—he would always objectively take the matter under mature consideration.

One is surprised that a conversation can be carried on without any anecdotes being told. Also one

(Continued on Next Page.)

# 'Steady Production of Jobless Group Must Stop'

**"Labor Saving Machines Are Robbing Humans Of Jobs Faster Than We Can Find Them New and Fruitful Employment."**

**By JAMES J. DAVIS, Secretary of Labor**

**Cabinet Member Expresses Belief That Problem Soon Will Be Remedied—Estimates of Idle Declared Too High.**

WASHINGTON, March 17.

UNEMPLOYMENT worries the country. Close observers began to see it some time ago. The jobless themselves began to be seen and heard from. Now the fact of unemployment has stamped itself on the consciousness of the country. It feels a natural alarm, and this has been fed by numberless estimates. By some the jobless are numbered as high as 4,000,000—nearly one-tenth the number of persons gainfully employed in the entire United States.

These are harmful and hazardous guesses—harmful because they are being accepted as based on knowledge and fact. Certain members of the Senate have taken the estimate of 4,000,000 as close enough to warrant an investigation. It is highly desirable that we face the truth, and reflecting the general public belief, the Senate directed me to obtain the facts as to unemployment and part-time employment and give it monthly reports thereon.

### *Learning the Facts*

To obtain every wanted fact as to unemployment in a country as large as ours is nearly impossible. Nothing short of a census, a ringing of every doorbell in the country, would bring us in touch with every person out of a job. A census would cost between two and three millions of dollars. It would take six months, and by the time the returns were gathered and counted, the situation would have altered and the returns would be without any value whatsoever.

But the Department of Labor has expert facilities for learning the facts as to unemployment in about 10,000 manufacturing plants in typical sections of the country. The returns from these are accurate enough, and should serve as a reliable guide as to conditions in general.

From the studies of unemployment already made by the United States Bureau of Labor statistics, and the employment service in the Department of Labor, it can be said at once that many of the current unofficial estimates are gross exaggerations. In one city where the unemployment conditions were thought to be among the worst of all, a labor organization put the number of jobless at 75,000 persons. Alarmed at this, the local Chamber of Commerce made a study, and cut this outside estimate down one-half.

It happened, however, that in this city a door-to-door canvas was made possible. Every doorbell in the city was rung, every family in it was questioned. The questions asked were fully answered, and the total number thus actually and truthfully found to be out of work was a little over 16,000.

### *Estimates Too High*

The Bureau of Labor Statistics has obtained the same accurate count from typical centers in two other states. There, also, actual count was balanced against the current estimate, and the ratio was the same. From these and other careful early penetrations into the problem, it is wholly safe to say that throughout the country the estimate as to unemployment will be found to be twice too high.

One cause for increase in the ranks of the unemployed should not be overlooked. Before 1921 we were admitting to the country a million immigrants a year. We now restrict immigration, it is true, but it is only restricted and not stopped altogether. The annual entry of aliens has been cut to nearly a third of what it was, but since 1921 there have passed the restrictive immigration requirements nearly 3,000,000 aliens. The adults are nearly all working people, and being new and unused to our ways they are sure to be largely represented in the present unemployment totals.

### *Whole World Affected*

Even with the number of our jobless only one-half what we have feared, the situation is one to be seriously and earnestly considered. And yet the fact that hundreds of thousands are out of work is not a condition singular to the United States, or to any administration.

The truth about unemployment is that it is at present world-wide. It has troubled England ever since the war. Relief for the chronically unemployed, through the system of unemployment insurance, has cost that country many millions. The typical industry of coal is in worse shape in England than it is with us, and from the same affliction—overdevelopment; too many mines and too many miners; ruthless competition among those with coal to sell, and the same competition for jobs among those with labor to sell.

Poland has a serious unemployment problem. So have The Netherlands, England, British Columbia, even Esthonia. The evil is general. Its nearly worldwide prevalence, in fact, is such as to raise the question whether the roots of this evil of unemployment do not penetrate deep into fundamental errors in our entire social and economic life.

In his book, "Ouroboros: the Mechanical Extension of Mankind," Garet Garrett shows in his vivid manner how the introduction of machinery, hardly more than a century ago, has multiplied the population of the earth.

### *Increases in Population*

To condense his argument, machinery cheapened the cost of production, lowered nearly every article of use in price. With lowered costs, more goods could be sold. With the sale of more goods, production was speeded. Increased production meant increasing the number of jobs. It also meant increase of the wealth from which wages are paid.

Machinery has thus made it possible for more people to live and have jobs, and the forces of nature gave instant answer, in an increase of population. In hardly more than a century the population of Europe has more than doubled, where our own has doubled again and again.

In a very large way, machinery has done all this. The very sanitation and hygiene we now employ to save and prolong life we have paid for out of the means supplied by enlarged machine production of wealth.

Is, now, this mechanical slave which man devised to do his work, beginning to turn on its master? Is machine production, which made it possible for many more people to live on earth, now going so fast as to eat up its own creation? One by one we devised machines to displace the old handworker. Now we devise mechanical marvels that displace older machines, and even those who run them.

Is this machine production, in ever greater volume and at ever greater speed, loading us down with a chronic class of the unemployed? If we shrink from the mere problem of counting those so affected, how are we to face the problem of what to do with these people? Warned to be fearless in looking the effects in the eye, we ought to be equally fearless in facing the causes of unemployment.

How far the present unemployment is the result of this mechanical invasion of the fields of human labor is something else that can only be estimated. We have certain telltale evidence, nevertheless.

Machinery is taking over more and more of the work of man power. Inventors are constantly turning out new and better machines. These do more and more work, do it better, in greater volume, and at higher speed. Fewer and fewer men are needed to operate these machines. And one by one the remaining handcrafts, where it has been thought for ages that human skill could never be supplanted by mechanical devices, are now surrendering.

### *The Making of Glass*

Take the making of glass. Until a few years ago glass was blown as it was in ancient Babylon and Egypt. For years inventors had striven to produce a machine that would duplicate the deftness and knack of the human blower and that would have in addition the other qualities that give the machine its value over human labor—capacity to turn out a product in vastly greater volume, and therefore at vastly lesser cost.

For years the inventors strove in vain. Now the glass industry, one of the last land industries, has been converted almost over night into an industry ruled by machinery. Like the typesetter of old, the blower of glass is in the discard, and where one man formerly could produce 100 two-ounce prescription ovals, he now produces 2,906 with a machine.

In the blowing of one staple product of the glass industry, the

# WILL SMASHED ATOMS SOLVE THE RIDDLE OF LIFE?

## *Smallest Substance Known to Scientists Gives Dr. Millikan Key*

## HOT SPARK EXPLOSIONS REVEAL ELECTRON WONDERS

### Delicate Experiments at Pasadena Laboratory Show Electrical Particles That Revolve in Atoms Like Planets in Solar System.

**By DR. ROBERT ANDREWS MILLIKAN,**
*Discoverer of the Cosmic Ray and Nobel Prize Winner, in an Interview with GOBIND BEHARI LAL.*

PASADENA, Cal., March, 1928.

*ATOMS! Electrons! Rays! These three things keep Doctor Robert Andrews Millikan and his brilliant fellow scientists ceaselessly busy in the Norman Bridge Laboratory of Physics, California Institute of Technology, at Pasadena.*

**Atoms—electrons—radiations" are, so to speak, the star keys that science is using to study the rules by which Nature plays her great game.**

*Dr. Millikan has unsurpassed knowledge of these things acquired through daring and original experiments. This experimental work is the outgrowth of a new idea developed in the last 20 years.*

**"I MAY call it the conception that all matter is electrical in composition," said Dr. Milikan.**

**Is everything made of "electricity"? How do the scientists know that? What use will they make of such a knowledge?**

*These questions were put to Dr. Millikan, and his replies open new fields of science before a layman.*

*The atom is the name of the smallest particle of matter. Every substance in the world is built of atoms, just as a house is built of bricks or stones. The atom is so unbelievably small that if the head of a tiny pin were enlarged to the size of a big mountain one of the atoms of which it is constituted would not be larger than a grain of sand.*

**"An atom of hydrogen gas enlarged 10,000,000 times," said Dr. Millikan, "would be like a football, about three feet in diameter."**

### *Inside of a Single Atom*

*And, like the football, the center of an atom is empty, except for two very small things, the electrons. "There is vacuum within the atom between the electrons," Dr. Millikan explained.*

*The inside look of the atom of hydrogen reveals only this: Within the hollowness, or space, there is a nucleus at the center. And on the outside limit there is something that keeps revolving around the nucleus.*

"It is like the solar system. You have the big space of the sky. Now, in the central position of the solar system, there is the sun. And around that there revolve the planets.

**"The same is true of the atom inside. The sun or nucleus of one kind of electrical particle. We call it the positive electron, or shortly—the proton.**

"The planet-like thing is also an electrical particle, but its electricity is negative. This is known as the negative electron, or, briefly, just the electron."

*According to what Dr. Millikan was saying to me, I realized suddenly that there were billions of solar systems, universes, full of "suns" and "planets"—these "protons" and "electrons"—were contained within a five-cent nickel-piece, such as I paid to the car conductor who took me to the Millikan laboratory. Again, there were untold suns and planets locked in a tiny drop of water or oil.*

### *How an Atom Is Smashed*

**"ALL the protons are alike. And all the electrons are alike," averred Dr. Millikan.**

*That is, the electrons in the atom of iron were precisely like the electrons in silver or gold or anything else.*

"All the protons were charged with the same sort of positive electricity, and all the electrons with the same kind of negative electricity."

*But, of course, the atom of one metal let's say, had a certain number of electrons within, and the atom of another metal had a different number of electrons inside it. It was as if each atom had a different number of planets running around its sun or central proton.*

"We have just finished some important work with our Spark Method of analyzing the spectrum of excited [illegible]" he said to me,

*[illegible]ant that Dr. Millikan smashes up atoms with a very hot [illegible]tricity. Under a terrific shock, the atoms are broken, so [illegible]t happens is simply that some of the electrons are set fr[illegible] atom.*

**"W[illegible]m loses one or more of its electrons," Dr. Millikan s[illegible] we call it the stripped atom. In this process of getting st[illegible]pped, the atom is thoroughly excied.**

"An excited atom sends out radiation or rays. And it is by studying these rays that we can tell just what sort of excitement is going on inside the atom.

"There is a different kind of radiation for every different change within the atom. If one electron is shot off, the ray is of one sort. If two electrons are emitted, that is also disclosed by the radiations. When an electron jumps from its usual path or orbit into a new path or orbit, the rays that come out of the atom signal the precise change from old to the new position of the electron.

### *A Strange Operation*

"Of course, you don't have to see the rays. It is better to have them photographed. Then you can study these photographs and each change in the picture tells the whole story"—

*This strange operation is known as "Spectorscopy." In its simplest form, anybody knows what it is like. When you look at sunlight or any light through a glass prism, a triangular glass, the light appears broken up into many color rays. Each color ray denotes just one kind of substance that emits that ray when intensely heated. Thus, by looking at the band of colors, you can tell, if you are a chemist, what materials in the sun are sending out these rays that, put together composed the plain or white light.*

*These bands or rays, produced when the light is split up into its elementary rays by the prism, are spoken of as the spectrum of that light. Now, red light or yellow light has a special kind of spectrum. There are in the red band or spectrum of the sunlight certain bright or dark lines that show just what kind of substance this color ray comes from—perhaps iron. Every gas when it is in flame throws a particular sort of spectrum and that contains a special kind of line or two in it.*

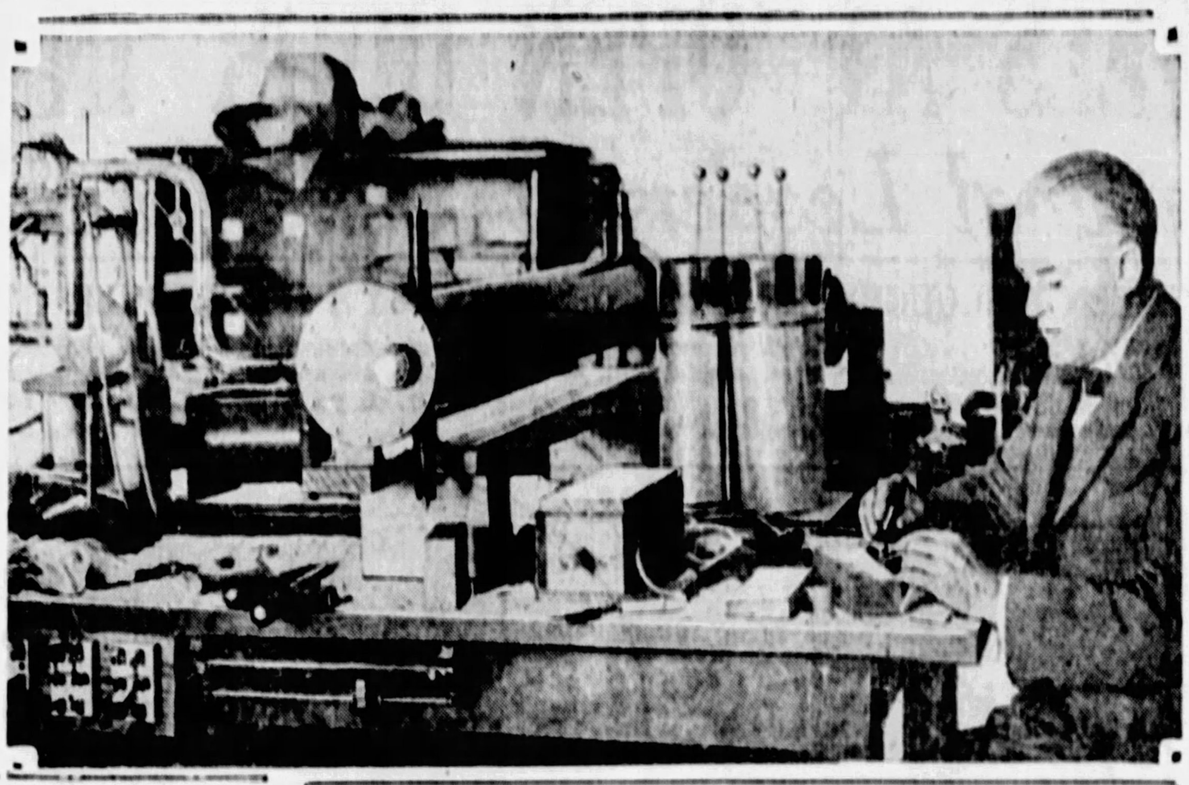
*What do the lines in the spectrum of any flaming gas mean? Only this: that the electrons in the atoms of that gas are in a certain condition. If the atom loses any electron, the line in the spectrum of the rays emitted by that flaming gas shows this fact.*

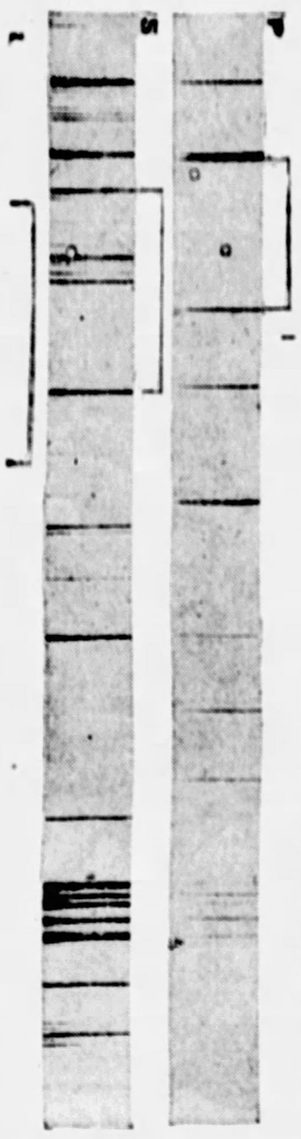
### *Stripping Electrons*

*You don't have to use a prism in all your work of separating the spectrums or radiant bands thrown by any group or rays. This can be done also by using what are known as "gratings," or mirrors of metal, upon which minute lines have been etched. Rays falling upon these lined mirror surfaces are reflected, but in such a manner that they produce spectrums.*

*Now, you can photograph these spectrums, produced by the grated mirror surfaces, and showing the spectrums of the various rays that were shot out of some burning substance in one pack, but now separated in different bands of rays.*

"I developed the Hot Spark Method in Spectroscopic study of the atoms in 1919 and 1921 with the collaboration of Prof. Bowen,"





*SPECTRA of an excited atom that has been smashed with a hot electric spark.*

said Dr. Millikan. "By means of it, it is possible to push the exploration of the spectrum much farther down into the ultra-violet field of radiations. I had the assistance of Dr. Sawyer also in this work.

"As a result of these experiments, we've learnt all sorts of spectral lines, which can be emitted by the lighter atoms—that is, the atoms of lighter metals or other substances—in all the stages of the stripping of these atoms. I mean the stripping of the electrones from the valence, or outer, shell of the atom."

*Dr. Millikan exhibited his Hot Spark apparatus. It is a large device, the most important part of which is a little over a yard in length. It is about ten or twelve inches in diameter. There is an air pump, operated by electricity, connected with the tube.*

*The air pump takes out all the air. What Dr. Millikan wanted was a perfectly air-free or vacuum container, and so this apparatus was devised.*

*It is in the tube that the Hot Spark is generated, and the atoms smashed.*

**"You see at one end of this tube," the great scientist explained, 'an arrangement to connect two ends of a powerful battery. I mean, we send into the tube a charge of electricity as strong as 10,000 to 25,000 volts.**

"At the two terminals of the wires, one carrying the negative electricity, the other positive, lithe metal cylinders are attached. And it is in these cylinders that we fill some powdered substance, which we desire to smash. Thus it may be powder of sulphur or aluminum of magnesium, or sodium or anything else.

### *Spectrum Analysis*

"Now turn the attention to the opposite side. There is inside the tube, a meter length away from and opposite to the Spark Point, a diffraction grating—a metal mirror that analyzes the rays that fall upon it into spectrum bands.

"These spectrums again return to the direction of the Spark, but the reflected spectrum or rays that give the spectrum fall upon a moving photo-film. The film turns in such a manner that the various rays reflected by the grating are photographed exactly according to certain time intervals.

**"When the Spark is passed,** the metal powder between the spark-producing wire ends is exploded, so to say, the atoms are smashed up, and lose their electrons, thus the atoms are stripped. Each stripping of the atom, each change of the electron position, is signaled by the emission of a particular ray, and that is photographed. So, by looking at the photograph, we obtain the spectrum records, showing the various strippings of the atoms of any substances.

**'Among the atoms of a lighter sort we have stripped nitrogen, oxygen, carbon, lithium, then sodium, magnesium, aluminum, silicon, phosphorus, sulphur, chlorine and many others. The interesting thing about many of these, like sodium and aluminum, was that the electrons in their atoms had a similar formation, but the protons had a different charge in each.**

**"This study of the atom by spectrum analysis—Spectroscopy, as it is called—has grown so fast that in the last two years a new set of rules has been developed."**

***Through these experiments Millikan and his fellow scientists have found strange things about the movement of the electron around the proton. (1) The electron makes an egglike or elliptical path around the proton. Sometimes, this orbit or path becomes an exact circle. (2) Electrons spin, so to say, about their own axis. (3) The direction of the spinning movement affect the magnetic properties of the electron. And no two electrons in any atom can occupy the same position at the same time. And so, no two electrons can have the same sized orbit, same spin direction or speed, and orbit of the same shape or direction in space.***

### *Jumping Electrons*

"You see at once a similarity between the whirling of the earth or any other planet around the sun, and the whirling of the electron around its proton within an atom.

**"The planet keeps going in the same orbit, or path, around the sun. But the electron jumps from one orbit to another. It may jump closer to the proton, or farther away.**

"And whenever such a jump occurs, th atom discharges a radiation, a ray of energy. This energy is equal to the difference between the energy of the electron's first orbit and the energy of its second orbit position. Now, you understand why the spectrum or the picture of the radiation tells us about the jumping of the electron. We know precisely what new orbit the electron has taken. What shape, what angle, what spin and so on, the new orbit has compared with the former one."

***The electron jumps from one orbit to another also in certain simple steps, one after another in a step-by-step manner. The radiation itself seems to go out of the atom, when the electron jumps to a new position, in unit bits of energy. This is a very new idea in science, and is known as "the quantum theory." Einstein has done much to create it.***

*According to this idea, the rays of light consist of small equal units of energy, shot out like the bullets of a machine gun. Dr. Millikan said about this: "In the case of radiations from the atom—as light rays, for instance—the situation is this: Energy goes out, in concentrated spots or packs or corpuscles, so to say. Each such concentrated bit is a unit or quantum."*

***From the atoms to the stars! The atoms on the earth are similar to the atoms in the stars. Science does not recognize that the stars are made of different material from the earth's material. The same 92 elements are found in the universe at large as here. In fact most of the stars are composed of only a few of the elements known to the chemist.***

*There is one thing in the sky that especially resembles Dr. Millikan's vacuum hot spark tube. And that is the Nebula, visible to the naked eye on a fine night, as a faint misty cloud of stars or stars and gases in ignition.*

*Now, it was Dr. Millikan's associate, Dr. I. S. Bowen, who knew so much of the stripped atoms in hot spark experiments, who discovered the truth about Nebulum.*

**Doctor Bowen said: "Nebulum was not a new gas. It was a mixture of two gasses that we all know so well. This substance in the nebulae consists of atoms of oxygen and nitrogen. That's all. But these atoms are in a peculiar condition. They are, as you may have guessed, stripped atoms. That is, they have lost some of their electrons.**

"I found that oxygen had lost, in some cases, one electron, and, in other cases, two electrons, from each atom. Nitrogen had lost one atom.

**"Now, the peculiar thing was that this stripping took place in a condition of extraordinary vacuum. That is, the substance of the nebulae is very thin, almost like a vacuum, only a greater vacuum than we could produce in our hot spark tubes in this laboratory.**

"Imagine a cubic inch of air on earth to be expanded into a cubic mile of space. How thin it would become! How far apart the atoms would be free from each other! An atom that has lost its electrons can go about for a long time without meeting another atom in such a low density as exists in the nebulae.

### *How Electricity Flows*

"It is when an oxygen or nitrogen atom is in a fiactastable condition—that is, when it is stripped but emits energy rays very, very slowly—that it is like these atoms in the nebulae. My work with Dr. Millikan here enabled me to discover the composition of the so-called nebulium."

*Another extraordinary discovery has been made by Professor Millikan and Dr. C. C. Lauritsen. It is about the way in which the condition of electricity takes place in metals. Since the conduction or flow of electricity simply means the movement of the electrons, the investigation concerned the energy of the electrons that conduct electricity, with or without heat.*

*Could Doctor Millikan extract electrons from a cold metal? That was the question. If he could, then it would be proved that the energy of the electrons was independent of the temperature. As a matter of fact, Doctor Millikan and Doctor Epring and Doctor Lauritsen have succeeded in extracting conduction electrons from cold metals.*

"Our problem was to extract or pull out conduction electrons from cold metals by applying to these metals a strong field current of electricity," said Dr Lauritsen "A piece of wire was put in the neighborhood of an electrical terminal, radiating electrical energy. The wire did not touch the electrically charged terminal, yet a current of electricity was shot out of the wire. That is electrons, the units of an electrical current, began to go out of it."

*The wire used was made of the metal called tungsten. It was so fine that it seemed like a baby's hair. It was no more than one five-thousandths of an inch in diameter, or, to be more exact, six ten-thousandths of an inch.*

### *Use High Voltages*

*In the middle of a glass tube, from which the air had been exhausted, this tungsten wire was held vertically and around it was mounted a small jacket of metal, but not touching it. In fact, there was half an inch or so distance between the wire and the cylindrical metal jacket. To this jacket was connected the terminal of an electrical battery charged with a 10,000-volt negative charge. The terminal contacting with the wire led into an electrometer, or galvanoscope, that measured any current produced in the tiny tungsten wire.*

*Of course, the tungsten wire was not in touch with the 10,000-volt electrical pole. But it was within the field of influence of the electrical charge that passed through the jacket surrounding the wire. When Doctor Lauritsen sent a high voltage charge the tungsten wire immediately shot out electrical currents.*

"If the charge of the current is 22,000 volts," Dr. Lauritsen explained, "that produces an electric field of 2,000,000 volts per centimeter. This field strength is so great that it pulls out the electrons from the tungsten wire that is in this field.

"The electron extracted from tungsten was strong itself. It was as much as 5 milliamperes or 50 watts power. In the apparatus this resulting current goes into the Anode or the positive terminal."

*As the high voltage passed, the tungsten wire began to emit electrons and also X-rays. The jerked-out electrons from the tungsten hit the walls of the vacuum tube and the metal jacket and X-rays were exhibited. The tube began to glow with all sorts of radiations."*

"Electrons go out. That means electricity goes out. But this also means that the very substance of the metal is turning into electricity. Can matter turn directly into electrical energy, or any other kind of energy?

"Is electricity made of these grains, called electrons? Are matters or atoms also made of the same electrones? And so all matter is nothing but electricity?"

*I put these questions to Doctor Lauritsen, and he replied that this was close to the prevailing views of science. As regards the experiments made upon cold metals, he added:*

"Our results show that the electrons that bear or conduct electricity in any metal are simply the lightest of the elements. At ordinary temperature, they are not affected by heat in their conduction power. They can be extracted from the metals directly, by the strength of field currents. The sort of electrons that conduct or bear electricity when the metal is heated may be called Thermions. So, the electrons that I pulled from the tungsten wire are not Thermions."

"The long and the short of it is this," said Professor Millikan: "We believe that these operations will prove important in solving the fundamental problems of electrical conduction in metals."

*Professor Millikan made this statement regarding the significance of scientific investigations:*

"If you consider the development of Spectroscopy in the last 14 years it gives a remarkable illustration—

"FIRST, of the rapidity of our modern scientific advance; for a whole huge domain, a veritable dark continent has been explored and reduced to order and civilization in less than 15 years—

"SECOND, of the power of the two tools that the physicist employs, Analysis and experiment, when they are properly used together, to force open nature's most tightly barred and bolted doors, and wrest from her most jealously guarded secrets for the enrichment of the life of future generations.

"Every bit of knowledge of nature adds so much to our control over her. That is, adds to our ability to turn her hidden forces to humanly useful ends!"

*DR. ROBERT A. MILLIKAN, distinguished scientist and Nobel Prize winner, and the vacuum spectrometer with which he has made important discoveries in atomic research. Some experiments have been in the field of ultra-violet radiations.*

## EMIL LUDWIG MARVELS AT 'OPEN DOOR' IN WASHINGTON

### "Coming from New York One Will Be Soothed by the Capital's Pace — It Is So European," Declares Biographer.

(Continued from Page One, This Part.)

marvels that all the officials hold him in such great affection.

I believe that he is not so happy as Dawes, perhaps because his natural ambition is curbed by his puritanical principles, whereas Dawes is simply himself.

Hoover and Dawes—a Quaker and an artist; the man of duty and the man of ideas; a man who never uses his lunch table for a desk and the man who eats on his desk.

In daily life Hoover will surely give each his due; in case of real need he will give more. Dawes, in daily life, will give freely; in case of need he will give with an open hand, but at a distance.

I see these two men before me—Themistocles and Aristides.

Among the Senators, Borah looks the most like a German. He also looks like Beethoven and with his blue eyes and soft features and 'cello-like voice he reminds one of our own romantic authors.

### *An Original Thinker*

I wonder if he is so strong and eager. I do believe that he is absolutely honest and that he does understand the Old World. He keeps America out of the League of Nations, but he would like to have America belong to the Court of Justice at The Hague—we, too, would like that if it were in any way practical.

Anyway, his room is the only one in America where I have seen a picture of the old grandmother, "The Map of Europe."

Shipstead, the fine son of Norway, is surely not so radical as people think. In Europe no one would call him that. He is only very independent, sincere and clear-headed. He would like to go back to the old political methods. Just as a Quaker runs away from the confusion of the Commentary and takes refuge in the Gospel!

Shipstead is an enemy of all kinds of Pharisees, and therefore he is not greatly loved. Without being a demagogue, he could accomplish a great deal as a tribune, for there is something constructive in him and his thoughts about revolution through knowledge displacing political revolution stamp him an original thinker. In a crisis men of his sort take the lead, almost over night.

### *A Modern Pacifist*

Mrs. Woodrow Wilson is more beautiful than her pictures. In Europe people have spun all sorts of fairy tales about her, and in New York I heard a few speak well of her. Whether she influenced Wilson is a subject open to discussion. The wisest men in all walks of life not only allow but even seek the advice of women.

I was curious about this wife of a man whom a small minority of Germany obstinately stand up for.

Mrs. Wilson's intelligence is like a fire that does not glow perhaps, as it used to, it is more even and subdued. In spite of her hard position she does not play the role of a Niobe, but naturally her strength and youth have been somewhat suppressed by the dignity with which she devotes herself to her dead husband's memory.

In talking with her Wilson becomes less of a problem to understand, he becomes simple and real.

Upon comparing what Lloyd George said to me about Wilson with what Mrs. Wilson told me about Lloyd George, I concluded that it is very hard to write contemporary history, and I also concluded that I must depend entirely upon myself.

Among the Congressmen is huge old Burton, who is the most modern sort of a pacifist and an open enemy of all nationalistic exaggerations.

Just as fearless, but far more delicate in every way, is Justice Brandeis, who looks like a chess player, but did not seem to be aware that just behind his finely formed head I could not help remarking the knees of the Venus di Milo.

In his home I heard Goethe mentioned for the first time in this country. A lady asked me the other day:

"How does one spell Goethe?"

Anyway, Brandeis seems to be a perfect treasure-house of knowledge of European affairs and good qualities.

With him humanity becomes more human and he does not attempt to force his skepticism, which is almost idealism upon the country.

### *"An Incomparable Vision"*

But no one in America could compare with Holmes, the oldest and at the same time the finest man I have met in America. When this 87-year-old man sits in his easy-chair before his open fire place and one hears his firm voice while he tells his thoughts filled with goodness, humor and freedom, one believes him to be about 60 years of age.

But when he stands up and one sees the bent back weighed down by the weight of years, then one realizes his age. His fellow-citizens consider him an authority on world affairs. He never reads newspapers but one sees on his table all the latest memoirs and in talking with him one feels that he understands the questions of the day better than any of us.

Each week he sits in the highest court of justice, studying legal documents. How he protects our times, especially our youth, and in what a friendly way he overlooks its weaknesses and tries to accentuate its good qualities, while all the time in his heart he thinks that there is nothing new under the sun. His judicial discernment often opens a door of the knowledge of life and then how his eyes gleam; an incomparable vision!

He talks about olden times as it were only yesterday. One would think that it was only last Sunday that he had spoken with Lincoln. At the time of the Civil War he was a young married man.

"My dear boy," he said and I felt most flattered, as he touched my forehead, "the best way is to be enthusiastic here, and here in the back part of the head be skeptical."

### *"This Wonderful Man"*

As I left this wonderful man and came home I saw a fine healthy boy standing in front of my hotel room door. He wanted my autograph. He was 76 years younger than Holmes so I could say to him "My dear boy," for according to age I stand somewhat in the middle between them.

While I contemplated with a sort of envy the hole in his stocking, I asked him if he read books.

"O, Doctor! Napoleon is a wonderful book and Son of Man that is now running in a magazine is much nicer to read than the same story in the Gospel with all its old verses and chapters. It is too bad that I have not got enough money to go to your lecture."

The next day he sat in the front row and took notes on the lecture.

In the evening someone rapped at the door and there he stood again, this time with a small package in his hand.

"My father brought me this from China."

It was a valuable little bronze Buddha.

I reproached him, and told him his father might be disappointed, and he replied sivly:

"Oh, no, he likes your books, too. Anyway won't you sometime write a life of Beethoven? I just love to hear of Beethoven."

"I have written one and next year it will appear in English."

"Three cheers," he cried, and threw his cap in the air.

"Won't you visit us some day in Europe? Here is a picture of our house and those are my dogs."

He beamed with pride as he took the picture and disappeared while the hole in his stocking gleamed white.

As long as America has such figures as this old man and this boy, she can be just as proud as she is and let all the European criticisms go to the devil.

# Can 'Strong Man' Learn Character Building from 'Weak Woman'?

## *Negative Weakness in Make-Up "Not Rooted in the Flesh"—Ridding Oneself of Irresoluteness and Taking on Firmness.*

## *What Women Have Already Done To Show That Character Can Be Changed.*

By WILL DURANT,

*Distinguished for His Remarkable Success in Arresting the Attention of the Country Upon the History of Thought. His Writings Include "The Story of Philosophy" and "Transition."*

WE HAVE in a previous article drawn two ideal portraits, of negative and positive character, and have made a division of humanity into weak and strong. We have described the negative type as usually conscious of some physical inferiority, as timid, hesitant, submissive, lazy, secretive, shy, idealistically imaginative; and the positive type as healthy, confident, curious, masterful, active, social and realistically intelligent.

Left so, these pictures would be extreme and useless; but placed side by side they make it easier for us to analyze, and perhaps to reorganize, ourselves. Can we rid ourselves of negativity and weakness, and take on some of that positive firmness which is the secret idol of our hearts? Can we, by taking that thought, add a cubit to our statures?

It is usual to answer this question with a pessimistic No; a man's character, we are told, is his fate; and what he is at birth he must remain to the end of his earthly chapter. Human nature, it is said, never changes. And very often the qualities of character are rooted in the condition of the body, in matters of health and strength and organic structure and function; how can characteristics so based be changed?

### *What Our Time Has Given Us*

Strange to say, there are facts, staring us in the face, that cast grave doubt upon this ancient dogma of the unchangeability of human nature. The history of our own time has given us a profound and startling example of wholesale transformation of negative into positive characters.

If our age is so replete with economic and psychological transitions that we grow a little unbalanced as we contemplate it, we are repaid not only with the zest of a complex life, but with the opportunity of watching and studying the processes of social changes as if we stood in a great laboratory, experimenting with a world.

Fifty years ago one might have described women as normally negative in comparison with men, and one might have labeled them with most of the adjectives that we have used to describe the weaker type. Their physical handicap was the basis of a sense of inferiority that revealed itself in the secret regret, lurking almost universally in the hearts of women, that they had not been born men; and out of that "complex" came a burning resentment, like some subterranean fire, that periodically erupted in the hot lava of their speech.

### *Woman's Lot in the Past*

It was their nature to be gentle in action; and if at times they were violent in words, it was in compensation and "over-correction" of that physical subjection which met them like a nemesis at every turn in the road of life. They were the "weaker sex."

It was on that bodily basis that the diffidence and submissiveness of woman rested. She did not thrill so much as the male with the lust for achievement; indeed, her lot seemed to be the same from generation unto generation—always and only the adventure of motherhood. She bowed to her master, took his blows affectionately, surrendered her name and property to him with her flesh, and sought her happiness in accomplishing his will. Life was hard and dull for her, but she made up for it by reveling, as often as she could, in romantic fiction and poetry that raised her for a while into a brighter world.

And then suddenly the industrial revolution caught her up and flung her into the office or the factory. Variety entered her life like a flood, individual responsibility and economic independence came; she earned her own money and molded her own morals.

### *Outgrowing Negativity*

She had already suspected the superiority of the male; she had always found him, in elementals, gullible and tamable and manageable. But now she discovered as he himself (timid worshiper of pugilists and athletes) was discovering, that, in the modern world the race is not to the swift, nor the battle to the strong; that selection was now more than ever by cunning and intelligence, ever less and less by human horsepower and simple brawn.

She found, to her delight, that physical inferiority was no insuperable obstacle to success and mastery; that the greatest men had often the smallest frames; and that even a woman, though suffocated with corsets and harassed with skirts and cramped by a thousand traditions and safety pins, might rise to leadership and power, and be master of her soul.

And bit by bit, as the Great Change advanced, she outgrew her negativity and took on positive traits. She became a personality, capable of initiative, of executive management, of realistic thinking. She imbibed the lust for acquisition, and became a mighty digger of gold. She neglected the quiet tidiness of the home for the noisy noisomeness of the streets, and took to powder as a substitute for water.

### *The Mood of the Man*

She loosened her stays, and shortened her skirts, and bared her neck to the sun; she prayed a little less, and played a little more; she drank deep draughts of the bracing air of her new freedom, and became stronger in body and soul. Almost in a generation she blossomed and sprouted into positivity.

*He who runs, may read the signs from the evidence; everywhere in America women, married or unmarried, are dominating men.*

The male was startled and shocked, and complained moralistically about the "new woman." But the change had come without his connivance, and persisted without his permission. He found himself faced with woman in industry, woman in commerce, woman in the professions, woman in education, woman in all those fields which had from time immemorial been exclusively his by the divine right of possession.

He was displeased with this independence of work and will; he longed for the ancient days of modest maidens and clinging vines, for the old domestic bliss (as it seemed to idealizing memory) of babies and doughnuts and apple pie. He fought the invasion manfully and querulously.

He lost. In America at least, woman has almost completed her dizzy transition from negative submission to positive domination. Sociologists question the historicity of that "matriarchate" which Bachofen and McLennan thought they had found in the ancient past; but of our current matriarchate no one can doubt; he who runs may read the signs and see the evidence; everywhere in America women, married or unmarried, are dominating men.

The old qualities of virginal docility and marital obedience disappear; of the two sexes it is man that now cherishes modesty awhile, and looks with bashful awe at the ankles, and calves, and knees, and added attractions of the modern lass. The words "love, cherish and obey" have been withdrawn from the marriage service; shortly they will be restored, among the questions asked of the male. But they will be superfluous.

### *What Will Is*

Judge, from so rapid a change, the possibility of altering character. Obviously those qualities which we have called positive and negative are not irrevocably rooted in the flesh; they have their basis in the strength and weakness of the body, but they can be transformed indefinitely by opportunity and environment. The same woman has, in a hundred thousand cases, developed from timidity to audacity, from submission to mastery. It is obvious that character can be changed—if we will.

But here we encounter subtle difficulties. Some of us do not wish to change our characters; we seem so sweetly perfect to ourselves, and our very faults are so forgivable and lovable, that the notion of making a few repairs in our make-up hardly appeals to us.

If we are to make ourselves stronger we must understand, first, what will is: not some mystical entity standing among the elements of character like the conductor of an orchestra, bending now to one side and now to that; but merely the sum and substance of all functioning impulses and dispositions. These motive forces that constitute character have no leader whom they may obey, outside of themselves; it is from their own number that some powerful impulse must come to dominate and unify the rest.

This is "strength of will:" That the one supreme desire stands out so high above the others that they may be drawn to it and harnessed by it to move in one direction to one goal. If you cannot find a co-ordinating goal, some master purpose to which you will readily sacrifice every other desire of your heart, unity is beyond you, and you must be in the end a stone in another man's edifice.

### *Conquering Imperfections*

Hence, it will not help you to read books that offer royal roads to character. Here, for example, is a volume published some years ago in London upon developing the will by the process of self-hypnotism; there are a hundred such masterpieces, which fools can buy in any city. But the way is harder than that, and longer.

One of the less unreliable and fantastic phases of psychoanalysis offers us here another illustration of the flexibility of human character and destiny. In the illuminating theory of Adler, the basis of both genius and neurosis (any abnormality of mind and character) lies in some organic defect, some weakness or malformation of some portion of the body, whose inescapable presence stings the soul into a heroic struggle to conquer the imperfection.

It is true that the struggle to overcome defects may fail, and that the failure may break down all the remaining health and strength of the will. Very well; it is the price we pay for greatness, that the struggle for it may plunge us to destruction: it is a race that nature arranges for us, in which there is defeat as well as victory. But any man worth a pinch of snuff will take the dare, and enter the race; it is better to have tried and lost than never to have tried at all.

Whatever your physical weakness may be, whatever your consequent weakness of soul, look it squarely in the face, and march breast forward to its overcoming. If you are shattered into pieces, very well; that is nobler than acquiescence. If you win, you create yourself anew, and know all the heights of greatness. What does it matter that we must die more deaths than one in order to live more lives?

## 'STEADY PRODUCTION OF JOBLESS GROUP MUST STOP'

Continued from Page One, This Part.

men were required. Now a single machine, run by a handful of men, does it. Naturally this means a lowering of cost. Assuming the labor cost by the old hand method to be $1.60, every dollar's worth of two-ounce bottles can now be produced for a little less than three cents.

Lowering the cost of any commodity to such an extent is, of course, an enormous boon to humanity. But the important point remains. It means the displacement of human labor. Labor-saving machines are robbing human beings of jobs at the rate more rapid than we can find them new and fruitful occupations.

As a boy I learned from my father the iron puddler's trade. In the iron and steel industry, iron must still be puddled by hand. No machine has yet been devised to take the place of human skill and judgment in this, but I have no doubt it will come. Nearly every other step in the making of iron and steel has been taken over by giant machines. This, too is a priceless boon.

### *Machines—Men*

In the older days the handling and shaping of great masses of white-hot metal was a back-breaking, heart-breaking task—often a dangerous and killing task. Now great cranes with magnet grapples, huge conveyors, every conceivable mechanical marvel handle these tons of metal, often at the touch of a lever or button.

Besides increasing output and lowering costs, with resulting benefits to humanity as a whole, this also is a boon to the workers themselves. It relieves them of endless toil and peril. But again the point remains. These giant machines have taken great tasks from the backs of men, but they also have taken from many men their jobs and livelihood.

The American manufacturer takes a wholly proper pride in his courage to scrap the machines of today as soon as faster and more productive machines are offered. His whole plant is skillfully organized for the saving of labor—for the purpose, of course, of saving money, lowering costs. But what of the men displaced?

In recent years in the cotton industry it has been made possible for a single weaver to operate many more looms than once was possible. The number of looms tended per weaver has increased from a general average of 12 to specific instances were a single weaver is expected to care for 60 looms.

### *Increasing Use of Oil*

At sea the increasing use of oil for fuel and the Diesel engine for power is bringing about the same dramatic change. The cruising range is so extended that an oil-using ship can circle the globe with one replenishment of fuel. Cargo space is saved. Oil fuel leaves 40 per cent of the room that coal requires. In the burning of oil, no stokers are needed. One or two men take care of the fuel pumps. Not long ago the Danish ship "Fiona" rounded the world with a single engineer.

In 1919, Edward N. Hurley, formerly chairman of the Shipping Board, estimated that when oil comes into general use for driving ships, from 80 to 90 per cent of the coaling stations of the world may be abolished.

Again a great saving, and thus a boon to humanity, but also a large displacement of stokers, coal-passers and skilled and unskilled labor on ships, as well as dockhands and others on land. And these already have been affected by recent new mechanical devices, cranes, conveyors and the like, in loading and unloading of vessels.

Machinery has walked in everywhere and shouldered the human being aside. Just to check off the more striking examples, here are a few:

A new potato-digging and loading contrivance, run by two men, does the work of 60.

The International Harvester Company is working on a mechanical cotton picker, planned to enable two men to pick from two to five bales of cotton a day. It would take the same two men from eight to 15 days to pick the same amount.

In the flour mills of the Northwest mechanical conveyors load six cars in 40 per cent of the time it formerly took in loading two, and 15 men do the work of 100.

In one plant of the International Paper Company three men feed oil to fire the boilers, where 40 men once shoveled coal.

### *Scientific Handling*

With the paint-spraying machine one automobile worker can do the work of seven. In a certain stamping plant for making auto parts, conveyor systems do the work of 140 men.

Chicago has a brick-making machine that turns out 40,000 bricks per hour.

And not only has labor-saving machinery come in, but scientific management has introduced methods of handling material that save the work of men. Better methods have enabled a plant at Worcester, Mass., that employs 6,000 people to produce more good with 600 fewer employes.

In a large copper refinery, during the years from 1918 to 1927, the number of men employed was reduced from 578 to 235, with a 10 per cent increase in output. The company hopes in time to run its plant with 100 men.

Every manufacturing establishment formerly had its own power plant, with the necessary stokers and engineers. More and more of them now have turned to the greater economy of electric power, often supplied from distant central stations. It is estimated that the electric motors of the United States today are capable of performing the work of 175,000,000 men.

Wherever you turn your eyes you will find this process going on, everywhere subject to new perfections. And we have been at it for years. I well remember the pigmy steam engines used to haul the trains on the "L" in New York 25 years ago. Each car was manned by a brakeman who opened and shut the gates and gave his signals. Every station had its ticket seller and chopper.

Now the engineer and fireman, and nearly all the brakemen have been displaced by a single motorman. One guard, or conductor, on the lead car controls all the doors on the entire train. Ticket choppers have gone their way and left behind them the turnstile. Three men now do the work of 16. What has become of the other seven?

The wonder is, not that we have so much unemployment, but so little. In addition to labor displacement as a result of normal economic progress, we have had the great floods in the Mississippi Valley and in Vermont, causing a huge disturbance in farming, industry and employment. The coal situation has kept thousands of miners out of work.

### *One Redeeming Feature*

Serious as is the number of people out of jobs, the situation has one redeeming feature—a feature bright with promise. There are now about 46,000,000 of our people gainfully employed. Our country has been cursed before with periods of unemployment, but the custom was to accept these as natural and unavoidable afflictions. The jobless were duly pitied. Bread lines and soup kitchens were established for their relief. Here and there scattered agencies or individuals did what they could to find employment for the unfortunates. For the rest they were supposed to bear their lot as they could, until the normal working out of events and the slow improvement of business gave them back their work.

But in 1921 when war conditions had brought about unemployment so serious that it forced attention, we learned the lesson that unemployment for any considerable proportion of our people is a calamity visited upon us all. In a word, hundreds of thousands of people out of work are a terrible cost to the entire country. We learned that if for no better reason than to cut that terrible cost, we are wise in exerting every effort to get every jobless person back to producing and buying again, with the least possible delay.

But my contention is that it is vastly more important to do what we can to stop this everlasting creation of new recruits to the army of unemployed, that has been going on for so long. What we do can be only temporary relief, so long as, even in the best of times, we swell its ranks with the men we release from our more and more mechanized mills. If we do not face this matter with all our brains and resolution, the standing army of the jobless will continue to increase in the future to alarming proportions.

### *Invention and Science*

The trouble is that invention and science have exerted themselves to the uttermost in perfecting the industries already established. They have produced results that put us at the head of every industrial nation. We are justly proud of the position. But invention and science must soon become equally energetic in seeking out new human tastes, needs and desires, and in developing industries to supply these new demands.

When I first put forth this statement, certain critics laughed. Their argument was that new industries would only add to the glut of goods, the over-production, which was all they could see as the cause of our present unemployment. The answer, I think, is simple. It is one of the oldest of economic fallacies that a nation's income is fixed and limited. The only limit to a nation's wealth is the limit to its brains and brawn in creating that wealth.

As for its consuming power, there is no known limit to man's desire for the good things of life. The rest is a matter of getting the wealth distributed.

These critics assume that public tastes, once discovered, are fixed and stable and ever the same. But nothing is so fickle as public taste and demand, and countless ruined industries stand in proof.

Thirty-five years ago the market for horses and buggies may have been subject to over-production. But invention turned out a thing called an automobile and now thousands upon thousands more people ride in one than ever owned a horse and buggy. Thirty-five years ago the man who predicted that one of our major industries would grow from such a fool competitor of the horse and buggy might have drawn a laugh.

Now no one would think of applying all our science and invention to speeding up the production of horses and buggies. Yet in other lines that is precisely what invention has been doing. In many a case it has been speeding up the production of commodities that the public no longer wants.

You may have the most magnificent high-speed plants for turning out old fashioned razors if run on the modern basis, your plant may be equipped with machines that do the work of hundreds of men, and turn them loose to hunt other jobs. But the minute a man comes along with a safety shaving device that the public suddenly prefers, all the science and invention in your old-fashioned razor plant is wasted.

### *Changing Public Taste*

You may brag of your plant as you please, complain as you please of glutted markets and depression. The public has passed you by. I believe it is not far-fetched to say that business today is somewhat less active and unemployment higher than it was in 1926. Some of the slackness is due to just this factor of changing public taste.

It is one strong argument, at least, for the cultivation of new science and new invention. They must turn more to the development of new public demands, and new industries to supply them. Already the hard-headed American business man has seen the point, and has turned in his practical way to carry it out.

The editor of one of our leading scientific publications writes me that never before has he had so many letters from large manufacturers. They all ask for some new invention which promises to meet a possible public need or taste. And these manufacturers all state as their reason that they desire to add a new line to their products in order to provide compensation for slackness in their older lines.

In addition, the same editor informs me that since January, this year, the filing of applications for patents on new inventions have never in the history of the patent office been so numerous or so promising.

This, of course, is all for the future. I have the greatest confidence in the ingenuity of this people. The same ingenuity that has built this tremendous industrial structure of ours, will surely be equal to the correction of its faults as they develop. One of those faults is certainly the steady production of a jobless group, a group that earnestly desires employment. This must be stopped.

In the meantime, I believe even the immediate unemployment problem will soon be improved. The opening season will enable the building trades to return to their regular occupations. The farms of the South begin to call for labor. The Mississippi flood prevention program will draft much common labor from the ranks of the out-of-work. The government has an extensive building program of its own soon to be launched.

Above all, our people are fully aroused in this present situation, and private enterprise everywhere may be counted on to do its share in providing work.

The American people have a way of solving their problems and the unemployment problem will be no exception. The telephone, automobile, radio opened a thousand new fields of employment. Other innovations will do the same.

# NIGHT WATCHMAN

By FANNIE HURST

## Shades of Night Are Lifted for Agnes.

AGNES MORSE was one of those women who might be said to have come grandly into their own. She came into her own, it is true, at the age of 54, and at 54 Mrs. Morse looked it. That is, she was guiltless of the pretense of being anything other than her years. There was no attempt at the fluh-dubbery of silhouette, marceled bob, stilted heels and revealed leg of the grandmotherhood of her day. Agnes Morse was one of those women who had grown old frankly and rather beautifully.

Years of the toil and moil of widowhood and rearing of a successful family by the literal sweat of her brow, had left their inroads, it is true. She had not built up a fragment of a plate-glass concern left her by her husband the [illegible] after their marriage [illegible] of the largest [illegible] ts kind in the Middle West, for naught. Twenty years of struggle and competition had cut deeply into the face of Agnes Morse and had given it strength and even a certain beauty that had not been there in the more placid years of her girlhood.

* * *

A LOOK of ability—of satisfaction at the daily mastering of a difficult job. A look of understanding and sympathy with the struggle of mankind. Understanding of his necessity to fight and conquer poverty. Sympathy with him in his failures.

For her accomplishment had not made Agnes Morse hard. She still remembered the worry and struggle of the years when she had not been sure whether she could make a go of her husband's business. Years when she did not know whether failure or success stood waiting, just around the corner, to meet her.

Twenty years—long years, but happy years, because they had been filled with activity and struggle, and because they had been crowned with everything she had worked for.

The ability to give her children what they wanted—what she wanted to give them. Health and happiness and comfort. A chance to meet life with a smile and a firm feeling of ability to master its obstacles and difficulties.

* * *

AND now, at fifty-four, with the plate-glass business sold at an astonishingly handsome profit, her three daughters handsomely married, from the social, financial and even romantic angle, Agnes Morse, respected in the town, a philanthropist, a club-woman, and still an executive, lived alone in the square stone house on Berkeley Street that she had bought the year that Adela, her eldest daughter, had made her debut.

It was so obvious that Agnes Morse was not the sort of woman to live with any one of her three daughters who would have welcomed that advent, that it was scarcely a matter of comment in the community. Ever since anyone could remember, Agnes Morse had been on her own, so to speak, had been both father and mother to her children; had been the head of her home and the head of her business. It was fantastic to even imagine Agnes Morse taking up her abode in the home of anyone else.

And so the house on Berkeley Street, strangely quiet now, but with the appearance of a household in which human life ran vibrantly, continued to keep its hearth-fires burning, so to speak.

A charming house, breathing of life and activity. A house that seemed to bear witness to the long years of pleasant, profitable struggle that had gone on under its roof. Years when Agnes, tired by her days of work and worry, had returned happily to the house that she kept so bravely over the orphaned heads of her children.

A home, in every sense. A house to harbor activity, vitality, the vigorous doings of a growing family. Or at least the more calm and settled activities of a busy adult group.

* * *

IF Agnes Morse, with her business successfully disposed of and the three pretty girls who had kept the house agog during their school days, their society days, their weddings and their marriages, felt panic in the sudden let-down in her scheme of life, she was not the one to show it.

She still maintained a proprietary interest in the plate-glass window business, drawing a small salary in an advisory capacity. She was the head of two local women's clubs, chairman of the largest philanthropic group in the state and with the three daughters and presently grandchildren living within a mile or two of the house on Berkeley Street, her days could scarcely be called vacant or dull.

It was the nights. Never any too good a sleeper, there settled upon Agnes Morse in the rather sudden quietude of these latter years, the disquietudes of insomnia.

* * *

FACT was, what with her enormous vitality, Mrs. Morse, her duties lightened, was not quite tired enough when night came. It was all well and good to attend a committee meeting, a motion picture theater or dine at the home of one of her daughters or even have in a few guests for bridge. It was after the hours of evening diversion that the stark and rather terrifying things began to happen to Agnes Morse.

The house became a mausoleum. It was as if she sat in a tomb of her yesterdays. Out of the corners and out of the rafters and out of the attic-places, like mice, came stirring memories and heart aches and visions of loneliness that terrified her. After a while, it became a house of dreadful nights to Agnes Morse, which not even a visit to French Lick Springs or a motor trip to New York with one of her married daughters and son-in-law, could assuage.

Sometimes, at 2 or 3 in the morning, Mrs. Morse got up and dressed, fully. She was not the sort of woman who indulged in dressing-gowns. One doctor had offered a theory that these sleepless nights might be induced by hunger. In her state of nerves and desperation, Mrs. Morse sometimes prepared herself a small meal and set table in the dining room to eat it.

A dainty meal, neatly served for its lone guest. Lights turned on, cloth spread, pretty china laid carefully, shining silver placed precisely. Steaming coffee, toast, perhaps. Sometimes fruit.

They could be pretty horrible, these feasts, because as she gulped down the food, tears rolled toward her lips and salted it. Any one of her three daughters, sleeping snugly and safely in their homes nearby, would have been horrified at the spectacle.

The woman sitting there, lonely and afraid, terrified at the thought of the years stretching out before her, years empty and solitary. Years filled with—nothing. Years in which she might rest and rest and rest.

The house, dark and somber, with a trail of light leading from Agnes' bedroom down to the big dining room. And a pool of brightness there, with the lonely, eager woman sitting there, trying to drown her loneliness in a familiar, comforting rite.

* * *

SOMETIMES, the night watchman, passing, tapped his stick, and that, to Mrs. Morse, was something to be grateful for. It meant a human being sharing the solitude of these dreadful watches of the dreadful nights. Once, when it was raining, Mrs. Morse stepped out on the front veranda and called him in for a cup of hot coffee and thick cream which was on the dining room table. He was a new man on the beat. A gracious old gentleman who had apparently quite an assortment of qualifications still left in him for many things except the more strenuous one of night-watching.

He was just one of those genial old gentlefolk who can suddenly find that the world no longer needs him in any particular capacity.

The large elevator construction company where he had held an office position for 40 years, had decided that about him and this was the result—sharing a nip of midnight coffe with Mrs. Morse on his watchman's rounds. It was the beginning of a strange and eerie series of tete-a-tetes. The immaculately-proper Mrs. Morse; the gentle, slightly-bewildered, white-haired night watchman "breaking bread" together night after night at the witching hour of 2 and 3 o'clock.

* * *

HE had about him the rather devastating capacity for solicitude that is so often characteristic of the gentle. He cared about Mrs. Morse's nerves. He exchanged with her the small-talk of his routine job, and yet his blue eyes were troubled for her. He brought her homely little brewed sedatives and newspaper clippings that offered panacea to the sleepless.

He cared.

Gradually, there came to be borne upon Mrs. Morse's consciousness this incredible realization.

She cared. And that day, there came the further realization that she cared for a man who in every way represented the kind of inadequacy with which she had had to cope in other people all her life. A sort of appealing kind of inadequacy, it is true, the same kind that had ground the lines into her face. Her husband had been like that. Her three daughters, lovely and devoted, had been like that.

The night watchman was like that.

He could bring her nothing except solicitude and the inbred gentleness and decency and goodness that were writ all over him. But to Mrs. Morse, at fifty-four, it seemed that the miracle of life had taken place. Her family, her friends, her neighbors, gasping when the news finally descended upon them, could not understand.

But to Mrs. Morse, the miracle was that here in the twilight of her life, the shades of night were threatening to fall.

The night watchman, gentle, solicitous, caring, had come into her impending night, and Mrs. Morse was no longer afraid.

Copyright, 1928.

*He cared.*

*Gradually Agnes Morse realized that he cared. And she cared. Cared for the man who could bring her nothing but solicitude and gentleness and decency and goodness.*

# The BOOK SHELF For Readers and Writers by George Seibel

### Subsoil Paris

FOR one who is curious about life there is no place like Paris. These words are from the opening pages of a book by C. E. Andrews, whose title is "The Innocents of Paris" (published by Appleton), and his book proves his words. Mr. Andrews is a college professor from the prosaic purlieus of Columbus, Ohio; he has written a book on prosody that shows him to be a student of the poets. Then the war carried him over to France and Macedonia, and now [illegible] his book is the best thing about P[illegible] n years. Not about the [illegible] ly knows, but about the [illegible] ing to the north of the Isle of St. Louis—the Marais, where once jeweled ladies walked in pride, and the Faubourg St. Antoine, where revolutions have been hatched for centuries.

"The book is full of damp old smells of butcher shops, cheese and packing straw. Its heroes are the strong men of the markets, bartenders and street-walkers, flower-sellers and old book men, apaches and beggars. Its life is the life around the old fountain in the old square which is one of the masterpieces of Jean Goujon, whose lovely Diana with the Stag is one of the gems of the Louvre. Out of this life Mr. Andrews extracts the finest essence of poetry:

"Mimi and Jo-jo moved off down the street together, arm in arm, and one kiss lasted all the way to the Sebasto. It was light enough for the Nymphs on the Fountain of the Innocents to smile, as they had smiled for nearly four hundred years. And over the narrow street between the tall old houses shone the pale silver crescent of the newest of new moons in the rosy-lilac morning sky."

Nobody more exalted than a hotel manager strays into these pages. There is an antiquarian book-dealer who dies worth a million francs, but he drinks his aperitif in the cellar bar of the Caveau like the rest of the people in the book. Nobody knows anything of poets that have sung deathless lyrics within half a mile; there is just one mention of the glorious basilica of the Sacred Heart gleaming afar on the Mount of the Martyrs; the enchanted glamour of the Gardens of the Luxembourg, one mile away, might as well be in the moon. This is the Paris of women fat to the verge of the comic, or scrawny to the verge of the demoniacal; of men who are loafers or criminals, or engaged in the lowliest and pitifullest occupations, rag-pickers who sell their finds in the Flea Market, vagabonds who sleep with their heads on greasy tables. Here—

"Ghosts of old fiddlers, of Moliere's serving men, and of Callot's beggars slip in and out of dark doorways and back courtyards, and mingle with workmen in corduroys, and girls in cheap finery, and young apaches who carry razors in their belt pockets."

Tragedies and comedies are played in this world of refuse and relics.

It is a tragedy when old Aubincourt, whose son has become a burglar, cries: "I cannot leave you to the law. You might get off free. It is your father's duty to take your life himself!" Steadying himself against the foot of the bed, he fires the pistol twice into his son's heart—and takes his place with Virginius and the sire of Emilia Galotti.

It is a comedy when Monsieur Taque, whose wife owned the merry-go-round in the Square of St. Medard, falls in love with the African giantess from Alabama, whose mountain of kinky hair was resplendent with green glass emeralds, but who was a member of the First African Baptist Church, and virtuously refused to accompany her admirer to a "bal musette" or to drink with him a "distinguished" glass of beer.

But whether comedy or tragedy, this is life—it is Paris—not the Paris seen by the tourist, not even the Paris of the students and the artists painted by Murger and du Maurier, but the hidden Paris north and east of the Tour St. Jacques and the Halles, where squeaky accordions and picturesque profanity are heard, and only the clanging of the great bell of St. Eustache to remind this little world of grime and stench that visions of beauty and splendor are only half a mile to the south and west.

What cares this world that Rachel and Madame de Sevigne and Victor Hugo once lived a few squares away? What does it know of the Venus de Milo and Mona Lisa, still there and only a few squares away? This world is sufficient unto itself—beer and tripe are the articles of its hedonistic creed.

Mr. Andrews, coming from Columbus, Ohio, has discovered this world and written about it with the ardor of a new Amerigo Vespucci. "The Innocents of Paris" is a great book.

HARRY HERVEY,
Author of "King Cobra"

### King Cobra

Travel in French Indo-China is described picturesquely by Harry Hervey in "King Cobra" (published by Cosmopolitan). He was hunting Angkor, a dead city in the Jungle. Incidentally he tells the fantastic story of the Khmers, a vanished Cambodian people who built the splendid city of Wat Phu. While somewhat discursive in its efforts to be dramatic, Mr. Hervey's book is filled with interesting geographical and ethnical lore.

### Story of 1776

"These are the times that try men's souls. The summer soldier and the sunshine patriot will, in this crisis, shrink from the service of his country; but he that stands it now, deserves the love and thanks of man and woman." These burning words of Private Thomas Paine, whose pen did as much as Washington's sword to win American independence, describe the period Jonathan Rawson depicts in his volume entitled simply "1776" (published by Stokes). No other book gives a more graphic account of that memorable year, for Mr. Rawson presents it almost entirely in the words of the people who lived it. Here is a work almost indispensable to any one who wants a true picture of the pregnant period that brought forth a new nation.

### Our Mighty Rivers

The rivers of a continent are like its veins and arteries—they carry the lifeblood of commerce and travel; they are the highways of civilization and progress. This is brought out finely in such a book as "Waterways of Westward Wandering," by Lewis R. Freeman (published by Dodd, Mead & Co.), which tells the romantic stories of the Ohio, the Missouri and the Mississippi. While the book, which is well illustrated, has its chief interest in geographical and historical lore, there is a sprinkling of anecdotes about people like Mark Twain and the Mayo brothers, besides one very interesting chapter about life on a real "show-boat."

### Who Has Prosperity?

This blasphemous question is asked in a symposium under the title of "Prosperity" (published by Vanguard Press), and is answered in various ways by about twenty people, of whom the best known are Robert Moras Lovett and Morris Hillquit. While their opinions as to who has prosperity vary slightly, they are agreed in denying that it is in their possession. Harry W. Laidler and Norman Thomas are editors of the symposium, which contains much food for thought.

### BEST SELLERS IN PITTSBURGH

**The following books are selling best in Pittsburgh book stores, according to lists furnished by J. R. Weldin Co., T. Edward Jones, Priscilla Guthrie's Book Shop, Kaufmann's Book Department, Horne's Book Department, Gimbel Brothers' Book Department and Boggs & Buhl's Book Department.**

"Wintersmoon," by Hugh Walpole.

"Claire Ambler," by Booth Tarkington.

"Red Rust," by C. J. Cannon.

"Deluge," by S. Fowler Wright.

"Ambition," by Arthur Train.

"Strange Interlude," by Eugene O'Neill.

### The New Fiction

#### Papillee

Marcus Cheke has written in "Papillee" (published by Morrow) the most delectable fantasy since Elinor Wylie's superb "Venetian Glass Nephew." It is an extravaganza of one of the most riotous and fantastic periods of history, the second phase of the French Revolution, when clothes as well as manners were delirious with freedom—the period between the Terror and the advent of Napoleon. Marcus Cheke has caught this riotous spirit, and peopled his pages with vivid and erotic personages, providing rare entertainment for the knowing reader.

#### "My Wife, Poor Wretch"

And now Mrs. Samuel Pepys as imagined by Emma Beatrice Brunner in the charming fancy, "My Wife, Poor Wretch" (published by Stokes), gives us further insight into the home life of the famous diarist and dispenser of kisses to comely wenches. Pompous, exacting, conceited, faithless and jealous, Samuel Pepys leads poor frivolous Elizabeth Pepys more or less of a wretched existence. But her feminine intuition serves her well, and she is able to manage her dear Samuel for all that. It is a humorous tale extracting novel imaginative elements from an old and beloved piece of literature.

#### Pluck

Basil King gives his novel "Pluck" (published by Harper) the subtitle: "Should a Woman Ever Sell Herself?" The story, however, is not as lurid as this would lead one to expect. Felicia is the oldest child of a village minister's family. Her father lives in a dream world of his own, and it is her impossible duty to make his entirely inadequate salary keep a large and trying family. She accepts the financial aid of a rich man in the parish without questioning too closely his motives, and realizes after her indebtedness has assumed awful proportions that his motives were none too altruistic. It is a realistic novel of moral conflict and understanding characterization.

### Russian Horrors

A trilogy of the Russian Revolution is furnished by three different publishers presenting three different novels. One is written by a Russian journalist, another by a Russian journalist who was formerly a priest, the third by a Russian woman of the untitled nobility in collaboration with an American journalist since deceased. Each shows the revolution from a different angle. Incidentally the noblewoman's account is the least vindictive.

Ivan Shmelov, in "The Sun of the Dead" (published by Dutton), depicts life as he saw it in the devastated and famine-stricken Crimea under the Bolshevist regime. The commisars confiscate everything, so the people in disgust stop production; the result is starvation. Ivan Shmelov's story is a song of hate. He hates the socialists, the communists, the Bolshevists, and laments the good old days under the Czars when everyone was happy and prosperous! But most of all he hates all the people of all other nations who sat comfortably by their firesides while he suffered. With his mordant pen he draws a vividly dramatic picture of utter helplessness—a situation of almost unbelievable destitution, when a few dried peas must suffice for a day's rations and even these must come to an end. His story is a monotone of blood and famine against a sapphire sea and a smiling sun.

Sergey Gussiev Orenburgsky chooses for his canvas the whole of Russia, and "The Land of the Children" (published by Longmans) is an epic rather than a novel. Against a religio-philosophic background he depicts the different types and motives which were responsible for the upheaval, and says: "I don't know whether there is truth in the new life or not, but I am perfectly certain that there wasn't any in the old one." It is a colossal and masterly work, which leaves the reader dazed like some of Tolstoy's pages.

Compared with the other two works, "We Have Changed All That" (published by Bobbs-Merrill) seems almost like a short story, for it depicts the Revolution as it affected only one family. It is a work of collaboration between Elena Stepanoff MacMahon, a Russian woman married to an American and living in Chicago, and Herbert Quick, an American newspaper man. The action takes place in Kazan, the center of culture in Eastern Russia. The Krassin family, wealthy members of the petty nobility, are shown in their individual reaction to the Bolshevist invasion, and the mother's love for her son is the center of a conflict of dramatic intensity. There is no overemphasis and the story has artistic distinction.

#### The Last Judgment

Another worry is added to the afflictions of the human race. J. B. S. Haldane assures us, in "The Last Judgment" (published by Harpers), that the moon is going to fall down upon the earth in little more than 25,000,000 years. As we shall have colonized Venus, the human species will not be entirely exterminated by that calamity. There is little comfort in that, since everything is already in a deplorable state. Mr. Haldane assures us that "the Pilgrim Fathers were much happier in England under King James I than they would be in America under President Coolidge." The moon might as well fall now and end our miseries, and thus we shall escape the prolonged agony forecast by Mr. Haldane's scientific fantasy.

### Birthdays of Authors For This Week

Today, March 18 (1813)—Friedrich Hebbel, German dramatic poet.

March 19 (1850)—Alice French, American novelist, "Octave Thanet."

March 20 (1828)—Henrik Ibsen, Norwegian dramatist, "A Doll's House."

March 21 (1785)—Henry Kirke White, English poet.

March 22 (1845)—John Bannister Tabb, American poet-priest.

March 23 (1865)—Madison Julius Cawein, Kentuckian poet.

March 24 (1830)—Robert Hamerling, German poet, "Ahasver."

### Books of All Sorts

"The Young Decorators" (published by Harpers) is a book by Nancy McClelland for young folks, but will also tell grown-ups about an interesting profession—that of the interior decorator. The book is both simple and practical.

"The Ten Commandments of Health and Happiness," by Dr. Paul Carton (published by Dobsevage), contains some good sense and some nonsense—the nonsense creeping in when the good French doctor gets metaphysical.

"Robert Edward Lee," by R. Alexander Bate (published by Stratford), is a tragedy in blank verse—with much unconscious humor to relieve its tedium.

"How to Avoid Incorrect English" (published by David McKay Co.) is a useful manual warning against common slips of speech and attempting to simplify some of the rules of English grammar—though Richard Grant White called ours "the grammarless tongue."

The Steuben Society of America has rendered historical students a real service by reprinting in a single volume and at popular price "The German Element in the United States," by Albert Bernhardt Faust, professor at Cornell. Professor Faust's book won a $3,000 prize in 1907 and the Loubat prize in 1911. It has become the standard work on this subject, and its 1,200 pages cover everything from Martin Behaim, of Nuremberg, friend of Columbus, to the present time, tracing the history and influence of the Germans in America.

"Motor Traffic Management," by G. Lloyd Wilson (published by Appleton), is the first book tackling the new problems of transportation in a practical manner. It is intended for operators of motor freight and passenger lines.

"The Speaking Voice," by Amelia Summerville (published by Avondale Press), is a little manual by a once well-known actress, giving excellent hints to public speakers and even the plain citizen on the management of their vocal machinery.

"Saplings" is the second series, covering 1927, of verse, short stories and essays by high school students in competition for the Witter Bynner prize, awarded through the Scholastic, a Pittsburgh publication for high schools. There is much promising material in the little book.

# BROADCASTING and RADIO PROGRESS

THE SUNDAY SUN-TELEGRAPH

SUNDAY, MARCH 18, 1928 — Classified Ads—GRant 5400 — (Combining The Pittsburgh Sunday Post and Pittsburgh Gazette Times) — PART 8, PAGE 5

# *Lindbergh Award by Wilson Foundation to Go on Air*

## These Are Singers and Musicians Who Will Entertain Radio Audiences of Week

**COMPOSER**—Sigmund Romberg, writer of "Maytime, will participate in the General Motors Party from WCAE Monday.

**"QUEEN OF SONG"**—Mme. Schumann-Heink often appears before the microphone during the Atwater Kent Hour.

**SOLOIST**—Josie Walton, one of the newcomers in the realm of radio, will sing in the Movie Revue from the studio of WJAS Tuesday night.

**"PINK LADY"**—Jessica Dragonette will play the title role in the Philco Hour presentation from KDKA Saturday.

**TENOR**—Richard Crooks will again participate as the guest artist during the Maxwell Hour from KDKA Thursday.

# Operatic Singers On Sunday Program

Radio listeners this week will hear entertainment designed to appeal to every taste. They also will hear the presentation to Col. Charles A. Lindbergh by the Woodrow Wilson Foundation of a $25,000 award for his work as "good will ambassador," and his acceptance. The Lindbergh ceremonies will be staged at 9:30 o'clock Monday night in Hotel Astor, New York, and will be placed on the air by the National Broadcasting Company blue network, including KDKA.

Chain programs continue to dominate the entertainment provided from Pittsburgh stations on Sunday. The first of the musical programs will be provided by KDKA at 1 p. m., when the Gold Strand Group will play "Rose of the World" and "The Count of Luxembourg." Marjorie Horton, soprano, will sing "The Temple Bells."

**TALK ON GIBRALTAR**

Military and band music will compose the program by the One Hundred and Seventy-sixth Field Artillery Band at 3 o'clock from KDKA. High points in the history of Gibraltar will be described by "The Man From Cook's" at 6 o'clock and prospects for the coming baseball season will feature the Collier hour from the same station at 8:15 o'clock. Violin solos by Don Amalzo will close the KDKA broadcasts at 10:15 o'clock.

Sea chanteys will be the offering of the Acousticon Quartet during the Acousticon hour from WCAE at 5:30 p. m, Sunday. Caroly Andrews, the "lark," will be heard again during the Maj. Edward Bowes' Capitol Theater Family program at 7:30 o'clock Sunday night from WCAE. While Miss Andrews is best known to the public through the medium of the radio, she has to her credit a successful career in both opera and concert, having sung with such organizations as the Operatic Festival in this city and Philadelphia, made up of Metropolitan and Chicago opera stars, and the Municipal Opera Company of St. Louis. The Atwater Kent hour from WCAE follows at 9:15 o'clock.

**OPERA FROM MANY LANDS**

Bits from operas of many nations will be played by the Judson Symphony Orchestra under the direction of Howard Barlow during the Symphonic hour, to be heard from WJAS at 3 o'clock Sunday afternoon. The American Singers in a half hour of quartet music will follow from the same station at 4 o'clock, to be followed in turn by the United Military Band in a 30-minute period of band numbers.

A medley of college songs and the "Soldiers Chorus" from Faust will be sung by a male quartet during the Effervescent hour from WJAS at 9 o'clock Sunday night. At Home with the Masters, a Sunday night feature designed for lovers of chamber music, will go on the air at 9:30 o'clock, and WJAS will conclude a day of broadcasts with the Cathedral hour. Ivor Karman will be violin soloist and a chorus will sing "Crossing the Bar."

Outstanding broadcasts of the week follow:

**MONDAY, MARCH 19.**

**8:30 P. M., WCAE**—A. & P. Gypsies in program dedicated to Tennessee, under direction of Harry Horlick, and with Charles Harrison, tenor, as vocal soloist.

**9:30 P. M., KDKA**—Woodrow Wilson Foundation $25,000 award to Col. Charles A. Lindbergh for his work as "good will ambassador," and his acceptance.

**10:30 P. M., WJAS**—Buccaneers in novelty vocal-orchestral program.

**TUESDAY, MARCH 20.**

**8:00 P. M., KDKA**—Stromberg-Carlson Hour of Music for male ensemble and orchestra.

**9:00 P. M., WCAE**—An hour in a phonograph recording studio, arranged for the Eveready Hour.

**WEDNESDAY, MARCH 21.**

**8:00 P. M., KDKA**—Al Bernard, character and novelty singer, as soloist with the Champion Sparkers.

**9:00 P. M., WCAE**—Ipana Troubadours, celebrating arrival of spring, and featuring Smalle and Robertson.

**10:00 P. M., WJAS**—Schubert Centennial program for Columbia Hour.

**THURSDAY, MARCH 22.**

**6:30 P. M., WJAS**—Sunset Dytinters, in dance and concert music, and with male quartet.

**8:00 P. M., WCAE**—Dodge Brothers presentation of instrumental solos.

**9:00 P. M., KDKA**—Richard Crooks, young American tenor, as guest artist with Maxwell Hour.

**FRIDAY, MARCH 23.**

**8:00 P. M., WCAE**—Cities Service Concert Orchestra under direction of Rosario Bourdon.

**9:00 P. M., KDKA**—Wrigley Review of orchestral and vocal selections.

**10:00 P. M., WJAS**—La Palina Hour, presenting stars of the musical world.

**SATURDAY, MARCH 24.**

**8:00 P. M., KDKA**—New York Symphony Orchestra under direction of Walter Damrosch.

**9:00 P. M., WCAE**—Addresses by Maj. Gen. Amos A. Fries, Harold J. Richardson, grand master of the Masonic Order for the State of New York, and Com. Richard E. Byrd, trans-Atlantic flier, together with entertainment by Roxy and Gang, at New York Chapter, Sojourners Club dinner.

# NEW SPEAKERS BY STEINITE

The Steinite Laboratories, whose all-electric radios have scored an outstanding success throughout the country, announce the production of a new speaker in both table and console models, which they have named the Polyphonic Speaker.

It is claimed for this speaker that it embodies a number of exclusive features in design and construction which has won for it the unanimous approval of not only the lay public, but highly trained musicians, who look at a radio speaker from a purely musical standpoint.

Recently, for instance, a trained musician listening to the Polyphonic speaker, said, "For the first time, I can distinguish the cello from the violin even when playing the same note." The tone is warm, brilliant and natural. The low tones are not produced with a hollow rain-barrel effect, which is often the case in speakers of the expensential type, to which the Steinite Polyphonic belongs.

ATWATER KENT modern RADIO
A.C.

Radio's greatest triumph!

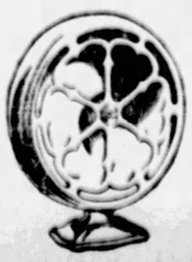
$88 without tubes

Model 37 *Six-tube, FULL-VISION Dial, self-contained A.C. set. For use with 110-115 volt, 60-cycle, Alternating Current. Uses six A.C. amplifying tubes, and one rectifying tube.*

More than 150,000 sold since January 1st! It is the most popular radio in the United States. It is converting even those who were "going to wait a while." It is the answer to the universal question, "When will electric radio be perfected?"

Plug in this new A.C. set yourself. Turn the FULL-VISION Dial. As your station responds you will know from the tone that radio without batteries is perfected.

No batteries—yet it is smaller than many battery sets. The compact cabinet is a shield against outside electrical interference. The built-in power supply is doubly shielded. The design and satin finish of the cabinet are modern, too—in keeping with the newer conception of beautiful things for the home.



Model E Radio Speaker 824

Radio's truest voice. All parts protected against moisture. Comes in a variety of beautiful color combinations.

You will find this set astonishingly economical in operation, for the current from your house-lighting circuit costs only a fraction of a cent an hour. You will find it durable for a lifetime—for that's the way it's made. You will find it—just as more than 150,000 other families have found it—precisely what you hoped radio would be. Why wait?

*If you must use batteries*

MODEL 33 is an extra-powerful, extra-selective battery set. Designed for use where unusual results are necessary but A.C. electricity is not available. FULL-VISION Dial. Six tubes required. Price, without accessories, $75.

Also Model 35. Shielded cabinet. Six tubes required. Price, without accessories, $49.

*Atwater Kent Radio Hour every Sunday night on 23 associated stations*

One Dial Receivers licensed under U. S. Patent 1,014,602
*Prices slightly higher West of the Rockies*

The NEW one unit America's Time-Tested Electric Radio!

Steinite ELECTRIC RADIO

Plug in. It's ready to go.

NEW! But new only in the sense that tremendous production and improved manufacturing facilities have effected amazing economies. New!—in the beauty of its stream line, flush type cabinet. Modern, graceful and compact! But in every other way, the Steinite is the time-tested, all electric, one unit radio that has been the talk of the country throughout the radio season.

$85 (Without Tubes)

A Brilliant Achievement!

THE STEINITE ELECTRIC comes to you in one complete unit—absolutely no outside attachments! No unsightly wiring or cables—no intermediate units to hide—nothing to watch or charge—no acids, liquids or chemicals! Consumes less than a penny's worth of current an hour. Beautiful solid (not veneer) Philippine Mahogany cabinets. Does finished. See your Steinite dealer today. Licensed under R.C.A. patents and under patent No. 1014062. STEINITE RADIO COMPANY, Chicago. Factory: Atchison, Kans.

Hi-Boy Console with Speaker $165 (Without Tubes)

Senior Table Model (without Tubes) $100

## Bohemian Pianist

**GUEST ARTIST**—Marguerite Volavy, Bohemian pianist, will be the featured soloist during the Ampico Hour of Music broadcast through KDKA and associated NBC Blue Network stations Thursday night at 8:30 o'clock.

## BOND HOUSE TO GO ON AIR

An interesting development, significant of changing conditions in the investment market, is found in the announcement made Saturday that Halsey, Stuart & Co. will engage in radio broadcasting, using 32 stations, comprising the Red Network of the National Broadcasting Company, including WCAE, beginning April 5. These programs will be the first of their kind to be broadcast on a national scale by a financial institution. The educational feature of the programs will be supplemented by musical features of highest order.

## Reducing Your Weight

By Dr. Theodore Beck

Science recognizes truly the extreme embarrassment, the constant annoyance and the real danger of becoming too fleshy. Particularly is the condition most pitiable during hot weather. If, therefore, this condition can be overcome, as it unquestionably can in a vast number of cases, I am truly glad to point the way.

It appears to be an established fact that obesity is often due to a partial failure of the thyroid gland to secrete and disperse through the blood an iodine gland substance which nature intended as a regulator of the fat absorption from the food consumed. Science, through myriads of experiments, discovered that the simple administration of the desiccated thyroid gland substance supplies to a degree nature's need for the control of fatty accumulation.

For many years I have recommended Arbolone tablets as a reliable, non-secret home remedy as it contains one grain of thyroid gland with other approved ingredients that have a tendency to aid in reducing the superfluous fatty tissues and to regulate the perverted craving for wrong foods. Taken as per directions I have never known them to be harmful; on the contrary many have gratefully written the facts of their success. Leading pharmacists dispense Arbolone Tablets.

**Registered Nurse Reduced With Arbolone.**

"I have benefited after using for about three months when all other prescriptions did me no good at all. Arbolone certainly has done for me and another member of my family what nothing else could do though I had tried for years, etc." (Signed) N. Mc St. C——, R. N., New York City.

**Reduced 15 Pounds First Month**

CLEVELAND, OHIO—Mrs. L. V—— —— Detroit Ave., Suite 4, writes: "I have been taking Arbolone so far for one month and lost 15 pounds. I feel better and know I look much better, too. Thanking you, etc."

**Lost 15 Pounds in Two Weeks**

NEW YORK CITY—John D. S—— —— E. 125th St., writes: "I used Arbolone Tablets two weeks and lost 15 pounds. Weighed 170 before and now 155. I am 51 years old, a baker, and work every day. It is a great relief for me to thank you."

**Used Arbolone Successfully**

RENOVA, PA.—Mrs. H. A. P——, —— Erie Ave., writes: "I took the Arbolone Tablets and must say they have done me a lot of good. I weighed 190 pounds. After taking a few days I did not have that stuffy feeling, so I kept on and now I weigh 169 pounds. Thanks to you for the good they have done. I am telling my over-stout friends, because I know they have never done me any harm. Thanking you again, etc."

Arbolone Tablets are sold by all the May Drug Co. stores and all good druggists everywhere.

NEW STATION SEPARATOR

# Social Advice from Aunty Climax

## By the Brilliant Satirist— Fish

Dear Aunty Climax:

I HAVE lost my boy friends and four fiances simply because I am getting too fat. This is a terrible worry to me, and please don't suggest any of the awful reducing methods, because I have worn everything and swallowed everything I can think of already. FATIMA.
Pensicola, Fla.

*I am afraid you are up against a pretty stiff problem. I think you had better get engaged to a Turkish Pasha, because they still appreciate girlies like you in Turkey.*

Dear Aunty Climax:

WE got a new vacuum cleaner recently, and it is particularly large and powerful. The other day I accidentally "vacuumed" my rich aunt, who had left us $100,000 in her will. How can we claim the insurance money, since there is so little trace left of her?
MRS. PETER J. EDGEWOOD.
Carstairs, L. I.

***Preserve the bits carefully and send them to the insurance company in your jewel box. This is technical evidence in all States but Utah.***

Dear Aunty Climax:

MY daughter has married a peer. Does this entitle me to wear a coronet?
CYNTHIA ——.
Reno, Nevada.

***Yes, but only a very small one.***

Dear Aunty Climax:

I AM 19 and my fiance is 44, he says. I am terribly fond of him, but I think he wears a toupee. He has a lovely head of golden hair, but, Oh, Aunty Climax, if it should be false! I dare not ask him straight out, but can you tell me how to find out?
Noxville, Miss. ELSIE ——

***This is one use for kid brothers. Seat your fiance in the hall close to the stairs and arrange with your young brother to be up above with a fish hook on a line. I will leave the rest to your imagination.***

Dear Aunty Climax:

WE have only one parlor in our house to entertain in, and when my special boy friend is calling on me Dad insists on coming in and talking about Babe Ruth's home runs and also what he was like when a boy. I am 17, and I think I ought to have some privacy. GWENDOLYN STANTON.
Spokane, Wash.

***Has your boy friend ever tried holding up Dad for a loan? This should be a very effective way to get all the privacy you want.***

# Mystery of the Vanished Skull of Rene Descartes Solved by Science

FOR almost three centuries French historians and scientists have been trying to solve the mystery of the missing skull of Rene Descartes, the great French philosopher, who died in 1650, in self-imposed exile in Stockholm, Sweden.

When, sixteen years later, his fame tardily acknowledged, his body was shipped back to his homeland, it was found that the skull was missing. Ever since, the question as to who stole the skull of the great thinker, and the motives that prompted the thief, have baffled all efforts at solution.

Recently the problem was solved by modern scientific research. The credit is due Professor Verneau, the well known anthropologist of the Paris Museum of Natural History.

When Descartes died at the age of fifty-four, he was buried in the orphanage cemetery at Stockholm. His own country, as well as the rest of the world, forgot all about him until 1666. Then the French nation began to realize the mistake it had made in turning away such a great man. Those who had repudiated the teachings of Descartes and who had caused his exile were among the first to sign a petition asking for the return of his remains to his native land.

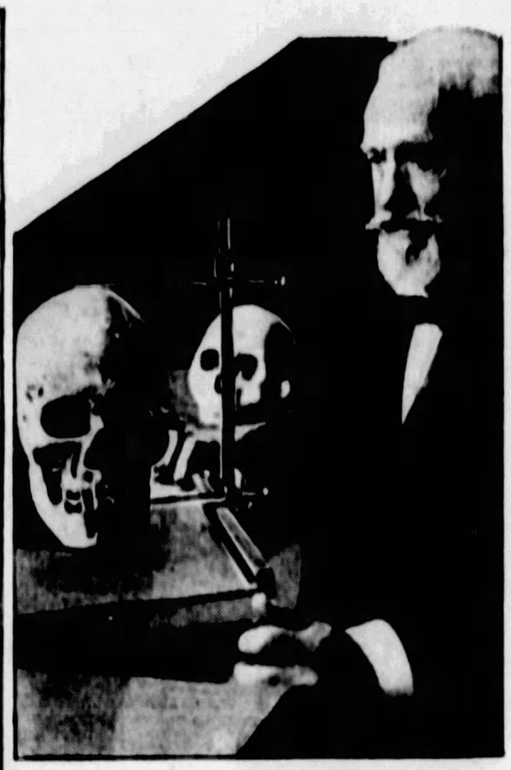
The body, with the exception of the bones of the right hand (kept by the Swedish Government with the consent of France, as a relic) was turned over to the French Ambassador. For almost three months, in a strong coffin specially prepared, it rested there in the Embassy, awaiting proper weather for shipment by sea to France. Finally, the weather signs being unpropitious, it was decided to send the body overland, and this was done. The bones of Descartes were placed in the chapel of St. Paul, and later transferred to the church of St. Genevieve, and there, for over a century, they lay undisturbed. All this time the posthumous fame of Descartes grew, and in 1793, what was left of Descartes was removed from the comparatively humble grave at St. Genevieve's, and with due ceremony the remains were given the highest place of honor in the famous Pantheon.

Even this was not to be the final resting place of Descartes. In 1819 the bones of the great thinker were taken from the Pantheon and brought to the Church of St. Germain des Pres.

All this time the fact had not been generally known that when the remains of Descartes had come back from Sweden, the skull had been missing. Probably the fact had been withheld as a matter of policy. But now, with the interment in St. Germain, the fact became known. Simultaneously it was reported that there had been, in the possession of a Swedish resident of France, what was said to be the original skull of Descartes. It was established that the skull of the philosopher had been stolen when the body was on its way to France from Stockholm. The act of mutilation, according to records dug up by Professor Verneau, was done by a Swedish guard, who, being appointed to watch over the dead body, removed the skull.

The Skull of Descartes, Now Authenticated and on Exhibition in the Paris Museum.

The Portrait of Rene Descartes, by Franz Hals, in the Louvre, From Which Professor Verneau Made the Measurements to Compare With the Recovered Skull.



Professor Verneau Measuring the Disputed Skull.

Eventually it was turned over to the Paris Museum of Natural History where, for generations, it had lain with hundreds of other skulls, nobody dreaming that it was really the head of Descartes. The claim of the donor was regarded with skepticism even at the time the award had been made, and as the years went by, it had even been forgotten. It was remembered only when the paper accompanying the donation came to light.

The problem then was to establish whether or not the skull in question was really that of the celebrated Frenchman. The job was put up to Verneau. His first act was to obtain two of the well-known paintings of Descartes, which hung in the gallery of the Louvre. One was by the master Franz Hals, the other by Bourdon. Professor Verneau made photostatic copies of both heads, and of the skull itself, and then measured the exact dimensions from the heads of the portraits. Microscopic instruments were then used in comparing the measurements, curvatures and other peculiarities of the actual skull and the two paintings.

The results satisfied Verneau that the skull was really that of Descartes. But not satisfied with this, he instituted the investigation which established the facts relating to the original theft of the skull and its eventual placing with the French Museum. It took five years to do this. Israel Planstroem was the name of the Swedish guard who, inspired by his desire to have a souvenir of the great man, appropriated the skull. He kept it throughout his life, and it was not until he died that it was sold, and then at auction. In 1751 the skull came into possession of Olaf Celsius, an antiquarian, and in 1821 it came into the hands of the museum, through gift. There it reposed for a century, until the research by Verneau established that it was Descartes' head.

# Barred American Actress from English Stage

LONDON, March 10

A CRISIS in the international relations of the American and English theatres has been caused by the barring of Miss Alden Gay, American actress, from the stage in London. The official act itself was done by the British Ministry of Labor's refusal to permit Miss Gay to open in a play on the grounds that her engagement was depriving an English actress of employment.

There was considerable annoyance in the United States when stringent laws were passed in England to keep American jazz bands from competing with the native orchestral talent, and now that this tendency has spread to the theatre at large, reprisals are expected in the United States. It is said that the ruling of the British Labor Bureau was inspired by the tremendous success in London of Tallulah Bankhead and other stage stars from the United States.

On the other hand, however, it is pointed out that America welcomed and poured a flood of gold into the hands of Sir Harry Lauder, Beatrice Lillie, Gertrude Lawrence and a great number of other English actors and actresses. In fact, there was a time when English actors were in the majority in plays on Broadway. For a certain type of play, American managers sought English actors, and there were several plays within the past few seasons whose entire casts were English, despite the fact that there were scores of competent American actors out of employment.

In the old days of the variety stage English vaudevillians scored their greatest hits in the United States. It really remained for American audiences to discover Lauder, Laddie Cliff, Vesta Victoria, Vesta Tilley, Marie Lloyd and many others. The lists of English actors and actresses who scored hits in America in the field of legitimate and musical comedy entertainment were far larger than those of Americans who earned their major successes in England. Criticized for their preference for English performers, American managers answered loftily that there were no boundaries in the field of art; that the stage was international, and that citizenship was not a factor in the matter of talent. All this, however, was in the days before the organization of the powerful Actors' Equity Association, which is now taking a hand.

"If England bars American actors and actresses, America will have to bar English stage people," is the ultimatum of a strong faction in the Actors' Equity Association. The barring of Miss Gay has brought the matter to a crisis which may effect the destinies of scores of actors in both countries.

Miss Alden Gay, the Young American Actress, Who Has Been Barred From the English Stage, and Whose Case Has Caused Much Excitement in the Theatrical World.

# Why Milk and Cheese are Valuable

HUNGER is placed even before sex instinct in the life of evolutionary man, so that man's menu is almost as ancient an institution as the record of his life itself. Artichokes, oysters, grapefruit, lobster, eggplant, nectarines are among the items which have appeared on man's menu within the past few hundred years. But long before that, almost as far back as there is record, man drank milk and ate cheese.

Intuitively ancient man must have discovered what modern man knows today scientifically, that milk and cheese, among all other foods, rank exceptionally high in dietetic value. The vitamin content, of course, is not the only factor that confers upon milk and cheese their dietetic value, which was recognized before the discovery of vitamins. The ancients must have known that milk was the best food for children; obviously, since this is the food that nature herself provided for children. But why?

The growing child has a special requirement for calcium and phosphates for the building up of bone. Recent work in the study of that children's disease known as rickets has shown that these elements must be supplied in the diet not only in adequate amounts but also in definite proportions. Most articles of food are poor in calcium; milk is especially rich in calcium and contains calcium and phosphates in the proper proportion.

In the matter of calcium requirements for the average child, it has been established scientifically that seven ounces of cow's milk are the equivalent of fifteen eggs. In addition to its calcium content, milk is rich also in vitamin A and vitamin B, while containing no vitamin C at all. Bread contains very little calcium, nor does white bread contain either vitamin A or B.

It may be said that what bread stands for in the matter of quantity, milk stands for in quality. What is true for milk applies also for its by-products, cheese and butter. Cheese contains the protein casein, of a high dietetic value, in a very concentrated form, together with a certain amount of vitamin B. Butter is rich in vitamin A. Both cheese and butter contain less calcium than milk, but are still richer in calcium than most other articles of diet.

As the calcium requirements for growth become less urgent, so the diet changes from milk to cheese and butter. It has been pointed out by an English dietetic specialist, Dr. Graham Lusk, that "few of those who eat in restaurants realize that the greater quota of nourishment which is brought to them lies not in the specific dish served, but in the bread and butter which is ostensibly presented as a gift."

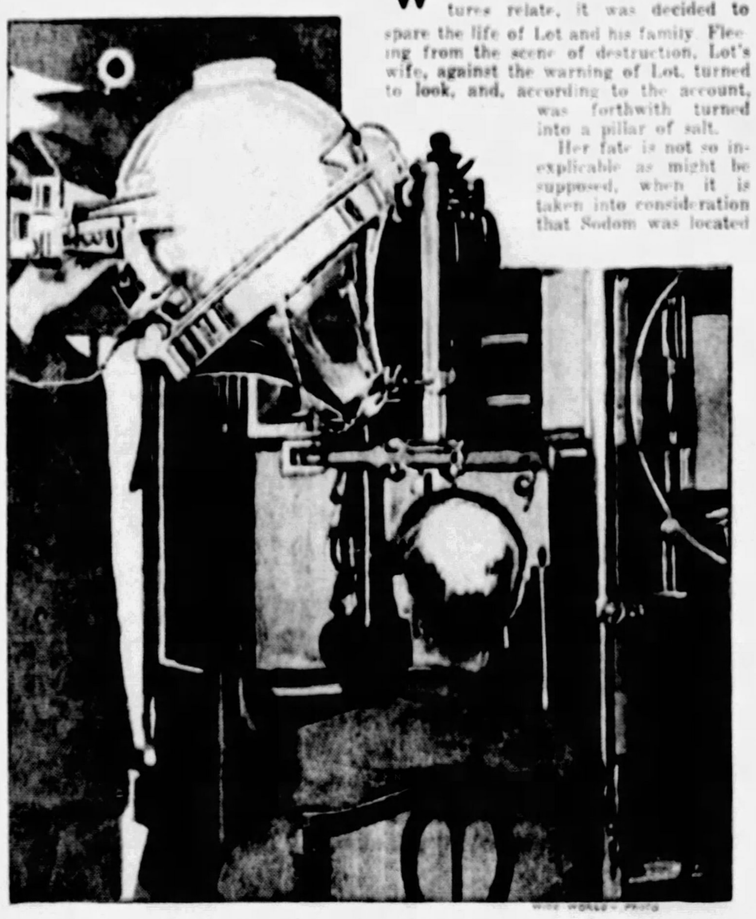
# To Tear Down and Sell the Famous "Lot's Wife" Pillar of Salt

WHEN Jehovah decided to destroy Sodom and Gomorrah, the scriptures relate, it was decided to spare the life of Lot and his family. Fleeing from the scene of destruction, Lot's wife, against the warning of Lot, turned to look, and, according to the account, was forthwith turned into a pillar of salt.

Her fate is not so inexplicable as might be supposed, when it is taken into consideration that Sodom was located on the edge of the Dead Sea, and that the destruction of the city was supposed to have taken place as the result of a great earth disturbance. Salt was an abundant constituent of the rocks around the Dead Sea. An eruption such as that which destroyed the wicked cities might have been accompanied by eruptions of salt slime, which presumably enveloped the good wife as she lingered. Lot, turning and seeing a mound, or pillar of salt where a short time before his wife had been, probably thought that a miraculous change had taken place, and so the incident was reported.

At any rate, near the shores of the Dead Sea stood a pillar of salt which, in later years, was known as "Lot's Wife," and the inhabitants of the Holy Land were convinced that this pillar was really all that remained of Lot's wife. The crystallized Mrs. Lot was pointed out to hundreds of thousands of pilgrims, and her sad fate was used as subject for sermons on the matter of disobedience, and what happens to women who disobey their husbands. But in time the quasi-holy nature of the pillar of salt was overlooked in certain commercial matters which involved concessions to work the Dead Sea deposits. Modern gentlemen with blue prints, machinery and all sorts of scientific devices came along, and before long it was inevitable that Lot's wife, in her traditional salt reincarnation, was doomed.

The concessionaires figured it out that the famous Pillar of Salt, having served so many centuries as an object lesson, was due to be turned into common table salt. It was recently announced that the pillar was to be torn down, crushed into powder form after going through the usual process of refinement, and sold for the salt shakers. There was a chorus of protest from all parts of the world against this move, which was styled a desecration. This gave the concessionaires a brand new idea. Common salt, after all, may be bought for a few cents a pound. Salt, however, which contained what once was the wife of a famous character in the Bible would be worth a great deal more as a relic. Hence, the newest plan is to sell the salt in special containers made from what is left of some of the equally storied cedars of Lebanon, and to get dollars instead of pennies for the containers of the sacred salt.



Experimenting on a Victim of Baldness With the Ultra-Violet Rays.

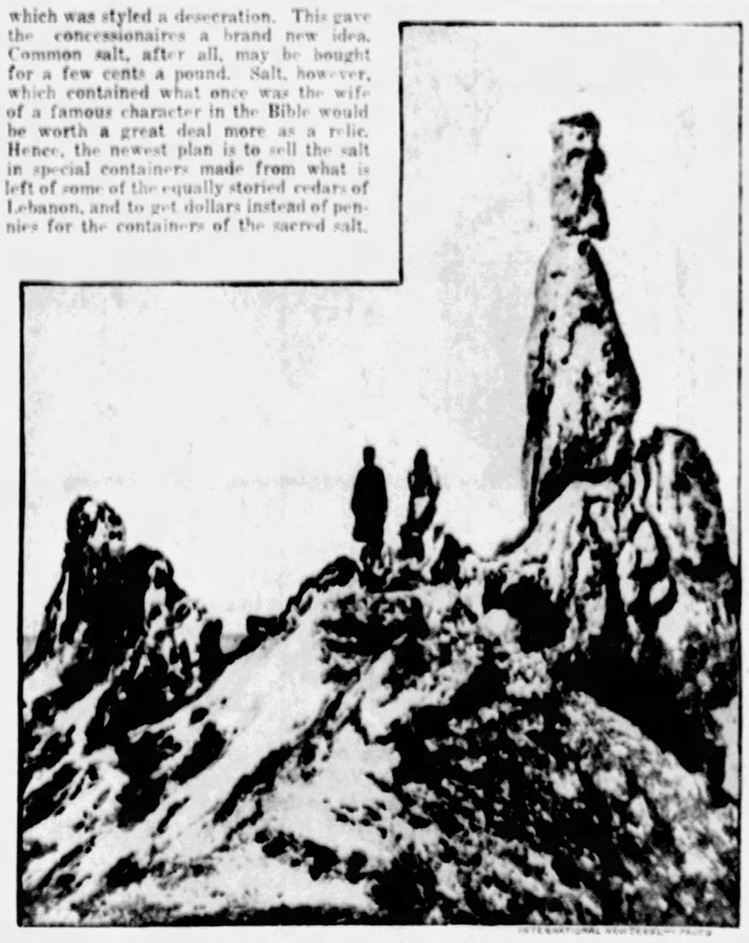
# Hope At Last For The Bald

ONE of the most persistent plagues of civilized man has been baldness. There have been concocted some thousands of lotions and remedies, and there have been used a great number of variegated treatments to bring back hair to those who have lost it, all with no great effect. Now, for the first time, there seems to be hope for the bald.

The British Medical Supply Association of London has been experimenting of late years with ultra-violet rays for the growth of hair. Some of the experiments have been so successful that there seems no doubt the use of these rays as a treatment for baldness will soon become more or less general.

Scalp troubles are claimed by experts to be the principal cause for the stoppage of hair growth, falling hair and other ailments that result in baldness, but it has also been found that, lacking stimulation, the roots of the hair cease to function properly, and need to be revived into activity. The perfection of a violet-ray device that not only kills germs and remedies surface affections, but penetrates to the hair roots and brings them to life, has been accomplished, according to the medical supply organization.

After the announcement of the development of the apparatus, the inventors had no trouble in mobilizing persons as experimental subjects. The applications for treatment to prove the efficacy of the violet-ray afforded an interesting psychological study. The operators found that bald men were equally as sensitive about their lack of hair as women were about their complexions, and the inventors look forward to as great a demand for the apparatus as there is a demand for beauty parlor appliances. "Men are as vain as women about their looks," they say, "and willing to pay the most exorbitant prices for new hair."



The Famous Pillar of Salt in Palestine, Which Many Bible Students Believe to Be the Body of Lot's Wife, Miraculously Changed Into Salt Because of Her Curiosity in Looking Back on the Destruction of Sodom and Gomorrah.

# Should a Minister Tell?

## Because the Rev. Mr. Pardue Revealed the Confession of the Pretty Young Bride, Alma Gatlin, the Body of Her Father Was Found, She Was Tried for Murder, With a Series of Dramatic Climaxes and Surprise Ending That Equals Any Scenario Invented in Hollywood

**Alma Gatlin, Beauty Prize Winner, Who Confessed to the Murder of Her Father to Rev. Mr. Pardue, the Village Clergyman.**

**CAST OF CHARACTERS:**

| | |
|---|---|
| The Accused Heroine | Alma Petty Gatlin |
| The Minister Who Told | Rev. Thomas F. Pardue |
| The Heroine's Murdered Father | Smith T. Petty |
| Her Mother | Mrs. Smith T. Petty |
| Her Fifteen-Year-Old Brother | Woodrow Wilson Petty |
| The Sheriff of Rockingham | J. F. Smith |
| Chief Attorney for the Defence | Powell W. Glidewell |
| Chief Attorney for the Prosecution | Porter Graves |
| The Judge | Justice Cameron McRae |
| Foreman of the Jury | W. M. Carter |

*On Their Knees, the Rev. Mr. Pardue Raised His Eyes and Hand to Heaven and, Clasping a Bible to His Heart, Prayed With the Young Woman at His Side as She Confessed Her Startling Story of How She Had Murdered Her Father.*

### REEL I.
**The Confession.**
**TITLE.**

IS IT THE DUTY OF REV. THOMAS F. PARDUE, BAPTIST MINISTER OF REIDSVILLE, N. C., TO REVEAL THE MURDER CONFESSION HE HAS HEARD OR TO SEAL HIS LIPS?

IRIS IN FULL SHOT of the minister's study.

He is sitting anxiously considering that problem. He looks over at the empty settee. VISION IN—

On the settee, Alma Petty Gatlin, 20-year-old bride of the local fire chief. She is a really pretty girl who a few years ago won a trip to California in a beauty contest and like most such winners, is now in trouble. Mrs. Gatlin, with growing emotion is telling something to the astounded minister. Her eyes become wild, she jumps to her feet, pantomimes picking up some imaginary weapon the size of an axe, steps stealthily forward and brings it down with a vicious blow. SPOKEN TITLE—

"and Father moaned: 'Alma, why are you killing me?'"

The vision of Alma Gatlin speaks this title, pantomimes striking another blow at someone prostrate at her feet and then collapses on the minister's settee. She DISSOLVES OUT, leaving the deeply troubled minister staring at the empty settee. He paces the floor and finally looks out the window at—

FULL SHOT, exterior of the minister's house, a uniformed policeman passing.

CLOSE-UP of Rev. Pardue, seen through window. He registers that he has come to a decision and taps on the glass. FADE OUT.

### REEL II.
**The Exposure.**

FADE IN LONG SHOT of the exterior of a house that has been empty since Smith T. Petty disappeared, his wife died and his daughter Alma married the fire chief. The Rev. Pardue walks thoughtfully into foreground of scene and pauses with a start as he sees a car stop in front of the vacant Petty house and Sheriff Robert Smith of Rockingham, with several deputies, carrying picks and shovels, enter the house.

CLOSE-UP of Rev. Pardue, again haunted with doubts. FADE OUT.

FADE IN exterior of Chief Gatlin's house. His wife Alma, at the window, watching for him to come home. She starts at the sight of—

LONG SHOT of Rev. Pardue coming down the street.

FULL SHOT of cellar of the Petty house. In the half-darkness it can be seen that the deputies have dug a shallow trench in the floor. From this they lift out a man's body. The Sheriff's flash-light reveals the cruel face of Alma's father, Smith Petty. The Sheriff feels of the back of the dead man's skull and utters SPOKEN TITLE—

"Just where the minister said she hit him."

Exterior of Gatlin's house. Rev. Pardue, passing, catches Alma's eye, at the window, and quickly averts his eyes, as he hurries on.

CLOSE-UP of Alma's face at window, registering quick, intuitive fear. SPOKEN TITLE—

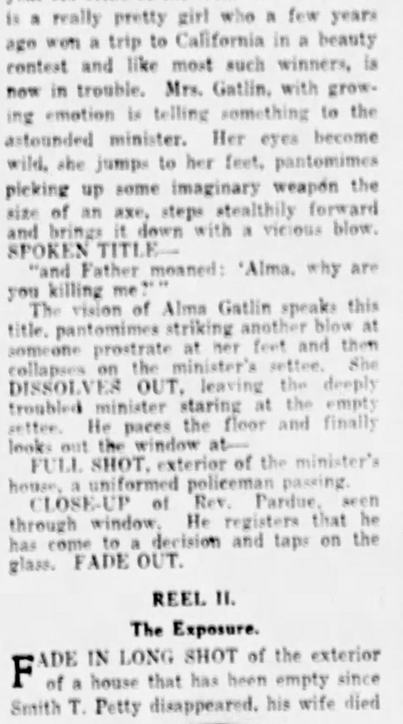
"But he promised never to tell."

As Alma whispers this to herself, she sees—

FULL exterior of Gatlin house. The Sheriff's car stops and his entire party march to the front door. Alma opens it. SPOKEN TITLE—

"I arrest you for the murder of your father, Smith T. Petty."

FADE OUT on the Sheriff saying this to the almost-fainting Alma.



**Rev. Mr. Pardue, the Minister Who Listened to the Confession, Promised Not to Tell, Then Was Tortured by His Conscience and Revealed Alma's Secret to the Authorities.**

**Alma Gatlin, Waiting at the Barred Windows of the Court House to Hear the Jury's Verdict.**

### REEL III.
**The Minister's Story.**
**TITLE**

SIX MONTHS LATER—

FULL SET of the crowded courtroom. Rev. Pardue is telling the story of Alma's alleged confession. SPOKEN TITLE—

"And when I had locked my study door, she confessed it all."

As the minister says this from the witness chair, DISSOLVE INTO his study. Alma sits on the settee as he locks the door and turns to her. SPOKEN TITLE—

"That night I found Father strangling Mother, as he often did when he had been drinking——"

As Alma says this DISSOLVE INTO—

FULL SHOT of the dining-room of the Petty house. Mr. Petty, intoxicated, is brutally throwing his half-conscious wife about by the throat as Alma enters unexpectedly. The daughter rushes to her mother's aid, pounding her powerful father with her small fists, until in fury he turns on Alma and beats her. The mother is too weak to help and when the father is through, the girl picks herself up. SPOKEN TITLE—

"I'll get you for this!"

Alma speaks this from the door as she totters out. The big man laughs at the threat. FADE INTO TITLE—

BREAKFAST.

FADE IN—FULL SHOT of dining room. Mr. Petty sober and sullen, eating alone. Behind him in the kitchen door, watching with a dangerous look, stands Alma. Mr. Petty holds up his empty coffee cup, without looking around. Alma takes the cup into the kitchen and reappears immediately, on tip-toe, with an axe, brandished on high. She brings the blunt end down on the back of her father's head, and, raising it again, watches him slowly fall out of his chair. Alma remains with the axe poised, watching the prostrate figure. His eyes open, he looks up at her and his lips move. As the flashing axe descends again:

DISSOLVE INTO the minister's study. Alma is pantomiming that last blow. She sinks back to the settee, but the minister asks a question. She answers SPOKEN TITLE—

"Oh, I hid the body in a closet."

Alma bursts into hysterical weeping. The attorney for the defence flies at him.

CLOSE-UP of jury box. The twelve men look very stern. FADE OUT.

### REEL IV.
**Alma's Story.**

FADE IN FULL SHOT of court room. All eyes turn as the pretty prisoner takes the stand, pale from six months in jail, but well-groomed and confident. Her attorney invites Alma to tell the jury her version of the killing. As she starts to speak, DISSOLVE INTO—

FULL SET of Petty house kitchen. Alma with hat on, ready to leave, stops to dab with a wet rag at some little fleck she sees on her neck. Her father's face, insane with liquor, glares in the door. SPOKEN TITLE—

"You needn't wash your neck, I'm going to cut it off."

Mr. Petty shouts this as he grabs a butcher knife and rushes at her. Alma manages to catch the knife-hand, but the other grasps her throat, giving time for just one scream. This brings in at one door her fifteen-year-old brother, Woodrow Wilson Petty, with an axe in his hand and at the other, her mother. The boy stands paralyzed at the sight, but Mrs. Petty snatches the axe from his hands and strikes her husband on the back of his head. He falls, dragging Alma with him. As he falls, Mrs. Petty strikes him again in the face. Alma gets up slowly, dazed (dazzled, to use her exact word). For a moment the three stare, stunned, at the dead man. Then the mother orders the brother and sister to go out and tell nobody. As they go, FADE INTO TITLE.

THAT EVENING.

FULL SHOT of Mrs. Petty's bedroom. She is in bed with strange, staring eyes. Alma looking in the door, thinks at first that she has taken poison, but the eyes turn toward her. Alma whispers a question. The mother makes a gesture of silence. SPOKEN TITLE—

"I'll never tell where I buried him."

Mrs. Petty speaks this decisively. FADE SLOWLY INTO TITLE—

MRS. PETTY'S DEATH BED.

FULL SHOT of small hospital private room, Mrs. Petty dying. Alma enters with a minister (not Mr. Pardue), tells him that her mother has something important to say to him and goes out. Mrs. Petty recognizes the minister, tries to speak and then her eyes close in death.

DISSOLVE BACK to witness chair in court room. Alma finishes her story.

CLOSE-UP of jury. Their faces have softened.

### REEL V.
**The Fatal Inconsistency.**

FADE IN SPOKEN TITLE—

"Now, in your own words, tell the jury about this alleged confession."

SEMI-CLOSE-UP of witness chair. Alma's attorney says this to her and she begins to speak again.

DISSOLVE INTO Rev. Pardue's study. Alma sits on the settee, just as the minister said she did. The sequence that follows is a brief resume of the high spots substantially as he related them.

DISSOLVE BACK TO FULL SHOT OF COURT ROOM—Every one is listening breathlessly to the pretty defendant.

CLOSE-UP of the prosecuting attorney registering growing astonishment that she should voluntarily admit all this. His eyes roll toward—

CLOSE-UP of the jury. The twelve faces are growing stern again.

DISSOLVE BACK to the minister's study. Alma is just finishing her confession to him and collapses onto the settee. But Alma's story does not stop here. It goes on and narrates something that the Rev. Pardue did not mention. The minister now suggests that they pray, and the two get down on their knees while the Rev. Pardue raises his eyes in prayer. SPOKEN TITLE—

"I thank Thee for letting me be such a leader among men that a person would have such confidence in me as to tell a horrible thing like this. Oh, God, let me keep the confidence of people."

As the Rev. Pardue utters this in prayer, Alma looks at him anxiously and asks a question to which he replies SPOKEN TITLE—

"I assure you again that your confession shall remain a secret between God and me and shall die with me."

The minister says this on his knees and with the Bible held against his heart. Alma believes him.

DISSOLVE BACK TO PANORAMA of the court room. Most of the spectators are furious at the betrayal of the girl's confidence, but the more thoughtful realize that she has apparently confessed in open court and left the jury no excuse to acquit. The faces of the jury seem to reflect this. FADE OUT on the jury.

**Mr. Smith Petty, Alma's Father, Who Was Murdered and Buried in the Cellar of His Home.**

**Mrs. Petty, Alma's Mother, Now Dead, Who Alma Now Declares Committed the Murder.**

### REEL VI.
**The Astonishing Explanation.**

FADE INTO SPOKEN TITLE BY JUDGE McRAE—

"But why did you make such a confession, if it was not true?"

SEMI-CLOSE-UP of the witness chair. Alma's attorney asks her that question.

CLOSE-UP of the prosecuting attorney, nodding vigorous and triumphant approval as he glances meaningly at the jury. It is just the question he wants to ask. SPOKEN TITLE—

"Mr. Pardue preached that if anyone died with a great sin, unconfessed, he would burn in Hell, forever."

CLOSE-UP of the witness chair as Alma says this.

DISSOLVE INTO CUT-BACK of Alma bringing the other minister to her mother's death-bed, too late.

DISSOLVE BACK TO CLOSE-UP of the witness chair. Alma is still testifying. SPOKEN TITLE—

"I wanted to know if Mother had committed a great sin or if she was justified. But I had promised never to tell about her."

As Alma says this—

DISSOLVE INTO FULL SET of the choir loft of Rev. Pardue's church. Alma and the minister are alone in the dimly-lit choir stalls. She is hesitatingly asking him questions. He suddenly arises and dramatically shakes a finger in her face. SPOKEN TITLE—

"What is all this? Why do you want to know so much about the sin of murder?"

CLOSE-UP of the two. As the minister shouts this at her, the girl recoils in dismay. She does not know how to answer without breaking that promise to her dead mother.

DISSOLVE INTO SPOKEN TITLE—

"So I told him I did it and he promised never to tell."

SEMI-CLOSE-UP of the witness chair. When Alma finishes saying this, her attorney indicates that he is done and turns his client over to the prosecution for cross-examination.

CLOSE-UP of the prosecuting attorney arising with surprised and flustered face. FADE OUT.

FADE-IN CLOSE-UP of the jury box. The twelve men stand up as their foreman announces the verdict. SPOKEN TITLE—

"NOT GUILTY!"

IRIS OUT.

# Carving the Hump Out of Mamma's Nose to Resemble Her Son's Cute "Pug"

UNDETERRED by the experience of Fannie Brice, who lost her husband, "Nicky" Arnstein, after she had her nose straightened, Mme. Estelle Gray-Lhevinne, the well-known concert violinist, has just had the hump taken out of her nose.

Arnstein, it will be recalled, left Miss Brice after she had been beautified by the nasal operation because she "didn't seem to be the same old Fannie." When the comedienne obtained her divorce she charged desertion due to the fact that the contour of her face had been changed.

Mme. Gray-Lhevinne has been internationally acclaimed as a beauty as well as one of the world's greatest women violinists. She did not submit to the nose operation to enchance her beauty, as did Miss Brice, but for a far different and more sentimental reason.

The violinist has a son, Laddie, seven years old, who is not only a child prodigy at the piano, but has been declared a perfect boy physically, and has been used as a model by artists. One of Laddie's most attractive features is his cute little pug nose.

Mme. Gray-Lhevinne, on the other hand, is of the Roman style of beauty. She had a pronounced hump on the bridge of her nose. This was not by any means a disfigurement, but it was so unlike Laddie's little nose that the more Madame compared the two facial organs the more she wanted a nose like Laddie's.

This being the age of beauty surgeons, Mme. Gray-Lhevinne did not have to look far after she firmly made up her mind to have a nose like her son's. She consulted a well-known Chicago plastic surgeon. The surgeon assured Mme. Gray-Lhevinne that the operation was possible, even simple. All that were needed were the exact measurements of Laddie's nose and the presence of the boy himself as a model. So micrometer measurements of the boy's nose were taken and he was brought on to Chicago from his California home to sit as a model while his mother's face was recast.

Mme. Estelle Gray-Lhevinne, as She Appeared Before the Operation, Her Nose Being a Decided Grecian Type.

Mme. Gray-Lhevinne's Nose, Without the Hump, as It Appeared After the Operation.

Laddie Gray-Lhevinne, Whose Cute Little Pug Nose Was Copied by His Mother.

Before the operation was performed, the violinist said:

"In the Scotch-Irish folklore of my son's ancestors, it was considered a lucky omen for any boy to look like his mother. But I regard it as even more fortunate and a great blessing as well for any mother to be able to look like her son. Since this happiness was denied me, I have set about on my own initiative to even the score and remissions of both birth and nature, molding myself in my son's image instead of him in mine."

After micrometer measurements of both noses had been made, Laddie was placed on the model's stool where he sat patiently while the surgeon removed the hump from the mother's nose. Now, both noses are exactly alike, adding greatly to the mother's happiness.

Laddie expresses himself as well pleased with his mother's new nose.

Laddie is a remarkable boy in more respects than one.

When he was only one year old, Laddie won a prize for physical perfection. At the age of three he won a nation-wide beauty contest for boys. Before he was four, he showed marked musical talents, and at four and one half gave his first public piano recital, playing numbers by Bach, Mozart and Schumann.

Magazines at this time were printing photographs of him showing his bodily perfection. Last Spring, not yet six years old, he was presented at the Civic Auditorium in San Francisco, by the Pacific Musical Society, and won over an audience of many hundreds. Since then he has appeared a number of times at the Pacific Musical Society entertainments, each time giving a different program of masterpieces for the piano, by Mozart, Bach, Beethoven, Grieg, Tschaikowsky and a Chopin Polonaise. His repertory includes many of the larger works, although his baby hand can only reach five notes on the piano.

Last Spring, too, he was presented at musical entertainments by six Eastern universities. He is permitted to leave home only six weeks of the year, the rest of the time being devoted to his education and his health.

Laddie does all his piano practicing with his pet rabbit, an old buck, three years older than Laddie, on the piano stool beside him.

# Italy's First Air Collision to Bring Law Against Stunt-Flying Over Cities

ROME, March 8.

KING AMANULLAH of Afghanistan was visiting Rome, and as part of the official welcome there were airplane maneuvers. Two Italian aviators performed spectacular stunts and were cheered by the crowds below.

Then, suddenly, they met head-on in a collision. One of the planes crashed to the street below, killing the pilot and injuring several people. The other nose-dived into the roof of a house, and so great was the crash that it remained impaled there. The pilot of this plane was also killed.

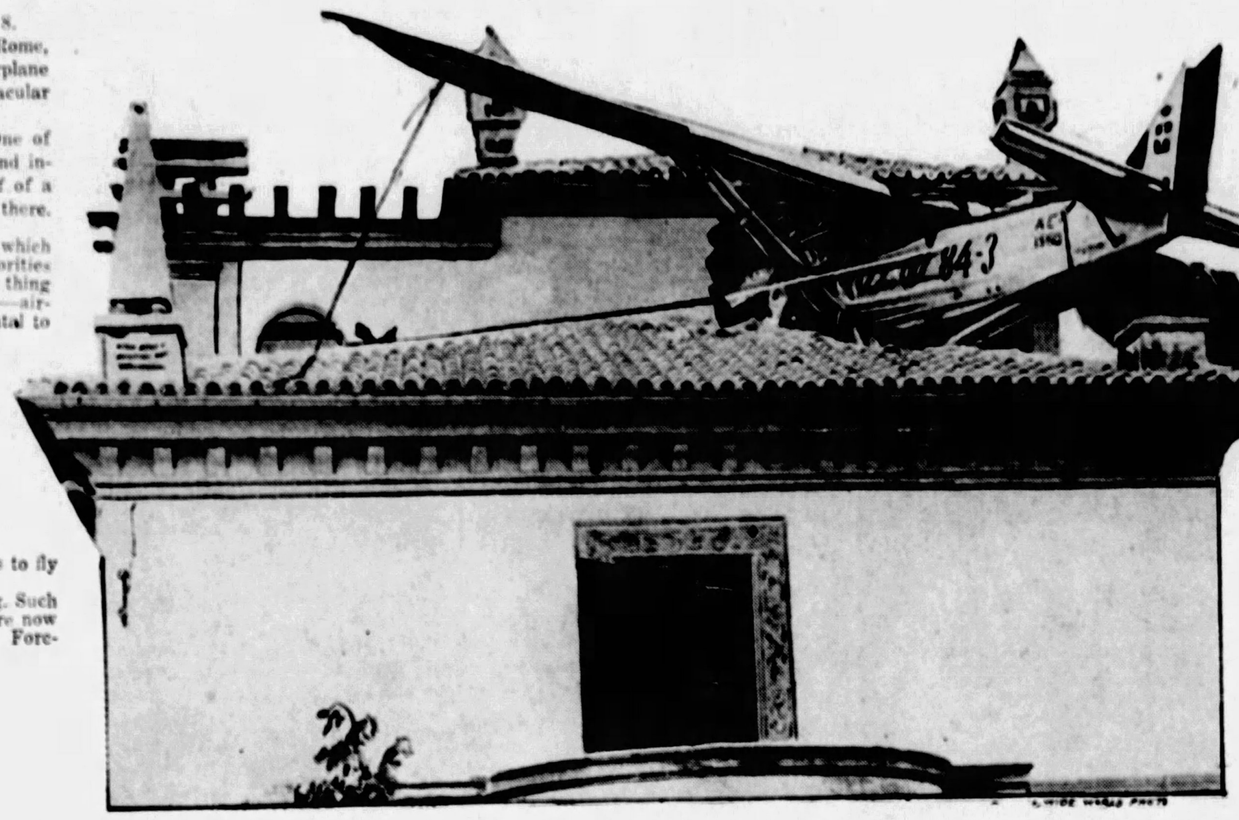
This tragedy served to bring to a head a problem which had been under discussion for some time by the civil authorities of Rome—the matter of regulating air traffic. At last the thing had happened which many people of Rome had foreseen—airplanes travelling over the city had collided with results fatal to the pilots and injurious to innocent bystanders below.

There had been under discussion a law which would provide that no air machine must fly over the city at a height less than one thousand feet. However, these two planes had been considerably over that distance in the air, and yet the accident occurred. It became apparent that the matter of height was not the only consideration to be involved in the drafting of an adequate traffic law for planes. If controls break or wings collapse, it makes no difference how high up a machine may be in the air. When they fall they are likely to fall like meteors. It was suggested that the only safe rule for the protection of citizens was to forbid airplanes to fly over cities, no matter at what height.

This, of course, was found to be too stringent a ruling. Such a law would interfere with the airplane transports which are now assuming the proportions of a major industry in Europe. Forcing the passenger planes to detour whenever they came to a city would seriously impair traveling schedules. In the matter of regulations concerning height of flight over cities, it is regarded as almost impossible to enforce, especially until such time as municipalities employ airplane police. Since the growth of aerial mail and transport systems, scores of planes fly over cities at night as well as by day. In many European as well as American cities, during outdoor events, such as ball games, fairs, circuses and carnivals, it has been the practice of aviators to fly over the grounds, circling above the massed spectators below, imperilling many lives in case of an accident which might send the plane crashing to the ground.

In such a case, and in the case of skywriters and other stunt flyers, legislation can be immediately effective. The plan in Rome now is to introduce stringent laws forbidding any over-city flights which are of an advertising or "stunt" nature. From that point on, legislation will have to proceed as it did in the matter of automobile traffic. When motor car use became so general as to create a traffic problem, one-way streets were introduced to reduce the chances of accidents. Something of the sort will have to be done with air traffic. It it predicted by experts in aerial travel that in a very few years the skies will be clouded by hundreds of fliers. Long before that time arrives laws will have to be established which will minimize the chances of accidents which may prove fatal to the people below.

Such laws will undoubtedly include a more rigid inspection of planes, perhaps a compulsory inspection of every plane shortly before it flies over a city. The matter of licenses for pilots will be more carefully regulated. Just as it is a serious infraction of automobile traffic laws to drive a car while intoxicated, so in the case of air travel intoxication will undoubtly be the cause of taking away the licenses of any offending pilots. The point of view taken by legislators must be that no parachute can ever be invented which will protect pedestrians when an airplane comes hurtling to a crowded city street.



Wreck of a Stunting Airplane, Nosed Into the Tile Roof of a Roman House, Following a Collision in Mid-air With Another Plane. The Pilot Was Killed.

# Beauty Treatments For Dogs More Costly Than For Women

NEW YORK now boasts an unusual beauty parlor, an establishment which confines its ministrations to the lower animals, catering particularly to dogs and cats. And it is an interesting fact that beauty treatments for Fido and Tabby are more expensive than they would be for their mistress.

Miss Sheila Hunt, one of the proprietresses of the unique establishment, explains this by saying:

"The reason for this is that the average dog or cat does not view beauty culture in a reasonable way, as do the women. The animals make more fuss over it, and for that reason we have to charge higher rates."

A shampoo for a dog costs $4.00; manicure, $3.00; violet ray treatment, $10.00; reducing treatment, $50.00, and permanent wave, $15.00. The latter device is much in demand by owners of Pomeranians, who not only buy their pets weekly shampoos, but have their glossy long hair beautifully marcelled. Some have gone so far as to purchase boyish bobs for their animals. Several Pekinese have been bobbed at Miss Hunt's shop.

One of the most interesting of the devices in the shop is a little treadmill, which is used for reducing obese lap-dogs. The weezing animals, overfed with candies and other rich foods, are placed on this treadmill, and given half an hour's workout per day as part of a reduction treatment. They are also given steam baths, a treatment wihch the dogs invariably object to, but which accomplishes results.

Fancy haircuts are given to French poodles, and mistresses of dogs have been known to ask for—and get—hair dyes for their pets. It is becoming fashionable for house dogs in some of the more recherche homes to match the general color scheme supplied by the interior decorators, and where nature has been unable to give the proper hue, the animal beauty shop does the trick.

The shop is exceedingly prosperous, indicating the ever-growing class of people—mostly women, of course—who take their pets seriously. Never in the history of civilization has the dog been given such care and attention as today. In Europe it is no uncommon thing for women to take their dogs with them in the increasing air traffic between London and Paris, and on the trans-Atlantic liners there are usually from a dozen to a score of pedigreed dog passengers.

The modern liner carries a veterinary surgeon as well as a physician. There are sanitary and modernly equipped kennels, and attendants to see that the dogs are as well cared for aboard ship as they are on land. Every precaution is taken to protect their health, for some of the dogs are worth considerable sums of money.

The most recent move made along these lines was to provide life preservers for dogs. Every owner of a dog is provided with a specially constructed life preserver, similar to those used by the human passengers, but smaller, and the dog-owners are instructed in the manner in which the life preservers are then fastened on the dogs.

Miss Sheila Hunt, One of the Proprietors of the Dog Beauty Parlor, Drying the Hair of a Pekinese After a Shampoo.

# Using Ice to Salvage Ships

THE newest development in modern salvage work is the invention of a German, W. Kinwull of Berlin. He ingeniously employs ice as a coating for the holed or damaged ship, thereby rendering the vessel watertight and capable of being pumped out.

This is done by direct cooling in the form of refrigeration of the steel or iron shell of the ship. The refrigeration plant is sunk to the point of operations by means of cables, and is supplied with the cooling liquid, a combination of C02 and brine, by pipe lines from above water. From the refrigerating plant extend flexible pipes, which are placed over the aperture to be sealed. The metal being cooled, the sheet of ice adheres firmly to the hull plates.

The Kinwull system of salvage has been successfully tried out by the British Admiralty, to whom the problem of salvage has always been a considerable one. Scores of vessels are sunk in the waters around the British Isles. Fishermen are constantly complaining of the damage their trawls and gear sustain through the numerous obstructions that bestrew every fishing ground. Under many of these wrecks lie telegraph cables, and many breaks and faults occur which can be traced directly to crushing and obstruction by wrecks.

As many of these wrecked vessels and their cargoes are of considerable value, a large amount of ship salvage has been done in the past ten years, and it is an interesting fact that although Germany possesses the latest and best diving apparatus, British firms are recognized as the world's salvage experts, and in many cases they carry out the work with great success. For some years engineers have been at work on new methods of ship salvaging, but it remained for the German inventor to design what promises to be the most effective of all systems—the use of ice to seal the battered wrecks.

# Why Conditions On Mercury Make It Impossible For Life To Exist

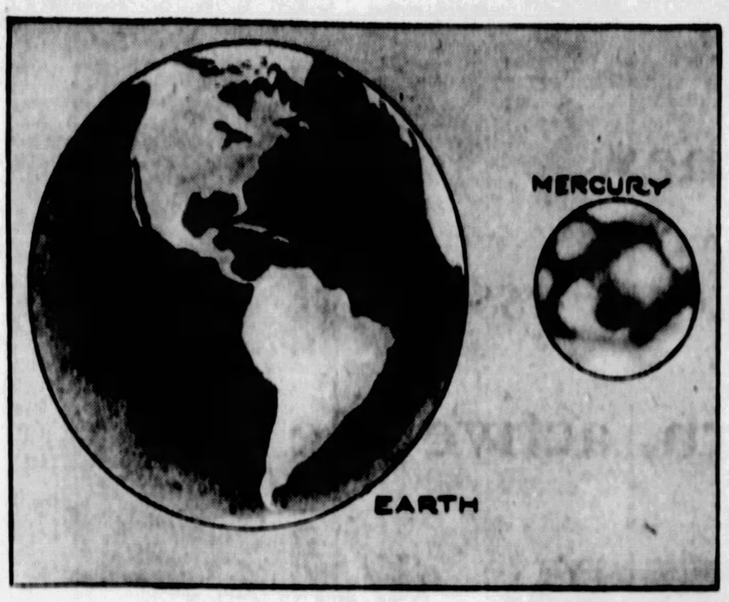

Diagram Drawn to Scale and Showing the Comparative Dimensions of the Earth and the Planet Mercury. Drawn by Prof. Rudaux.

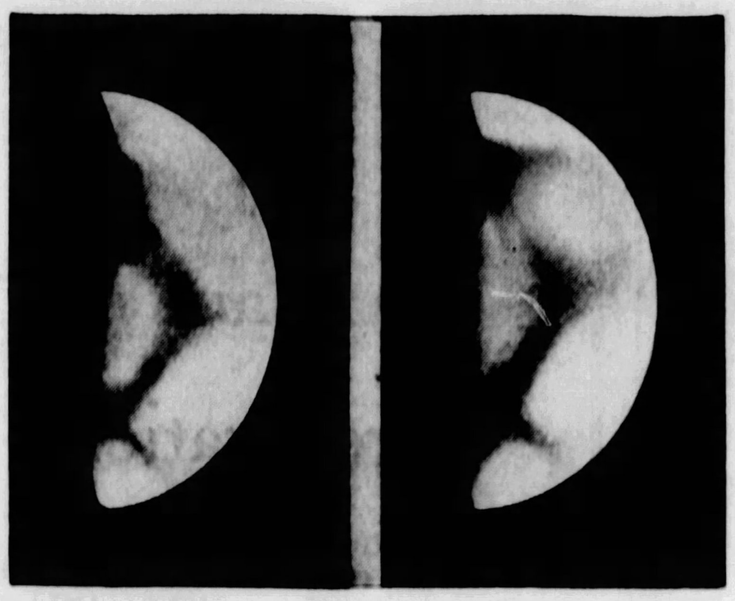
***Professor Rudaux, the Distinguished French Astronomer, Explains How His Observations of This Interesting Planet Reveal High Mountains and Torrid Deserts, and While One Half Is Swept by Violent Wind Storms of Frightful Heat, the Other Side Is in Perpetual Cold and Darkness***



The Irregular Line of the Shadow Boundary of Mercury, Caused by Irregularities on Its Surface.—From Sketch by Professor Rudaux.

***By Professor Lucien Rudaux.***

**Of the Donville, France, Astronomical Observatory.**

DONVILLE, France, March 10.

WHEN astronomers study the planets of the solar system they are interested, first of all, in discovering how closely these other worlds resemble our own, and, secondly, whether it would be possible for life to exist on them. Such researches require an enormous expenditure of patience and time before their results can be considered seriously.

Among the planets Mercury is the one nearest the sun and also the one about which least is known. It is situated in such a way as to render its observation very difficult. Its extremely rapid motion limits the period during which it can be clearly seen to a few days. The following facts will serve to illustrate these remarks.

Mercury is at an average distance of only 36,000,000 miles from the sun. Consequently it moves in a comparatively small orbit. If this orbit were ring-shaped, the planet could be observed in its entire progress around the sun. Such, however, is not the case. By a trick of perspective, the circle, or orbit, seen obliquely, appears to our eyes as an elongated ellipse. For this reason the course of Mercury seems to be a sort of seesaw, and the planet appears to pass alternately from one side to the other of the sun.

In pursuing this motion, Mercury exhibits successive phases similar to the full, half and quarter phases of the moon. These depend upon its changing position as seen from the earth. At the same time it is turning on its axis in such a way as to keep one side always facing the sun. The accompanying diagram will explain these facts better than words.

Since it is near the sun, Mercury is usually lost from view in the sun's radiance. The difficulty of observing it is, therefore, great. It can never be seen by the naked eye except when farthest from the central luminary; in the west a short time before sunset, and in the east a little before sunrise. As it moves very rapidly, completing its orbit in 88 days (figured in conjunction with the orbit of the earth) it only remains far enough away from the sun to be seen for a short time before once again disappearing.

This constitutes the first serious obstacle to regular observations. Weather conditions must next be considered. The observations, already brief, are often further curtailed by clouds or the presence of mist in the vicinity of the horizon where the planet appears. Whoever wants to observe Mercury must have the patience of a soldier on watch.

There is still another obstacle. The diagram illustrating the phases of Mercury shows that when the planet is nearest the earth it appears in the form of a crescent, that is to say, we only preceive a small part of the illuminated portion. Only when it is farthest from the earth is it sufficiently illuminated to enable us to distinguish all the details of its surface. But then as a result of extreme remoteness its dimensions appear so reduced that most of the details cannot be made out. Consequently the planet has to be studied with the largest and most powerful telescopes.

But fogs and disturbances of the air, which are most exaggerated in the neighborhood of the horizon, blur the image as seen in the telescope. It is true that these instruments permit Mercury to be distinguished in broad daylight, but the air has to be of a peculiar transparency without being too bright, in which case, seeking the planet in the neighborhood of the sun, the eye of the observer becomes dazzled.

If we seem to have harped on these vicissitudes it was only to show the difficulty of any consistent study of Mercury. The reader will understand how this planet, which gives up its secrets so reluctantly, has been somewhat neglected by the majority of observers. Our knowledge of it is as yet quite incomplete. After describing its motion and stating its size and position in the solar system, most astronomy books seek refuge in vague and often contradictory remarks. Compared to the earth, Mercury is a very small planet. It is only 3,000 miles in diameter, its volume being thus only equal to a twentieth part of the earth's volume. This is not the only difference between the two worlds, as we shall soon see.

Until the end of the last century, it was generally believed that Mercury and the earth turned on their axes in practically the same time. Then, after a series of observations undertaken between the years 1881 and 1889, the eminent Italian astronomer, Schiaparelli, announced that, instead of turning on its axis in 24 hours, Mercury accomplishes this movement much more slowly. Its rotation, he declared, is completed in the same time as its orbit, i. e. 88 days. The consequence of this fact is that Mercury must always present the same side of its disc to the sun.

It is impossible to tell why the discoveries of the Italian scholar were accepted so reservedly. Some astronomers even discarded his conclusions altogether, continuing to maintain that Mercury must rotate rapidly. The cause of discord is perhaps to be found among the difficulties of making exact observations. In fact, the problem has come down to the present without final solution.

Because of the great interest attached to it, the study of Mercury has been pursued at my observatory for many years. To begin with, it seemed advisable, because of their forced infrequency, to extend the observations over a long period. It would then be possible to assert that a phenomenon which appeared periodically unchanged was a permanent fact. Furthermore, observations at long intervals would enable the observer to distinguish transient phenomena from those of a fixed character. Such a distinction could not be made as a result of many observations within a short space of time.

In furtherance of this program, the observations begun in 1893 were continued until 1927. They have resulted in a number of incontrovertible conclusions.

The discoveries of Schiaparelli, which are admitted by some and denied by others, were found to be correct. Mercury only presents one side of its sphere to the sun. We will appreciate the important consequences of this fact further on. On its illuminated side—which is the only one we will ever see—details appear which can only be discerned in a general fashion. There has been, and still is, a great deal of contradictory information about these details.

Schiaparelli maintained that the shadowy markings of the planet denote geographic features of the surface, that they are very difficult to discern and change their aspect. Many observers since then have discerned the markings partially, others have been unable to make them out at all.

My observations have borne out Schiaparelli's conclusions. Variations actually do occur. Sometimes the markings are very apparent, sometimes they are nearly invisible, or partially masked. These variations do not result from the nature of the markings themselves, but rather from some external influence, which, veiling them, makes them disappear for a time. We are warranted, therefore, in supposing that the influential phenomena are situated in an atmosphere environing the planet, and in likening them provisionally to clouds of vapor or of dust.

The appearance of the markings is the same each time they can definitely be made out. Their permanence is thus assured. This amounts to saying that they represent variations on the surface of the planet. Generally speaking, the surface is of a yellowish color, marked with very bright or white regions. It is difficult to give the exact shade of the darker, grayish, portions.

The map reproduced here is based upon my observations. It shows in a general fashion the appearance of the one side of Mercury that we can see. If this may be compared with the map of the earth, it will immediately be noted that the geographical features of the two globes are entirely different.

To an observer looking at the earth from a great distance the oceans would appear darker than the continents and the great islands. If the same conditions obtained on Mercury, i. e., if the darker portions represented oceans, it would mean that there was very little water on Mercury as compared with that on the earth. Oceans occupy more than three-fourths of the surface of our world, while on Mercury, the dark portions have a total extent less than that of the light.

However, the darker portions of the surface of Mercury need not represent water. By reason of the heightened temperature which must obtain on a planet so close to the sun, the evaporation of water would be such that the atmosphere would be constantly clouded. Thus the details of the surface would nearly always be hidden from view. This does not mean that the planet is absolutely without water, but rather that water must be very scarce there just as it is in terrestrial deserts.

My observations seem to lead to the belief that the general character of the surface of Mercury is similar to that of the moon. On the day when either special circumstances or, which is more likely, new methods of investigation will allow the visible details of the planet to be distinguished with more accuracy, the whole matter will take a great pace forward.

In the meantime, if all the facts proceeding from the appearances that I have observed be assembled, it will be found necessary to consider Mercury as more like the moon than the earth. This hypothesis depends, in part, on the fact that the image of the moon when seen by the unaided eye (appearing then smaller and more blurred than through a telescope) is remarkably like the general appearance of Mercury; the details of the surface, too far away to be made out distinctly, are fused into an appearance of broad masses.

Consequently, it is quite likely that, as in the case of the moon, the darker regions of Mercury represent vast plains whose soil is of a different sort than that of the bright regions.

There is another respect in which the moon and Mercury resemble each other. The sun's light strikes celestial globes so as to illuminate part of them. The conditions under which we see them make the illuminated portions appear of various shapes. Thus we speak of the moon as being full, or half, or quarter. Astronomy calls these various degrees of illumination "phases." The half moon is one phase, the quarter moon another phase, and the full moon still another.

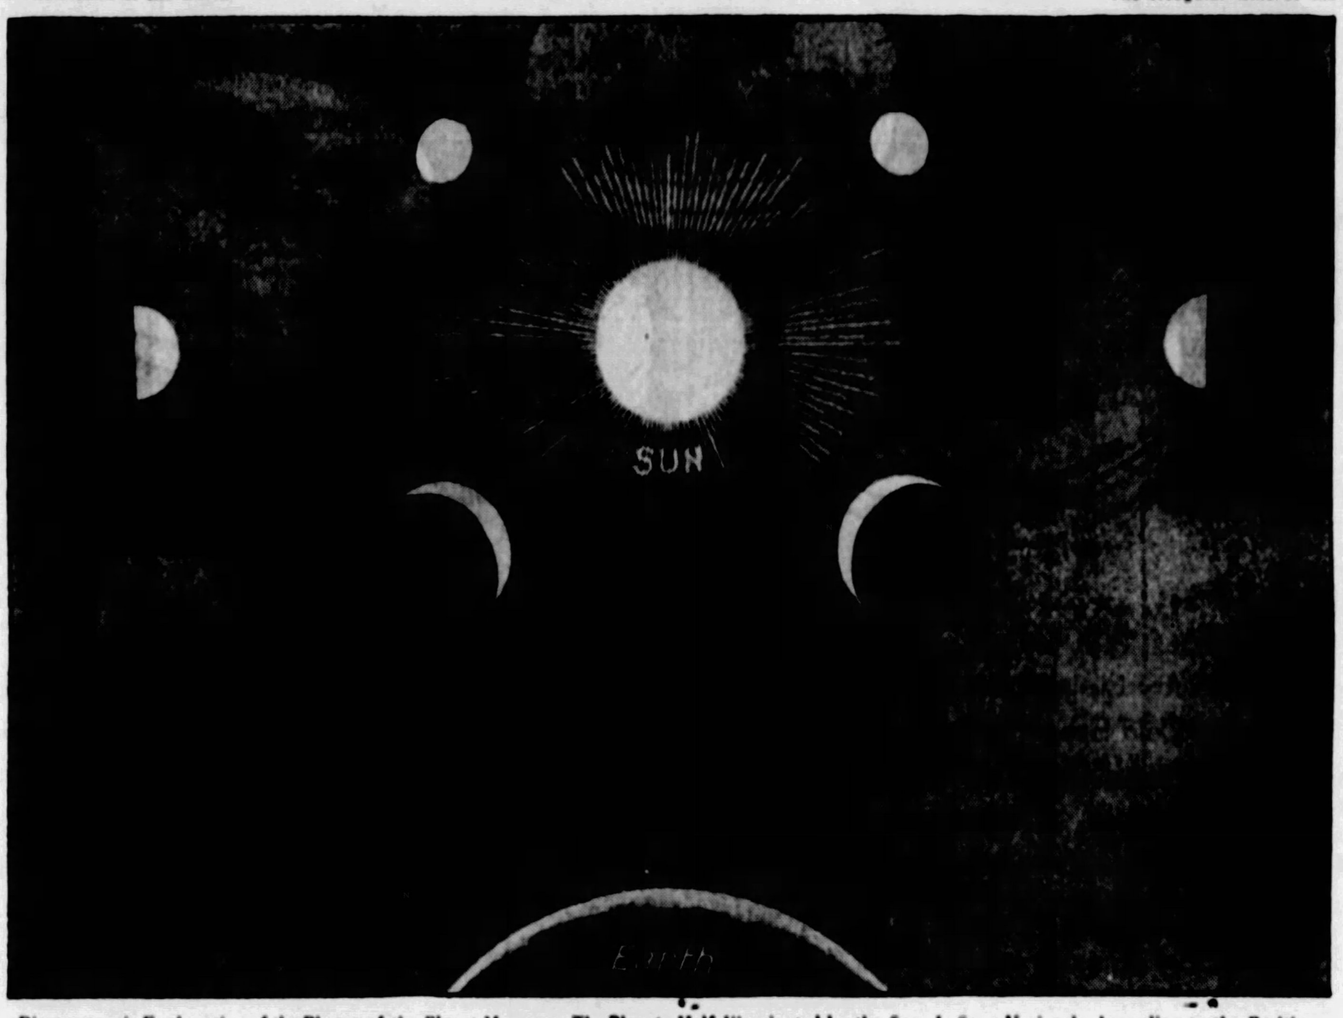
In each case, part of the globe appears bright and the rest dark. Where the light portion and the dark portion come together the eye perceives a line. This line, in the case of a perfectly round and smooth globe, would not be uneven; however, if the surface of the globe happened to be broken or hilly, we would perceive the line as more or less uneven, according as the irregularities of the surface were more or less pronounced. Now, both Mercury and the moon have phases, and in the case of both, the line separating the illuminated and unilluminated portions appears very uneven.

Consequently, after a number of observations, I concluded that the surface of Mercury was very irregular, offering differences of level between the plains and mountainous regions, of about 9,840 to 13,120 feet.

In recapitulation, the planet Mercury seems to be essentially different from our world. Upon those regions of the former which are contantly exposed to the sun's rays the heat must be frightful. As a result of its proximity to the sun (taking into consideration the variations in its distance from the central luminary) the temperature of the illuminated portion of Mercury is about seven to ten times higher than that of the earth. The American astronomers, Pettit and Nicholson, of the Mount Wilson Observatory, have estimated that the temperature of Mercury's soil must be about 400 degrees Centigrade.

Basing our reasoning on the conditions of organic life on the earth and on the facts that have been gleaned from my observations, it is hardly possible to think of Mercury otherwise than as a world made up principally of torrid deserts, where violent wind storms occur, caused by the interchange of air between that part of the planet that is in perpetual cold and darkness and the baking regions on which the sun's rays are always falling.

Without any doubt, life, as we know it, could never exist on Mercury.



Diagrammatic Explanation of the Phases of the Planet Mercury. The Planet, Half Illuminated by the Sun, Is Seen Variously According to the Position It Occupies With Regard to the Earth in Its Movement Around the Sun. Its Orbit Is Represented Here in Perspective. In A, Mercury, in a Position Beyond the Sun, Is Very Far Away From the Earth; in B, It Has Come Nearer to Us and Now Is at Its Furthest Remove From the Sun. These Positions and Phases of the Planet Are Those Which Are Visible in the Evening After the Setting of the Sun. On the Other Side of the Orbit, C¹, B¹ and A¹ Represent Those Phases of Inverse Order and Aspect When Mercury Is Visible Just Before Sunrise. Drawn by Professor Rudaux.

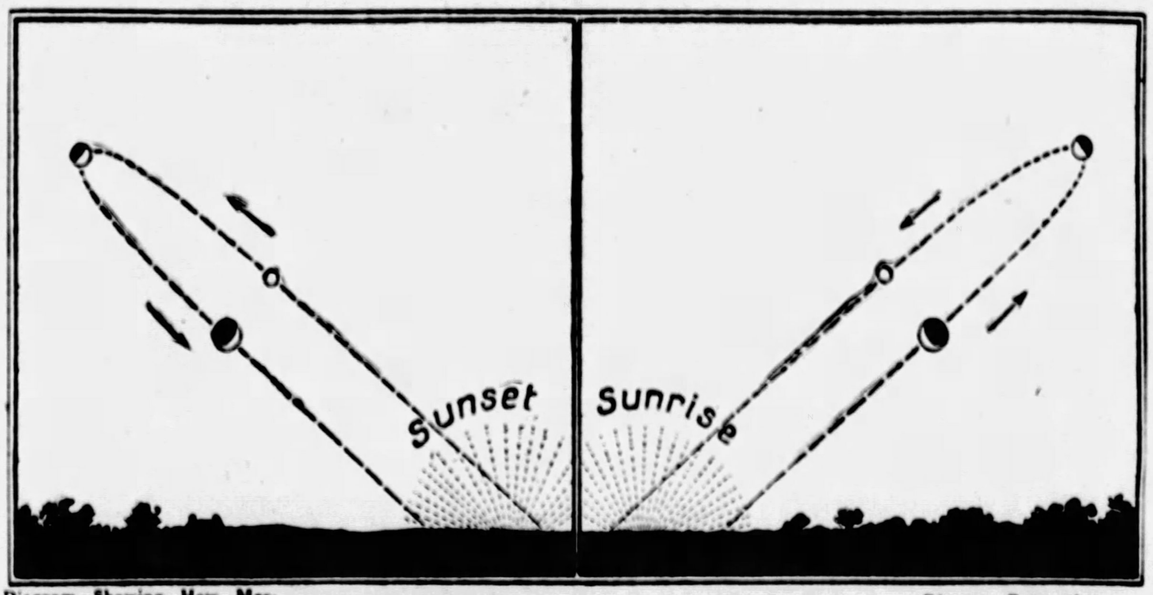


Diagram Showing How Mercury Can Only Be Seen by the Naked Eye in the West a Short Time After Sunset, and in the East a Little Before Sunrise on Account of Its Being the Nearest Planet to the Sun.

Diagram Drawn by Prof. Rudaux.

# Send 10c for this marvelous new Armand Beauty Treatment—with four essential preparations—designed for your modern, active life

IT IS Armand's belief that face powder, like costumes, should suit the life of the times. Yet today there is but one face powder that meets perfectly the modern, vigorous conditions of living. Only Armand Cold Cream Powder will stay on for hours at a time. Only Armand Cold Cream Powder need not be renewed through mornings, afternoons or evenings of activity. It is a smooth, natural face powder that keeps your complexion as delicate as the petals of a rose.

*No matter what kind of skin you have—here is the way to keep it fresh and clear. It takes only ten minutes of your day.*

Armand has perfected an entire beauty treatment designed for your busy life. It contains four essential preparations: (1) Armand Cold Cream Powder, this modern complexion powder that really stays on. (2) Armand Eau de Cologne Cleansing Cream, for cleansing only. It is a smooth cream consisting of penetrating cleansing oils. It liquefies the moment it touches your skin. (3) Armand Foundation Creme, the perfect powder base. After a single week of use of this marvelous new cream you will notice a fine quality coming into the texture of your skin. (4) Armand Lip and Cheek Rouge, the surprise in rouges! With a tiny touch of cream you can spread it on evenly and it will last all day.

In this trial package you will also receive the authoritative talk on beauty, "Give Your Complexion Ten Minutes of Your Day," which describes the treatment for every kind of skin. If your skin is clear and fresh, it helps you to keep it so. If your skin is inclined to be sallow and dry, there is a treatment here for it.

The results of this new beauty treatment are remarkable. Certainly you will want to get your generous trial package before the supply is exhausted. And they are going fast. Never before have we been able to offer such an important Beauty Treatment for such a small amount of money. Send us the coupon and ten cents. Armand, Des Moines. In Canada, Armand Ltd., St. Thomas, Ontario.

*Armand Cold Cream Powder*

ARMAND, 134 Des Moines Street, Des Moines, Iowa.

I enclose ten cents (stamps or coin) for which please send me the new Armand Ten-Minute Beauty Treatment.

Name _____

Address _____

City _____ State _____

*If you live in Canada send coupon to Armand Ltd., St. Thomas, Ontario*

*Always in the pink and white hat box at $1.*

# Where the Famous "Follies" Beauties Come From

## Miss Paula Pierce, Who Dropped Her Flapjack Flipper at a Cheap New York Restaurant, the Newest Recruit, From the Long Lines of Stenographers, Waitresses, Shop Girls and Dress Models

The Famous "Dolores," Who Graduated From Lady Duff-Gordon's Dressmaking Establishment to the "Follies," and Who Was Called "The Best Clothes-Horse in the World."

Miss Paula Pierce, Who Was Discovered Tossing Flapjacks in the Window of a Downtown New York Restaurant and Was Promoted to a Place in the "Follies."

Miss Gladys Glad, Who Decided She Was Too Decorative to Continue Life as a Stenographer.

Miss Lily Skeels, a Bargain Counter Shop Girl, Who Took on the Name of Prudence Wise and Became a "Follies" Beauty.

Miss Polly Nally, the Brooklyn Stenographer, Who Put Away Her Notebook and Typewriter and Joined the "Follies."

THEY find pearls in oysters, diamonds in clay, ambergris in whales—but where do they dig up the unfailing supply of precious beauties for the "Follies"?

This question arose recently when a wide-awake newspaper reporter discovered one of these jewels in the rough, tossing flapjacks in the window of a low-priced restaurant near where newspapers are published in lower New York.

The reporter noted the girl's pretty face, her shapely arm and the grace with which she deftly flipped the cakes from the hot griddle onto a plate.

"There," he thought, "is as pretty a girl as you will find on any stage. Why is she working with her hands down here instead of throwing her feet, about 100 blocks further up Broadway? It must be that she lacks charm, personality or she is dumb. Probably she's a cold, stone Venus."

Thereupon, as women so often do when a man thinks something personal about them, she looked right at him through the glass. She paused, with the flapjack flipper poised in her hand and gave him a smile. That smile was a pretty good answer to his unspoken thought. It revealed two neat rows of white teeth, lighted up her face and gave her eyes that merry, roguish look that makes a man desire to have a woman all to himself across a supper table and sometimes even a breakfast table.

She was a 100 per cent beauty as far as he could see, but he could see only as far as her hips because the griddle concealed the rest. The reporter reasoned that she must have "frog's legs" or something. He went in, sat at the first table and called for flapjacks which the waitress translated into a shouted order:

"Plata w'eats!"

The Venus at the griddle picked up her pitcher and poured a small puddle of batter on the hot metal. She did not have frog's legs nor piano legs, but straight, slender and very presentable legs, the kind that have an agreeable kick in them.

On the way out the reporter spoke to Mr. Kingman, the manager, and learned that the bay window cook's name was Miss Reeves. It later developed that she was really Miss Paula Pierce, of Montreal, who had been "tossing 'em" for six weeks.

The newspaperman went uptown and told the "Follies" management what he had seen. The management was skeptical but promised to send an expert to look into it. The expert did look into it, first with his nose flattened against the glass, with the rest of the street audience and then joined the paid admissions within.

On departing he spoke to Paula who looked stunned and then showed her agitation by pouring out an oversized wheat cake—a heinous offense. But the horrified manager, rushing up, did not even scold Paula when she told him that she had been invited to call at the New Amsterdam Theatre, home of the "Follies."

Miss Pierce got a job and is to be seen in the chorus of the show, but not from the sidewalk nor for anything like the price of a plate of wheats. As a "griddle girl," she drew about $25 a week and no tips. As a beginner in the chorus she would be entitled to a minimum of twice that, with possibilities of tips ranging from orchids to limousines. It is rumored that she is receiving nearer $100 which would indicate that Paula has made a nice little hit.

One thing that helped her is her absence of stage-fright. What is an audience out in front when you are used to one front and rear, and what are dance steps compared with the dread of pouring out a few more calories than a customer is entitled to?

Paula arrived hot off the griddle, but whence come the others? They come from most every walk of life and do not need, like a President, to be born on a farm. Some achieve their objective by careful preparation and others have it thrust on them. Very few do not choose to run, if they get the chance.

Thelma Todd was literally "fired" into it. Readers of this weekly will remember how that pretty, little 15-year-old daughter of an ex-alderman of Lawrence, Mass., was sent home in tears after just one day at her first job in a five-and-ten-cent store. She was so pretty that all the customers stood and gaped at her, forgetting to buy anything. They dismissed Thelma from two other positions for the same reason. But the very thing that made her an impossible salesgirl qualified the little beauty for the "Follies" and there she arrived.

Occasionally winning a beauty contest gets a girl the coveted honor, though more often it only brings her a swelled head and a lot of misfortune. Gladys Glad arrived as the ultimate fruit of carrying off the palm in a Bronx contest. Everyone wonders what her real name is; but that's it. Her father's name is Glad and her mother's Gladys. Strangest of all, she still keeps house for him and scorning limousines, travels home from Broadway in a Bronx express.

Perhaps the most prolific source is the big cloak and suit manufacturers who are involuntary scouts for the "Follies." They have to find beauties who can display their garments to the out-of-town buyers. Unfortunately the girl who can "wear clothes" effectively is usually even more effective without quite so many. And so Madeleine Sheldon, Hazel Forbes, and many others, after parading as mannequins before the buyers in the wholesale dress houses, paraded before them again across the footlights.

The career of Dolores, who, with Jessie Reed, is probably the most famous "Follies" girl of all, was as strange as anything in fiction. When she was quite a young girl in England she became apprenticed to the exclusive dressmaking establishment of Lady Duff-Gordon, and when that establishment invaded New York, came with it as a mannequin, dropping her real name of Kathleen Mary Rose and becoming, so far as almost anyone ever knew, just Dolores.

The two other mannequins imported by Lady Duff-Gordon, Hebe and Phyllis, married millionaires, but Dolores remained heart free, even after she joined the "Midnight Frolics," and became known as the world's loveliest show girl. Dolores was the most effective show girl they ever had, the "Follies" management said a few years ago. "The most perfect clothes-horse in the world," Lady Duff-Gordon called her.

The great mystery about Dolores was not only in her name, but in her personality. Her stately, regal manner clung to her off stage as well as on. She was the epitome of the impersonal, never offering the least information about herself and never seeking information about others. To put it bluntly, the mystery was: Is Dolores high-brow, deep or just dumb? Nobody seemed to know the answer.

Eventually she left the stage and sailed for France. There she disappeared from the sight of the gay crowd. When next heard of she had married Tudor Wilkinson, an expatriate St. Louis millionaire, and after that, even, it was some time before it was discovered that she was living a quiet life with him in a secluded mansion on the Ile de St. Louis, a small, exclusive island in the Seine.

Jessie Reed, one of the most celebrated of them all, first punched crackers in a Texas factory where she was discovered and married by a vaudeville actor who brought her to Broadway, lost her to the "Follies" and then to her second husband, the late Dan Caswell.

Miss Pierce the flap-jack girl of the downtown griddle is by no means the first to graduate from a restaurant. Kathleen Rasche got herself a job as waitress in a restaurant right next door to the New Amsterdam, hoping that propinquity would get her something. It did. The beauty experts seeing pretty face and figure carrying trays about with a carefully studied show girl walk, decided to give her a chance. She did not like the life though and surprised everyone by going back to her waitress job. She said it was her career, and so it was, for she was soon promoted to wife of the owner of a chain of restaurants.

Joan Gordon who married the chum of the man who married her chum, Helen Morgan, was a stage-struck waitress in a Seattle tea room. One day she found she was waiting on Ina Claire, the comedienne and dropped her tray with a crash. When the actress settled down in her chair again, she took notice of the girl who had startled her and the result of that notice was the "Follies" into which she may be said to have crashed.

Helen Morgan was a Montreal stenographer who came all the way to Atlantic City to win a beauty contest and step from that to the "Follies." The New York night club named after her was the scene recently of that mysterious raid by Maurice Campbell and his curiously vindictive prohibition raiders who chopped up the mahogany bar, smashed the glassware and tore costly lace curtains and tapestries to ribbons. Broadway is waiting with interest to hear Mr. Campbell, who himself was once a theatrical manager, explain his motive in court.

Polly Nally was a Brooklyn stenographer, but appraises herself as too decorative for anything but a "Follies" girl. She went to the New Amsterdam, saw the manager and went right to the point with the announcement that she wanted to be in the show. Then she almost stunned him by demanding:

"When do I start?"

He automatically gave the first command:

"When casting—take off your hat."

When Polly's hat came off, her blonde hair tumbled down to her knees and she was hired on the spot for the "Follies." She naively asked the manager to telephone her mother so she would believe that Polly was really hired. He did so and the mother replied:

"All right, but don't you dare undress my girl in your show!"

He didn't—entirely.

Doris Lloyd was a high school girl who was "fired" into the "Follies." As punishment for some sort of exuberance, the principal made her stand up on the platform and recite, "Hark, hark, the lark," to the whole school. Doris managed to put so much mock heroics and burlesque gestures into it, that the school roared and the enraged principal sent her home. She stayed home until the truant officer was sent for her. Polly said:

"Tell that overpaid and underworked principal that I am going on the stage."

She had just that moment seen an advertisement:

"Girls wanted for the Gertrude Hoffman dances."

She joined that troupe and then went into a Ben Ali Haggin tableau in which she met Marion Benda, who had been a newspaper reporter. From this both Marion and Doris graduated into the "Follies." Flo Kennedy, a future "Follies" girl, took the place of Doris. Flo met and nearly married the Russian Prince Troubetzkoy.

Howard Chandler Christy's studio has been a generous feeder of the "Follies." Lois Wild and Dorothy Knapp were winners of beauty prizes at Atlantic City which qualified them as models for his paintings and from that eminence they climbed onto the "Follies" stage. This was also the history of Ruth Patterson, who was a typist before she was "Miss Greater New York" at Atlantic City.

Eunice Holmes worked her way in, taking singing lessons in St. Louis until she was good enough for the local opera company. Then she went away with a road company of "No, No, Nanette" and finally into "Rio Rita."

Mildred Adams, a cashier, stepped from "Miss Baltimore" in a beauty pageant to "Rio Rita." Jane Alden arrived somewhat unexpectedly, through matrimony. She was a concert singer who somehow lost her voice but, fortunately, not her figure, in an unhappy marriage and joined the "Follies" until such time as divorce brings back her voice.

Marcella Miller was a cigarette girl in the Knickerbocker Grill. Lilly Skeels was at the ribbon counter of Selfridge's department store in London. In one jump she became Prudent Wise of the "London Midnight Follies."

They come from anywhere and everywhere, but there is never too many of these beauties, for they are gobbled up by matrimony and movies almost as fast as they are found.

# Budweiser

## Real Quality Malt Syrup

## Constant Control

**from raw materials to finished product by**

**America's Foremost Maltsters**

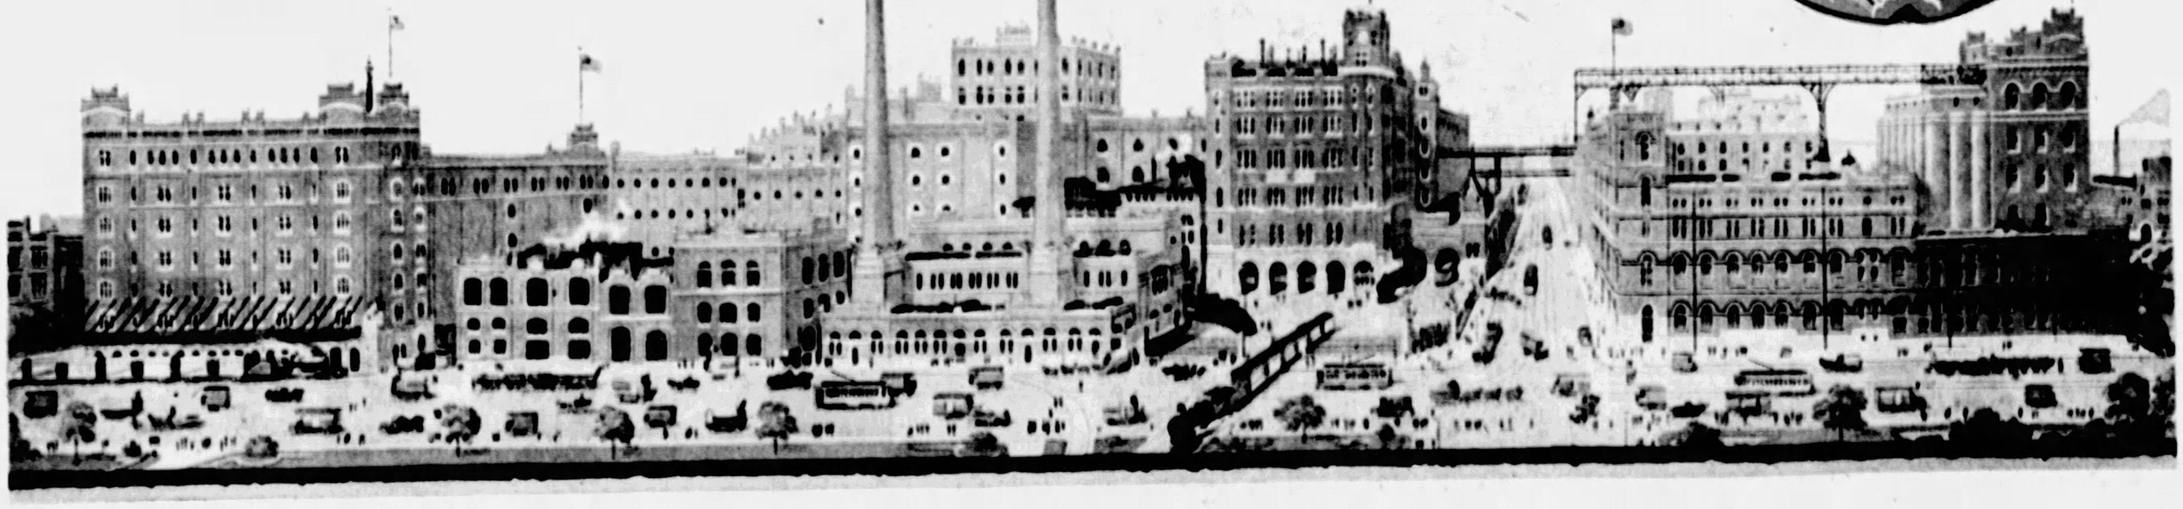
Anheuser-Busch is one of the very, very few malt syrup manufacturers who maintain absolute control of quality from raw materials to finished product.

All malting is done in our own huge malt houses right here in St. Louis—the cleaning is done here—the sorting, grading and blending of the natural barley grains. The cans are filled and labeled in the Anheuser-Busch plants at St. Louis—and every can is sold under our own name and label.

Remember this the next time you buy malt syrup! For no manufacturer who uses partially processed materials can guarantee the quality and uniformity of his finished product.

Budweiser Malt Syrup is sold by grocers, delicatessens and neighborhood dealers everywhere.

Made of wholesome cereals, malt syrup adds nutriment to food products.



When in St. Louis, visit the Home of Budweiser Malt Syrup ~ ~ covers 70 City Blocks

# How the Duke of Torlonia Lost His American Heiress Wife

Cascade and Basin in the Grounds of the Villa Torlonia.

The Duchess of Torlonia, Who Was Elsie Moore, of New York and Connecticut.

Western Stairway to the Villa Torlonia, Near Rome, Italy, the Ancestral Country Seat of the Duke of Torlonia—A Little Seedy, Moss Grown and Shabby When the Duke Married His American Heiress Bride.

## Didn't Appreciate the Goose That Was Laying the Golden Eggs Which Paid the Bills at His Ancestral Palaces in Italy Until His Conduct Drove Her to a Divorce

The Reception Hall of the Town Palace of Torlonia, in Rome.

Alessandro, Oldest Son of the Duke and Duchess of Torlonia.

The Duke of Torlonia, in Riding Costume.

IF an American girl marries an Italian nobleman, as Elsie Moore, of New York, and Greenwich, Conn., did, and spends papa's millions keeping up the expensive ducal palace at Rome and the huge villa at Tusculum, built on the site of the Gardens of Lucullus, she must also behave herself, just the same as if he were a regular husband and paid all the bills.

If he catches her being unfaithful to him, just once, he can throw her out and get a divorce. That seems fair enough to the American girl, because the American law is the same. But if she thinks catching her husband once or a thousand times is ground for divorce, she is a much mistaken wife. It is not even grounds for pulling his ear or scolding him. According to Italian law, what is sauce for the married American goose means nothing in the life of her noble gander.

True, he must not be "offensive" about his delinquencies. If the philandering husband brings one of his sweethearts home with him, that isn't quite right, and if the wife catches them there, the Italian courts recognize that she has cause for divorce. But as long as the husband keeps these various flames out of the house, where they shouldn't light up a wife's jealousy, and he doesn't advertise them unduly, the Italian law considers that they are none of his wife's business. American wives never seem to get used to that idea.

And so when Elsie Moore, American heiress, got tired of her numerous rivals for the affections of her husband, the Duke Don Marino Torlonia, and sued for divorce in her native State of Connecticut, His Grace the Duke put in a double defence that made the American judge open his eyes. First, his counsel, Mr. Philo Calhoun, maintained that Elsie, by marrying the Duke became an Italian subject, and, therefore, the American marriage and divorce laws had no jurisdiction over them.

In the second place, he hadn't done anything wrong, anyway. The various affairs his wife complained of were a husband's privilege in Italy and he had been reasonably discreet about them. And as for that little matter of knocking the Duchess out by hitting her over the head with a piece of a chair—if he really did such a thing, maybe she deserved it. It wasn't fair to divorce a Duke, one of the highest forms of noble life, just for an alleged bit of bad manners. Hadn't he defended her fair name by fighting a duel with a sculptor who had made an insulting bas-relief of the Duchess holding an American dollar in her hand?

The American court listened with awe to this heads-I-win, tails-you-lose matrimonial arrangement and decided in favor of the Duchess. However, the decree will not go into effect until the Court of Errors has passed on the Duke's claim of non-jurisdiction.

When an American heiress marries a threadbare, titled foreigner, she knows it is usually a straight business proposition. He needs the money to get his coronet out of pawn, to hire servants and get the gas and water turned on at the castle. She buys that title for so much down at the wedding and so much a month on account on a Duke or whatever she is buying. Some American heiresses have "welched" on their payments. Count Salm had to sue to get anything at all. But Elsie kept her end of the bargain so faithfully that she is known in Europe as the "Dollar Duchess."

In spite of the commercial side of the alliance, the bride believed her husband loved her for herself. Perhaps he did. All heiresses imagine that, because all noblemen are trained from childhood to act the part of a lover convincingly. She was young, pretty, bright, high in New England society and the belle of her town. He may have meant it. Anyway, Elsie was certainly the envy of American womanhood in 1907 when, with her gallant husband, she left on their honeymoon to Italy. It seems to have been perfection itself, all the way—a husband right out of a movie film.

Also the Villa Torlonia, the romantic terminus of the honeymoon, was like a set taken from a movie. As she had seen from his photographs, few royal palaces could equal in size and magnificence this ancient seat of that ancient ducal family. Impressive sums of American dollars had gone ahead of them to put that splendid mansion and grounds in commission, staff it with servants, fix its plumbing and turn on the fountains and the great cascades. She found it all that he had said or she had imagined, and yet she had hardly entered the great mansion when her dream of romance was ruined.

The army of servants bowed before the Duke and his Duchess as if they were almost divinities, and the Duke's family welcomed the wealthy bride with almost reverent formality. But when the ceremonial was over, she happened to see two young, gaudy and bejeweled women rush upon her husband and embrace him at the same moment with surprising vehemence. The Duchess wondered who these might be—perhaps very demonstrative cousins who had arrived too late for the formal family greeting.

She stepped in to be introduced, and immediately got the impression from their pained looks that she had committed a social error. No, they were not relatives, just—very old friends. The Duke, who is a very bright man, saw at once that his bride was not going to understand. He whispered something to the two young women, who gave the Duchess a mean look and departed. Elsie asked for an explanation. Instead of giving it, the Duke deputed one of his older female relatives to explain, put on his hat and sauntered out.

He did not return until nearly daylight of the second night. Meanwhile the American bride had been informed of all the peculiarities of Italian marriage laws and customs. It was not concealed from her that her noble husband was probably visiting those two very old friends, but then she was informed that what a wife does not actually know is not supposed to hurt her.

The first impulse was to take the next steamer home to father. But father would say, "I told you so." And what would those millions of envious fellow-countrywomen say if she flounced back on the next boat? Her pride told her to stay and fight it out.

If her husband did not love her she would make him love her. She would win him to her ways and make him true to her and she was not entirely unsuccessful. The Duke seems to have had quite a fondness for his "Dollar Duchess" and really to have considered himself a devoted husband, according to his conception of how that part should be played.

He soon dismissed the two sweethearts that had broken his wife's heart, but they were immediately replaced by new ones. Almost as fast as she discovered a rival, she found that he had gotten rid of her. This was not so much to be obliging as because he tired of them quickly. In a way, however, it made the situation more endurable. At least Elsie had the satisfaction of knowing that he did not take any of these short-lived affairs very seriously, while she herself was permanent.

It was not pleasant though, as she wrote the checks that kept their great palaces running, to wonder which items concealed his generosity to the Duke's assorted lady friends. But she did it and hoped for the best.

While she was still struggling to cure her husband of his taste for variety, three children were born, Alessandro, who is now 16 years old, Christina 15, and Marino 10. In consideration of the fortunes their mother was spending in its upkeep, the Villa Torlonia was placed in the names of their children. It still is, but it may be taken away unless they return to Italy and become Italian subjects and also subject to their father.

The Duchess might have gone on forever, seeing with the corner of her eye an unending in and out of her husband's life, if it had not been for Maria Lorenzino, who broke up the whole parade.

Maria Lorenzino was rated as the most beautiful woman in Rome. Her face and form were so enticing that it was considered pardonable for any man, no matter who he might be with, to stop and look after her. The Duke not only looked but ran after her. An affair with a woman of such prominence could not be discreetly hidden. It was on everyone's tongue and everyone told the Duchess about it. This was bad enough if it had been brief like the others, but it showed signs of permanence. At last he seemed really smitten—also it was expensive.

Finally, so the Duchess testified at the recent divorce suit, she went to the lovely Maria's apartment and accused her of undue friendliness with the Duke. All the Duchess got in reply was a long and sweetly-modulated laugh, in which her husband apparently joined, later. However, it could not be laughed off. The "Dollar Duchess" was good and furious.

This unreasonable attitude angered the beautiful Maria and pained the noble Duke.

There followed at the Ducal home a long and unpleasant argument, making the Duke so agitated that he accidentally pulled off the arm of the antique chair in which he was sitting. Men of gentle breeding dislike scenes and the Duke put an end to this one, according to the Duchess, by hitting her over the head with that chair arm, putting her down and out.

Though the husband may have thus had the last word, he evidently did not convince his wife, because she took her children and returned to America, where she went through the process of repatriating herself as an American citizen. The Duke maintains that this is null and void because done without his necessary approval. Then, after the required year's residence in Connecticut, she brought her suit for divorce.

Meanwhile the Duke began to mourn the loss of his "Dollar Duchess" for lots of reasons. She seems to have kept on paying some, but not all the bills. Things are not what they used to be in Europe. Servants are becoming scarce and expensive, even in Italy, and Mussolini is jacking up the taxes on the great unproductive estates of the nobles, no matter how noble. Under such circumstances, it was embarrassing to have the goose that was laying all the golden eggs divorce him.

It was over one of the bills that the Duke fought a duel with Count Filippo Lovatelli, the sculptor who had made a bas-relief of the Duchess in marble. But when it was finished she was in America and by some mistake she sent him only 1,000 lira, which at that time only amounted to about $45.

The Count was so indignant that he chiselled the features into a sort of comic valentine in marble and, in place of a lily in the lady's hand, placed an American dollar. Rome laughed at the caricature, and the sculptor's remark that a woman who paid so much for her husband should not be so niggardly over something of real worth.

The Duke considered this an insult that could only be wiped out in blood and challenged him to the field of honor. It was a real fight, with rapiers, and the noble husband "proved himself in the right" by running his adversary through the arm. His triumph was short-lived. The Church of Rome is trying to suppress duelling among its members and thought so little of the Duke's excuses for hostilities that it excommunicated him for a while.

His Grace wants his wife back. Common ordinary men miss their wives when they see the dishes accumulating in the sink, but when the missing wife has also been paying all the bills for two palaces and about everything else, it is heartbreaking. The Duke might even consider a single standard of behavior.

*Djer-Kiss Talc ... chiffon—soft ... with the same bewitching parfum. Delightful after bathing.* 35¢.

# How the Pretty Kansas Co-eds Punished the "Butt-ins"

## Unpleasant Surprise for the Masquerading Boy Students Who "Crashed" the University of Kansas Girls' Ball When They Were Caught and Ducked in the Swimming Pool

Miss Ruth Bennett, One of the Co-ed Leaders Who Hurled the Pair of Student "Crashers" Into the Pond.

Miss Bennett as She Appeared at the Ball When Selected by the Votes of the Girls as the "Perfect Man."

THE well known University of Kansas, at Lawrence, Kansas, has its share of fraternities and sororities. The lads of the fraternities are known not to abide entirely by the prohibition laws, and sometimes, at frat meetings they drink toasts. Just now the favorite toast is this:

"To the old-fashioned girl!"

They drink hearty to that one. Up to quite recently the male students at the Kansas university were stalwart champions of what has been designated as the genus flapper. When reactionary critics deplored the tendencies of the present day young woman to smoke, drink gin and generally behave ultra-modern, the U. of K. boys rose en masse in defense of the co-eds. But not now. No more. No.

"To the old-fashioned girl!"

They mean it. They long again for the clinging-vine type, the gentle and shy type, the dear girl of olden days who knew her place instead of her onions. They deplore the passing of the annual "Hell Week." From now on it is to be known as "Rosebud Week." The sorority sisters, as it were, knocked all the first word out of "Hell Week." The clinging vines of yesteryear became berserk Amazons.

It was all on account of the Puff-Pants Prom. For years when the University of Kansas co-eds staged their annual prom, half of the girls would dress as men, in a feature which was a sort of contest to determine which of the girls made the most handsome "men." The Puff-Pants Prom started in the days when that was as far as girls went in trying to be men. It was just a matter of costume.

It had been the custom of the men's fraternities to order some of the members just then being initiated to "butt-in," or, as the more modern college slang has it, "crash-in" on the Puff-Pants Prom. The week of the prom got the name of "Hell Week" because of the amount of pranks played by the students. They were the terror of the co-eds as well as the townspeople. All the rest of the semester was preparatory to this one grand spree.

As for the initiates of the fraternities who were ordered to "crash" the girls' prom, they rather welcomed the assignment. It was nothing like so difficult as the other stunts which the Greek letter men invented to test the stamina of those they had picked for fellow members. Inasmuch as the prom was more or less a mask affair, it was easy to get in. When the unmasking came, the girls had always behaved with becoming girlishness. They had squealed, giggled and looked modestly the other way when long skirts and wigs had been discovered to be hiding the fresh frat initiates. Their consternation at this annual discovery had been most ingenuous, and pleasing to the masculine vanity of the youths.

Taking their cue from the girls, the police had been equally considerate about the ructions which took place from the tests of other neophytes during the seven days of rowdy doings.

All this was in the good old days, the days before the flapper had come into her own, the days when skirts came down to ankles, when curls clung to girlish necks, when young women never rouged their lips in public, when cigarette-smoking girls would have caused expulsion, when—in short, the good old days.

Those days, the gentlemen of the fraternities now realize, are gone forever. No more will fraternity neophytes crash the Puff-Pants Prom. Not without brass knuckles. On the occasion of the last Puff-Pants Prom, the girls caught the gate crashers, beat them up, tore off most of their clothes from them and threw them into the college swimming pool when its temperature was close to freezing.

And the police, taking their cue from the girls, suffered a change of disposition, too. Instead of smiling at the students' pranks as heretofore, they threw thirty-four of the fraternity pledges into jail and weren't a bit gentle or nice about it, either. But not as rough as the sorority sisters.

On the night of the whimsical college lads' recent disillusionment, about 150 of the co-eds, in assorted costumes, were being escorted to the annual Puff-Pants Prom, which is under the chaperonage of the University Women's Good Government League. Their escorts were an equal number of other co-eds. The escorts, however, wore borrowed clothes—all male—toreador and matador costumes, tuxedos and frock coats, cadet suits and the like—but all trousers. Each sorority represented had several entries for the contest as to which girl made the best looking man. Rivalry was keen. One couple attracted more than usual attention.

"What a fine man that girl maker," commented more than one woman as the parade passed in review.

"The girl's ankles are a bit large, though, don't you think?" suggested another. "And those shoulders! So broad!"

Just then the girl discussed tripped. Something ripped. A cry went up.

"A man! A man!"

This was the cue for the shy running away of the girls, the hiding, the squealing and the murmurous giggling of former Puff-Pants Proms when the intruders were discovered. But there was no running away nor giggling this time. Affairs were at once taken in hand by Miss Ruth Bennett, one of the leaders of the sorority sisters.

She had a suggestion to make.

Miss Florence Kisecker as a Spanish Cavalier and Louise Wright as a Spanish Girl, Winners of the First Prize at the Kansas University Puff-Pants Prom, After They Had Gotten Rid of the Intruding Men Students.

"Enough of this," she said. "Let's teach these boys a lesson. To the swimming pool!"

The others took up the chorus—299 shrill voices, charged with the note of battle.

"To the swimming pool!"

They advanced upon the intruder. They tore off his outer garments. They tore off also the outer garments of his partner. They were revealed then, with burning faces and sheepish grins, as two frat neophytes—Clarence Laughlin, of Lawrence, and Sidney Edwards, of Oswego, Kansas. They had been sent there by the older members of the Phi Alpha Delta, into which they were being initiated.

They found themselves being given what is vulgarly termed the bum's rush. Their slithering progress, impelled by the forceful help of the co-eds, led them to the swimming pool. The waters of the pool were, at the time, close to the freezing point. It was plain to see that they were destined to enter that pool, head first. They fought, ungallantly, unchivalrously, against the fair captors. But gymnasium classes and cross-country hikes had given men's strength to the emancipated co-eds.

"Hell Week" had no fury like these women scorned.

Clarence Laughlin, One of the Unfortunate Pair Who Was Ducked, as He Appeared in His Wet Dress Shortly After His Escape.

There was a loud splash as young Edwards went hurtling head first into the freezing water of the pool. A moment later Laughlin hit the water with a plunk. But the co-eds had left him part of his gown. He shouted that he was drowning.

"Help, help!" he called as he came up and went down again.

Without the slightest hesitation Virginia Bowers, one of the emancipated co-eds, poised for a moment in a beautiful diving stance and then plunged into the pool. Under the water she opened her eyes and looked around for young Laughlin. Finally she had to come up to get her breath.

"I can't find him, girls," she cried.

From the other side of the pool came a loud laugh. It was Laughlin. An expert swimmer, he had crossed under water before coming up for air. He crawled out of the pool and walked swaggeringly away, while companions helped Miss Bowers, bedraggled but relieved, from the water. His mocking laugh could be heard as he disappeared.

It was the only laugh the frat men had that day. It was the last laugh they were to have that memorable "Hell Week," which was to degenerate into a week of mourning and lamentation. In some way news of the emancipation of the co-eds spread to police headquarters, and the police began a round-up that was to be historic.

In the meantime the Puff-Pants Prom, apparently de-manned, proceeded. But just before the last dance, two more dancers were found whose sex was male. They were Earl Foy and Richard Layne, both of Hutchinson, Kansas. They were discovered lurking at the edge of the ballroom. One wore a silk dress and the other had padded parts of a man's suit.

They suffered the same fate as Laughlin and Edwards. They were given their ducking in the icy waters of the pool, and permitted to depart to ruefully report to their elder brothers of the Delta Chi fraternity. While the four neophytes were recovering from their ordeal, wrapped in blankets and dosed with quinine, the police of Lawrence were busy.

The county jail is equipped with thirty-eight cells. Thirty-four of them now housed initiates of the Alpha Tau Omega, the Sigma Chi, Sigma Alpha Mu, Sigma Nu and Alpha Phi Alpha. The four other cells could very easily have accommodated Messrs. Laughlin, Edwards, Foy and Layne, but they were now fitter candidates for a hospital. The charge against them all was the same—disturbing the peace.

*"'They're men!' somebody cried.*

*"And the whole 299 co-eds descended upon the two masquerading men students, tore the most of their girls' clothes from them, then rushing them to the swimming pool, hurled them into its icy waters, expediting their progress downward with sundry pokes from hastily snatched up poles."*

While the disheartened young men were discussing ways and means, the Puff-Pants Prom went on gaily, with no men around to interfere with its orderly progress. As the time approached for the end of the prom, in the early morning hours, a vote was taken and Miss Ruth Bennett was voted the handsomest "man" of the prom. Undoubtedly the judgment of the voters was influenced to some extent by the fact that it was Miss Bennett who led the onslaught against the intruding men students which resulted in the icy ducking. It was the girls' way of giving a testimonial to Miss Bennett.

Charged with this later, they said "No, no." They insisted Miss Bennett came nearer their beau ideal than any real man. A bit dark of complexion, tall and graceful of figure, she was indeed impressive in her well-fitting trousers and double-breasted suit of dark material. She carried her cane and gloves like a dandy of the Paris boulevard.

"And what a sock in the nose she gave Laughlin!" murmured one co-ed adoringly as she cast her vote for Ruth.

The best costumed couple was voted to be Miss Florence Kisecker and Miss Louise Wright, dressed in Spanish costumes. Miss Kisecker made a handsome don with the short-waisted jacket and flaring trousers of the Spanish traditional costume. It was Miss Kisecker who personally flung young Mr. Foy into the pool, and it was Miss Wright who attended with her own hands to the ducking of Mr. Layne.

Meanwhile the pledges of the fraternities who had escaped ducking simply by not having been assigned to the prom—for which they thanked their good fortunes—were debating, in their cells, the changing times. None of them slept a wink that night. In the morning they received a visit from C. C. Stewart, the county attorney, and Judge C. H. Daugherty. They talked matters over with the young men and their fraternity brothers who came to their aid. It was decided that the pledges had been sufficiently punished. Promises were exchanged.

The lads were not required to swear they would no longer make any attempts to "crash" the girls' prom. It wasn't necessary.

Chancellor E. H. Lindley, of the university, when asked about the matter of the ducking of the four men students, smiled. But it is understood the whole matter was taken up at a meeting of the Pan Hellenic Council of the university.

A resolution calling for the official abolition of "Hell Week" was unanimously adopted. The ruling was that hereafter fraternity initiations are to be held within the chapter houses. When, next year, the young women hold their Pants Prom, there will be no male intruders. Nor the year after. Not as long as the university pool functions and the flappers of the university stay emancipated.

# Mlle. Dalbane, The "Death Flower," Whose Lovers All Meet Tragic Ends

## The Mysterious Death of Prince Radziwill, Controlling Owner of Monte Carlo, Reveals the Startling Career of a Fascinating French Lorelei Into Whose Lap Rich, Famous and Titled Admirers Have Poured Fortunes and Have Been Struck Dead as if by a Jealous Lover

Marthe Dalbane at the Height of Her Popularity, Richly Dressed in Furs.

Photograph of a Mystic Meeting in One of the Underground Catacombs of Old Paris, Where Jacquard and His Friends Held Their Interrupted Ceremonial.

Marthe on the Beach at Deauville, France.

Lucienne de Carlyane, Who Was Arrested by the French Police in the Raid Which Followed Marthe Dalbane's Arrest.

CHAPTER VII.

*(Continued from Last Sunday)*

© 1928 by American Weekly, Inc. Great Britain Rights Reserved

PARIS, March 11.

WHEN Marcel Boussac, the wealthy French textile manufacturer and race track owner, felt the gash of the razor in the hand of his discarded sweetheart, Marthe Dalbane, he screamed and fell to the floor. As related in the last chapter, the lovely Marthe, who became known to Paris and most of Europe, as the "Death Flower" because so many of her admirers came to violent ends, made no effort to escape when the servants of the magnate's great Bois de Boulogne apartment rushed in.

Boussac's life blood spread over the tiled bathroom floor and he seemed to all to be dying. The "Death Flower" must have realized that one more fatality was about to be added to the long list. The Paris telephone system is operated by the government and is almost as bad as in Russia or Turkey, and it failed in this emergency.

Fortunately for the wounded man and for the woman who had slashed his throat, Dr. Thierry de Martel, one of the city's most famous surgeons, happened to be passing in his car and was hailed by a frantic, hatless butler. One glance and he saw that seconds meant life or death. His skilled fingers flew to their work, and after the operation was done, he announced that the patient would probably live. Then, for the first time, he looked around and asked how the accident happened.

"She did it," said the servants, pointing to Marthe, who had been sitting quietly all the time.

The surgeon looked at the blue-eyed beauty and frowned. It was his duty to report her.

"Here," she said, holding up one hand, like a dog with a sore paw, "fix that."

Dr. de Martel looked at the slender, white hand and saw that it was badly cut near the wrist. Nerves and blood vessels might be involved, so he set to work and sewed that up also.

Before this was done Boussac was conscious again and looking at them from the bed. The butler asked his master if he wished the woman turned over to the police. Boussac turned questioning eyes at Dr. de Martel, who said:

"You will give."

At that Boussac whispered faintly:

"No, let her go, but, nom de Dieu, never let her in again."

"I will have the honor of taking Madame home," announced the surgeon with a courtly bow, for a little thing like attempted homicide does not interfere with the gallantry of a Frenchman.

Marcel Boussac smiled faintly and beckoned to Dr. de Martel to lean over him. He had seen the surgeon from time to time glance up from Marthe's wrist into her fascinating blue eyes, which filled with tears of silent pain.

"Doctor," whispered the wounded man, "you saved my life and I owe you something. That is Marthe Dalbane, the 'Death Flower.' She can go home in a taxi. If you take her you do so at your own risk."

The great surgeon looked at Marthe, who gazed back, with great blue eyes, full of injured innocence, and the face of an abused angel.

"If Mademoiselle will honor me—?" he said, offering his arm. The Mademoiselle did and they left the room together. Looking back the surgeon saw his patient feebly going through the pantomime of washing his hands of the whole matter.

The surgeon not only took Marthe home, where he could hardly fail to be impressed by the splendor of her Avenue Bugeaud residence, but she had to be treated for a long time because a nerve had been severed in her wrist, causing temporary paralysis of part of her hand. While these treatments were going on, Dr. de Martel undertook to wean her away from the drug habit and she let him think he was slowly succeeding. In his benevolent efforts it was necessary to give the beautiful addict long lectures, and few men can look into Marthe's eyes with impunity.

The "Death Flower" listened meekly, and she also showed a flattering interest in the surgeon's work, read his books, spent much time in his clinic and delighted him by studying to be a trained nurse. The doctor was indignant when a woman suggested that the reason might be that a nurse can always have needles and plenty of morphine, unmolested by the police.

He did not know how serious had become Marthe's problem of getting drugs. While her powerful friend, Jean Guitry, the head of the drug ring, was alive she was in touch with the main source of narcotics, and his uncanny power kept the police at a distance. Now things had suddenly changed, Judge of Instruction Bacquart of the Seine Tribunal, sent for her. An instruction judge is really a sort of district attorney, who directs the police and detectives, but does not actually try the malefactors himself.

Judge Bacquart specializes in pursuing drug addicts of Paris and Marthe had faced his penetrating eye before. The judge is handicapped by the rather lax drug laws of France, but his grim persistence and uncanny knowledge and memory have made him a terror to the drug fiends. Marthe knew that for years Judge Bacquart had been accumulating a dossier about her doings and trying to fathom the mystery of the chain of deaths associated with her name.

As long as Boussac did not die or enter a complaint, Judge Bacquart could not put her on trial, even for assault, but when she found herself in his presence she feared that this might have just happened. Therefore, Marthe told the truth about the slashing and pleaded that it had been done under the influence of drugs. It was a dangerous admission. The "Death Flower" was released, but soon knew that she was being shadowed, which made it hard and hazardous to get her drugs. The need of becoming a trained nurse became more imperative.

Dr. de Martel could not have been the most fashionable surgeon of Paris, as he was, except through great popularity among fashionable women. He had a balcony above his operating room where renowned beauties and their escorts had tea and watched the surgeon remove appendices and perform such other operations as are not unduly revolting to watch.

Invitations to these little entertainments were eagerly sought and indirectly brought much revenue and profit. Some patients preferred to be carved in privacy, but usually they enjoyed playing the hero to such an audience, chatting gaily until the nurse muzzled them with an ether cone. Marthe became a sort of hostess at these curious tea parties, and was often seen, in a becoming uniform, driving about with the doctor; a beautiful but not entirely necessary assistant.

Dr. de Martel is of distiguished and sympathetic appearance. He has many advantages in his favor. He is of noble family and counts many of the most famous Frenchmen of history among his ancestors. He is the principal descendant of Count de Mirabeau, the great moderate leader of the Revolution—the Mirabeau family is extinct in the male line. His mother, the Countess de Martel, was regarded, under her pen name "Gyp," as one of the most daring and witty of French novelists a generation ago, but her daring would not be considered exceptional today. The Countess is now very old and Dr. de Martel himself is of mature years.

They say that every successful surgeon in Paris has been made so by a woman or by women. Paris expects a great doctor to be thoroughly familiar with every phase of the gay life, and especially with that which is of supreme interest—the doings of the reigning beauties of the day. He is supposed to be equally intimate with the beautiful ornaments of the highest society and also that other society which is much livelier and of more interest to Parisians. In fact, a surgeon could hardly enjoy the highest kind of reputation and standing unless he had two or three outstanding friendships in both sets.

They tell some entertaining stories of how great Parisian surgeons have made their first success. There was Dr. Robert, one of the best known surgeons of recent years. At the beginning of his brilliant professional career he had the good fortune to meet Madame Gautreau, at that time one of the beauties and great leaders of the best Parisian society. Her portrait by Sargent marked the beginning of that great artist's fame. Dr. Robert felt that this fascinating beauty ought to be of similar help to him and began paying his attentions to her in the best Parisian manner.

One afternoon Madame Gautreau, who was often quite brusque and unconventional, remarked with irritation to the young doctor:

"I wish you would stop courting me for a time and tell me what it is that constantly causes a pain in my interior."

"Madame," said Dr. Robert, "I am always at your service, no matter what the occasion may be."

The energetic young surgeon hurried his fair friend to his surgery. There he discovered a peculiar tumor in her side, which he persuaded her to allow him to remove at once. It proved to be the body of a twin brother who had only partially developed and had become "encysted" in his sister's tissues from the beginning of her existence.

Madame Gautreau made a quick recovery, and from that time she devoted herself to praising the skill, devotion and general abilities of Dr. Robert. His fortune was made.

Dr. Thierry de Martel at the present moment is the Parisian ideal of a fashionable doctor. His refined and kindly features bear the stamp of one who has worked and studied much at his calling and has wrestled earnestly with problems of life and death, and yet he has the cheerful air, the sophisticated eye of a Parisian man of the world.

Dr. de Martel must have had a wonderful way with women because he pursuaded them that his wistful, kindly little friend was a much wronged victim of circumstances. If any of them were jealous of her hold on the magnetic surgeon they did not show it at the time. Marthe's newest romance was running smoothly and she looked forward to the time when shortly she would be a registered nurse, able to tell Judge Bacquart that she had drugs in her house and on her person and ask him what he was going to do about it.

Just as this was almost within her grasp, death intervened again and ruined all her plans. The news swept over Paris that Rene Jacquard had scrawled her name with the last strength of his stiffening fingers and died mysteriously.

Dr. de Martel had had his suspicions about Rene, but he might have forgiven a rival now that he was dead had not his patronesses turned their lovely backs on the "Death Flower" as soon as publicity burst on her again. This was the worst deluge of all, because of the peculiar prominence of the man who had died. In vain Marthe pleaded that it was a mere coincidence that he had been at her house. The tea tables in the operating room were deserted. She had to go.

Rene Jacquard was one of those pathetic characters in whom genius is separated from madness by only the thinnest of veils. Son of an old and wealthy French family, he started off like a rocket on the road to fame. With high university honors, a magnificent personality and a gift for poetry much like that of Gabriele d'Annunzio, he captivated the French capital as a youth. Like the Italian poet, he had a flair for the picturesque and an instinct for dramatic posing.

A great name in literature seemed assured, and then it all fell to ruin as he took to drugs and met Marthe about the same time. Almost at once his fine rhythm degenerated into free verse, which he finally wrote without even punctuation. Nobody knew what it meant. The young poet had been a deep student of medieval history and now his drug-ruined mind concentrated on that ancient madness known as devil-worship.

Jacquard was familiar with every phase of French diabolism from the time of the Baron Gilles de Rais, the real "Blue Beard," who depopulated a number of villages through wholesale human sacrifices offered to Satan in the hope of obtaining from the Evil One magic powers and especially the secret of turning base metals into gold. Jacquard had studied all discoverable literature concerning that strange creature, the Marquise de Brinvilliers, the greatest poisoner of history, who resorted to devil-worship and sacrilegious ceremonies to obtain Satan's help in her countless crimes.

In her company the famous Marquise de Montespan participated in an outrageous travesty of divine worship with the object of inducing Satan to turn King Louis XIV.'s affections back to the Marquise's waning beauty. It proved to be more of a miracle than even Satan could accomplish.

In his studies Jacquard made the discovery that all true devil-worshipers are the spiritual descendants of the ancient devotees of the Asiatic gods, Baal and Moloch. They were the same evil divinity with one name. To them uncounted human beings—men, women and children—had been sacrificed since the dawn of civilization. Sacrifice to Baal was commonly made by cutting the victim's throat, while those offered to Moloch were destroyed by fire.

It appeared to the drug intoxicated mind of the Parisian student of ancient wickedness that the most intelligent men since the beginning of time had worshiped the god of evil rather than a benevolent creator. These early men were convinced from experience that the evil divinity brought the best results to his worshipers. Baal and Moloch always brought an abundance of war, pestilence and other misfortunes on the enemies of those who sacrificed to them. It paid apparently to worship Baal and Moloch.

It may seem incredible that in this enlightened age anyone outside of a lunatic asylum could be found willing to worship evil spirits. But Paris has a large drug-addict population, and among these is a considerable sect who take diabolism seriously. After all, it is not strange because under certain drugs nothing is too fantastic to seem real.

When the police of Paris heard that Jacquard was planning to hold a grand devil-worship ceremony in the underground dungeon beneath the ancient house of Tristan the Ogre, on the Latin Quarter, they made no move to interfere. There was no law against a man worshiping evil spirits if he liked, and in the past these diabolistic services had been harmless enough. The police reports told of a lot of sorcery, burning of incense and uttering of fearful sounding names and that was all.

But the drug-crazed mind of Jacquard, the half-genius, had something more serious planned than just spells and smells. His intention was to revive the demon worship of Baal and it was whispered among the select who were invited that Baal would have a human sacrifice such as he had always demanded in the past. If the police heard of this rumored feature they paid no more attention to it than to the usual ravings of addicts.

The dungeon was a well chosen place. Tristan the Ogre was one of the secret executioners of wicked King Louis XI. and beneath his house he had all the medieval implements of torture for making the King's enemies yield up their secrets, wealth and sometimes life. From the walls dangled chains by which the prisoners had been fettered and others higher up from which they hung by their thumbs until they remembered something his Majesty wanted to know. There was a rack which also helped a man's memory by pulling him limb from limb, branding irons, flesh pincers, the "boot" and a case, shaped like a woman and big enough to hold a man. When a person was placed inside and the lid allowed to close, spikes slowly penetrated various parts of his body.

When Jacquard's friends of both sexes arrived at night in this dreadful place they saw all these things, and also a large altar in the form of a papier-mache bull's head, with long iron horns. Inside was some sort of light which gleamed through the bull's eyes.

Around this object they saw Jacquard and a dozen others garbed in priestly robes of ancient Babylon, but the thing that caused awe and wonder was the form of a man bound to a table placed beneath the altar. The man was breathing, but seemed to be drugged into half consciousness. What would they do to him?

There was much incantation, pouring out of oil and wine, burning of incense and other spices and herbs until one could hardly breathe in the chamber. Then came the climax of all this mummery.

Rene Jacquard announced that the man on the table had not only consented but volunteered to be sacrificed to the great Lord Baal. At this the victim opened a pair of bleary eyes and nodded confirmation. Some of the more rational persons present thought it only a bluff, but one or two did not like the exalted look in Rene's face and protested when he drew from his robes an ancient sacrificial knife of curious shape.

Their protests were silenced by Jacquard's acolytes, who also passed around a hymn to Baal written on slips of parchment. When the last verse of the hymn had been chanted Jacquard advanced upon the victim, rolled back his flowing sleeve and raised the knife. One or two spectators screamed, but the high priest ignored them.

At that instant the ancient door of the chamber flew open and in rushed half a dozen masons and bricklayers, who knocked the high priest down and released the stupefied victim. For this sacrilege they were attacked by the Baal priests and worshipers, who outnumbered the invaders five to one. But the workmen were husky, healthy men, whose fists made short work of the flabby addicts.

When Baal's devotees had had enough, the workmen smashed the altar and dragged away to the open air the maudlin idiot, who complained because he hadn't been permitted to sacrifice himself. The rescuing masons had been peeping at the ceremonies from a neighboring cellar through a hole in the wall which one of them had made.

It was the honest opinion of these men that they had broken in just in time to prevent a tragedy, and most of Paris agreed with them. But the police made no arrest because they could not prove what was in the crazy minds of the devil-worshipers.

At dawn one morning, this much discussed priest of demonism staggered from a taxi to the door of the Jacquarde residence and rang the bell. A sleepy maid let Rene in, saw that he got safely to his room and forgot then about it. Around noon the next day Rene's mother thought her son had slept off enough of his spree to awaken him. The door was unlocked and she threw it open.

The whole household answered her cry of anguish. They found Rene, still fully dressed, lying doubled up on the rug before his desk. He had been dead for six hours.

He had collapsed while seated at his desk, and the attack that had killed him had struck while he was in the act of writing. No one knew what this last message of a dying man might have been, completed. It was sufficient for Jacquard, pere, that the first two words of the scrawl in his son's handwriting were the name—Marthe Dalbane.

The families of Hellmann, Bellanger and others shrank from publicity and discouraged all attempts to ferret out the mysterious connection between the "Death Flower" and the series of tragedies that dog her steps. Jacquard senior was of sterner stuff. He followed his son's body to the grave and then drove straight to the Palais de Justice, where Judge Bacquart was waiting to question Marthe in the presence of the bereaved father.

Marthe told what seemed a simple, truthful story. She said that for some time she had not seen Rene Jacquard, but on the evening before his death she had dined at the home of Mlle. Rosette Scott, a well known professional beauty of Paris. There were several other guests, including Mme. Dujardin, whom Judge Bacquart had on his lists as a drug user. Rene had attended that dinner, arriving late and declaring that he had quarreled with his wealthy father, and bringing a basket of champagne, stating that it was all he had been able to drag from the house.

At 1 o'clock in the morning Marthe had decided to go home and Rene had arisen, announcing that he would escort her. They found no taxi, and as they started to walk a sudden snowstorm descended on them, making the woman's slippers wet through before her house was reached. Rene had complained of a headache and asked to sit in the hall for a moment. When Marthe had changed her slippers she found the young man sitting rigid, insensible and scarcely breathing.

Mindful of her death flower reputation, Marthe was frightened at the prospect of another man dying in her house, and for an hour telephoned vainly for a doctor. At last she got the physician of George Watch, one of the few admirers of Marthe who is still alive.

The physician found Rene's thighs covered with the tell-tale ulcers left by careless jabs of the morphine needle. They worked till daylight on the man, with massage, oxygen and coffee. Marthe did her part, persuaded a drug store to open and sell her some more oxygen. Finally Jacquard opened his eyes as if from a deep sleep, apologized for the trouble he had made and said he was well enough to go home. The doctor went with him and saw him enter his house.

Not only the doctor, but every one else mentioned in Marthe's story corroborated every word Marthe said. There was nothing the matter with her story except one thing. It was so similar to so many of her other stories. As usual Marthe had done nothing except to be helpful, and yet there must be some reason that so many young men just happen to start dying in her presence. Also, as usual, the autopsy revealed an overdose of morphine.

The judge and the father could only look at the mysterious and fatal beauty in perplexed despair.

"I don't know why these things happen any more than you do," she sobbed out to Judge Bacquart.

"Well, one of us must find a way to stop them," answered the judge sternly. "It will be better if you do," and he let her go.

Judge Bacquart, however, took one precaution. He knew that publicity had for the moment broken off the "Death Flower's" relations with Dr. De Martel. However, after a day or two she might win her way back to him. The judge decided that De Martel was too good a surgeon to have anything befall him, so he took steps to make that separation permanent, as he hoped.

Except as an excuse for slashing Boussac's throat, Marthe had not admitted taking drugs. Judge Bacquart knew well enough, but the point had not been pressed because the inquiries were about death, and it was not fair to expect the woman to incriminate herself as an addict. It seemed time to get some evidence so that Marthe could be kept away from the surgeon. So two of the Judge's best searchers were sent with a warrant to Marthe's Avenue Bugeaud mansion, and for two days ransacked it in vain. They found a dozen secret panels in the walls, hollow legs of furniture and other hiding places, but not a single crumb of narcotics.

While they were hunting Marthe moved into a small apartment at No. 46 Rue Francois 1er, and for some reason has never returned to her splendid house.

"She thinks faster than I do," said the Judge, when his men reported failure. "We'll try her again. She has probably destroyed all her supply and is now desperately anxious for more. She dares not seek out a drug peddler for fear we are trailing her. She is, therefore, sending vague distress messages from friend to friend to get something to her somehow. We will accommodate her."

Next morning a detective dressed in the nondescript clothes of a messenger boy called at the concierge's lodge of the apartment with a small package for which Mlle. Dalbane must sign personally.

He was introduced to the presence of the mistress of the house. Perhaps he betrayed too much eagerness. Perhaps some sixth sense warned Marthe. At any rate, on the point of affixing her signature to the delivery voucher which the detective had presented she sprang up and let the pen fall.

"What's in this package?" she cried. "I don't know anybody in Marseilles who might send me a present." With a rapid gesture she tore the wrappings of the packet away and let the contents, a

## The Story of a Modern Diana and a Search for the Treasure of Ancient Carthage

### Synopsis of Preceding Chapters.

VERE CRAIG, something of a modern Diana, must raise $7,500 to pay a debt incurred by the extravagance of her younger sister, Lois. She cannot ask her father, a retired colonel, for the money, and the only other possibility is a trust fund of $10,000 she is to receive when she marries. Vere meets Michael Feverill, an explorer, who is about to leave for Africa, never to return. In desperation she asks Feverill to marry her.

Realizing that the girl is in trouble, Feverill agrees, and they are secretly married an hour before he sails in search of the treasure of ancient Carthage. He leaves Vere his signet ring and a letter to his solicitors that will enable her to secure a divorce whenever she wishes.

Vere returns home to tell her sister that she has the money. Lois rushes in with the news that she has just won $8,250 on a bet placed several weeks previously on Crossbow for the Royal Hunt Cup. Lois can now pay back the money herself, and Vere's marriage has been a useless sacrifice. The pain caused by the realization that she has done Feverill a great injustice keeps the young explorer constantly in Vere's mind and makes her more human, more sympathetic and doubly attractive.

In Algiers Feverill goes to the house of his friend El Hadji, whom he tells of his plan to hunt the treasure of Carthage, which he believes lies hidden somewhere in the desert. The Arab shows him an ancient Roman gold piece that came to him from Largah, near the place where Feverill believes the treasure to be. El Hadji warns him of the extreme danger and then disguises the Englishman as a Berber and gives him a letter to El Dhid in the oasis of El Harib, where he can learn the desert speech. Feverill — now El Nemir, the Panther — arrives at the home of El Dhid and greets the latter's daughter, Rezala, a beautiful child of the desert. Upon the girl's breast he recognizes another gold piece from the treasure of Carthage.

In England, meanwhile, Vere's friends the Pollitts, plan a trip to Africa to inspect a newly-discovered iron deposit, and Vere decides to accompany them, paying for the trip with the trust fund she received on the day of her marriage.

Vere and the Pollitts arrive in Africa and are met by Jules Casgrain, cultured French engineer and discoverer of the iron deposit who hopes to interest Pollitt in investing. On the way to the iron mountain Vere is much attracted to the charming Frenchman. The night they reach it he tells Vere he loves her and asks her to marry him. She tells him that she is not free. The party plan a tour in the desert.

Feverill and Rezala are falling in love. She tells him of her dream about their finding the treasure, describing its hiding place accurately, and suggests that she, her father and El Nemir go in search of it. In his excitement El Nemir blurts out his acceptance in English.

### CHAPTER XV (Continued)

FEVERILL jerked himself together, and dropped back into Arabic.

"And if I am a Negleez?" he questioned.

Rezala put her hand to her throat. All in an instant she felt powerless. El Nemir a Negleez! So many things were clear now that she had not understood about him before. Little gestures—the way he ate—something in his walk that was not the desert stride—his eyes, Berber enough in color, though not Berber in their effect on her. A thousand such things rushed into her brain. She wanted to be furious with him—and could not.

Feverill Jerked Himself Together and Dropped Back Into Arabic. "And if I am a Negleez?" He Questioned.

"If you think you should tell your father—tell him," added Feverill, smiling.

The smile disarmed her. This man was now more than ever the goal of her desire, but would a Negleez marry a girl of El Harib? She tried to imagine that—and failed.

"El Hadji—" she stammered—"does he know?"

"As a Negleez I have long been the friend of El Hadji. Thus I entered his house and came out again a Berber, there being those behind me that would do me evil. They also sought what I seek. Now do with me what you will."

She reflected, eyeing him more soberly. Was there, of a truth, no woman in his life? But how discover that from a Roumi? Perhaps, after all, he was not rich, which was why he came here to seek. Then, if he found the gold, he would be free to go away. Could she buy his love with the treasure of Karthad Hadtha? Women were bought cheaply in her country, so why not a man at a great price?

And he was in danger. Were it known that he, a Roumi, was masquerading here as a Berber, his life would hang by a thread. All Roumis were judged in the desert by the French and Spaniards who made war in the mountains of Morocco. He would be taken for a spy. Perhaps he was a spy! But even this did not affect her love.

"Well," he repeated gently, "what are you going to do?"

Ah, but he was cruel, this man who put himself so completely in her power. She could not hurt him—and he knew it.

"I shall tell no one," she said under her breath. "What would you do, if you found what you sought—or I found it for you?"

"If you—!" He broke off sharply. What would he do? Live with his wife? That thought was absurd. If she had not freed him, he would force her to action. What then? Gradually it seemed that he was a fool not to take what the gods offered. This girl would be loyal—while it lasted. He could count on that. They could travel, and there was not a capital in Europe where this desert flower would not command admiration. She could light in him the flame that he thought dead forever. He knew that already. He felt it now.

"Listen, Rezala. There is amongst the Negleez a custom of not asking promises and vows but leaving the matter in the lap of a friend. Thus is much done that might not otherwise be done at all. Can you, therefore, be enough of a Negleez to leave this matter in my lap? Also I will tell you what I told El Hadji in the Sidi Ferruch. I do not seek this treasure for the sake of any woman."

She gave a quick little gasp of happiness, caught at his hand, pressed it hard and darted out of sight amongst the palms.

### CHAPTER XVI.

IBN MASSOUD, the headman of El Felja, sat in the sun and looked at Casgrain with eyes sleek as black velvet.

"Does the Roumi think that there is to be found a camel behind every tamarisk bush?"

The engineer smiled patiently. He was used to dealing with men like this, knew perfectly well that all kinds of imaginary difficulties would be raised to enhance the price, and also that Massoud in no way expected what he would ask.

"I am not altogether a stranger in these parts."

Massoud grunted. He had watched the Roumis arrive the night before, noted the completeness of their equipment, had had a word or two with one of the mal-

(Continued on Page 20)

## What do the neighbors think of *her* children?

To every mother her own are the ideal children. But what do the neighbors think? Do *they* smile at happy, grimy faces acquired in wholesome play? For people have a way of associating unclean clothes and faces with other questionable characteristics.

Fortunately, however, there's soap and water.

"Bright, shining faces" and freshly laundered clothes seem to make children welcome anywhere . . . and, in addition, to speak volumes concerning their *parents'* personal habits as well.

*There's CHARACTER*—in SOAP & WATER

## How to Wash Your Face

THE absolutely normal facial skin is extremely rare. If anything, it is becoming rarer. The face is exposed to the elements; it is a catch-all for dirt and soot; it is covered by secretions from oil and sweat glands, and by the scales that are constantly being shed by its horny layers. There are always plenty of bacteria on the face, waiting to enter the pores and start infections.

The bacteria have a much better chance, if the face is dirty, says Dr. Oscar L. Levin, in his book "The Care of the Face." They literally thrive on dirt; and their infections produce the variety of pimples and boils and spots and blotches that are collectively called eruptions or lesions. To fight these bacteria and prevent their infections it is necessary to resort to chemistry.

The best chemical for this purpose is water. It surpasses any other agent for preserving the health and the beauty of the face. Not only does it cleanse the skin, but it stimulates it. It removes the scales, oil, sweat, dust, soot and bacteria. It stimulates the cells of the skin to function so that they remove obnoxious matter from the body. It softens the skin and makes it pliable.

The tonic of water makes the blood vessels open and close properly, so that they give the skin good color, regulate the temperature and aid in the process of excretion. The sweat and oil glands are stimulated to perform their work of refrigeration and lubrication. The muscles under the skin are so affected that they contract, and make the skin smooth, firm and velvety. And the tonic makes the skin "harder," so that it lends the body better resistance to attacks from without.

The best water for the skin is that which is called "soft." That means it is free of calcium and magnesium carbonate. If the only water available is "hard," it can be boiled or softened by adding a little borax or bicarbonate of soda. Rain water or distilled water may be used instead. The objection to hard water is that it frequently irritates the skin. The chemicals in the water itself may not be at fault; but they tend to curdle the soap, and this makes it so difficult to remove the dirt that extra friction is necessary, and the result is irritation.

Water that is cool or cold is the tonic. It first causes a contraction of the skin generally, and then, when the reaction sets in, there is a relaxation to normal color, texture, gloss, smoothness and firmness. Warm or hot water is better for cleansing and for relaxing.

Obviously, then, the way to wash is to use warm or hot water first, and then cold. The former opens the pores, the latter closes them.

While warm or hot water cleanses the skin, there is such a thing as too much of it. It removes not only the dirt, but the secretions of the skin—the oil and sweat, which prevent it from drying too much. Too much hot water on a skin makes it dry and inelastic; it chaps and cracks easily. Hot towels, steam and too frequent Turkish or Russian baths irritate and injure the skin by causing an over-relaxation. There is little, if any, value in most of these complicated treatments. It is impossible to say how often the face should be washed, of course. That depends on factors such as the individual's environment, occupation and type of skin.

There is probably no more persistent illusion than that which holds that oils and creams—anything in fact—are better than water for washing the skin. Not a few women are so obsessed with this notion that it practically amounts to a hydrophobia. They firmly believe that their skins cannot stand water. With few exceptions they are the same women who think their hair should not be washed oftener than once a month.

Only skins afflicted with certain diseases are harmed by washing with water.

**Watch Them Fall Off!**

*This New Way*
**GERMAN DISCOVERY**
**Works Wonders in 3 Days**

READ FREE OFFER: Worry no more over your pimples, blackheads, large pores, shiny nose, oily skin, freckles, sluggish blemishes and surface wrinkles that ruin your complexion! Learn FREE how to make disfiguring blotches "fall off" and have a new, clear, smooth skin on face, neck, arms, hands or any part of body. Makes you look more youthful and beautiful—years younger. New skin comes—old skin falls off! Blemishes positively GONE, because they're OFF! Simple, harmless, easy! Different from anything you ever tried! All explained in wonderful new book in English language entitled—

"Beautiful New Skin in 3 Days"

Send no money—just name and address. Get it by return mail, postpaid, FREE.

**HOW TO DARKEN GRAY HAIR**

**Makes One Look Younger.**

Men and women who used to be called Grandpa and Grandma are now setting the styles by darkening their gray hair at home.

For instance, J. A. McCrea, a well-known Californian, recently made the following statement:

"Anyone can prepare a simple mixture in five minutes that will darken gray hair and make it soft and glossy. Merely take a half-pint of water, add 1 ounce of bay rum, a small box of Barbo Compound, and ¼ ounce of glycerine.

"These ingredients can be bought at any drug store at trifling cost. Apply to the hair twice weekly with a comb. It does not color the scalp, is not sticky or greasy and will not rub off."

**BARBO**

**A PERFECT LOOKING NOSE**
**Can Easily Be Yours**

Trades Model No. 25 corrects now all ill-shaped noses quickly, painlessly permanently, and comfortably at home. It is the only nose-shaping appliance of precise adjustment and a safe and guaranteed patent device that will actually give you a perfect looking nose. Over 50,000 satisfied users. For years recommended by physicians. 16 years of experience in manufacturing Nose Shapers is at your service.

Model 25 jr. for children.

Awarded Prize Medal by big Wembley Exposition, London, England. Write for testimonials and free booklet, which tells you how to obtain a perfect looking nose.

M. TRILETY, Pioneer Noseshaping Specialist
Dept. 3071. Binghamton, N. Y.

**Heals Legs by New Method**

Dr. Clason's Home Method for Varicose Ulcers, Open Sores, Swollen Leg, Milk Leg, Fever Leg, or Sores from operations or injuries, Phlebitis, Poor Circulation and Varicose Vein suffering succeeds after all else fails. It is positive and prompt. Stops pain, aches, itching, cramps, numbness, smarting, reduces swelling and heals leg sores without laying up. Send for Free Booklet and explain your ailment.

**Try Joint-Ease for Painful Joints and Rheumatic Agony**

**Pharmacists Everywhere In America Recommend this Inexpensive Remedy**

**12 DAYS' FREE TRIAL**

They call this successful preparation "Joint-Ease" because the man who turned the trick worked for years to perfect some low-priced remedy that should really benefit the millions of people who have one or more joints that need helpful attention.

So "Joint-Ease" is prepared for people who have a swollen, painful, inflamed joint, whether in knee, elbow, shoulder, ankle, arch or finger and for rheumatic agony it is used by thousands.

Of course, it is generally used for the relief of such superficial ailments as lumbago, neuralgia, neuritis, sore, lame, aching muscles, stitch in the side, crick in the neck, sore, burning feet, or chest colds, because of its soothing, healing, penetrating action.

So if you have a pain tormented joint ask for a tube of Joint-Ease at any drug store in America. Rub it in thoroughly to help bring about the much-desired relief as quickly as possible. You won't be disappointed in Joint-Ease—60 cents a tube. You can always get Joint-Ease.

**FREE** Send name and address for large generous tube (12 days' treatment) to Pope Laboratories, Desk 70, Hallowell, Maine.

# Twenty Pianos All Being Thumped At The Same Time

FORTY pianists sat at twenty pianos in a recent concert at Portland, Oregon, and gave a concert which was listened to by over 5,000 people. The baton was waved by William van Hoogstraten, conductor of the Portland Symphony Orchestra. It was the first time that such a concert had ever been given, and the results were so tremendously successful that similar concerts are being planned for various parts of the country.

Piano duets and trios and, in vaudeville, an act with six pianos had given musicians an idea of the effect possible by the use of many pianos played together. Not long ago the producer of a musical revue in New York introduced a dozen pianos played together. But in this case the pianists were girls of the chorus, who were far from being expert. In the case of the Portland concert, every player was a finished and talented pianist. For a week expert tuners had been at work putting the concert grands into condition for the event, which had been sponsored by the Oregon State Federation of Music.

"If such remarkable musical effects may be obtained by the use of twenty pianos, what would be the result if, say, a hundred pianos were played simultaneously?"

This question was asked of Professor van Hoogstraten, and he admitted that it was not without the range of possibility that such a concert might be given. It is in line with generally radical tendencies in the world of music during the past few years. The past year particularly has seen a number of concerts unique of their kind.

With considerable advance ballyhoo, the young American composer, George Antheil, came from Europe to his native land to perform his "Ballet Mecanique." The concert took place in Carnegie Hall, New York City, and was blazoned on all the front pages the following morning. Raucous derision was the main note of the reviews. In his remarkable composition for orchestra, Antheil had used wind machines, rattles, automobile horns and tin kettles, and the effect, to the average listener, was that of chaos. Of course, there were a few of the loyal who hailed Antheil as the prophet of a new era in interpretative music, but they were heavily outvoted by the skeptics, who ruled that Antheil's composition was merely a mad series of dissonances.

Forty Pianists, Using Twenty Pianos, All Going at Once, During the Unique Concert Recently in Portland, Oregon. The Concert Was Directed by Professor William van Hoogstraten.

An Ironing Hint.

WHEN dampening clothes to iron them, always sprinkle more water over the linen articles.

**Gray Hair**

I show you safe way to end it FREE

THROW away messy, old-time, "crude dyes." They are dangerous and noticeable. Call back natural shade by clear, colorless liquid combed through hair. Does not wash off. Leaves hair live looking and lustrous. Keeps easy to curl. May supply only to parts.

Test free—or get bottle at drug store. Few cents' worth gives complete restoration. Money back if not amazed.

# Kill Beetles With Perfume

The Perfume-Filled Beetle Trap Hung in a Tree. —And at the Right— Enlarged Photograph of the Pestiferous and Destructive Japanese Beetle.

A NEW IDEA is being tried out by scientists in a campaign to exterminate the pestiferous Japanese beetle. The beetle is being lured to its death by perfume. The stuff used is "geraniol," which, mixed with bran, serves for the baiting of traps. It liberates a vaporous perfume which is irresistibly attractive to the beetles. They come in flocks to enjoy it, and it kills them.

Geraniol is derived from lemon oil by distillation. Lemon grass is a tropical plant, and much of the oil comes from the Malay Archipelago. In southern California the plant is beginning to be cultivated for making perfumery.

The crude oil is "split" into a number of products, one of which is geraniol. Most valuable of the component parts is "petitgrain," which is the basis of many expensive perfumes, and is used for scenting fine toilet soaps.

Geraniol can be obtained by the distillation of geranium plants—whence its name—but it is more cheaply derived from lemon grass.

The trap used for Japanese beetles is simple and ingenious. It is a cylinder of galvanized iron with a solid bottom and a tin funnel set into the top. Half way between top and bottom is a pan of wire mesh, to hold the bait.

The odoriferous vapor, rising through the funnel, spreads in the surrounding air and attracts all the Japanese beetles in the neighborhood. They fly into the funnel, are suffocated by the fumes and fall through.

# Intelligence Test For Motorists

BY way of self analysis, says Hygeia, let each motorist answer honestly for himself the following questions:

Have I at any time in the past been guilty of driving a car at an excessive rate of speed?

Have I ever driven on the wrong side of the street?

Have I driven recklessly in passing children?

Or taken chances in passing another vehicle?

Failed to stop when passengers were getting off street cars?

Fooled with other occupants of the car while driving?

Failed to observe recognized automobile signals?

Failed to sound the horn, as is customary?

Started from the curb into heavy traffic without precaution?

Passed a street car on the left?

Driven through a safety zone?

Disregarded the traffic rules?

Failed to co-operate with the traffic officers?

Failed to go slowly by a school building?

Turned corners improperly?

Been reckless at a railroad crossing?

Driven a car with illegal lights?

Driven incautiously past blind corners?

Backed up without looking behind?

Driven with inadequate brakes?

Stopped suddenly without warning those behind?

Parked my car next to a water hydrant?

Failed to look out for jaywalkers?

Parked my car at night without lights?

Left my car on an incline without brakes properly set?

Driven with a faulty steering gear?

Or without chains or non-skid tires over wet pavement?

Followed another car too closely for safety?

Entered a garage at high speed?

Driven a car I did not know how to manage safely?

Allowed a child to catch on for a ride?

Failed to watch out for obstructions in the highway?

Neglected to exercise proper caution on curves?

Driven a car not equipped with mirror for looking back?

Driven and flirted with girls on sidewalks at the same time?

Failed to give pedestrians a fair chance?

Tried to outguess the other fellow?

*Now Ready!*

# AN IMPROVED KOTEX

## Offering Two New Exclusive Features:

**1** ***A new, form-fitting shape*** **. . . you wear it under the most clinging gowns without possibility of detection, without marring smooth, fashionable lines.**

**2** ***It is softer, too*** **—fluffier—eliminating unpleasant chafing and binding.**

*How gaily social events can now be met . . . No limitations set by physical handicap . . . The lines of any gown, however clinging, will remain smooth, unbroken.*

WITH the presentation of the new style Kotex, exclusive in design, comes the most radical development in intimate feminine hygiene since the invention of Kotex itself.

***What form-fitting means***

You can wear the new Kotex without self-consciousness no matter how close fitting your gown, how thin and clinging its fabric. By a unique process, developed only after months of experiment, corners are now scientifically rounded and tapered so that the pad fits snugly, comfortably, securely, and is worn in the knowledge that closest-fitting gowns will retain their slim, smooth lines.

This brings a composure, a sense of well-being, heretofore impossible.

***Softer—fluffier—chafing eliminated***

New, exclusive methods have been found for making the absorbent filler *still softer*. Chafing, binding, similar discomforts are eliminated.

Utmost protection is afforded delicate, sensitive skin. The importance of such an improvement cannot be exaggerated.

The Improved Kotex retains all the advantages of the old Kotex, including the same area of effective absorbent surface you have always known.

***Women doctors, nurses, approve***

Women doctors, nurses in hospitals, in welfare departments, in city health departments—have given these improvements their enthusiastic approval. So will you! Your good health, your comfort, are considered—and, for the first time, your appearance.

* * *

Utter safety is assured by the remarkable Cellucotton wadding which fills Kotex and which is exclusive to Kotex . . . for it is 5 times more absorbent than cotton. It discards like tissue—you simply follow the directions given in each box; it deodorizes thoroughly while being worn.

***Nothing else is like Kotex***

You buy Kotex by name, without embarrassment, without delay . . . comes in two sizes, Regular and Kotex-Super.

Remember, nothing else is remotely like the new Improved Kotex. Buy a box today. Kotex Company, 180 N. Michigan Ave., Chicago, Ill.

***No laundry—discards as easily as a piece of tissue***

*"Ask for them by name"*

KOTEX

PROTECTS—DEODORIZES

***Supplied also through vending cabinets in rest-rooms by West Disinfecting Co.***

**To Keep Fruit.**

IN keeping fruit, let it be spread out in a light, airy place, no two pieces touching. If piled together, or if stored in a damp, dark place it will decompose quickly.

Rub BAUME BENGUÉ (pronounced Ben-Gay) on the forehead and outside of the nostrils. Its penetrating quality is at once felt. Head throb is lessened, and the congested mucous membrane relieved.

The "stuffiness" usually felt quickly disappears if a little BAUME is melted in a spoon and the vapor inhaled. Use it for every chest cold and every ache or pain in nerve or muscle.

**BAUME BENGUÉ**
**ANALGÉSIQUE**

# Freckle-Face

**Now Is the Time to Get Rid of Those Ugly Spots**

Do you know how easy it is to remove those ugly spots so that no one will call you freckle face?

Simple get an ounce of othine—double strength from your druggist and a few applications should show you how easy it is to rid yourself of freckles and get a beautiful complexion. The sun and winds of March have a strong tendency to bring out freckles, and as a result more othine is sold in this month. Be sure to ask any drug or department store for the double strength othine, as this is sold under guarantee of money back if it fails to remove your freckles.

# Three Days of Terror

By J. S. Fletcher

## The Story of a World Menaced by a Strange Power

**Synopsis of Preceding Chapters.**

HENRY GRAHAM is engaged to Evelyn Wynyard, ward of his uncle, Olive Wynyard, Chancellor of the Exchequer. At the Chancellor's he meets Count de Reineville, a mysterious Frenchman of considerable reputation as an amateur scientist. Graham is struck by the unnatural appearance of the Count, and notices an indefinable feeling of uneasiness while in his presence.

The Dictators, a secret society in possession of a newly-discovered force capable of destroying the world, demand a ransom of £100,000,000 from the Government. When this is refused they blow up several blocks around Charing Cross Station with an explosive that makes no sound and the ruins rapidly disintegrate into gray ashes as though consumed by some fiercely-biting acid. The Dictators issue a public ultimatum demanding that the ransom be paid immediately or they will blow up London.

De Reineville offers Wynyard his chateau in Normandy as a refuge until the danger is over. Wynyard accepts for his ward, and Evelyn, accompanied by Cynthia Beachcroft and Graham, go aboard the Count's palatial yact. At sea the yacht's captain, Popinot, informs them that they are headed not for France, but for the Island, off the Norwegian coast, where the Count has a castle.

At his office in London, Wynyard, who seems to be under the influence of a strange spell, drinks an amber-colored liquid from a small flask of tinted green glass. Undecided as to whether or not he should arrest de Reineville as a suspicious character, Stephen Gotto, international authority on Anarchist outrages, goes to the Count's apartment, where he, too, drinks of the amber-colored liquid. Wynyard arrives and announces that the Government has surrendered to the Dictators. At the Count's suggestion the three take a special train to Hull, where a fast steamship, the Malvolio, chartered by de Reineville, awaits them.

The party on the yacht arrive off the Island. Popinot serves them with the amber-colored liquid, called Creme de Diable, which is only tasted by those to whom the Count offers it. It produces a feeling of veneration for de Reineville. Graham falls into a hypnotic trance.

That night the Malvolio, steaming without lights, enters the harbor and is sunk in a collision with a German warship. Wynyard and Gotto, also in a strange trance, are rescued and de Reineville is picked up apparently dead.

## CHAPTER XXIII.

**Narrative of Miss Beachcroft—III.**

I WAS by this time so completely case-hardened in respect to horror that without hesitation I followed the doctor to the side of de Reineville's rigid figure lying beneath the sheet. The captain hung back somewhat—it was plain that the events of the night had discomposed him.

"What is it?" he whispered.

The doctor turned back a corner of the sheet. For a moment he kept himself between us and the thing he desired us to see.

"It was this way," he said, in a low tone. "The Count had been struck on the head, and when I examined the wound I found that what must have been taken for the man's face was a skillfully built up mask—built up, you understand, on the natural face of him. Ach Gott! you now see him as he was!"

He stepped aside . . . we drew nearer and looked.

For the second time that night I did not do the things which women are supposed to do on these occasions. I neither screamed nor exclaimed. I just stood quietly by the dead man and looked at him . . . perhaps for a moment. The skillfully built up mask lay in shreds and peelings on each side of his head . . . his face lay amongst the ruin as a nut lies in a kernel . . . a face worn and wasted by the touch of incredible age. There were great cavities beneath the cheek-bones and at the temples; the nose had shriveled until the cartilage pressed tightly against the skin; the lips, masses of wrinkles and lines, were drawn back from the jaw; over the forehead a thin lock of white hair lay smooth. But the eyes were still open and staring . . . black, brilliant eyes with a strange force still shining in them and making the old face look older and older.

"You are a brave woman," the Captain remarked to me, with obvious sincerity. "Ach! I never saw such horrors as this night brings. I think I have seen the devil in that man's face. Who was he?"

But there was not time to inquire into that particular. The boat was back again with Evelyn and Mr. Graham, and the doctor and myself were busily employed during the next half hour in looking after the new patient.

"He is in the same state as the other two," whispered the doctor to me. "It is a species of trance; the symptoms are the same in each case, but less so in his case"—here he pointed to the inanimate figure of Mr. Gotto—"than in the others, I think"—here he shrugged his shoulders and wrinkled his face into the semblance of loathing and disgust—"I think that these three will have seen something when they come out of that trance. They will have been in the world beyond, seeing, eh?"

I persuaded Evelyn to leave the cabin wherein the three unconscious men lay, and to come on deck with me. On finding her guardian lying there in a similar condition to her lover she had almost collapsed, and she now moved at my side with mechanical steps and staring eyes. It suddenly struck me that if she saw any more of the horrors that hung around us she would go altogether, and so I forced her to lie down in a cabin, which the captain gave over to us, and made her swallow a strong sleeping draft. I remained with her until she was asleep, and I locked her into the cabin.

That was a wise precaution of mine—the worst was yet to come.

It was gray dawn when I went on deck once more. I looked in at the cabin where the three men still lay in their strange trance. The doctor moved from one to another, watching them with eager eyes. I turned away and sought the captain. He stood looking out toward the Island, and as he caught sight of me, he beckoned me to his side.

**De Reineville's Real Face Lay Among the Shreds and Peelings of the Skilfully Built Up Mask—the Face of a Man a Thousand Years Old.**

"Look!" he said. "The Island!" He stretched out his hand. Following its direction I saw, poised on a rocky promontory that stood out from the white beach, three figures habited in loose garments of a curious gray tint which mingled well with the almost spent night shadows. They stood motionless on the head of a great rock; as the light strengthened, their figures became more boldly outlined against the rose-tinted walls of the great marble palace which rose behind them. All around us rose murmurs—from the commotion on our own decks and on those of the yacht we knew that the men on both vessels had seen the three shapes.

I heard the captain fetch a deep breath; he suddenly pushed his glasses into my hand, and turning away went over to his chief officer. I adjusted the glasses to my sight and directed them upon the Island. Then I saw the three shapes clearly. They stood on a rock which rose to a considerable height above the beach, and they seemed to hold converse with each other. But of their faces I could see nothing—from head to foot the three were wrapped in filmy, gray-tinted garments that stirred faintly in the morning breeze.

The captain came back to me. His face was set and white, and I saw his hand tremble slightly as he took the glasses from mine. He directed them once more upon the figures. Suddenly he dropped them.

I looked towards the rock. One of the shapes had moved a little forward; it lifted its arms. A long, weird cry came across the waters—then a second—then a third. . . .

As the last died away came shouts of, "Help! Help! Help!" from the cabin where the three men lay. We rushed towards it—into it. The doctor and his two attendants were struggling with the three men . . . or with the three demons which had entered into the three men's souls.

This was the first of the horrors which unnerved me. Swept away by the rush of the sailors who entered in response to the doctor's call I shrank against a bulkhead inside the cabin and there remained, trembling and horrified at the scene which took place before my eyes. By the doctor's directions the sailors seized on the three and lashed them firmly to their beds. The sweat dripped from the sailors when they had finished—they gathered together in the center of the floor, watching. As for the doctor he watched as a cat watches a mouse.

Again the thrice-repeated call came, and again each man, as the sound reached him, strove to burst his bonds. . . .

I find it difficult to write about this. If I could, I would have fled from the cabin. But I could not move. . . . I was obliged, compelled to witness it all . . . the loathsomeness, the beastliness, the savagery of it. . . .

Once more the call sounded and once more the men strove against the lashings which secured them. One of the sailors suddenly screamed and fell down in a fit . . . they carried him outside.

Then came silence for a long time. The three men lay motionless. As for the rest of us, we scarcely breathed.

A shout of alarm sounded sharply from the bridge. The captain rushed out. . . . I followed him, reviving in the fresh air. I climbed the stairway to the bridge; the captain and the first officer were staring towards the Island. As I came up to them the latter handed me his glasses and turned away, shivering as if the ague had fallen upon him.

I fixed the glasses and looked shoreward. The three shapes still stood upon the rock, but they were now moving about, gesticulating and beckoning with their arms, and to them from all parts of the beach were approaching crowds of . . . what? Heavens, what were those things? . . . were they men, or beasts, or . . .

The things were running all over the beach . . . running on all fours . . . and when you caught the gleam of their eyes it was as if you looked on the eyes of a man from whom everything but the brute has been driven. And suddenly they began to wail, or cry. They clustered about the Three Shapes . . . clustered as hounds about the huntsman, or apes gather on the side of a rock, and the sound of their crying came clear and distinct.

One of the shapes lifted an arm and pointed seawards. . . . The things broke into fierce yappings of brute delight, and plunged or threw themselves into the sea. In another moment there were hundreds of them swimming swiftly in our direction, and as they swam they yelled. . . .

The captain woke into activity. Some orders rang out sharply; a bell tinkled somewhere; I felt the great ship move; I saw the men running hither and thither; I heard the bustle of preparations going on all around me. Then I looked again at the oncoming throng.

They were swimming for the yacht and swimming with incredible swiftness. Their long, bestial arms smote the water like the blades of a powerful screw; their faces shone in the morning sun as they breasted the rippling waves. And as they drew nearer one heard the horrible chattering sound which they made . . . a sound of terrifying, soul-affrighting laughter.

They were around the yacht, swarming up its sides, running . . . on all fours . . . over its decks, into its cabins, within a few minutes of leaving the Island. We saw the officers and crew thrown hither and thither as the mob of beasts swept over them. We saw the beasts emerging from stairways and hatches, jabbering, howling, screaming, running along the decks with lowered muzzles, as hounds run who seek to pick up a lost scent. . . .

Then suddenly, they quitted the yacht as with one consent, casting themselves pell-mell over the sides into the sea. The great, loose, glistening mass of them, howling and screaming, came in a solid body, swimming swiftly, in the direction of the warship.

A quick order rang out, followed by the sharp rattle of a quick-firing gun from our bows. I saw bright jets of scarlet leap up from the loose mass, but it came on, on, on. . . . Another rattle, and more leaping spurts of blood . . . and still the onward rush never wavered.

Then I heard the captain mutter something hastily to his first officer, and the latter rushed from the bridge. A moment later four sailors ran along the deck beneath, bearing a body closely wrapped in a sheet. They went forward—then they flung their burden overboard. The beasts were clamoring round our bows . . . the light shone full on their faces and glittering eyes.

I turned away, sick, sick. . . . When I looked again the brown mass of swimming things was speeding shoreward, bearing the body above it. It returned in silence, and then I heard the labored breathing of the men about me.

It was some time before we dared look at each other, I think. It seemed quite a long time before that weird wailing which we had heard in the night broke out once more on the Island. I looked towards the shore again. . . . The beasts had carried their burden to the rock on which the Three Shapes still stood, and were now crowding about it and them, wailing, wailing.

Suddenly the entire assemblage forsook the rock. It wound, a long, close-packed line, across the beach in the direction of the castle or palace which stood in the center of the Island. And as it moved, the warship moved, too. The great screws revolved, and the sea seemed to slip past, and within a few minutes we were steaming full speed for the open sea.

I turned presently to look at the yacht. When we were nearly a mile from her she got under way

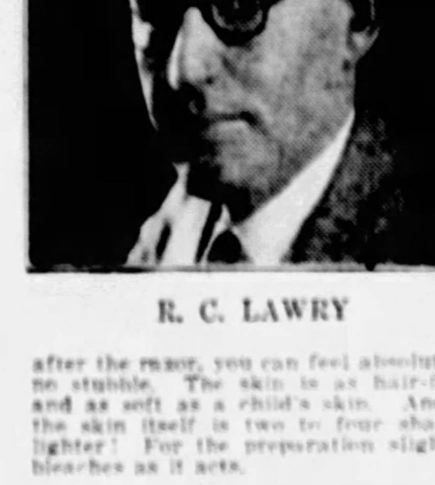
# DON'T SHOW YOUR AGE!

Don't let wrinkles tell the world you're getting older. Remove them instantly—look years younger! Simple, safe, scientific formula erases every one. Get two ounces of eutol at druggist, mix at home with water and teaspoon of glycerine. Spread lightly over face, neck and around eyes. The starved tissues absorb it rapidly as you work into pores until gone. Then see the instant transformation!—wrinkles, frowns, age lines, crowsfeet—gone! Leaves the skin smooth, firm, lovely as a flower. You can depend on sure results with genuine eutol—be sure you get it.

If blackheads trouble—remove them this easy way. Never squeeze—large pores will result. Safest way to dissolve them all at one time. Ask your druggist for two ounces powdered calonite, sprinkle on hot, wet towel, apply and presto!—they're gone! You've never seen anything like it. Results positively marvelous—even in worst cases.

# The Man Who Works Miracles Ridding Women of Hair

**How, by Means of a Simple Discovery, a Middle-West Scientist Is Proving, to the Wonder of the Cosmetic World, That Hair on Arms and Legs Can Not Only Be Removed Completely—But Bristly Re-Growth Be Entirely Avoided and All Re-Growth Delayed Indefinitely . . . *What It Is and How to Use It.***

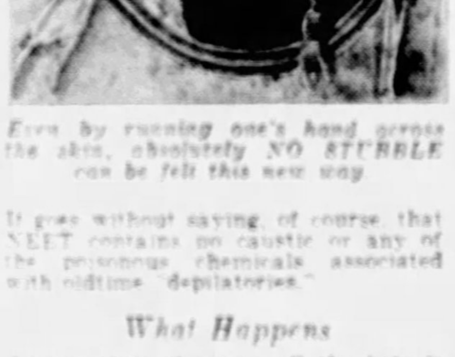


R. C. LAWRY

THAT the arm and leg hair every woman detests can not only be completely removed, *but kept from growing back indefinitely* with the bristly, coarse growth, skin roughness and enlarged pores following the razor and other commonly used ways, is now an established scientific fact.

An entirely new light has been thrown on the situation. Noted cosmeticians are taking back everything they ever said about hair removal and standing amazed before the recent discovery of R. C. Lawry, famed Mid-Western scientist. The hair removing problem, it would seem, is largely ended for women.

Resembling in texture a superlatively fine beauty clay, the preparation embodying this discovery is simply spread over the surface from which the hair is to be removed. Then rinsed off with lukewarm water. That is all.



*Even by running one's hand across the skin, absolutely NO STUBBLE can be felt this new way*

It goes without saying, of course, that NEET contains no caustic or any of the poisonous chemicals associated with oldtime "depilatories."

*What Happens*

As you rinse it away, all the hair is rinsed away with it . . . every single hair gone; not a vestige remains. It is gone so completely that, unlike after the razor, you can feel absolutely no stubble. The skin is as hair-free and as soft as a child's skin. And—the skin itself is two to four shades lighter! For the preparation slightly bleaches as it acts.

But, above all things, it banishes forever the re-growth of heavy, bristly hair wherever it is used. *And retards all re-growth indefinitely.*

*Slows Growth Seven Times!*

This discovery is now compounded in the hair-removing preparation called NEET. A preparation on the American market some years, but recently radically changed in compounding to embody the Lawry discovery.

After the first application, normal hair growth (reappearance of the hair) is slowed 7 times. Think what this means.

It is said to come closer than any other way yet found to discourage the growth of hair on women.

*On Sale at Stores Or Use Coupon*

The preparation "NEET"—embodying the complete Lawry discovery, and so stamped on the package—is now on sale at all drug, department stores and beauty parlors. The usual price is $1. There is also a 60c size. The $1 size contains 3 times the quantity of the 60c size.

Obtain at your drug, department store or beauty parlor, or if you cannot be supplied, use the coupon below for supply by mail.

# Ever Had Your Colon "House Cleaned?"

**90% of All Ills and Ailments Have Their Source in the Neglected "Cellar" of the Human Body**

IT'S only natural to neglect the cellar of the house, the part you don't see. Yet, as a matter of fact, it's more important to keep the cellar clean and airy than any other part of the house.

The colon, or large intestine, may be called the cellar of the human body. It's there the rubbish or waste matter from digested food collects for passage out of the body—only the body waste is no mere rubbish, but highly toxic or poisonous waste.

This waste can't stay in the body too long. When it does, self-poisoning literally sets in.

When the colon is normal it acts vigorously through muscular contraction in moving the accumulated waste matter along its way and out of the body. When the colon becomes "inert" or semi-paralyzed, the poisonous waste collects in the colon and cakes itself to the walls of the colon and in the folds and crevices, like so much concrete.

The muscles of the colon then become "cemented" and can only feebly move. More and more waste collects and hardens and soon there is left a passageway for the waste only about the circumference of a lead pencil.

The retention of the waste matter then that follows plays havoc with human health!

The poisons of the waste—the toxins of decay, fermentation and putrefaction—are absorbed by the blood. They are carried to all parts of the body. They poison your brain and nervous system and make you mentally depressed and melancholic. They poison your heart and make you weak and listless. They poison your lungs and make your breath foul. They poison your digestive organs and make you bloated, "belchy" and distressed with gas. They poison your muscles and joints and make you lame and sore. They undermine your whole health, in truth, make you old long before your time and cut years from your life.

**8 Out of 10 Victims!**

A "half dead" colon is literally what ails eight out of ten people today. Our modern mode of living is at fault. It is all out of accord with Nature. We eat too much "prepared" and bland foods. We don't get enough bulk or roughage to get the right response from the colon. We don't get enough vigorous exercise. The result is the colon "lays down on us" and we are "half invalids."

Virtually every one suffers in some degree from a clogged colon, and for this reason virtually every one can stand an occasional thorough "house-cleaning" of the colon.

Laxatives are worse than futile. They only aggravate the situation.

An enema is only 33 1-3% efficient, for the colon is shaped thusly—∩—and an enema reaches only to the first bend.

**A True "Internal Bath"**

The only effective means of thoroughly cleaning out the colon is to get a fluid up there, throughout the whole length of the colon, that will loosen the accumulations from the walls and folds of the colon, break them up and flush them out, leaving the colon clean and wholesome and the muscles free to resume their normal functioning.

In other words, an "internal bath."

This is exactly what you get in the use of the J. B. L. Cascade, the marvelous invention of the eminent Dr. Charles A. Tyrrell, who perfected it to save his own life.

This appliance holds and injects into the colon a flood of pure, warm water, especially treated with a wonderful cleansing tonic.

The fluid fills the entire length of the colon and reaches into every tiny fold and crevice. The action of the especially treated warm water loosens all accumulations from the colon walls and folds and induces a natural muscular action of the colon that drives all the waste out.

There is complete cleansing of the colon with absolutely no pain or discomfort.

**Glorious Relief**

The feeling following a J. B. L. Cascade treatment is one of grateful relief. You just know something beneficial for your health has been done! Taken just before retiring, an "internal bath" with the J. B. L. Cascade sends you to bed with that delightfully relieved feeling that insures a night of sound, restful slumber. And in the morning! You feel like a new person with a new appetite for breakfast and a new zest for life! You fairly radiate "pep" and energy!

If you want to see how fifteen minutes can take fifteen years off your shoulders, just try one "internal bath."

**Send for This Booklet**

Every one with a colon should read this amazing booklet issued by Tyrrell's Hygienic Institute. Every chapter is not pleasant reading, but it's a lesson for every one. "If every person in the world could read this book," says one man, "the average of human life would be increased by 10 years."

This eye-opening booklet is sent free and postpaid upon request. No cost or obligation whatsoever. Simply ask for it in a letter or on a postcard or on the coupon below and address the Tyrrell Hygienic Institute, Dept. 1673, 152 West 65th Street, New York City.

Why look older than you are? Keep the years from showing in your face. Mar-Vel Lifters will take 15 years from your face instantly. Lift one side of your face—see how young you look. Mar-Vel Lifters will do that for you, young always. They feel a little—are invisible—can be worn with bobbed hair. No slipping, held by my patent-d facialment. Mar-Vel Lifters will give better results than surgery lift. I am the originator of this method; used them successfully for 18 years. Beware of imitators. Price $2.00. Profit by my 15 years experience in Plastic Surgery and Deep Peeling. I have treated some of America's best known women. All questions cheerfully answered. Lucille Francis (Maker of Beautiful Faces), 704 West Ninth St., Los Angeles, Calif.

# Coast Guard Staging Pirate Spectacles

FORMERLY the prevention of smuggling was almost the whole of the U. S. Coast Guard's business. Now its duties are many and varied; and only the other day it was called upon to help stage a pirate show at Wilmington, N. C.

On that occasion a 36-foot motor life-boat was built up with a superstructure and fitted out to represent a pirate ship. Though of miniature size, the craft was made as accurate in detail as possible, and at her fore-peak flew the skull and crossbones of the Jolly Roger. She was manned by a crew of picked "cutthroats" of the Coast Guard, in appropriate and picturesque costumes.

A second motor lifeboat was converted into a brig-rigged vessel, and manned by Coast Guardsmen in uniforms of the eighteenth century. She was, in miniature, an accurate copy of the revenue cutter Eagle, which in 1747 helped to defend the Cape Fear River against the advance of a piratical expedition.

Both ships were armed with 6-pounder guns lent by the modern Coast Guard cutter Modoc; and, blazing away at each other with blank charges, they gave much realism to a mock battle which was the principal feature of the recent historical celebration at Wilmington.

**The Coast Guards' Replica of the Buccaneers' Ship, Used in the Marine Spectacle at Wilmington, N. C.**

The Government believes that by encouraging such spectacles, the members of the service, as well as the citizens of the cities thus favored, are benefitted by the research that is necessary to producing a historical pageant. It also serves as a sort of recreation for the personnel, who plunge into the work of converting ships and decorating them according to history with much vigor and pride.

And on such occasions there is always a series of social functions, for which the men are given coveted shore leave. On the occasion of the Wilmington fete there was, of course, a costume ball, following the marine spectacle.

While this branch of the marine service does not specialize in this sort of work, it has been called upon many times to assist in providing spectacular settings for sea fights, as filmed for the motion pictures in the Pacific. A number of great films have Coast Guard service personnel in them, either as invaders or defending forces.

The officials of the Coast Guard believe that such events not only "limber up" the men and afford them recreation, but that it popularizes the service. It has been noted that after these occasions there is always an increase in enlistments. Of late years the Coast Guard has had to do very little recruiting, for since it has had to solve the problems of rum running as well as protecting the coasts, the added adventure has appealed to the type of youth who craves action. The service combines the experience of the navy with the action in home waters, and has fully as many traditions and ethics to preserve as the larger military branches.

# Finds A "Mona Lisa" in Real Life

**Mlle. Andree de Martel, Who, French Critics Declare, Is the Living Prototype of the Famous Painting "Mona Lisa."**

PARIS, March 8.

Her kiss is death; her love, red flame
That scorches like a white-hot brand;
But luring lightning in her eyes
Beckons to that forbidden land
Where blasted lives, like hollow skulls,
Lie whitening on the sun-cut sand.

THUS wrote Gabriele d'Annunzio in the prologue to "La Gioconda," based on Leonardo da Vinci's portrait of Lisa di Anton Maria di Noldo Gherardini, who was the third wife of Francesco di Bartolomeo di Zanobi del Gioconda, and who would have died in the memory of man with the death of her body had not da Vinci painted the picture which has since become recognized as his masterpiece—the famous Mona Lisa.

To Andree de Martel, famous French beauty, has been given the name "Modern Mona Lisa." She is not the first woman who has been given the title. In 1911, when the da Vinci masterpiece was stolen from the Louvre and the attention of the world was focussed on the picture, there sprang up a number of Mona Lisas, so-called from their alleged resemblance to La Gioconda.

Following the recovery of the painting in Florence, Italy, the "Mona Lisa look" made its appearance in the grand tier of the Paris opera. The seductive smile, which is the distinct feature of the painting, became all the rage among the women of society.

It is this same haunting smile which is said to be the chief attraction of Mlle. de Martel. The face of Mona Lisa depicts a pleasure that is seemingly hiding sorrow, and the classic contour of Mlle. de Martel's face, artists say, seems but a thin veil for a lurking sorrow. Her eyes are dark, limpid and sad; the mouth a perfect "Cupid's bow" that seems ever trembling on the verge of a sob.

Certain cynical critics, however, believe that the Mona Lisa look on the face of the French actress is not due to a great hidden sorrow, but to assiduous application of the science of the theatre. Mlle. de Martel, they claim, was told she resembled Mona Lisa, and ever since then she has been practicing the Mona Lisa look, until she has subconsciously made it a part of her. In support of this theory they cite the fact that her temperament is the antithesis of sadness. The lovely lips tremble, true, but when they part they invariably show the dental smile of a Pollyanna.

Thus quite a controversy has been aroused and Mlle. de Martel smiles her haunting, sad smile. Controversy is excellent for women of the theatre. It frequently gets into print, and printers' ink is the stream which bears the heaviest traffic to the box-office.

**Corns**

Special sizes for Callouses and Bunions

***A letter from Miss Adela T. Jones of Olympia, Washington***

Dear Sirs:

Since I have been using Pebeco Tooth Paste, my teeth have become whiter than when I used other brands. I am so delighted!

My teeth were not in such good condition last year. They were taking on a yellow look, which will mar any woman's appearance. The use of Pebeco has enhanced them a hundred per cent.

The constant use of Pebeco will make the dingiest looking teeth turn white, and make it possible to converse with friends without offending them.

*Truly,*

(Signed) Adela Terry Jones

***Keeps the mouth YOUNG!***

© 1928, Lehn & Fink, Inc.

*Thousands are grateful for its salty tang*

**Shining teeth *a fresh sweet mouth***

WHAT a joy it is to know that all day long your mouth is sweet and fresh. Your teeth white and charming.

A great medical authority, fighting unhealthy conditions of the mouth, found that the most common cause of trouble was a slowing up of the mouth fluids which keep the mouth safe from acids.

So he developed the formula of Pebeco with its special salt to keep the fluids healthily active.

At the first touch of Pebeco in the morning, a cool invigorating taste summons the mouth fluids. For hours they bathe the teeth, between the teeth, the whole mouth. The bedtime brushing renews their activity for the night. Your breath stays fresh and sweet, your teeth and gums sound.

Made by Pebeco, Inc., a division of Lehn & Fink Products Company. Sole distributors, Lehn & Fink, Inc., Bloomfield, N. J. Distributed in Canada by Lehn & Fink (Canada) Limited.

# Its loveliness will thrill SMART AMERICA

FOR fifteen years I endeavored to bring more grace, more loveliness to the hands of my clients who, I really believe, are among the most fastidious women in the world.

My only problem was to find a polish that would adorn the nails with beauty.

I had begun to believe that I was looking for a rainbow when I discovered Glazo. First I applied it to my own nails. Imagine my delight when I saw that my fondest hopes for perfection were realized. And my clients were enthusiastic too.

Here at last is the liquid polish that bestows on the nails a lustrous beauty to match the alluring tint of a flawless pearl . . . to make hands fairer.

Its soft patina, its lovely lustre . . . for a whole week its radiant beauty remains undimmed! And it does not crack, peel or dull in spots.

*Beauty in a Twinkling!*

Its ease of application makes Glazo more wonderful. For now you can give your nails the loveliness which distinguishes the hands of my clients.

Of course, you can purchase Glazo at all the better shops and stores. Its price complete with remover is only fifty cents. Also for preserving the beauty of the cuticle there is nothing better than Glazo Cuticle Oil or Glazo Cuticle Cream. I suggest that you use the one you prefer.

*Send For My Booklet*

Just a word from you will bring you my complete little booklet on manicuring which shows you how to keep industrious hands forever lovely—and a Miniature Glazo Manicure. Fill in and mail the coupon with ten cents.

Miss Rosaline Dunn,
[illegible]
Cincinnati, Ohio

Please send me your booklet and the miniature Glazo manicure set, ten cents enclosed.

# Three Days of Terror

By J. S. Fletcher

(Continued from Page 16)

One of the Shapes Moved Forward, Lifted Its Arms, and a Long, Weird Cry Came Across the Waters.

and followed us, at first slowly, then with rapidly increasing speed. I think she sailed much faster than we did; at any rate within a few minutes she approached to within perhaps half a mile of us.

It was then that the thing happened. . . . It is hard to describe, though, what did happen. I was standing at the captain's side, on the bridge, and we were both looking at the yacht. Suddenly I saw her stagger, just as a man staggers who has been shot through the brain. No, perhaps stagger is not the word . . . she shivered; every mast, spar, stay in her, every bit of cordage, the funnels, the ventilators, the shining brass work on her decks, seemed to shiver, as if she were a human being. And then, all of a sudden, she crumpled up, just as a scrap of paper is crumpled up by a fierce flame, and almost before we knew what had happened the yacht had disappeared.

I gripped the captain's arm. He flung my hand off as he leaped to the communication with the engine-room. I heard a bell tinkle, I felt the great ship, already steaming at tremendous speed, leap forward trembling; I felt her quiver and quiver, and quiver, as she tore through the water. I looked at the captain, his face was white and he wiped great beads of sweat from it, and his lips trembled as I heard him say:

"If only we are out of range! If only we are out of range!"

## CHAPTER XXIV.

### Narrative of Miss Beachcroft—IV.

IT was some time before I ventured to address the captain. The warship was now tearing through the water at a terrific speed, and her funnels vomited continuous clouds of smoke which went sailing away across the sea in dense masses. I never saw such looks of anxiety in my life as I saw on the faces of the men by whom I was surrounded. Officers and men alike seemed filled with apprehension since the terrible destruction of the yacht.

They kept their eyes fixed on the Island, the towers of which we could just see, but once or twice they glanced at the captain, and then at the smoke pouring out of the funnel, as if they wondered whether the speed to which he was forcing the ship was not becoming dangerous. But he, never taking his eyes from the Island, neither spoke nor moved until the rose-hued towers of the castle had dipped—then the bell rang again, and the great warship, groaning and straining, lessened her speed and flew forward in smoother fashion.

The captain wiped his forehead and motioned his first officer to his side. They conversed together in low tones for a few moments, and then the captain turned to me and asked me to accompany him to his cabin. We left the bridge together, and I remember that as soon as I began to walk I was conscious of a curiously weak feeling. When we got into his cabin the captain gave me some brandy, and then swallowed a stiff dose of it himself. It was easy to see that he had received a severe shock.

"Miss Beachcroft," he said, "I must talk to you. You told us about the destruction of a large area of your metropolis the other day. Did you witness that event?"

"No," I replied. "But I know exactly what happened—I heard everything about it before I left London."

"From what you heard, did that destruction resemble the destruction of the yacht?" he asked, with a sudden contraction of his fingers. "Ah! I never saw anything like that—I think we are in the presence of the devil!"

"From all that I heard," I made haste to reply, "the area at Charing Cross must have been destroyed in exactly the same fashion. There was no sign, no sound; there was nothing but a sudden disintegration, as one might say, of everything."

"Everything was all crumpled up and became as nothing, eh?" he said.

"Yes."

"Just like the yacht—wood, iron, bones, living men—all destroyed in one touch?"

"Yes," I said once more.

He began to walk up and down, nodding his head, opening and shutting his mouth, and giving other remarkable signs of his astonishment and perturbation.

"But I have never heard of such a thing!" he said, stopping in front of me at last and clapping his hands. "These people, whoever they are, must be in possession of some secret which even the very greatest chemists do not know of! Why, not even lightning would have such an effect. They shoot their power forth, and pouf!—whatever it hits is gone—disappeared! How do we know that they may not yet destroy us? That yacht—Mein Gott!"

"I have an idea," I said. "Is it not possible that the yacht was destroyed by the explosion of a mine charged with this marvelous force? I ask, because it seems to me that as we were in close proximity to the yacht at the time, they might as easily have destroyed us as her. Perhaps that Island is surrounded by mines, and perhaps the yacht crossed one and was——"

"Ah!" he said admiringly. "That was an excellent conception. Mines! Yes—it is most likely. It must have been a mine. Well, but what is to be done now? Here are those three unfortunate men still in the bonds of the devil, and here is that Island filled with—Ach Himmel, what is it filled with? I ought to go on my way—already I have lost several hours."

"I cannot advise you," I said. "Only one thing—carry us all with you wherever you are going."

He was proceeding to assure me with great politeness that he would never desert us until our feet were safely planted on German soil, when an officer hastily entered the cabin with the news that a ship flying the English flag was in sight, steaming at great speed towards us. I rushed out and darted up to the bridge before the two astonished Teutons knew what I was after.

"Why, it's an English man-o'-war!" I exclaimed as the captain came after me. "A first-class cruiser, too—look at the way she's coming along."

I hastened to Evelyn, and finding her much better and greatly cheered by my news of the English man-of-war, took her on deck. The two ships were now within half a mile of each other, signals were being exchanged, and one of the younger officers standing near us with his glasses at his eyes suddenly read out the English ship's name.

"It is the 'Avenger,'" he said, turning to us with a nod.

"The Avenger!" exclaimed Evelyn. "Why, that's Eustace Wynyard's ship—you remember the Avenger, Cynthia?—we went over her at Portsmouth. Don't you remember that Eustace told us all about her—she's a first-class armored cruiser, I don't know how many thousand guns and tons and horse-power and all the rest of it."

"Yes, I remember," I said, "But I shall remember seeing her now much better than seeing her at Portsmouth. Let's see, and isn't Winthrop Leyland her commander?—weren't we introduced to him that day? I have misty recollections of something of that sort."

"Oh, Cynthia! We lunched with him!" said Evelyn, reproachfully. "Why—you asked him why they called him 'Fighting Leyland,' in the Navy."

"Never mind," I said, "I'll ask him again some day. There—they're going to hail each other."

The two great ships now lay motionless, and almost opposite each other. We listened eagerly as the officer vociferated. The young officer who had told us the name of the English man-of-war explained to us what was being said.

"They want to know have we seen or heard of an English vessel called the Malvolio of Hull," he said, after much shouting had gone on. "We reply—yes, we cut her in two last night. . . . They seem

# "OFTEN SO TIRED I could hardly finish the program"

*Philadelphia, Pa.*

"In business all day—then, every evening well into the night, practising with our little orchestra . . . no wonder I began to feel continually tired!

"What sleep I could get didn't seem to do me any good. My weight dropped to 112 pounds, my face lost all its old healthy color.

"As our engagements became more frequent, matters became even worse. I was often so fagged that I wanted to drop out, but as part of the orchestra I was forced to see it through.

"This kept up till, on the suggestion of a young man in the office, I began eating Fleischmann's Yeast. I ate a cake before each meal, and in less than three months my color had come back and my weight was again normal. Today, instead of dreading our engagements I look forward to them with pleasure."

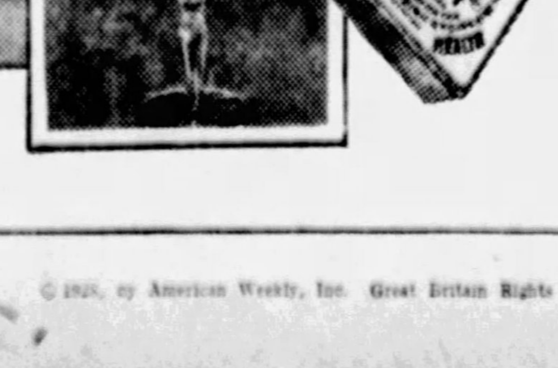
*Edward T. Brown, Jr.*

Mr. Edward T. Brown, Jr., of Philadelphia

AS fresh as the tenderest home-grown vegetables, Fleischmann's Yeast is a food, not a medicine.

Easily, naturally it cleanses the intestines of poisons—softening the intestinal contents and toning up the sluggish muscles. The result is prompter, more complete elimination—improved digestion—a clearer, healthier complexion.

You can get Fleischmann's Yeast at any grocery store. Buy two or three days' supply at a time and keep in any cool, dry place. And write for a free copy of the latest booklet on Yeast in the diet. Address Health Research Dept. S-51, The Fleischmann Company, 701 Washington Street, New York City.



LEFT

Enjoying her new-found health . . . Miss Margaret Berry of Chicago, in action on the basketball floor. Miss Berry writes:

"I used to be all tired out every morning before going to school. I was nervous and irritable, and even resented the fact that I had to eat.

"And I was bothered with a breaking out on my back.

"My friend told me about Fleischmann's Yeast and, though I doubted that it would do me any good, I began to eat it before every meal. In a very short time I began to enjoy my meals again. I now feel better in every way. And my skin is better, too."

*Margaret Berry, Chicago, Ill.*

RIGHT

"I have been a long distance runner for twenty-two years. Work hard all day, then go to the gym and run ten miles or more three times a week.

"When in training for a long run, as for my recent 70-mile endurance test, I eat several cakes of Fleischmann's Yeast every day around mealtime or between meals.

"I have eaten Fleischmann's Yeast regularly for twelve years. I carry a little case that holds three cakes, and I defy anyone to catch me when I haven't got at least one cake on my person. Fleischmann's Yeast tones you up and makes you feel fit."

*Harry Duell, Minneapolis, Minn.*

New health, new zest in life—
this easy way:

Eat three cakes of Fleischmann's Yeast regularly every day, one cake before each meal or between meals. Eat it plain, or dissolved in water (hot or cold) or any other way you like. For stubborn constipation physicians say it is best to drink one cake in a glass of hot water—not scalding—before meals and before going to bed. Train yourself to regular daily habits. Dangerous cathartics will gradually become unnecessary.

# children coax for this *safe* laxative

Gone forever are those nasty medicines that upset the nervous system and stomach. Now when constipation threatens let your children eat a piece of Ex-Lax, the safe, non-habit-forming laxative. It tastes like a fine chocolate bar. It is made from pure chocolate and contains a harmless, tasteless laxative ingredient that mildly and pleasantly relieves constipation and protects precious health. Give Ex-Lax to your children to keep them healthy. Take it yourself. Doctors recommend it both for grown-ups and children. Get Ex-Lax, the chocolated laxative, from your druggist, 10c, 25c and 50c. Also for more obstinate cases he sells Ex-Lax, Fig Flavor, a delicious fruit laxative made from the choicest Smyrna figs, 15c and 35c. In foreign countries, slightly more.

*Forcing children to take castor oil or bitter pills may upset their nervous systems or derange their stomachs. Most physicians agree that it is preferable to give children a palatable laxative. Phenolphthalein, the active ingredient in Ex-Lax, is frequently prescribed by doctors.*

*for constipation*

IT'S THE CANDY!

# The Unlit Lamp By Sinclair Murray

(Continued from Page 14)

content Berbers, and, realizing that further progress now lay in his hands, was enjoying himself exceedingly. There was, too, another matter that moved darkly in his mind, on which account he did not propose to hurry. And he hated all Roumis.

"It is six camels that are needed?"

"For ten days."

Massoud glanced down the straggling line of mud houses fronting the only thoroughfare of El Felja, and saw the other Roumi and his woman and another woman with men's clothes and copper-colored hair. He concluded that with clothes like that she could be only one kind of a woman, but nevertheless, she was beautiful. This group sat beside a pool talking, surrounded by a cluster of staring and naked children. It struck him that these must be rich people—to have come so far for nothing. Rich! He fingered his string of holy beads, and looked furitively at Casgrain.

"It might be that with great effort I could find them—but not till tomorrow. A hundred francs a day for each camel. Never before have I made so small a price."

Casgrain also looked at the pool. Then he began to smoke.

"I will give you fifty, and their food." This after a long deliberate pause.

The headman spread out his polished palms in dismay. "We be poor people in El Felja, and they are very noble beasts. Ninety—and their food."

Casgrain laughed at him. "I am not buying camels, also it is written that there is much poverty outside El Felja. Let it be sixty."

"The camels of which I speak are such that they would die of shame if they heard you. If God wills, I make it eighty, and not a franc less. But let this be a secret between thee and me."

"The sun is too hot for much talk, and the tongue wearies with many words. It might be that I make it seventy, but, doing this, I go in rags for the rest of my life."

"Then to keep thy feet from the stones I make it halfway between eighty and seventy. And their food—and food for the drivers—and a gift at the end of the journey."

Casgrain chuckled. "Tomorrow, before the sun is hot. Let it be thus."

He went off to the others and Massoud sat for a moment deep in thought. His hard, weather-beaten face was not pretty, his eyes were half closed, and his lips lifted a little, showing his rusty teeth. Again he fingered his holy beads and presently signaled to a tall young Arab who lounged a little way off. There ensued a low-voiced conversation, with covert glances at the strangers. Suddenly the young man's eyes rounded, and he made a gesture.

"It is death if this were discovered."

Massoud smiled sardonically. "I speak it into the hollow of your ear, and do not call from the housetops. The part you take is very simple."

"Where are these Nomads?"

It is a tribe of the Igidi desert, and they camp today near the Springs of Dra. That is a matter of but thirty miles and very easy. With my racing camel you can be there in four hours. Go, therefore, quickly, looking not behind, and tell the Kaid what I have told thee. I know not his name, but he is a small man and the point of his nose cut off. There can be no mistake."

"And how many of them shall come?"

"As many as the Kaid may bring. The Roumis have but few arms and on account of the women there will be little fighting. It is well, also, that you describe these women, for, as the Kaid will remember, the Roumis pay great sums to ransom their wives. That is strange, but true. Go therefore, and peace go with you."

* * *

The camels of El Dhid moved disdainfully across the face of the desert, and, perched high on the leading one, the merchant regarded the tawny slopes of the Jebel Ran. Already there could be distinguished the great wrinkle at the foot of which lay the green patch that was El Felja, and on the edge of the green he made out two points of white that he instantly knew to be tents. There are, by nature, no white things in the desert.

He turned, glanced strangely at Rezala, and waved his hand.

"We shall find strangers today. I think they are Roumis."

The dream darted back into the girl's mind, and she became at once prodigiously interested. She looked at Feverill. Did he remember the dream?

"Perhaps there may be women!"

If Feverill was interested she could not tell, but he gave no sign. If these were Christians they would be the first he had seen for months. Then, with an involuntary smile, he reflected that to them he would be like any other Arab. A curious situation, this. He rather liked it.

"I would be so happy to talk to a Negleez woman," added Rezala plaintively.

"The Negleez woman would like it, too," said Feverill.

El Dhid sat up and looked at him very hard. "What do you know of such women? Have they dealings with a panther?"

"I have seen them in many places, and was able to make myself understood," said Feverill calmly.

The father of Rezala did not answer that. He had been watching his prospective son-in-law very closely for the last three days since they left El Harib, and was wondering not a little. No mistake about what his daughter felt and intended, but this man was colder than the Springs of Dra. Never had he heard of any one taking a situation of this kind so calmly. El Dhid's ideas of morals were large and what might be termed loose, but he discovered to his astonishment that El Nemir felt differently about certain things. And he a Berber! It made one a little impatient.

"Do you know the headman of El Felja?" asked Feverill, not caring what the answer might be. The Roumis occupied his mind as completely as that of the girl.

"He is one Massoud, and a brother of Sheitan. He is the son of a liar, grandson to a thief, and uncle of murderers. We have not much in common, Massoud and I."

El Dhid made as though to spit on the earth, but his mouth was too dry.

"How long do we stay here?" said Rezala, straining her eyes at the enlarging patch of green. Massoud was nothing to her.

"To sleep once and water the camels."

"But I would talk with the Negleez women of many things."

"There is no power, not even in El Felja, that can stop women from talking of many things," grinned her father. "Also there are many hours in the night."

She shrugged her shoulders and stared at the tents. The white, wedge-shaped roofs were now very distinct. She thought she could make out figures. It was a great moment for her, and in the excitement she almost forgot about Feverill.

Then, of a sudden, something plucked at her heart, and she was frightened. For the last few days, knowing his secret, she had been more sure of him—ultimately. But these Roumis introduced a new danger. Would the sight and sound of them call him back to his own people? Her heart, so hungry for love, filled with alarm at the thought. But she must show no fear. Striking the tawny shoulder of her camel, she forced him forward beside El Dhid.

"These be the Roumis of whom I told you," she said in a low voice.

He nodded, wrinkling his brows. It was all very strange that they should be here, where to his knowledge, no Roumis had been before, and, like her mother, the girl was doubtless gifted with second sight.

"What is written is written. If it is the will of God that we go together, then we go."

"And if you, my father, talk with Massoud, is it not well to tell him that El Nemir is my man?"

He puzzled over that. "What is it to that son of a dog?"

"It is something to me that all these people know—even the Roumis."

She said no more after that. Presently there could be distinguished four figures beside the tents. They stood watching. And by the large sun helmets they were of a surety Roumis. Then Rezalas voice cut in sharply.

"There is one woman—no—two! The second is dressed like a man!"

El Dhid laughed in his straggling beard. "It is a strange country where women wear the clothing of their husbands. What think you, El Nemir?"

Feverill did not answer. He had pulled his haik over his face till only the bronze forehead and blue-gray eyes were visible. A hundred yards from the tents now! Familiar—two of these figures were familiar! The thing was incredible. Then his heart seemed to miss fire and he recognized the Pollitts. And that other—the woman in man's clothing? All in a rush—he knew!

Nothing happened. That was the incredible part of it. Only the slow regular thump-thud of camels' pads, the swaying lurch of the clumsy shoulders, El Felja lying in the baking sun, Rezala watching him and these strangers with round active eyes, the Pollitts—and his wife! Another man was there, but he didn't matter.

They drew still nearer. Rezala, all eyes, was staring at the two women, creatures dropped from another world into hers. They stared, fascinated at Rezala. They smiled. The girl smiled back, doubly breathless seeing that the woman in man's clothes had hair like gold. This woman looked straight into the eyes of El Nemir, and back at Rezala. Her real interest was there.

All this while a dozen long camel strides brought them up—abreast—and past. Feverill felt as though he had been hit in the face. He could not forbear to glance back. Vere had grasped Mrs. Pollitt's arm and was talking excitedly. They both had turned to watch these newcomers from out of the desert. Pollitt was laughing while the other man watched Vere, saying nothing. Feverill's wife! The wife of El Nemir, the panther! At that Feverill gave a chuckle deep in his throat. An ugly sound.

He jerked his gaze away, and

## *A fire-fighter is as good as his muscles*

## 7 out of 10 fire-fighters questioned use this to avoid muscle lameness

A FIRE-FIGHTER has to keep his muscles always strong and supple. He must be able to climb and spring with the sureness and swiftness of a cat—to perform almost superhuman feats of strength.

And yet think of the conditions under which he works! Out in all kinds of weather, drenched for hours with the spray from the big hose, he is constantly exposed to the chilling that causes stiffness of the muscles, rheumatism, chest congestions. And his heavy muscular strains—the risks he takes—cannot but bring a certain amount of lameness and numerous minor injuries.

We went right to the fire fighters themselves and asked them how they ward off the results of chilling—what they use for lameness, stiffness, congestions, injuries.

Out of hundreds questioned, 7 out of 10 said they use Sloan's.

*All workers who face exposure and strain praise it*

In every walk of life where men and women work hard—face exposure—run the risk of accidents—you'll find Sloan's Liniment the standby. It saves them hours of pain, days of lost time.

Read this statement from a lifeguard at Coney Island.

"I have been a lifeguard for the City of New York for many years, and sometimes after being out on the beach all day in rainy weather, I come home aching all over with muscular rheumatism. But as soon as I apply Sloan's Liniment the pain goes away. I also find it good for a rub down after a long swim or a rescue, and I always carry Sloan's Liniment in my first-aid kit." *Walter C. Menyhart, 918 Gravesend Ave., Brooklyn, N. Y.*

And this from a policeman: "I have had Sloan's Liniment give me great relief when all others fail. I recommend Sloan's for all pains in the back and legs. I do a lot of walking and am exposed to all kinds of weather." *W. R. Christy, 1933 Master St., Philadelphia, Pa.*

*Sloan's is sure—quick*

What makes Sloan's Liniment relieve pain where all other liniments fail?

Simply because Sloan's works by stirring up the body's own powers to heal itself. It doesn't just deaden the pain. It gets at the cause. It stirs up the circulation—breaks congestion—clears out germs and poisons. The pain stops because the trouble is gone. You can get a bottle that will last a long time for 35 cents at any druggist's. Use it for:

*Rheumatism* — *Lame muscles*
*Sciatica* — *Stiff neck*
*Lumbago* — *Colds and congestions*
*Neuralgia*
*Sprains and bruises*

*The company doctor of one of the biggest industries of the country says of Sloan's: "People whose work exposes them to strain or to damp and cold usually suffer from a good deal of muscular soreness. We find that Sloan's gives them quick, positive relief."*

*One of the fire-fighters questioned. 7 out of 10 told us that they use Sloan's to protect them from exposure and strain*

# SLOAN'S

*Endorsed universally by those who do the world's hard work*

## New Hair Style from New York

"I've so little time to myself," says Mildred Warshaw, lovely New York City girl who lives at 1353 42nd Street, Brooklyn. "That's why it's been such a help to me to learn the new way so many of my girl friends are doing their hair. Now I just put a few dashes of Danderine on my brush every time I use it. It makes my hair easy to dress and holds it in place. All I need is one shampoo a month, now. It stopped my dandruff, and my hair is always gleaming and silky, instead of looking dull and stringy like it did before I started using Danderine."

Danderine does more to bring out the natural color, the gleam and lustre of your hair, than any shampoo or treatment. It removes all the dust, grime and oily film from your hair—tones and refreshes your scalp—keeps dandruff away. All drug stores have the 35c bottles. Lovely hair and a healthy scalp for a few cents!

# DANDERINE

*"The One Minute Hair Beautifier"*

## For a Weak Back

Put an Allcock's Plaster on the weak spot. It will not only remove any pain, but will strengthen the part to which it is applied, and restore energy, and make life a pleasure instead of a burden.

*Always Ask for*

**ALLCOCK'S PLASTER**

*A Remedy of 80 Years' Standing*

VERA REYNOLDS, *Lovely young Pathe DeMille star appearing recently in "Corporal Kate," "The Main Event", and "Walking Back".*

# My Most Precious *Beauty Secret*

*by Vera Reynolds*

THE glorious youthful charm and beauty—the tireless vivacity and dash of lovely Vera Reynolds! What would you give to have them, and for keeps? She tells the intimate secret of them with engaging frankness, and you may have her beauty method to use in your own home every day, by simply mailing the coupon below.

Learn from Miss Reynolds the secret of complete relaxation. Learn how, no matter how strenuous your life and work, how wearing and aging, you may easily retain the ever attractive high spirits and freshness of your teens, while your firm yet rounded and satiny skin shows never a line or wrinkle.

And Miss Reynolds' secret is but one of *twenty*, all given in what is probably one of the most unique and valuable little books ever printed, a book of beauty secrets written by 20 of the most noted and beautiful women of the screen—a book which you may have for the small cost of packing and postage, if you send the coupon.

*Write Today for This Amazing Book*

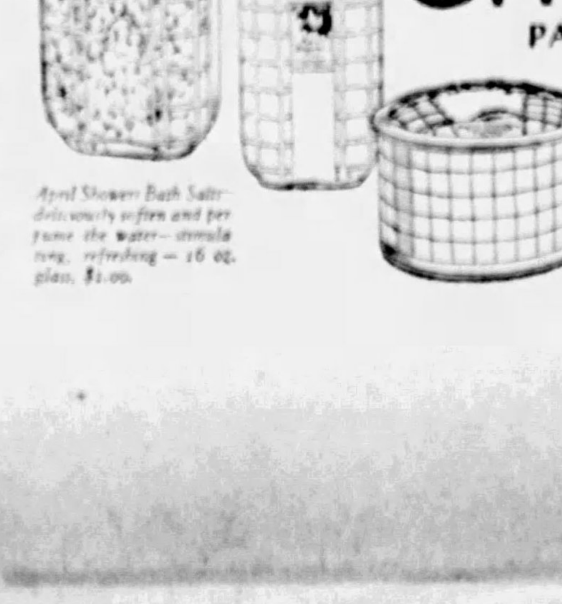
If you spent thousands of dollars with the world's greatest beauty specialists, you could hardly obtain more valuable information and advice than is contained in this one priceless little volume. Remember, it is written by women who *know*—women who *must* know, because they must retain their unique loveliness and fascination, or their entire career is over.

Learn how one gorgeous star attains that glorious aureole of hair—how another who is far, far past her teens preserves the perfect, rose-petal skin and lovely rounded contour of a young girl—how a third has achieved her lovely arms and hands—the secret of youthful slenderness without a hint of scrawniness—a dozen little tricks of make-up known only to the greatest experts in make-up.

You'll find it all in this amazing book. Attractively bound and profusely illustrated, if sold through the usual channels it would probably cost a dollar or more. But Cheramy offers it to you now, together with a generous container of the lovely April Showers Talc, for only 25c (to cover cost of mailing).

Rightly called the Perfume of Youth, April Showers is gay, laughing, youthful as the Springtime—yet smartly sophisticated, a favorite with the Parisienne. To know the exquisite April Showers toiletries is to adopt them as your own. Frankly, that is why we would like to send you the talc.

But you must write at once if you want the book "Precious Beauty Secrets". Our edition is limited and first come first served. Simply mail the coupon with 25c to cover packing and mailing. Send today to make sure of getting your copy.



*April Showers Talcum Powder—soft, smooth, fine ... fragrant ... metal box, 25c, glass jar with sifter top, 50c*

*April Showers Bath Salts—deliciously soften and perfume the water—stimulating, refreshing—16 oz. glass, $1.00.*

*April Showers Dusting Powder—caressing soft, soothing, cooling. Protective, absorbing body moisture. Metal can, $1.25.*

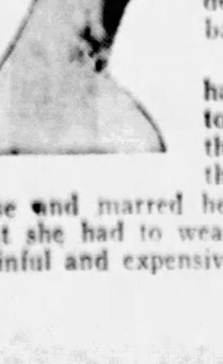
# Many Here Get Rid of Superfluous Hair by Novel French Method

**Clear Arms, Legs and Neck, Quickly and Safely**

By following the advice of her aunt, who is employed in a well known beauty parlor, Miss Gloria Johnson, like hundreds of local women, discovered how quickly, pleasantly and inexpensively superfluous hair can now be removed from the arms, legs, under-arms and back of neck.



Miss Johnson had tried vainly to get rid of hair that showed through her silk hose and marred her forearms so that she had to wear long sleeves. Painful and expensive methods had irritated her skin without removing the hair.

Her aunt's advice proved a blessing! Applying X-Bazin Cream like a cold cream, she left it on only five minutes and then washed it off like soap. Every trace of unwanted hair had gone, and she found her skin soft, clean, smooth as a child's. Now, she reports, she wears evening gowns and sheer hose without hesitation.

Thousands of women have followed the advice of beauty doctors and used X-BAZIN cream, made after the formula of Dr. Xavier Bazin, the famous French specialist. A generous tube with certified directions may be had of your druggist or toilet goods dealer for 50c. Trial 10c tubes at the better 5c and 10c Stores.

**X-BAZIN CREAM**

**Removes Superfluous Hair**

**Painless, Inexpensive and Quick**

*"Put on Like Cold Cream, Wash off Like Soap."*

# The Unlit Lamp By Sinclair Murray

(Continued from Page 20)

became aware of Rezala's eyes, searching him, large, anxious, pleading, asking him a thousand questions. This thing—all of it—was written. It absorbed her as had nothing else in her whole life—and she feared it. Innumerable points she wanted to know, because, by instinct, she felt that these were his sort of people. He was like that when not a Berber. A sort of god!

But she did not dare to speak, yet, and El Dhid, swallowing his own curiosity, led a little nearer the village. Dismounting, he made a sign to his servants to pitch the shelter.

The camels, at a tapping on their huge bony knees, groaned mightily and came complaining to the earth. Silent men in white appeared from the mud-walled houses. The naked children glanced at the new arrivals and turned back to that which was more wonderful by far. Then arose the Bedouin camp of El Dhid a stone's throw from the white tents of the Pollitts of Bryanston Square.

The cycle was nearly closed, nearly complete, but not quite. Thirty miles to the south, where the ice-cold Springs of Dra leap to sunlight from beneath the feet of the Jebel Ban, a small, pock-marked man, the end of whose nose was missing, sat in the middle of a circle of wild-eyed Nomads. He talked in the dialect of Igidi, and his words lit a quick fire in every untamed breast.

## CHAPTER XVII.

THE sun, dipping behind the red shoulders of the Jebel Ban, flung league-long shadows over the hot face of the desert. The shimmer in the air cooled to a still clarity, so that to look eastward was to look out over a solidified sea whose dwindling perspective was amazingly sharp. There was no wind, and from the camp of the Roumis a threadlike pencil of grey smoke climbed skyward, its tenuous membrane dissolving in the motionless atmosphere.

Vere and Mrs. Pollitt, increasingly intrigued with the present situation, were watching Rezala who sat alone at the door of her father's tent, and, consumed with curiosity, they called Casgrain to aid.

"We want to talk to that girl," announced Mrs. Pollitt. "She looks perfectly fascinating, but she won't understand a word. Can't you introduce us?"

He nodded, having known at once by Rezala's unveiled face that it would be permitted to speak to her, and went over. Rezala, missing nothing of this, felt very excited.

"If it is your wish, the Negleez ladies would talk with you," he said, smiling.

She immediately smiled back. She liked this man's face, liked the look in his eyes, and he spoke her own tongue as though born to it. Heart fluttering, she followed him. The other two, uncertain whether to shake hands, made room for her between them.

Rezala sat down as a leaf sinks to the ground. These women had short hair, while her own fell in one long thick braid. It was very strange. The skin at their necks was very white, and her own a pale biscuit brown. She was attracted by the expression of the older, and secretly feared lest the blue eyes and gold hair of the other woman have their effect on El Nemir. But perhaps this was the kind from which, by the mercy of Providence, he was free.

There ensued a conversation with Casgrain as go-between. Rezala began by timidly trying her English, but was too nervous to get more than a few broken words. Then she called in assistance. She learned from the older woman that the other Roumi was her husband, and the interpreter was not husband to the other. This made it more important than ever to fortify her own position, and just at this moment Feverill came out of the mud-walled house of Massoud, and moved toward them.

Vere turned and stared at him. His haik still revealed only his eyes, but there was something about his figure and walk that gave her an extraordinary impression. Ridiculous! He stood, a white-shrouded Arab from the wilderness, only a few feet away.

"Ask who he is," she said quickly.

"I would like to talk to him. Does he speak English or French?"

Rezala, with a sharp glance at the man's impassive face, shook her head energetically. "Tell her that he understands not English." She was thoroughly frightened now.

The man's eye looked faintly amused, and Vere knew that he had understood something. She felt baffled and disappointed.

"Good day," she said, determined to draw out some response.

He made a grave salute, the same as she had seen Massoud give Casgrain. From what little she could discern of his face, he looked intelligent. He was tall and straight, his skin a copper bronze, his naked feet thrust into thick-soled sandals of soft leather. Then, because he could not possibly understand, she put a question to Casgrain.

"Are the eyes of Arabs often as gray as that?"

"Yes, but only among the Berbers. It's nothing unusual. Almost English eyes, aren't they? Do you want to talk to him? He's going to marry this girl."

She glanced at Rezala, who was staring at the man, her whole soul in her eyes. Nothing could have been more eloquent, and here, if anywhere, thought Vere, was wild love. But the man, for his part, signaled nothing back.

"Tell him, please, that I hope they'll both be very happy."

Casgrain put this into faultless and flowery Arabic, adorning it with every possible ancient compliment to the girl's beauty and the man's strength. The eyes of El Nemir looked remotely amused, and he made the same salute as before. Rezala was infinitely relieved, it being quite evident now that this girl was to be married to the Roumi with the short black beard.

"I hope the woman with the gold hair will be happy with you, too," put in Rezala, not to be outdone in civility.

Casgrain got rather red, then laughed, and Vere made him explain. He did this rather unwillingly, conscious that the Arab was regarding him with a cool, hard stare. It was the stare with which men weigh each other, finally and dispassionately. But he did not speak. He made a sign to Rezala, and the two moved off to the tent of El Dhid.

El Dhid, advancing, salaamed, then asked in a very composed voice if he might have a few words with the Roumi who spoke Arabic. He had come away from a purely formal visit to Massoud not over comfortable. No definite reason that he could pitch on for this, but, apart from the matter of Rezala's dream he rather felt that for the immediate present it might be well to increase the size of the party, if possible.

Perhaps it was the fleeting gleam he thought he discerned in Massoud's eye when divulging the information that the Roumis were travelling north next day. El Nemir was beside him at the time, but said nothing. Or perhaps it was because El Dhid had recently heard in El Harib that the Touareg Nomads were coming nearer the Jebel Ban this year than ever before.

He really could not quite decide what it was. He knew perfectly well that these wild tribes would never bother him, but could imagine their licking up a party like those Roumis, and holding them for ransom at a very high price. But, probably, the real root of his feeling was Massoud's unspeakable reputation.

Thus, spurred by he knew not what, he opened negotiations with Casgrain by saying who and what he himself was, where he abode, the name of his daughter and that of her future husband.

"My lord travels east with his friends tomorrow?" he asked when that was all clear.

"Yes. They would see something of the desert, and we make for Beni Abbes."

"By way of El Harib?" asked the old man thoughtfully.

"That was our thought."

"If it is the will of God, I return shortly to El Harib myself. But first we go a little north by the Jebel Ban, then east. Why do you not come with us? Is there something that calls you to Beni Abbes?"

He was so earnest that Casgrain looked at him thoughtfully.

"Only the wish of women."

"It is written that the wish of a woman changes like the wind through a tamarisk bush. Would you not come with us, then go North by the caravan route from Timbuktu as far as Kedima? Thence the solid road leads on to Fez."

"It is in your mind that this is safer?"

El Dhid shrugged his shoulders. "Between El Harib and Beni-Abbes is a poor country for the Roumi."

"Nomads!" The word came sharply.

"It may be Nomads. Those there are that journeyed that way a year ago, and have not arrived yet. Nor have they returned. Also, if you come to El Harib it is likely that you can join a caravan of traders going to Fez. These people are rough, but very honest, also there is no danger. And in El Harib my house shall be yours."

Casgrain, admitting to being puzzled, bowed his thanks. It evidently behooved him to be very careful. He could not imagine any tribe of Nomads attacking El Dhid, for Arab did not rob Arab in wholesale fashion like this. It was always the Roumi they sought. The oasis home of El Dhid! That should please everyone. Then he began to wonder about Massoud.

"This headman of El Felja—is he honest? Tell me for my own ear and none other."

El Dhid cleared his throat and just managed to spit this time.

"Were I to sleep beside Massoud I would swallow my purse before I closed my eyes. But it is safe enough to have camels from him. They at least are honest."

Casgrain made up his mind at once. He had his own reasons for wanting this desert journey, and the new proposal was doubly attractive. It did not really matter where they went for the next week or so, and the presence of the girl and her lover introduced an element that appealed to him enormously. El Dhid looked honest, was obviously an established man, and traveled like one who could afford to travel.

"I will talk about this matter with the others, saying nothing of that which lies between me and thee, and give you the word afterwards. But we cannot go before noon on the morrow."

"What is an hour or a day in the years of a man's life? Tell me at sunrise, and peace be with you."

## CHAPTER XVIII.

EL FELJA is but a small green patch in an uncharted wilderness of tawny rock, arid soil and shifting sand. It ends almost where it begins, and the last of its dwindling pools delimits the minute area where vegetation of any kind may survive. A hundred feet further is the edge of the desert.

Here sat Michael Feverill when the sun descended on the most extraordinary day of his life. He did not attempt to find any explanation, and accepted the situation with fatalistic irony. This was Africa. In one tent was his wife, in the other the girl who expected him to marry her.

His thoughts went back—back. He was aware that these last months of wandering had had a certain definite effect, and he was devoid of the acid that formerly ate into his heart. In a rather unexpected way he regarded himself less of a man with a grudge against the world. The healing touch of the desert had done that much for him—he who had determined to be free of women. And now——!

What did one do in a case like this? Should he cast aside his Berber cloak? He smiled to remember how fatally well it had served him. What would Vere do then—Vere who had followed all unconsciously to this mud-walled meeting place? But if he did announce himself, what else must he do? He could not appear as the husband of Vere. No obligations on either side!

That brought in Casgrain. He had learned in the village who Casgrain was, where he came from and what he did, the Berbers in Pollitt's party having been very ready to talk. But there was more than that. In Casgrain he saw a man in love with Vere. Why not? This wife of his, this disturbing and hitherto uncapturable woman, was enough to rouse love in any man—any normal man. And, reflected Feverill, he himself had not been normal last June. So why should not this farce be ended, and Casgrain marry her?

He winced a little at that and promptly jeered at himself for wincing. Jealous!—was he getting jealous? Absurd! The girl was his, formally and temporarily, but not to take. Suppose he were to smash the mutual agreement, and take her? At this thought the desert seemed to ask what manner of man he was to hesitate—or whether he was a man at all.

Then Rezala, warm, passionate, hungry for love—Rezala in contrast with this wife of his—Rezala who at a crook of the finger would follow him, exultant, to the heart of the sands of Igidi. Had Vere something of that desert fire, he would not hesitate. Perhaps she had—for Casgrain. And Casgrain was on fire. One could see that.

He imagined himself the husband of Rezala. Rezala in his arms. There would be a year, perhaps two, even three, before the flame of that union died down. Then what? He began to grope, trying to picture the rest of his life after that. When Rezala had given all she had to give—when the inevitable calm came before the equally inevitable storm—what then?

In her own way she was complete, alluring, almost destructive. She was like the sirocco with its fiery breath. But what had the centuries done for this lovely illiterate? Ideas, aspirations, associations, none of these were hers, this flower of the desert, this daughter of the leaning palm. But he, Feverill, in spite of his alien soul, was linked, every fibre of him, with

# LOVELY MRS RICHARD PORTER DAVIDSON

*of Washington..*

GRAND DAUGHTER OF MARK HANNA

*Mrs. Davidson's unusual beauty always finds its perfect setting in an exquisite taste and smartness in dress. The contrast of this smartly tailored trotteur and her own stirring beauty is characteristic of the lovely subtle effects she achieves*

*Large dark eyes, wide-set beneath delicately arched brows, and a smooth, creamy complexion make Mrs. Davidson one of the most beautiful women in Washington society. This delightful portrait is by the famous English artist, Olive Snell, who exhibits her delightful work in New York each year.*

*In this white satin gown by Vionnet, the warm rich tones of Mrs. Davidson's lovely skin and hair are happily accented. The daughter of a famous beauty, her radiant loveliness richly carries on the traditional beauty of the women of her family.*

MRS. RICHARD PORTER DAVIDSON—daughter of the renowned beauty Daisy Gordon of Cleveland and granddaughter of Mark Hanna, the famous "Senator from Ohio," is young and beautiful.

With chestnut-tinted hair and great brown eyes, she is a glowing figure in the more exclusive salons of the Capital and the brilliant international assemblies for which Washington is famed.

A strictly modern young woman with that urge toward achievement which is characteristic of women today, Mrs. Davidson has accepted the challenge of business and has also proven her ability in this field.

But in spite of varied interests and days crowded with action, Mrs. Davidson's beauty is as fresh as the day she came out—for she learned long since, the value of Pond's Two Creams for the care and protection of her lovely skin.

"OF course Pond's Creams aren't new to me," she says, "I've adored them for years—their matchless snowy texture, their intriguing fragrance, the prompt magic of their effect upon the skin!

"Delightful, too, are the new Pond's Skin Freshener and Tissues—to complete the perfect method of keeping the skin young!"

*On Mrs. Davidson's dressing table—exquisite in old rose and pale green taffeta—stand two slender lamps of delicate green glass. And, reflecting the lamp's soft rays, jade green jars of Pond's Two Creams and the tonic Skin Freshener.*

To guard the skin of youth, or to restore its fragile beauty, use these four enchanting preparations.

FIRST, as always, cleanse your skin with Pond's light and fragrant Cold Cream.

THEN—with Pond's Cleansing Tissues, softer than fine old linen, wipe away gently and completely every trace of oil and dust.

NEXT—tone and firm the skin with Pond's Skin Freshener. It closes the pores, leaves your skin refreshed and fine, without a trace of oiliness.

LAST—for a final touch of loveliness apply the merest breath of Pond's Vanishing Cream.

Do this during the day. And always before retiring cleanse and refresh your skin once more with the Cold Cream and Freshener.

Try these delicious Pond's preparations—know the extra freshening and invigoration they bring. Send today for the complete equipment, enough for a week's exquisite care of your skin.

*A New Offer:* Trial sizes of Pond's new Skin Freshener and Cleansing Tissues—and the Two famous Creams! **Send this coupon and 10¢.**

(Continued from Page 21)

tradition. The Crusaders lying with crossed feet in the marble peace of a Dorset chancel claimed him as their son. He was, in a way, immortal. Was Rezala immortal in this fashion?

Torn thus asunder by arrow-headed thoughts, the body of Feverill stirred, complained, revolted. He had to be honest with himself. He wanted both women and was worthy of neither. But Casgrain looked worthy. One had to admit that. Could he, Michael Feverill, therefore go to his wife—now—and say, "I was wrong, and a fool. I want you. Come with me."

"El Nemir!"

He turned. It was Rezala, coming toward him from the low-pitched tent of El Dhid; Rezala with love in her eyes. She sat close to him, putting the warmth of her shoulder against his. It was his arms she wanted.

She did not speak for a moment and he, still ridden by a multitude of self questions, blamed himself for being so cool. She at least was honest, and he was not.

"Today, when I talked with the Roumis, did I say what was right?" she asked after a long silence.

"Yes, that was quite right."

"You did not want them to know that you were a Negicez? I hope you did not."

"No, there was no reason for it," he said, moved by sudden tenderness.

"And the one with gold hair—did you think her very beautiful?" She had been struggling with this for hours.

"Not more than yourself, Rezala."

That pleased her and she sent him a long look as though to tell him a thousand things and make a thousand promises. In the half light she was more than ever lovely, her dark eyes seeming to have captured a tender and inner illumination from the afterglow that was reflected with a subdued lucency.

Her flowerlike face, as seen in this semi-obscurity, was utterly appealing. Under her cloak the perfectly-modelled arms were bare to the shoulder. Never had the African night brought to a man a woman of more allure than hers.

"Are you sure," she asked in a low voice, "that after we are married you will not want to do what I cannot do?"

She put this timidly, profoundly aware of the difference between herself and the woman with gold hair—that visitor from an outer world, very formidable and mysterious to this daughter of the desert. She could only face it if she were completely loved. And if she lost the man she loved, she would kill herself.

Unreality rose like a cloud behind the flame of desire, and Feverill found it difficult to answer. He might want, would almost certainly want to do countless things that she couldn't. Why did she add to his uncertainties like this? A few days ago he had pictured her in the cities of Europe, but now the clear eyes of another woman, very near him at this moment, proclaimed that this was out of the question. That was her place, not Rezala's. And to lift Rezala out of Africa, to the north, was to transplant a passion flower to Iceland.

"Where do you want to live?"

He wondered greatly what she would say.

Wise beyond her years, she surprised him.

"Not far from the desert, and in some place where strangers would pass. I cannot be like them, I understand this, but you can teach me more English and I would talk with them."

"You would not like to go across the sea?"

"I might lose you there. Then I would die."

He began to be afraid of what he had created. Or had he created it? Was it not Africa that flung their souls together and watched them wear themselves out with hope and passion, fear and loneliness, the playthings of some vast and ironical scheme?

She went on talking in the same low voice, her shoulder still against his, talking like an artless child, blending in herself a terrific appeal and an abyss of innocent ignorance. It seemed now that a man whose lot was cast here might do no better than take her and mould her to some form of modern life in the wilderness, because here she could contribute much. But not elsewhere.

Thus, thought Feverill, the body of him responding to her touch, the mind of him questioning the fundamentals of existence as never before. One woman had betrayed him. Another used him, asking all and offering nothing. This third one asked nothing and was ready to give all. Which of them was the truest woman? Only one answer to that, but the soul of the man remained unconvinced.

"Look!" whispered Rezala.

Two figures were visible, moving slowly. He recognized Vere and Casgrain, and for a second felt like roaring with sardonic laughter. His wife being made love to under his own eyes! Here was a sight for the gods. And surely the thing that was Africa—the old, unnameable, ruthless spirit of her—would be content this night. That spirit seemed to take form till it became a vast shrouded opaqueness leaning gigantic arms on the Jebel Ban and looking down with a cosmic indifference at these all too earnest pigmies. What did they matter?

"I think they love each other very much." Rezala's voice was soft. Now, if ever, she would make this man her own.

He replied so absently that, offended and hurt, she drew away a little. He did not seem to notice this, having, in truth, arrived suddenly at one of the crossroads of life. There came to him something that, afterwards, he could only believe was a breath of immortality. With it a tremendous conviction that he had been put into the world for a purpose—and the purpose was not what he contemplated now. For the first time in his whole existence he meant something to himself.

What this was he could not yet tell. As far as he understood at the moment, the mysterious instructions—sent from somewhere—were that he was to wait. He was to hold his essential self in reserve, not wasting it in unprofitable passions, saving body and brain for a test that was not far off, and trusting in destiny as he never had trusted before.

The result of this was that he watched the other two with an extraordinary mixture of feelings; and when Rezala, perceiving that he was not thinking of her, left him almost in tears, he made no attempt to follow.

# Three Days of Terror

By J. S. Fletcher

(Continued from Page 18)

much astonished—they ask if we have any survivors on board. . . . We reply, yes, we have Honorable Mr. Wynyard, Mr. Graham, Mr. Gotto, all very sick; two ladies also. . . . They say right-oh, their commander is coming aboard."

"Oh, tell them to bring their doctor!" I exclaimed.

We stood at the side while the gig of the Avenger put off and was rapidly pulled across to us. As she came near we recognized her commander, and then Eustace Wynyard, and the latter caught sight of Evelyn and waved his hand joyfully to her. Both men, on gaining the deck of the President Ebert, lost little time in making ceremonious greeting to her captain and officers, after which they rushed at us as if they were going to hug us.

"By Jove, Miss Beachcroft!" said Commander Leyland, as he vigorously shook my hand, "I am glad to find you alive and well. I am all in a fog—I don't know what it all means. I was sent to find the Malvolio, get Wynyard off her, find out from him where a certain M. de Reineville had carried you, Miss Wynyard, and Graham to, and bring you all away. Here you all are, strangely enough."

"It is not so strange," I said. "Suppose you ask the captain to take us all into his cabin and let us get things put straight."

"That's a clever idea," he said, and in a few minutes Evelyn and I, Leyland and Eustace, the German captain and his first officer, were all in the conclave. Leyland became businesslike on the instant.

"This is how I happen to be here," he said. "On the morning of the surrender to the Dictators—"

"What!" Evelyn and I exclaimed simultaneously. "Surrender!"

Leyland hung his head. I think he blushed.

"It's true," he said. "The Government surrendered the morning after you left. Well, never mind—that morning, or early in the afternoon, somebody at the Treasury found a curious document in Mr. Wynyard's private room. It appeared to have been written by the Chancellor himself early that morning. It was rather vague, but it said that he believed himself to have fallen into the power of the Dictators, and that before that power seized upon him altogether, he wished to ask his fellow colleagues to see to his ward, Miss Beachcroft, and his nephew. He added that as for himself he was being drawn away. Well, there was a fine to-do. The wires were set working in all directions.

They found that Miss Wynyard, Miss Beachcroft, and Mr. Graham had sailed from Gravesend in M. de Reineville's yacht early in the morning, and that M. de Reineville himself, with Mr. Wynyard and another companion, had chartered one of the fastest Wilson liners from Hull and left that port at half-past one in the afternoon. All this was found out within a few hours; in fact there was word to stop the Malvolio received at Hull within two hours of her sailing. The Avenger was at the Nore and was selected as the fastest ship handy, and before night we were off. I don't know whether I have made it all clear," concluded Leyland, looking at the Germans, "but here we are, you know, and now I'd like to know what's happened."

I believe that Leyland and Eustace Wynyard thought they were having bad dreams as I told them what had happened. Then they thought we were all mad, or either mad or lying.

Leyland rose and asked the German captain to accompany him to the sick men in the doctor's charge. They went away and came back with pale faces and an air of distaste of what they had seen, and they sat down again, and for a while said nothing.

"Well," said the German captain, at last, "you have seen and heard."

"More than I ever wished to hear or see," answered Leyland with a shudder.

Then he looked at me. "Miss Beachcroft," he said, "you, and Miss Wynyard had better withdraw. We are going to settle matters."

We left them with their chairs and heads drawn close together, and we went on deck and waited for half an hour wondering what they would do. At last the two Englishmen came out, both walking with an alert, confident step; with them came the German captain, smiling joyously. He caught sight of me and waved his hand.

"Ah!" he said. "We have decided to blow that Island into the Sea."

It was, I think, about noon when we came in sight of the Island again, and reduced our speed to a gentle motion. Curiosity began to get strong in me; I felt that I must be on deck where I could see.

I know nothing whatever about nautical warfare or about big guns, and I cannot write in technical language about what followed. All that I know is that for about an hour the two warships poured such a storm of shot upon that Island as perhaps no single limited area ever received in the same space of time.

We were so far away that it was impossible to see exactly how things went on, but after the firing had ceased for a time and the smoke of the big guns had cleared off, we saw that the castle of rosy-hued stone or marble had been leveled to the ground and that flames were bursting out from various parts of the Island. Some exchange of signals went on between the two warships, and after a time Commander Leyland once more came aboard the President Ebert. He smiled when he found me in the captain's conning-tower. But I did not smile when I heard what it was that he had come to propose. He actually wanted to form a joint volunteer party of English and Germans, to go ashore and examine the Island.

**To Be Concluded Next Sunday.**

# Mlle. Dalbane, the "Death Flower," Whose Lovers All Meet Tragic Ends

(Continued from Double Page)

triple row of chalky cubes of heroin, fall on the carpet.

When the crestfallen detective reported his failure and discomfiture to Bacquart, the criminologist decided on an original move. A less accomplished psychologist would have changed his method of attack, would have multiplied ingenious schemes to trap Marthe Dalbane into the necessary signature of acceptance—and would have found that quick-thinking lady as wary of the last one as of the first.

Bacquart put the case to the crestfallen detective:

"Do you think that 'lightning never strikes twice in the same place'?"

The detective admitted that he had heard that such was the case.

"Well, learn that the reverse is true," chuckled Bacquart. "I say that lightning always strikes twice in the same place. The proof——"

The next afternoon at the same hour in the same disguise and with another Marseilles packet in his hand, the same detective rang at Mlle. Dalbane's doorbell.

This time the clever Marthe accepted the packet without hesitation. As she dipped her pen in ink for the signature she turned to the detective and laughed:

"Yesterday—you'll never guess what I suspected—I thought you were a detective!"

"You know that's just what I thought," agreed the detective, "and when they gave me another package loosing just the same and from the same place, I was sure you wouldn't take it from me. I was thinking of getting someone else to deliver it."

"No," said Marthe, as she signed the receipt. "When you came back a second time, I knew it must be all right, because no detective would be so stupid as to try the same thing twice."

"You are right," admitted the messenger, "I certainly would never have done it and had no idea it would work, but nevertheless, I am a detective and you must come with me."

A little later she was in the presence of her old adversary again, Judge Bacquart. He spoke rather kindly, explaining that she would be tried in a few weeks and probably convicted. As a first offender she would receive only a small fine, which she could afford, and he would promise her something that would do her much good. He would see to it that she took the drug cure.

The "Death Flower" was then set free, as is the custom in such cases, with only a warning that she must not leave Paris until after the trial. Marthe went home in despair and her sharp eye told her that she was being shadowed. She had no drugs, dared not hunt for any nor have them sent to her, and, worst of all, she was faced with that terror of terrors, the cure. Yet only a few blocks away was a famous surgeon who had deeply admired her, who probably still admired her, and in his hospital was plenty of drugs. Marthe began to think busily and bitterly.

At breakfast next morning, Judge Bacquart was shocked to read in his morning paper that the lovely "Death Flower," Marthe Dalbane, had attempted suicide by swallowing veronal tablets. It was thought likely she would die. But reading the next paragraph the judge laughed out loud.

"Again that woman thinks faster than I do," he said. "She thinks while I sleep."

The paper stated that Mlle. Dalbane had been taken to Dr. Martel's hospital and that the eminent surgeon had been unsparing in his efforts to save her.

**Next week the final chapter from the curiously fatal career of Marthe Dalbane, the mysterious French beauty known as the "Death Flower."**

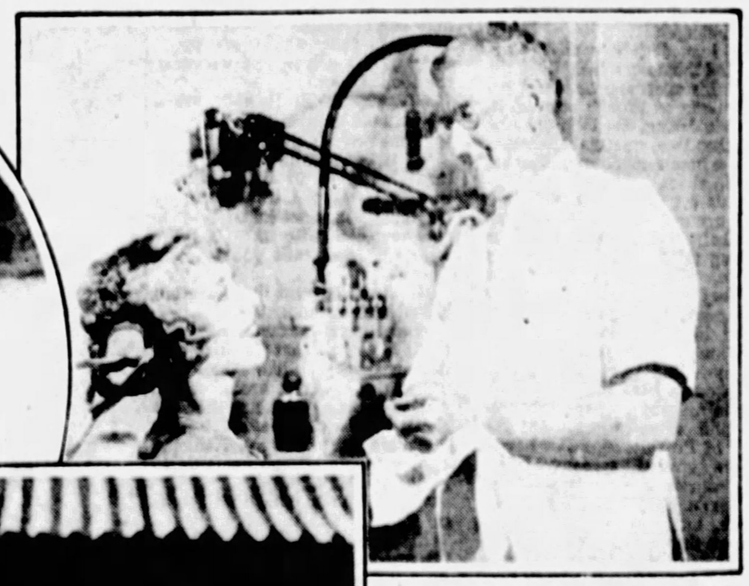
(Above) BOWLING TO REDUCE is both entertaining and effective, says Miss Helen Byrne, New York beauty specialist. Here are four more smiles whose brilliance is largely due to Pepsodent.

(Above) A NEW ICE STAR is Mary Percola, who is fancy skating champion of Michigan, and is, at present, appearing before society in several cities at private exhibitions. Pepsodent keeps her smile charmingly bright.



(Above) REMOVING FILM EACH DAY does in a small way what your dentist does by cleaning teeth. Thus Anne Pomeroy is urged by her doctor to use Pepsodent, the special film-removing dentifrice.

Remove Dingy Film on Teeth to Make Them Whiter

You merely think your teeth are dull, "off color." The new dental way amazes—it combats serious tooth and gum disorders, too

YOU will never know how gleaming white teeth can be, nor how healthy, until you have removed the film that clouds them. Ordinary brushing fails to remove film successfully. You must remove it scientifically according to dental opinion.

For this purpose specially, a new and different dentifrice is being advised by dentists, called Pepsodent. What it does to make teeth beautiful and keep them healthier seems almost magical.

Film is that slippery, granular coating that forms on teeth. Run your tongue across your teeth and you will feel it.

It clings to teeth, gets into crevices and stays. It absorbs the stains from food and smoking and gives that dull, tarnished look.

Germs by the millions breed in film. It fosters bacteria of decay and serious tooth and gum disorders.

Film is the basis of tartar. And tartar plus germs is an established cause of pyorrhea.

Pepsodent, through the most recent findings of dental chemistry and dental practice, acts in a new and different manner. It first curdles the film and then removes it in gentle safety to enamel.

It acts further to firm the gums. The alkalinity of saliva is multiplied to combat the acids of decay. It cleanses hygienically in a way nothing else does.

Millions have discovered it on dentists' advice. Millions use it because they know it keeps teeth whiter, brighter and healthier than they thought was possible. Get it at your druggist's. Or send coupon for 10-day tube and note the difference in your smile.

Send for 10-day Free Tube

SMILES ARE DAZZLING WHITE when film is gone. Teeth sparkle like polished jewels. Gums firm to healthy coral tint. Thus this new scientific way of dental care becomes one of the greatest beauty treatments of the day, and, with its unique therapeutic and prophylactic qualities, a great aid in oral hygiene

PEPSODENT
The Quality Dentifrice—Removes Film from Teeth

# Don't Let Your Baby Suffer at Teething Time

By *Anna Lane*

SO many mothers write me that they have "tried everything" to help their suffering little ones during the troublesome teething period, that I am glad to be able to recommend a lotion which will really bring immediate relief.

Some years ago the noted baby specialist, Dr. D. B. Hand, developed a prescription for the teething babies whom he treated in his extensive private practice. Later this lotion was made available to mothers generally through all drug stores.

I know many families where it has been used for three generations and have in my files thousands of letters explaining how it gave immediate relief even in most severe cases of inflamed, swollen, aching gums.

Just rub Dr. Hand's Teething Lotion on baby's gums—you will find it entirely harmless—no narcotics or other harmful drugs—only natural healing, cooling fluids.

**DR. HAND'S Teething Lotion**

I have a letter from Mrs. J. W. Fletcher, in which she says: "I rub the gums three to four times a day with Dr. Hand's Teething Lotion, which removes the fever and swelling in the gums, eases the pain and helps baby to rest."

If your baby is giving you trouble with cutting teeth, I am sure you will find this lotion a really marvelous relief—for both of you!

Just mail me a 2c stamp and the name of your druggist. A bottle containing enough for 6 or 8 applications will go to you by return mail. Miss Anna Lane, 433 Arch St., Dept. 14, Philadelphia, Pa.

# TOOTHACHE!

Use Dent's Toothache Gum. Not a chewing gum. Applied in cavity it—
(1) Stops toothache instantly
(2) Cleanses and protects cavity
(3) Retards further decay
(4) Destroys all odor.

Does not spill or dry up like liquids. All druggists or by mail, 25c. Made for 38 years by C. S. Dent & Co., Detroit.

**DENT'S TOOTHACHE GUM**

# What the Well-Dressed Kitchen Will Wear

*By Mrs. Christine Frederick,*
*The Distinguished Authority on Household Efficiency*

MARCH housefurnishing sales are to the fore, and wise is the provident housewife who takes advantage of them. She may need only a few pots, pans or small kitchen tools, or she may be considering an entire new Spring outfit for the kitchen. For today the kitchen is no longer the neglected dark spot of the home as it used to be. Gone are the days when a plain wood table, the kitchen stove and a few shelves with an unattractive cast-off chair was the portion of Dinah or Lizzie. No indeed, the mistress has become her own maid and chooses what her well-dressed kitchen will wear with as much thought and discrimination as she does the decorating of other rooms in the house.

Let us start with the structure and wall treatment of the kitchen. The smaller the space the better, as long as it is arranged for efficient and step-saving work. The housewife who belittles the small kitchen should remember that the dining-car kitchen serves a hundred persons every meal and that the ship's kitchen or galley is often but a few feet in space. Size is not the thing. Arrangement, spacing, and selection of the right tool for the purpose needed, is all important. Any kitchen can be made larger by the use of light tones on walls, on trim and in the fittings. There has wisely been a reaction against the all-white kitchen so popular a few years ago. It looked like an operating room, lacked all charm and was tremendously difficult to keep clean. Thus it has vanished. But tones of cream, buff, yellow, warm gray, cheerful blue and the bright apple jade or pea green are ideal for kitchen decorating. So, too, black and white, perhaps with mandarin red is smart.

Having chosen the main color plan, the housewife can follow it out in fittings from the March sales. She will find these displays a riot of color. She may find a green garbage pail, a red waffle iron, and a whole set of kitchen knives boasting cobalt blue handles. But in her eagerness to bring color into the kitchen, let me warn that she not forget that the first principle in choosing equipment should be use and practicability. "Do I need this pot or appliance?" "How often will it be used in my family?" "Is it well designed?" "What is its shape from the point of view of comfort in use, amount of fuel used, ease in washing, and space on the pantry shelf when laid away?"

Too many kitchens are crowded with little novelties which are seldom used. On the other hand, many housewives hesitate before buying an appliance which would save them steps, labor or time every day in the week. The really basic question when buying is number of times of use—in short, "the investment point of view," which men have when they outfit their factories or plants. For example, a woman may be delighted with a "cute" cherry seeder which costs only a dollar. She may delightedly take it home. The same day she may have refused to pay ten dollars for a wheel-tray on which she could load all the dishes of a meal and carry the soiled ones back again to the kitchen. Which cost the most, cherry seeder or the tray? She may use the seeder 5 or 10 times during the cherry season, while the tray would be used 1,095 times in one year.

Pots and pans were never so beautiful or intriguing. But still they should be bought on a basis of size, shape and use as well as color. Overly large pots are heavy to lift and take up too much space. Pots that are too small "cockle" in the burner, tilt and spill. Pots with small bottoms waste fuel because they do not offer a large enough surface to the flame. Unless handles are smooth and put on at the right angle for easy lifting, they cause fatigue during work. If a pot is intended for heating up a little milk, making cocoa or warming beans, it should be bought in small size just for this purpose, and not a large pot which is more difficult and useless to wash. The really good cook never has too many tools! But those he or she does use are chosen for quality and 100 per cent efficient performance.

In considering what the well-dressed kitchen will wear, divide the kitchen into different groups. Thus, there is the preparing group consisting of cabinet (or table) with every beater, colander, masher, bowl which could be used in preparing. Ask yourself, are these of the best shape and type for the purpose intended? Have I too many, not enough, or not the right ones? Seek the answer in wise selection in the March sales.

Move on to the cooking group. Look at it. It consists of the range, whether gas, electric, or any other cooking device or appliance. It includes also the skillets, roasters, casseroles, broilers, every piece with which actual cooking is performed. Here again, is your kitchen a 1928 model, or is it still harboring pans that are Victorian in weight, material, shape or other point of view? In short, bring your kitchen cooking up to date. This may involve buying a waterless cooker, a fireless, pressure or similar cooking unit. It may urge you to seek a new and better type insulated range. It may force you to select a skillet which does not go up in the middle and down on the side so that food is burned or scorched. Size up every item and discard all those which do not do the work in the best manner.

# Appetizing Menus for the Week

| MONDAY | TUESDAY | WEDNESDAY | THURSDAY | FRIDAY | SATURDAY | SUNDAY |
|---|---|---|---|---|---|---|
| *Breakfast* Oatmeal with Raisins, Toast, Coffee. | *Breakfast* Fruit Juice, Codfish Cakes, Toasted Rolls, Coffee. | *Breakfast* Prunes with Lemon, Poached Eggs on Buttered Toast, Coffee. | *Breakfast* Stewed Dried Fruit, Scrambled Shad Roe and Eggs, Muffins, Coffee. | *Breakfast* Whole Wheat Cereal, Top Milk, Broiled Bacon, Corn Oysters, Toasted Left-over Muffins, Coffee. | *Breakfast* Canned Tomato Juice, Corned Beef Hash, Rolls, Coffee. | *Breakfast* Fruit, French Omelet, Muffins, Coffee. |
| *Luncheon* Potato and Liver Pie, Lettuce Salad, Jelly Jumbles, Tea. | *Luncheon* Stewed Dried Lima Beans, Cabbage and Green Pepper Salad, Apple Butter, Tea. | *Luncheon* Mexican Corn Pudding, Tomato Jelly Salad, French Dressing, Fruit Turnovers. | *Luncheon* Deviled Leeks on Toast, Deep Apple Pie with Hard Sauce. | *Luncheon* Oyster Stew, Crackers, Pickles, Apricot Trifle, Half Cups Coffee. | *Luncheon* Baked Beans, Raisin Brown Bread, Apple Snow with Finely Chopped Pistachio Nuts. | *Dinner* Beef Loaf, Brown Mushroom Sauce, String Beans with Okra and Tomatoes, Rhubarb and Banana Whip, One-Egg Cake. |

# Old Recipes That Have Never Failed

*By Mary Lee Swann,*
*The Well-Known Writer and Lecturer on Cooking.*

**Apples for Parties.**

PARE and core apples. Place in baking dish. Sprinkle generously with sugar and put 2 or 3 tiny red cinnamon or spice candies in each apple and add a little water. Bake in a hot oven until nearly transparent.

**Waldorf Salad.**

MIX lightly 1 cup sliced apples, 1 cup diced celery, 1 tablespoon lemon juice and ½ teaspoon salt. Add ½ cup broken nut meats and 1 cup mayonnaise and mix well, using a fork so that the apple slices will not be crushed. Serve on crisp lettuce.

**Wafers.**

SIFT 1 pint flour with 1 teaspoon salt. Work in 2½ tablespoons lard and add ice water to make a stiff dough. Roll very thin. Cut out with biscuit cutter and prick with a fork. Bake until delicately colored.

**Tasty Dessert.**

FOR a change in dessert, cut up oranges, bananas and pineapple (and a little apple if desired). Cover with sugar. A little water may be added if there is not enough juice. Serve in sherbet glasses, together with any fancy cake.

# This purifying toilet soap guards family health

## Removes *germs* from hands as well as dirt

AS A CAREFUL MOTHER—what better way to guard your loved ones against disease—than to warn them against germ-laden hands?

Your children may think you're too fussy about clean hands. But you'll find they can be made to realize the importance of removing germs from hands frequently—especially before eating—if the dangers are really explained.

### *A simple health precaution*

Tell youngsters why our hands can't avoid picking up germs along with dirt. Show them how many times a day our hands *must* touch things where germs may hide—books, toys, door-knobs, money, telephones. Much-handled, unavoidable things that may leave germs on our hands—to be passed into the mouth.

Name for your family some of the 27 germ diseases, listed above, that the Life Extension Institute says hands may spread.

And above all else, for greater safety, just see that *everyone* in your home always uses this delightful, purifying toilet soap that millions enjoy—Lifebuoy. Its bland and abundant antiseptic lather removes *germs* as well as dirt.

### *Millions enjoy its clean scent*

Children, men and women too, quickly learn to love Lifebuoy's pleasant *clean* scent—which tells you Lifebuoy purifies—yet which quickly evaporates after rinsing.

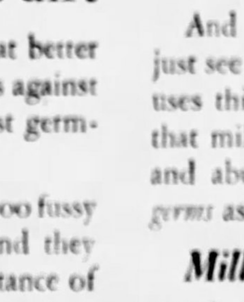
And the same gentle, antiseptic Lifebuoy lather that guards health by removing germs—keeps skins fresh and clear by purifying pores. Prevents embarrassing body odor, too.

Use Lifebuoy a week and you'll use it for life. Get some today.

LEVER BROS. CO., *Cambridge, Mass.*

**LIFEBUOY**

FOR · FACE · HANDS · BATH ·



PROTECTS HEALTH — STOPS BODY ODOR

# American Weekly Patterns

A STYLISH MODEL FOR YOUTHFUL FIGURES (6083). The pattern is cut in 3 sizes: 16, 18 and 20 years. An 18-year size, if made as illustrated, will require 1¼ yards of 32-inch lining or other material for the underbody and 3½ yards of 39-inch material for the dress.

AN ATTRACTIVE GOWN (6079). The pattern is cut in 6 sizes: 34, 36, 38, 40, 42 and 44 inches bust measure. To make the dress as illustrated for a 38-inch size will require 1 yard of 32-inch lining for the underbody and 4⅛ yards of 35-inch material, together with ½ yard of contrasting material.

A PRACTICAL MORNING FROCK FOR WOMEN OF MATURE FIGURE (6087). The pattern is cut in 9 sizes: 38, 40, 42, 44, 46, 48, 50, 52 and 54 inches bust measure. A 42-inch size will require 4⅜ yards of 36-inch material together with ⅝ yard of contrasting material.

A PRETTY FROCK FOR A LITTLE MISS (6090). The pattern is cut in 4 sizes: 4, 6, 8 and 10 years. A 6-year size will require 2 yards of 36-inch material, together with ⅛ yard of contrasting material for facing on the belt and 1½ yards of narrow bias binding put on as illustrated.

# To prove it...

## *Here's David and Vivian and Gertrude and Chris*

David Richardson of Fresno, California, was recently crowned king of the babies of his home town! Four leading physicians examined all contestants in a baby contest and pronounced David "the most perfect." His mother writes to tell us this with pride—and to say that David has been "a constant and exclusive user of Eagle Brand since he was two months old."

Vivian is the daughter of a registered nurse—Mrs. E. Brashear, 1201 South Walker St., Oklahoma City, Oklahoma. Vivian was put on Eagle Brand at nine days of age, and kept on this milk throughout the entire feeding period. Her mother writes: "Vivian is now eleven years old. The school physician says she is exceptionally healthy. Our dentist says her teeth and mouth formation are as near perfect as he has ever seen."

Here's another prize winner—Gertrude Newell, 72 Oakland Ave., Jersey City, N. J. At one year old she was the proud possessor of two 100% health certificates, a medal and a loving cup. Not to mention sixteen teeth! The photograph shows her at the age of two. Mrs. Newell writes: "My doctor told me to put Gertrude on Eagle Brand when she was six weeks old. She has never been sick a day since."

Chris Kitchler lives at 2324 Florence St., Victoria, Canada. The doctor prescribed Eagle Brand for Chris when he was two weeks old. His very proud father writes: "If you had seen that baby go for that milk it would have done your heart good. We kept him on it until he was old enough to go on solid food." As for Chris's health, his father says: "The picture speaks for itself!"

THE millions of sturdy children who have been raised on Eagle Brand furnish overwhelming proof of its value as an infant food. It is pure, fresh, whole cow's milk, modified by the addition of refined sugar and condensed by the removal of most of the water. The sugar furnishes the carbohydrates required by all infants. The milk supplies bone and tissue-building materials and growth-promoting vitamins. And in case of digestion Eagle Brand can only be compared to mother's milk!

If you cannot nurse your baby, we suggest that you and your physician consider this food. It is always pure and uniform. Safe for traveling or for use in hot climates. Send for free booklets, containing practical feeding information and suggestions for the supplementary foods—orange or tomato juice, cereals, cod liver oil, etc.,—now generally advised by physicians. Just mail the coupon!

# Why—"not a cough in a carload"

*Possibly you think that "not a cough in a carload" . . . is just an advertising phrase . . . Wrong! It is more than a slogan . . . it's a fact! For these reasons:*

[1] *The finest tobaccos that grow* [2] Only the "heart-leaves" from the heart of the tobacco plant [3] Selected for their silkiness and ripeness to insure that *honey-like smoothness* [4] Extra long mellowing and ageing in a temperature of mid-July sunshine [5] All tobacco, pure tobacco, *the finest tobaccos that grow*

# OLD GOLD

SMOOTHER . . . *BETTER* . . . NOT A COUGH IN A CARLOAD
